**April-June 1975**

Volume 40—Numbers 63-126

Pages 14565-27635

This INDEX is a consolidation of contents entries appearing in the April-June issues of the FEDERAL REGISTER. It is published monthly, quarterly, and annually.

A GENERAL INDEX to the entire Code of Federal Regulations is available as of July 1, 1974.

Numerical Finding Aids. CUMULATIVE LIST OF CFR SECTIONS AFFECTED is published monthly and is cumulated each month, keyed to the revision dates of the various CFR volumes. A List of CFR Parts Affected by entries in this INDEX appears at the end of this INDEX, together with a table of FEDERAL REGISTER pages and dates.

All FEDERAL REGISTER publications are available for purchase from the Superintendent of Documents, U.S. Government Printing Office, Wash. D.C. 20402.

Users and subscribers are invited to send their comments and suggestions to the Director, Office of the Federal Register, National Archives and Records Service, Wash. D.C. 20408.

## FEDERAL PREVALING RATE ADVISORY COMMITTEE

## Notices

## Meetings

## FEDERAL RAILROAD ADMINISTRATION

## Rules

Freight care safety standards; "bad order" and "home shop for repairs"	17573
Occupational safety and health standards; extension of time.	16217
Protection of railroad maintenance - of - way - and - structure employees.	17265, 23310
Safety appliance standards; box and other house cars; correction	17853

Signal systems, commuter railroads and rapid transit lines; standards.	19209, 23085, 24365
Special notices and emergency order procedures; railroad track, locomotives and equipment; hearing	25688
State participation; certification, investigation, etc.	27042

## Notices

## Meeting: Railroad Operating Rules Advisory Committee.

## Petitions for exemptions, etc.:

Algers, Winslow & Western Railway Co.	24375
Duluth, Missabe & Iron Railroad Co. et al.	16233
Green Mountain Railroad Corp.	15929
Johnstown & Stony Creek Railroad Co.	15929
Mount Hood Railway Co.	15929
Norfolk & Western Railway Co.	20337
Oregon & Northwestern Railroad Co.	15929
St. Johnsbury & Lamolille County Railroad.	23102
United Transportation Union.	14626
Yakima Valley Transportation Co.	15929
Sleeping quarters for railroad employees, noise levels; extension of time.	14627

## FEDERAL REGISTER OFFICE

## Rules

CFR checklist; 1975 issuances.	14569, 18977/23717
--------------------------------	--------------------

## Proposed Rules

Agency publication on assigned days of week; inquiry.	26046
---	-------

## Notices

Acts requiring publication in Federal Register; table.	18845
Freedom of information index requirements.	
Quarterly guide to agency material.	16726
Republication of format.	24784
Inflation impact statements; certification language and form.	26312
Privacy Act publication guidelines.	25988
Procurement, armed services; incorporation by reference; inquiry	25643

## FEDERAL RESERVE SYSTEM

## Rules

Authority delegations: Board of Governors and Federal Reserve Banks.	25581
Banks, foreign activities: Interpretation of foreign bank. Reserves against eurodollar borrowings.	18412, 17136
Banks, State; loans in flood-prone areas.	21931
Credit extensions by Federal Reserve banks; rate changes.	23842, 27476
Interest on deposits: Maturity; time and savings deposits.	24894

NOW accounts for governmental units.	17831
Penalty on withdrawal.	24894
Telephone, withdrawal of savings by.	16831
Securities credit transactions.	19653
Truth in lending; real estate settlement procedures.	21470

## Proposed Rules

Banks; reserves and interest on deposits.	25031
Banks, State, securities of.	15909, 25031
Credit by brokers and dealers.	23768
Discrimination prohibited on basis of sex or marital status; consumer credit protection.	18183, 20827
Interest on deposits; maturity notice, penalties, withdrawals.	16684, 16685

## FOOD AND DRUG ADMINISTRATION

Rules	Page
Administrative practices and procedures, enforcement, authority delegations, etc.	22950, 26027
Animal drug applications, sponsor; name change	18993, 22543, 25448
Animal drugs, feeds, and related products:	
Bambermycins, amprolium, ethopabate, roxarsone	22131
Chloramphenicol tablets	26273
2 - Chloro - 1 - (2,4,5-trichlorophenyl) vinyl dimethyl phosphate	21028
Dexamethasone tablets	26273
Doxapram hydrochloride injection	17838
Methanearsonic acid	22132
Methoprene	23071, 26027
Phenylbutazone injections, tablets, or boluses	18994, 23847, 25812
Prednisolone sodium phosphate	18549
Ronnel	24721
Sodium thiamylal for injection	25812
Sterile ampicillin trihydrate suspension; penicillin antibiotic drug	24360
Thiabendazole-trichlorfon	23071
Tylosin	18168, 20270, 20271, 20617, 23070, 25812
Biological products:	
Rubella virus vaccine, live; test for safety	25813
Color additives:	
Aluminum hydroxide et al.	15087
D & C Green No. 6 for surgical sutures	18167
FD&C Red No. 40; effective date	15087
Cosmetic products; warning statements, packaging labels	16192, 18426, 23458, 23998, 24442, 25585, 26675
Environmental impact considerations	16662
Food additives:	
Adhesives	21924, 26267, 26268
Cacao products and confectionery	24162
Castor oil, polyoxyethylated; in manufacture of paper and paperboard	22251
2,4-Dichlorophenoxyacetic acid in potable water	26675
Dimethyl phosphate of 3-hydroxy-N-methyl-CIS-crotonamide; pesticide tolerances	18167
Filters, microporous polymeric	25811
Lubricants with incidental food contact	26268
2 - (1 - Methylthoxy) phenol methylcarbamate	20793
Paper and paperboard components	25205
Plasticizers in polymeric substances	23996
Polyester elastomers	26269
Polyhydric alcohol esters of long chain monobasic acids	14905
Propargite	17142
Propylene glycol azelate	14905
Resinous and polymeric coatings	23997, 25205, 26269
Salt; electrolytic diaphragm process; stay of effective date	26674
Simazine	14592
Slimeicides	14905
Food identity standards, etc.:	
Cheeses and cheese related foods; cottage cheese	22250
French dressing	18425
Market testing, temporary permits for	21721
Milk and cream	18549
Salmon, Pacific, canned	22540, 26267
Seafood cocktail and frozen dinners; common or usual names; stay of effective date	26267
Sirups, table	21723
Soda water; nonalcoholic beverages	26266
Soft drinks in bottles; exemptions	26262
Water, bottled	21932, 23725
Food labeling; foreign language requirements	23996
Human drugs:	
Antacid and antifatulent products; over-the-counter drugs	22542
Antibiotic and antibiotic containing drugs, tests and methods of assay	22251
Candididin	15089
Cephapirin sodium	23725
Cephadrine	26270
Clinical research standards; acceptance of foreign data	16053, 18993, 15088, 14906
Methicillin; pyrogens test	15088
Neomycin vaginal suppositories	14906
Oligosaccharide and peptide antibiotic drugs	22252
Zinc bacitracin	15088, 19194
Radiological health; microwave ovens; performance standards	14750, 16663
Reorganization and recodification; correction	26027, 26508
Sunlamps and medical ultraviolet lamps; record and report requirements; extension of date for submission of reports	26052
Tea standards	26508
Turtles, ban on sale; communicable disease control	22543

## Proposed Rules

Administrative review of decisions; effective indications for drugs; withdrawal	22841
Biological products:	
Sterility testing; Alternative Thioglycollate Medium; deletion	18176
Vaccines, smallpox and measles; testing for potency and safety; correction	17151
Cosmetic products; zirconium in aerosol drugs and cosmetics	24328, 25218
Food additives:	
Salt; electrolytic diaphragm process; proposed revocation	26683
Food identity standards, etc.:	
Cherries, canned	26276
Dietary food, special	23244
Frozen desserts and dairy products; exemption from label requirements	26682
Lemonade and colored lemonade, frozen concentrate	16085
Sweeteners, nutritive; glucose sirup and dried glucose sirup	21736

	Page
Human drugs:	
Antacid products; over-the-counter drugs; testing procedures	22553
Bioavailability and bioequivalence requirements	26157, 26164

## Cumulative List of CFR Sections Affected

MAY 1975

### CONTAINING:

#### TITLES 1-16

Changes January 2, 1975  
through May 30, 1975

#### TITLES 17-27

Changes April 1, 1975  
through May 30, 1975

#### TITLES 28-41

Changes July 1, 1974  
through May 30, 1975

#### TITLES 42-50

Changes October 1, 1974  
through May 30, 1975

PARALLEL TABLE OF U.S.C.-C.F.R.

UMI

## CUMULATIVE LIST OF CFR SECTIONS AFFECTED

### WHAT IT IS

The Cumulative List of CFR Sections Affected is designed to lead users of the Code of Federal Regulations to amendatory actions published in the Federal Register. It should be shelved with current Code volumes. Entries indicate the nature of the changes. Certain terms used are defined in the glossary below. Proposed rules are listed at the end of appropriate titles, except for Title 41, where proposed rules follow each chapter.

### HOW TO USE THIS FINDING AID

The Code of Federal Regulations may be brought up to immediate date by the following steps:

1. Consult this Cumulative List of CFR Sections Affected for any changes, deletions, or additions published after the revision date of the volume you are using.
2. Check the "Cumulative List of Parts Affected" appearing at the front of the latest issue of the Federal Register for changes published after the last date covered by this issue of the Cumulative List of CFR Sections Affected.
3. If you do not have the latest edition of the Code of Federal Regulations, use the previous edition, and bring it up to date as follows:

Volumes Having Revision Date:	Refer to List of Sections Affected:
January 1, 1975 (Titles 1-16)	December 1974
April 1, 1975 (Titles 17-27)	March 1975
July 1, 1974 (Titles 28-41)	June 1974
October 1, 1974 (Titles 42-50)	September 1974

After checking Cumulative List of CFR Sections Affected as indicated, follow steps 1 and 2 above.

For an explanation of the structure and numbering of the Code, see 1 CFR Part 21.

### GLOSSARY

**Amended**—A typographical unit of the CFR was partially set forth.

**Recodified**—Major portions of CFR were restructured or rearranged, or both.

**Redesignated**—A typographical unit or larger was renumbered and transferred from one place to another place in the CFR with no change in text.

**Removed**—A typographical unit was removed from the CFR.

**Revised**—A typographical unit of the CFR was set forth in full.

**Superseded**—An existing CFR unit was replaced by regulations appearing under another CFR unit.

**Suspended**—The entire CFR unit was not in effect for the period of time indicated.

**Suspended in part**—A portion of the CFR unit was not in effect for the period of time indicated.

**Technical amendment**—General amendment that may have no substantive effect on regulations.

### PARALLEL TABLE OF STATUTORY AUTHORITIES AND RULES

A table is included after Title 50. It contains references to the U.S. Code sections cited as authority for regulations added during the calendar year.

### TABLE OF FEDERAL REGISTER ISSUE PAGES AND DATES

A finding aid is included at the end of this issue which identifies the inclusive page numbers in each Federal Register cited in this Cumulative List of CFR Sections Affected.

### INDEXES

An index to the daily Federal Register is published monthly, quarterly, and annually for the calendar year.

A General Index to the entire Code of Federal Regulations is available as of July 1, 1974.

### INQUIRIES AND SUGGESTIONS

Inquiries concerning this and other publications of the office and suggestions for improvements will be welcomed by the Director, Office of the Federal Register, National Archives and Records Service, Washington, D.C. 20408.

## PARALLEL TABLE OF STATUTORY AUTHORITIES AND RULES

(Additions to CFR Finding Aids Volume, Table 1; January—May 1975)

This table lists the sections of the U.S. Code which were added to the CFR Finding Aids Volume, Table 1 as a result of new citations of authority carried in the *Federal Register* from January through May 1975. Recent legislation not yet assigned within the U.S. Code is carried by public law number at the end of the list.

In order to determine the *Federal Register* page numbers of the parallel CFR citations, users should consult the List of CFR Sections Affected, above.

federal register

Area Code 202 Phone 523-5240

Published daily, Monday through Friday (no publication on Saturdays, Sundays, or on official Federal holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C., Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The FEDERAL REGISTER provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest.

The FEDERAL REGISTER will be furnished by mail to subscribers, free of postage, for \$5.00 per month or \$45 per year, payable in advance. The charge for individual copies is 75 cents for each issue, or 75 cents for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the FEDERAL REGISTER.

FEDERAL REGISTER, VOL. 40, NO. 96—FRIDAY, MAY 16, 1975

## rules and regulations

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510. The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

### Title 7—Agriculture

#### CHAPTER I—AGRICULTURAL MARKETING SERVICE (STANDARDS, INSPECTIONS, MARKETING PRACTICES), DEPARTMENT OF AGRICULTURE

##### PART 68—REGULATIONS AND STANDARDS FOR INSPECTION AND CERTIFICATION OF CERTAIN AGRICULTURAL COMMODITIES AND PRODUCTS THEREOF

###### Standards for Rough Rice; Correction

The U.S. Standards for Rough Rice (7 CFR 68.201 et seq.) were revised and published as final rulemaking in the FEDERAL REGISTER of Thursday, March 6, 1975.

The following errors were found:

1. On page 10473, § 68.202(c) (2), lines 6 and 7 read "... of long- or short-grain rice" and should be changed to read "... of long-grain rice or whole kernels of short-grain rice."
2. On page 10473, § 68.202(c) (3), lines 6 and 7 read "... of long- or medium-grain rice" and should be changed to read "... of long-grain rice or whole kernels of medium-grain rice."
3. On page 10474, third column, in the paragraph entitled "Certification," the wording reads "For a period of 6 months after July 1, 1975, ..." and should be changed to read "For a period of 6 months after June 1, 1975, ..." The correction was necessary so that the 6-month interval coincides with the effective date of June 1, 1975 for the new rough rice standards.

Done at Washington, D.C., on: May 12, 1975.

E. L. PETERSON,  
Administrator,  
Agricultural Marketing Service.

[FR Doc.75-12911 Filed 5-15-75;8:45 am]

##### PART 68—REGULATIONS AND STANDARDS FOR INSPECTION AND CERTIFICATION OF CERTAIN AGRICULTURAL COMMODITIES AND PRODUCTS THEREOF

###### Standards for Whole Dry Peas; Correction

The U.S. standards for whole dry peas (7 CFR 68.401 et seq.) were revised (39 FR 18633—May 29, 1974), effective July 1, 1974, after public rulemaking proceedings according to the administrative procedure provisions of section 553 of Title 5, United States Code.

An error was found in footnote 4 to the table in § 68.406. Footnote 4 reads in part, "... through the appropriate oblong-hole sieve as follows:" The part should read "... through the appropriate oblong-hole or slotted-hole sieve as follows:"

Therefore, pursuant to sections 203 and 205 of the Agricultural Marketing Act of 1946, 60 Stat. 1087 and 1090, as amended (7 U.S.C. 1622 and 1624) footnote 4 in § 68.406 of the U.S. standards for whole dry peas is amended to substitute the last quoted phrase for the first quoted phrase. This amendment is made solely to correct the sieve description since both oblong-hole sieves and slotted-hole sieves are used in the inspection of whole dry peas and can be expected to give equivalent results.

It does not appear that public participation in rulemaking would make additional relevant information available to the Department on this matter. Also, this amendment should become effective as soon as possible so as to conform to present procedures. Accordingly, under the administrative procedure provisions of section 553 of Title 5, United States Code, it is found upon good cause that further notice and public participation in rulemaking procedures with respect to the amendment are impracticable and contrary to the public interest, and good cause is found for making it effective May 16, 1975.

Done at Washington, D.C., on: May 12, 1975.

E. L. PETERSON,  
Administrator,  
Agricultural Marketing Service.

[FR Doc.75-12910 Filed 5-15-75;8:45 am]

#### CHAPTER IX—AGRICULTURAL MARKETING SERVICE (MARKETING AGREEMENTS AND ORDERS; FRUITS, VEGETABLES, NUTS), DEPARTMENT OF AGRICULTURE

[Grapefruit Reg. 75, Amdt. 8; Export Reg. 24, Amdt. 8]

##### PART 905—ORANGES, GRAPEFRUIT, TANGERINES, AND TANGELOS GROWN IN FLORIDA

###### Amendment of Grade Regulations

These amendments lower the minimum grade requirements applicable to domestic and export shipments of Florida white seedless grapefruit and white and pink seeded grapefruit to U.S. No. 2 Russet on May 19, 1975. The specification of such lower minimum grade requirement recognizes the lesser quality of such grapefruit estimated to be remaining for fresh shipment from the production area.

**Findings.** (1) Pursuant to the marketing agreement, as amended, and Order No. 905, as amended (7 CFR Part 905), regulating the handling of oranges, grapefruit, tangerines, and tangelos grown in Florida, effective under the applicable provisions of the Agricul-

tural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601-674) and upon other available information, including an informal poll of the members of the Growers Administrative Committee, it is hereby found that the minimum grade requirements applicable to seedless and seeded grapefruit, as hereinafter provided, will tend to effectuate the declared policy of the act.

(2) These amendments reflect the Department's appraisal of the current and prospective demand for white seedless grapefruit and white and pink seeded grapefruit by domestic and export market outlets. The lower minimum grade requirement specified for domestic and export shipments of white seedless grapefruit and white and pink seeded grapefruit is consistent with the external appearance and remaining supply of such grapefruit. Fresh shipments of Florida grapefruit for the season through May 4, 1975, totaled 25,861 carlots, and there were an estimated 2,639 carlots remaining for shipment.

(3) It is hereby further found that it is impracticable, unnecessary, and contrary to the public interest to give preliminary notice, engage in public rulemaking procedure, and postpone the effective date of these amendments until 30 days after publication thereof in the FEDERAL REGISTER (5 U.S.C. 553) in that the time intervening between the date when information upon which these amendments are based became available and the time when these amendments must become effective in order to effectuate the declared policy of the act is insufficient; and these amendments lower requirements applicable to the handling of white seedless grapefruit and white and pink seeded grapefruit grown in Florida.

**Order.** 1. In § 905.556 (Grapefruit Regulation 75; 39 FR 32976, 37186, 40745, 42899; 40 FR 8321, 11345, 14889, 20061) the provisions of paragraph (b) (1) and (b) (3) are amended to read as follows:

§ 905.556 Grapefruit Regulation 75.

(b) . . . .  
(1) Any seeded grapefruit, grown in the production area, which do not grade at least U.S. No. 2 Russet;

(3) Any seedless grapefruit, grown in the production area, which do not grade at least U.S. No. 2 Russet; or.

2. In § 905.559 (Export Regulation 24; 39 FR 32976; 37186; 40 FR 2792, 11345, 12646, 14889, 16210, 20061) the provisions of paragraph (b) (11) and (b) (13) are amended to read as follows:

**§ 905.559 Export Regulation 24.**

(b) . . . . .  
(11) Any seeded grapefruit, grown in the production area, which do not grade at least U.S. No. 2 Russet;

(13) Any seedless grapefruit, grown in the production area, which do not grade at least U.S. No. 2 Russet;

(Secs. 1-19, 48 Stat. 31, as amended; (7 U.S.C. 601-674))

Dated, May 13, 1975, to become effective May 19, 1975.

CHARLES R. BRADER,  
Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service.

[FR Doc.75-12913 Filed 5-15-75;8:45 am]

[Valencia Orange Reg. 498]

**PART 908—VALENCIA ORANGES GROWN IN ARIZONA AND DESIGNATED PART OF CALIFORNIA****Limitation of Handling**

This regulation fixes the quantity of California-Arizona Valencia oranges that may be shipped to fresh market during the weekly regulation period May 16-22, 1975. It is issued pursuant to the Agricultural Marketing Agreement Act of 1937, as amended, and Marketing Order No. 908. The quantity of Valencia oranges so fixed was arrived at after consideration of the total available supply of Valencia oranges, the quantity of Valencia oranges currently available for market, the fresh market demand for Valencia oranges, Valencia orange prices, and the relationship of season average returns to the parity price for Valencia oranges.

**§ 908.798 Valencia Orange Regulation 498.**

(a) Findings. (1) Pursuant to the marketing agreement, as amended, and Order No. 908, as amended (7 CFR Part 908), regulating the handling of Valencia oranges grown in Arizona and designated part of California, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601-674), and upon the basis of the recommendations and information submitted by the Valencia Orange Administrative Committee, established under the said amended marketing agreement and order, and upon other available information, it is hereby found that the limitation of handling of such Valencia oranges, as hereinafter provided, will tend to effectuate the declared policy of the act.

(2) The need for this regulation to limit the respective quantities of Valencia oranges that may be marketed from District 1, District 2, and District 3 during the ensuing week stems from the production and marketing situation confronting the Valencia orange industry.

(i) The committee has submitted its recommendation with respect to the quantities of Valencia oranges that should be marketed during the next suc-

**RULES AND REGULATIONS**

ceeding week. Such recommendation, designed to provide equity of marketing opportunity to handlers in all districts, resulted from consideration of the factors enumerated in the order. The committee further reports that the fresh market demand for Valencia oranges continues to be generally stronger. Prices f.o.b. averaged \$3.35 per carton on a reported sales volume of 483,000 cartons last week, compared with an average f.o.b. price of \$3.20 per carton and sales of 370,000 cartons a week earlier. Track and rolling supplies at 344 cars were up 120 cars from last week.

(ii) Having considered the recommendation and information submitted by the committee, and other available information, the Secretary finds that the respective quantities of Valencia oranges which may be handled should be fixed as hereinafter set forth.

(3) It is hereby further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rule-making procedure, and postpone the effective date of this regulation until 30 days after publication hereof in the FEDERAL REGISTER (5 U.S.C. 553) because the time intervening between the date when information upon which this regulation is based became available and the time when this regulation must become effective in order to effectuate the declared policy of the act is insufficient, and a reasonable time is permitted, under the circumstances, for preparation for such effective time; and good cause exists for making the provisions hereof effective as hereinafter set forth. The committee held an open meeting during the current week, after giving due notice thereof, to consider supply and market conditions for Valencia oranges and the need for regulation; interested persons were afforded an opportunity to submit information and views at this meeting; the recommendation and supporting information for regulation during the period specified herein were promptly submitted to the Department after such meeting was held; the provisions of this regulation, including its effective time, are identical with the aforesaid recommendation of the committee, and information concerning such provisions and effective time has been disseminated among handlers of such Valencia oranges; it is necessary, in order to effectuate the declared policy of the act, to make this regulation effective during the period herein specified; and compliance with this regulation will not require any special preparation on the part of persons subject hereto which cannot be completed on or before the effective date hereof. Such committee meeting was held on May 13, 1975.

(b) Order. (1) The respective quantities of Valencia oranges grown in Arizona and designated part of California which may be handled during the period May 16, 1975, through May 22, 1975, are hereby fixed as follows:

- (i) District 1: 230,000 cartons;
- (ii) District 2: 382,000 cartons;
- (iii) District 3: 238,000 cartons.

(2) As used in this section, "handled", "District 1", "District 2", "District 3",

and "carton" have the same meaning as when used in said amended marketing agreement and order.

(Secs. 1-19, 48 Stat. 31, as amended; 7 U.S.C. 601-674)

Dated: May 14, 1975.

CHARLES R. BRADER,  
Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service.

[FR Doc.75-13034 Filed 5-15-75;8:45 am]

[Grapefruit Reg. 15, Amdt. 6]

**PART 944—FRUITS; IMPORT REGULATIONS****Minimum Grade Requirements**

This amendment lowers the minimum grade requirements applicable to imported white seedless and white and pink seeded grapefruit to U.S. No. 2 Russet on May 19, 1975. The requirement is the same as that applicable to grapefruit produced in Florida and regulated pursuant to Marketing Order No. 905.

This amendment is consistent with section 8e of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601-674). This section requires that whenever specified commodities, including grapefruit, are regulated under a Federal marketing order, imports of that commodity must meet the same or comparable grade, size, quality, or maturity requirements as those in effect for the domestically produced commodity. This regulation fixes the same minimum grade requirement on imported white seedless and white and pink seeded grapefruit as is effective under Marketing Order No. 905, as amended (7 CFR Part 905), regulating the handling of oranges, grapefruit, tangerines, and tangelos grown in Florida.

Order. In § 944.111 (Grapefruit Regulation 15; 39 FR 33306, 37188; 40 FR 8322, 11346, 14891, 20063) the provisions of paragraph (a) are amended to read as follows:

**§ 944.111 Grapefruit Regulation 15.**

(a) . . . . .

(1) Seeded grapefruit shall grade at least U.S. No. 2 Russet and be of a size not smaller than 3 1/8 inches in diameter except that a tolerance for seeded grapefruit smaller than such minimum size shall be permitted as specified in § 51.761 of the United States Standards for Florida Grapefruit; and

(2) Seedless grapefruit shall grade at least U.S. No. 2 Russet and be of a size not smaller than 3 1/8 inches in diameter except that a tolerance for seedless grapefruit smaller than such minimum size shall be permitted as specified in § 51.761 of the United States Standards for Florida Grapefruit.

It is hereby found that it is impracticable, unnecessary, and contrary to the public interest to give preliminary notice engage in public rulemaking procedure, and postpone the effective time of this amendment beyond that hereinafter specified (5 U.S.C. 553) in that (a) the

requirements of this amended import regulation are imposed pursuant to section 8e of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601-674), which makes such regulation mandatory; (b) this amendment fixes the same requirement for imports of white seedless and white and pink seeded grapefruit as is applicable under amended Grapefruit Regulation 75 (§ 905.556) to the shipment of white seedless and white and pink seeded grapefruit grown in Florida; and (c) this amendment lowers the minimum grade requirements applicable to imported white seedless and white and pink seeded grapefruit.

(Secs. 1-19, 48 Stat. 31, as amended; (7 U.S.C. 601-674))

Dated: May 13, 1975, to become effective May 19, 1975.

CHARLES R. BRADER,  
Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service.

[FR Doc.75-12912 Filed 5-15-75;8:45 am]

[Lemon Reg. 692]

**PART 910—LEMONS GROWN IN CALIFORNIA AND ARIZONA****Limitation of Handling**

This regulation fixes the quantity of California-Arizona lemons that may be shipped to fresh market during the weekly regulation period May 18-24, 1975. It is issued pursuant to the Agricultural Marketing Agreement Act of 1937, as amended, and Marketing Order No. 910. The quantity of lemons so fixed was arrived at after consideration of the total available supply of lemons, the quantity of lemons currently available for market, the fresh market demand for lemons, lemon prices, and the relationship of season average returns to the parity price for lemons.

**§ 910.992 Lemon Regulation 692.**

(a) Findings. (1) Pursuant to the marketing agreement, as amended, and Order No. 910, as amended (7 CFR Part 910) regulating the handling of lemons grown in California and Arizona, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601-674), and upon the basis of the recommendations and information submitted by the Lemon Administrative Committee, established under the said amended marketing agreement and order, and upon other available information, it is hereby found that the limitation of handling of such lemons, as hereinafter provided, will tend to effectuate the declared policy of the act.

(2) The need for this regulation to limit the quantity of lemons that may be marketed during the ensuing week stems from the production and marketing situation confronting the lemon industry.

**RULES AND REGULATIONS**

(Secs. 1-19, 48 Stat. 31, as amended; 7 U.S.C. 601-674)

Dated: May 14, 1975.

CHARLES R. BRADER,  
Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service.

[FR Doc.75-13179 Filed 5-15-75;11:47 am]

**CHAPTER X—AGRICULTURAL MARKETING SERVICE****PART 1011—MILK IN THE APPALACHIAN MARKETING AREA****CFR Correction**

On pages 221 and 222 of the current edition of 7 CFR Parts 1000-1059 remove § 1011.51 (b) (1) and (b) (2).

**PART 1007—MILK IN THE GEORGIA MARKETING AREA****CFR Correction**

On page 199 of the current edition of 7 CFR Parts 1000-1059, transfer the list of Georgia counties now appearing under § 1007.52(a) (2) to appear under paragraph (a) (1).

**CHAPTER XIV—COMMODITY CREDIT CORPORATION, DEPARTMENT OF AGRICULTURE****SUBCHAPTER B—LOANS, PURCHASES, AND OTHER OPERATIONS**

[Amdt. 2]

**PART 1427—COTTON****Subpart—Seed Cotton Loan Program Regulations****MISCELLANEOUS CHANGES**

Notices of proposed rulemaking with respect to the continuation of the loan program for the 1975 crops of upland and extra long staple seed cotton and operating provisions to carry out the program were published in the FEDERAL REGISTER on July 17, 1974 and August 15, 1974 (39 FR 26159 and 39 FR 29375), respectively. Four responses were received. Three recommended continuing the program and one recommended that the program be discontinued. After careful consideration of the recommendations it has been determined that the program will again be offered in 1975. Therefore, the Seed Cotton Loan Program Regulations issued by Commodity Credit Corporation and published as "Subpart-Seed Cotton Loan Program Regulations" in the FEDERAL REGISTER as 38 FR 14816 and 16631, as amended, are hereby further amended to incorporate several previously announced changes in the operating provisions as follows:

1. Paragraphs (a) and (b) of § 1427.163 are amended to provide that an approved cooperative or a commercial ginning company designated by producers to obtain loans in their behalf may request and obtain disbursement of loans through a central county office. The amended paragraphs read as follows:

## RULES AND REGULATIONS

## § 1427.163 Disbursement of loans.

(a) Where to request loans. A producer or his agent shall request a loan at the local county office for the county where the cotton is stored, which will assist the producer in completing the loan documents, except that approved cooperatives and approved financially responsible commercial ginning companies designated by producers to obtain loans in their behalf may obtain loans through a central county office.

(b) Disbursement of loans. Disbursement of each loan will be made by the county office of the county in which the cotton is stored by means of drafts drawn on CCC by the county office, except that approved cooperatives or commercial ginning companies designated by producers to obtain loans in their behalf may obtain disbursement of loans at a central county office. Service charges shall be deducted from the loan proceeds. The producer or his agent shall not present the loan documents for disbursement unless the cotton is in existence and in good condition. If the cotton is not in existence and in good condition at the time of disbursement, the producer or his agent shall immediately return the draft issued in payment of the loan or, if the draft has been negotiated, shall promptly return the proceeds.

2. Paragraph (b) of § 1427.165 is changed to provide that: upland cotton must be produced on a farm which has a base acreage allotment; extra long staple cotton must be produced on a farm on which the acreage planted to such cotton does not exceed the established allotment. Paragraph (c) of § 1427.165 is changed to provide that cotton must not be produced on land owned by the Federal Government which is occupied without a lease, permit, or other right of possession. The amended paragraphs are as follows:

## § 1427.165 Eligible cotton.

(b) Upland cotton must have been produced on a farm which has a base acreage allotment by a "cooperator" as defined in section 408(b) of the Agricultural Act of 1949, as amended, who has complied with the set-aside requirements, if any, of the Upland Cotton Program as prescribed in Parts 718, 722, and 791 of this title and any amendment thereto. Extra long staple cotton must have been produced by a "cooperator" as defined in section 408(b) of the Agricultural Act of 1949, as amended, on a farm on which it has been determined that the acreage planted to such cotton does not exceed the established allotment as prescribed in Parts 718, 722, and 791 of this title and any amendments thereto.

(c) Such cotton must not have been produced on land owned by the Federal Government if such land is occupied without a lease, permit, or other right of possession.

3. Section 1427.173 is amended to provide that the loan service fee applicable to approved cooperatives or to commercial ginning companies shall be \$7.25 per loan, provided loan documents are prepared by the cooperative or gin company. The amended section reads as follows:

## § 1427.172 Loan service fee.

A producer shall pay a loan service fee of \$10 per loan, plus \$1 for each additional risk or other individual lot in storage over one, for each loan disbursed, except that in the case of loans to approved cooperatives or to producers through approved ginning companies acting in the producer's behalf, the fee shall be \$7.25 per loan if the cooperative or approved ginning company prepares the loan documents. This fee is not refundable.

4. Section 1427.174 is revised to change the restrictions governing the use of agents and to make such provisions consistent with the provisions covering warehouse-stored lint cotton loans. The revised section is retitled "Use of Agents" and reads as follows:

## § 1427.174 Use of agents.

A producer who desires to appoint an attorney-in-fact to act in his place and stead in obtaining and repaying loans may use Power of Attorney, Form ASCS-211 (referred to in this subpart as "Form 211"), except that a power of attorney on another form will be accepted if it is determined by CCC to be legally sufficient. The original or facsimile of the power of attorney or a copy certified by a notary public as a true and correct copy must be filed with the county office. An attorney-in-fact shall not make any purchase of the seed cotton redeemed from a loan or the producers' equity in such cotton for his own account or as agent for others, or sell any such cotton or equities therein to any person by whom he is employed or who has the right to control or direct his sale of the seed cotton, the equity therein, or the lint cotton produced therefrom. Any delegation of authority given in violation of this paragraph shall be without force and effect and shall not be recognized by CCC.

5. Paragraph (c) of § 1427.178 is amended to permit approved cooperatives and commercial ginning companies designated by producers to obtain loans in their behalf to remove seed cotton from storage for ginning without obtaining prior approval from the county office under certain conditions. The amended paragraph (c) reads as follows:

## § 1427.178 Settlement.

(c) Removal of loan cotton. A producer or his agent shall not remove from storage any cotton covered by a chattel mortgage until prior written approval has been received from the county committee for removal of such cotton. Any such approval shall be subject to the terms and conditions set out in the approval form. If a producer or his agent obtains such approval, he may remove such cotton from storage, sell the seed cotton,

have it ginned, and sell the lint cotton and cottonseed obtained therefrom. The ginner shall inform the county office in writing immediately after the cotton removed from storage has been ginned and furnish the county office the loan number, producer's name, and applicable gin bale numbers. If the seed cotton is removed from storage, the loan, interest, and charges thereon must be satisfied not later than (1) the date established by the county committee, (2) promptly after the producer received the class cards (and the warehouse receipts, if the cotton is delivered to a warehouse), representing such cotton, or (3) the loan maturity date, whichever is earliest. If the seed cotton or lint cotton is sold, the loan, interest, and charges must be satisfied immediately. A producer (except a cooperative) may obtain a warehouse storage loan on the lint cotton, but the loan, interest, and charges on the seed cotton must be satisfied out of the proceeds of the warehouse storage loan. An approved cooperative must repay the seed cotton loan, interest, and charges before pledging the cotton for a warehouse storage loan. If approved cooperatives and commercial ginning companies authorized by producers to obtain loans in their behalf remove seed cotton from storage prior to obtaining approval to move such cotton, such removal shall constitute conversion of such cotton unless the cooperative or commercial ginning company notifies the county office in writing the following morning by mail or otherwise that such cotton has been moved and is on the gin yard, furnishes CCC an irrevocable letter of credit if requested, and repays the loan within the time specified by the county committee. Any removal from storage shall not be deemed to constitute a release of CCC's security interest in the cotton or to release the producer or approved cooperative from liability for the loan, interest, and charges if full payment of such amount is not received by the county office.

(Secs. 4, 5, 62 Stat. 1070, as amended (15 U.S.C. 714 b and c))

Effective date. May 16, 1975.

Signed at Washington, D.C., on May 7, 1975.

KENNETH E. FRICK,  
Executive Vice President,  
Commodity Credit Corporation.

# Title 12—Banks and Banking CHAPTER II—FEDERAL RESERVE SYSTEM

## SUBCHAPTER A—BOARD OF GOVERNORS OF THE FEDERAL RESERVE SYSTEM [Reg. Z]

### PART 226—TRUTH IN LENDING Disclosures Regarding Real Estate Settlement Procedures

This interpretation is written to clarify the application of Regulation Z to the standardized form, including Truth in Lending disclosures and instructions,

## RULES AND REGULATIONS

21471

prescribed by the Department of Housing and Urban Development to meet the disclosure requirements of the Real Estate Settlement Procedures Act. For example, the standardized form is designed for the disclosure of loans and credit sales, and it should be used regardless of any differing requirements in Regulation Z.

Section 226.102 is added to read as set forth below:

#### § 226.102 Disclosures made in connection with the Real Estate Settlement Procedures Act of 1974.

(a) The Real Estate Settlement Procedures Act of 1974 (Pub. L. 93-533) requires the Department of Housing and Urban Development to prescribe a standardized form for the disclosure of settlement costs, which must be given to home buyers in transactions which involve federally related mortgage loans. Section 4 of the statute specifically requires that such form include all information and data required to be disclosed by the Federal Truth in Lending Act. A Truth in Lending disclosure form (hereinafter referred to as "form") and instructions to be used in completing such form have been prescribed as a part of the standardized form. Because of the unavoidable complexity inherent in combining settlement and credit costs into one form, the requirements relating to the use of the standardized form differ to some degree from the requirements imposed under Regulation Z. It is the purpose of this interpretation to eliminate any confusion as to the steps creditors must take in complying with the Truth in Lending disclosure requirements in completing the form and to clarify the interrelationship between the Truth in Lending Act and the Real Estate Settlement Procedures Act.

(b) Sections 226.6(b), 226.8(c), and 226.8(d) of Regulation Z characterize credit transactions as loans or credit sales and require differing disclosures for each. The form is designed for the disclosure of both credit sales and loans. The form should be used for consumer credit transactions subject to the Real Estate Settlement Procedures Act regardless of whether the transaction may be characterized as a loan or a credit sale and such use shall not constitute a violation of the Truth in Lending Act.

(c) Notwithstanding the provisions of § 226.8(a)(1), the form precludes the inclusion of the promissory note or other instrument evidencing the obligation. Notwithstanding the provisions of § 226.6(c)(2), the form precludes the inclusion of any inconsistent State disclosure requirements. Notwithstanding the provisions of § 226.8(a), itemization and disclosure of charges excludable from the finance charge under § 226.4(b) may be made on the settlement costs portion of the combined form.

(d) The form, when properly completed in accordance with Regulation Z and the instructions provided with the form, constitutes compliance with the provisions of § 226.6(a) relating to "clear, conspicuous, and meaningful sequence"

disclosure requirements. (Under § 226.6(a) creditors must continue to disclose more conspicuously the terms "annual percentage rate" and "finance charge" as well as making numeric disclosures under the type size requirements specified.) The instructions accompanying the form permit creditors to delete inapplicable disclosures, to substitute more pertinent disclosures for those presently included, to provide for additional space or language where necessary to satisfy full disclosure, and to make additional disclosures not presently included where such are required. Such permissive changes to the form should be made in compliance with § 226.6(a).

The form provides for the optional disclosure of the simple annual rate of contract interest. The disclosure of such rate does not constitute a violation of § 226.6(c).

(e) The definition of "federally related mortgage loan" provided in section 3 of the Real Estate Settlement Procedures Act (12 U.S.C. § 2602) could be interpreted as requiring settlement cost disclosures in transactions which are exempt under § 226.3. In such cases, the form need not be provided.

(f) The effective date of this interpretation is June 20, 1975, which coincides with that of the Real Estate Settlement Procedures Act.

(Interprets and applies 12 C.F.R. 226.4, 226.6, and 226.8)

By order of the Board of Governors,  
May 5, 1975.

[SEAL] GRIFFITH L. GARWOOD,  
Assistant Secretary of the Board.

## Title 14—Aeronautics and Space CHAPTER I—FEDERAL AVIATION ADMINISTRATION

[Docket No. 75-GL-10; Amdt. 39-2209]

### PART 39—AIRWORTHINESS DIRECTIVES Bellanca Aircraft Models 17-31, 17-31A, 17-31TC, 17-31ATC

There have been reports of the vapor return line check valve P/N 19121-206 sticking or being improperly installed on the Bellanca Model 17-31A. Since this condition which can result in engine power failure is likely to exist or develop in other airplanes of the same type design, an airworthiness directive is being issued to require modification of the vapor return line check valve on Bellanca Models 17-31, 17-31A, 17-31TC, 17-31ATC airplanes.

Since a situation exists that requires immediate adoption of this regulation, it is found that notice and public procedure hereon are impracticable and good cause exists for making this amendment effective in less than 30 days.

#### § 39.13 [Amended]

In consideration of the foregoing, and pursuant to the authority delegated to me by the Administrator (31 FR 13697 and 14 CFR 11.89) § 39.13 of Part 39 of the Federal Aviation Regulations is

amended by adding the following new airworthiness directive.

Bellanca. Applies to the following airplanes:

17-31: S/N 32-1  
17-31TC: All serials  
17-31A: S/N 32-21 through S/N 75-31158 except S/N 32-25

17-31ATC: S/N 31004 through S/N 75-3113  
Compliance: Required within the next 25 hours time in service after the effective date of this AD. The airplane may be flown to a facility where the modification can be accomplished after the expiration of the 25 hours time in service after the effective date of the AD. To prevent possible engine power failure, accomplish the following as appropriate:

#### A. Models Up To But Not Including 1973 Models\*

The check valve (P/N 19121-206\*\*) is located on the diagonal on the forward wing truss under R/H front seat; the following procedure is to be used:

1. Remove right front seat, lift up carpet and remove plywood cover.
2. Remove check valve.
3. Disassemble the check valve, remove the internal check ball and reassemble the valve without the internal check ball. Remove the Bellanca placard showing the valve as P/N 19121-206 and remark the valve housing with a yellow stripe through the AN part number.
4. Reinstall the valve in the vapor return line.

5. Make appropriate log book entries.

#### B. 1973 Model Aircraft\*

The check valve (19121-206\*\*) is located under right floorboard; the following procedure is to be used:

1. Remove: right front seat forward stop and seat, floor mat, right kick panel, right half of heel plate, metal cover over fuel selector, and right floorboard.
2. Remove check valve.
3. Disassemble the check valve, remove the internal check ball and reassemble the valve without the internal check ball. Remove the Bellanca placard showing the valve as P/N 19121-206 and remark the valve housing with a yellow stripe through the AN part number.
4. Reinstall the valve in the vapor return line.

5. Reverse Step 1 to complete operation.

6. Make appropriate log book entries.

#### C. 1974 and 1975 Model Aircraft\*

The check valve (19121-206\*\*) is located under right floorboard; the following procedure is to be used:

1. Remove: right front seat forward stop and seat, floor mat, right cabin heat fresh air deflector, seat adjuster mechanism, metal cover over fuel selector, and right floorboard.
2. Remove check valve.
3. Disassemble the check valve, remove the internal check ball and reassemble the valve without the internal check ball. Remove the Bellanca placard showing the valve as P/N 19121-206 and re-mark the valve housing with a yellow stripe through the AN part number.
4. Reinstall the valve in the vapor return line.

5. Reverse Step 1 to complete procedure.

6. Make appropriate log book entries.

\*Identify aircraft model year by referring to first two digits in serial number for 1973, 1974 and 1975 aircraft; aircraft serial numbers prior to 1973 were not coded to year.

\*\*The check valve is a small 13/16 inch diameter by 1 1/4 inch long (plus fitting) AN valve located in the vapor return line between the fuel selector and the firewall. The valve may be positively identified by noting the Bellanca placard rework number 19121-206 located after AN in lieu of the AN number.

XUM

This amendment becomes effective May 22, 1975.

(Secs. 313(a), 601, and 608 of the Federal Aviation Act of 1958 (49 U.S.C. 1354(a), 1421, and 1423) and of Section 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)))

Issued in Des Plaines, Illinois, on May 8, 1975.

JOHN M. CYROCKI,  
Director.

[FR Doc. 75-12864 Filed 5-15-75; 8:45 am]

[Airspace Docket No. 74-NW-20]

# **PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS**

## **Alteration of Control Zone**

On March 21, 1975, a Notice of Proposed Rule Making was published in the FEDERAL REGISTER (40 FR 12810) stating that the Federal Aviation Administration was considering an amendment to Part 71 of the Federal Aviation Regulations that would alter the description of the Hillsboro, Oregon, Control Zone.

Interested persons were given 30 days in which to submit written data, views, or arguments. No objections were received.

In consideration of the foregoing, the amendment is hereby adopted without change.

Effective Date: This amendment shall be effective 0901 G.m.t., August 14, 1975.

(Sec. 307(a) of the Federal Aviation Act of 1958, as amended (49 U.S.C. 1348(a)) and of Section 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)))

Issued in Seattle, Washington, on May 9, 1975.

C. B. WALK, JR.,  
Director Northwest Region.

§ 71.171 [Amended]

In § 71.171 (40 FR 354) the description of the Hillsboro, Oregon, Control Zone is amended to read as follows:

## **HILLSBORO, OREGON**

Within a 5-mile radius of Portland-Hillsboro Airport (Latitude 45°32'15" N, Longitude 122°56'46" W); within 2 miles each side of the Newburg VORTAC 007° radial, extending from the 5-mile radius area to 8 miles south of the airport; within 2 miles each side of the 039° bearing from the airport reference point, extending from the 5-mile radius area to 0.5 miles northeast of the airport; and within 3.5 miles each side of the 323° bearing from the airport reference point, extending from the 5-mile radius area to 16 miles northwest. This control zone will be effective during the time established in advance by a Notice to Airmen and continuously published in the Airmen's Information Manual.

[FR Doc. 75-12866 Filed 5-15-75; 8:45 am]

[Airspace Docket No. 75-NW-01]

# **PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS**

## **Establish Control Zone**

On March 21, 1975, a Notice of Proposed Rule Making was published in the

FEDERAL REGISTER (40 FR 12811) stating that the Federal Aviation Administration was considering an amendment to Part 71 of the Federal Aviation Regulations that would include the description of the Port Angeles, Washington, Control Zone.

Interested persons were given 30 days in which to submit written data, views, or arguments. No objections were received.

In consideration of the foregoing, the amendment is hereby adopted without change.

Effective Date: This amendment shall be effective 0901 G.m.t., August 14, 1975.

(Sec. 307(a) of the Federal Aviation Act of 1958, as amended (49 U.S.C. 1348(a)) and of Section 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)))

Issued in Seattle, Washington, on May 9, 1975.

C. B. WALK, JR.,  
Director Northwest Region.

§ 71.171 [Amended]

In § 71.171, add the following description:

## **PORT ANGELES, WASHINGTON**

Within a 5-mile radius of William R. Fairchild International Airport (latitude 48°07'10" N, longitude 123°29'44" W), excluding that airspace within a 1-mile radius of latitude 48°08'28" N, longitude 123°24'45" W.

This control zone is effective during specific dates and times established in advance by a Notice to Airmen. Effective date and time will thereafter be continuously published in the Airmen's Information Manual.

[FR Doc. 75-12865 Filed 5-15-75; 8:45 am]

# **Title 24—Housing and Urban Development**

## **CHAPTER II—OFFICE OF ASSISTANT SECRETARY FOR HOUSING PRODUCTION AND MORTGAGE CREDIT-FEDERAL HOUSING COMMISSIONER [FEDERAL HOUSING ADMINISTRATION]**

[Docket No. R-75-313]

## **INTEREST RATE CHANGE**

### **Changes To Meet Mortgage Market**

The following amendments are being made to this chapter to change the maximum interest rate which may be charged on a mortgage insured by this Department from 8 percent to 8½ percent. The Secretary has determined that such change is necessary to meet the mortgage market, in accordance with his authority contained in 12 U.S.C. 1709-1, as amended. The Secretary has, therefore, determined that advance notice and public procedure are unnecessary and that good cause exists for making this amendment effective April 28, 1975.

Accordingly, Chapter II is amended as follows:

# **PART 203—MUTUAL MORTGAGE INSURANCE AND INSURED HOME IMPROVEMENT LOANS**

## **Subpart A—Eligibility Requirements**

1. In § 203.20 paragraph (a) is amended to read as follows:

§ 203.20 Maximum interest rate.

(a) The mortgage shall bear interest at the rate agreed upon by the mortgagee

and the mortgagor, which rate shall not exceed 8½ percent per annum with respect to mortgages insured on or after April 28, 1975.

(Sec. 211, 52 stat. 23; (12 U.S.C. 1715b). Interpret or apply sec. 203, 52 stat. 10, as amended; (12 U.S.C. 1709)).

2. In § 203.74 paragraph (a) is amended to read as follows:

§ 203.74 Maximum interest rate.

(a) The loan shall bear interest at the rate agreed upon by the lender and the borrower, which rate shall not exceed 8½ percent per annum with respect to loans insured on or after April 28, 1975.

(Sec. 211, 52 stat. 23; (12 U.S.C. 1715b). Interpret or apply sec. 203, 52 stat. 10, as amended; (12 U.S.C. 1709)).

# **PART 205—MORTGAGE INSURANCE FOR LAND DEVELOPMENT**

## **Subpart A—Eligibility Requirements**

3. Section 205.50 is amended to read as follows:

§ 205.50 Maximum interest rate.

The mortgage shall bear interest at the rate agreed upon by the mortgagee and the mortgagor, which rate shall not exceed 8½ percent per annum with respect to mortgages receiving initial endorsement (or endorsement in cases involving insurance upon completion) on or after April 28, 1975.

(Sec. 1011, formerly sec. 1010, 79 stat. 464, (12 U.S.C. 1749j)); renumbered Pub. L. 89-754, sec. 401(a), 60 stat. 1271).

# **PART 207—MULTIFAMILY HOUSING MORTGAGE INSURANCE**

## **Subpart A—Eligibility Requirements**

4. In § 207.7 paragraph (a) is amended to read as follows:

§ 207.7 Maximum interest rate.

(a) The mortgage shall bear interest at the rate agreed upon by the mortgagee and the mortgagor, which rate shall not exceed 8½ percent per annum with respect to mortgages receiving initial endorsement (or endorsement in cases involving insurance upon completion) on or after April 28, 1975.

(Sec. 211, 52 stat. 23; (12 U.S.C. 1715b). Interpret or applies sec. 207, 52 stat. 16, as amended; (12 U.S.C. 1713)).

# **PART 213—COOPERATIVE HOUSING MORTGAGE INSURANCE**

## **Subpart A—Eligibility Requirements—Projects**

5. In § 213.10 paragraph (a) is amended to read as follows:

§ 213.10 Maximum interest rate.

(a) The mortgage or a supplementary loan shall bear interest at the rate agreed upon by the mortgagee and the mortgagor, or the lender and the borrower, which rate shall not exceed 8½ percent per annum with respect to mortgages (or

supplementary loans upon completion) on or after April 28, 1975.

# **Subpart C—Eligibility Requirements—Individual Properties Released From Project Mortgage**

6. In § 213.511 paragraph (a) is amended to read as follows:

§ 213.511 Maximum interest rate.

(a) The mortgage shall bear interest at the rate agreed upon by the mortgagee and the mortgagor, which rate shall not exceed 8½ percent per annum with respect to mortgages insured on or after April 28, 1975.

(Sec. 211, 52 stat. 23; (12 U.S.C. 1715b). Interpret or apply sec. 213, 64 stat. 54, as amended; (12 U.S.C. 1715e)).

# **PART 220—URBAN RENEWAL MORTGAGE INSURANCE AND INSURED IMPROVEMENT LOANS**

## **Subpart C—Eligibility Requirements—Projects**

7. In § 220.576 paragraph (a) is amended to read as follows:

§ 220.576 Maximum interest rate.

(a) The loan shall bear interest at the rate agreed upon by the lender and the borrower, which rate shall not exceed 8½ percent per annum with respect to loans receiving initial endorsement (or endorsement in cases involving insurance upon completion) on or after April 28, 1975.

(Sec. 211, 52 stat. 23; (12 U.S.C. 1715b). Interpret or apply sec. 220, 68 stat. 596, as amended; (12 U.S.C. 1715k)).

# **PART 221—LOW COST AND MODERATE INCOME MORTGAGE INSURANCE**

## **Subpart C—Eligibility Requirements—Moderate Income Projects**

8. In § 221.518 paragraph (a) is amended to read as follows:

§ 221.518 Maximum interest rate.

(a) The mortgage shall bear interest at the rate agreed upon by the mortgagee and the mortgagor, which rate shall not exceed 8½ percent per annum with respect to mortgages receiving initial endorsement (or endorsement in cases involving insurance upon completion) on or after April 28, 1975. Interest shall be payable in monthly installments on the principal amount of the mortgage outstanding on the due date of each installment.

(Sec. 211, 52 stat. 23; (12 U.S.C. 1715b). Interpret or applies sec. 221, 68 stat. 599, as amended; (12 U.S.C. 1715l)).

# **PART 232—NURSING HOMES AND INTERMEDIATE CARE FACILITIES MORTGAGE INSURANCE**

## **Subpart A—Eligibility Requirements**

9. In § 232.29 paragraph (a) is amended to read as follows:

## **§ 232.29 Maximum interest rate.**

(a) The mortgage shall bear interest at the rate agreed upon by the mortgagee and the mortgagor, which rate shall not exceed 8½ percent per annum with respect to mortgages receiving initial endorsement (or endorsement in cases involving insurance upon completion) on or after April 28, 1975.

# **Subpart C—Eligibility Requirements—Supplemental Loans To Finance and Installation of Fire Safety Equipment**

10. In § 232.560 paragraph (a) is amended to read as follows:

§ 232.560 Maximum interest rate.

(a) The loan shall bear interest at the rate agreed upon by the lender and the borrower, which rate shall not exceed 8½ percent per annum with respect to loans insured on or after April 28, 1975.

(Sec. 211, 52 stat. 23; (12 U.S.C. 171b). Interpret or applies sec. 232, 73 stat. 663; (12 U.S.C. 171w)).

# **PART 234—CONDOMINIUM OWNERSHIP MORTGAGE INSURANCE**

## **Subpart A—Eligibility Requirements—Individually Owned Units**

11. In § 234.29 paragraph (a) is amended to read as follows:

§ 234.29 Maximum interest rate.

(a) The mortgage shall bear interest at the rate agreed upon by the mortgagee and the mortgagor, which rate shall not exceed 8½ percent per annum with respect to mortgages insured on or after April 28, 1975.

(Sec. 211, 52 stat. 23; (12 U.S.C. 1715b). Interpret or applies sec. 234, 75 stat. 160; (12 U.S.C. 1715y)).

# **PART 235—MORTGAGE INSURANCE AND ASSISTANCE PAYMENTS FOR HOME OWNERSHIP AND PROJECT REHABILITATION**

## **Subpart D—Eligibility Requirements—Rehabilitation Sales Projects**

12. Section 235.540 is amended to read as follows:

§ 235.540 Maximum interest rate.

The mortgage shall bear interest at the rate agreed upon by the mortgagee and the mortgagor, which rate shall not exceed 8½ percent per annum with respect to mortgages insured on or after April 28, 1975.

(Sec. 211, 52 stat. 23; (12 U.S.C. 1715b). Interpret or applies sec. 235, 82 stat. 477; (12 U.S.C. 1715z)).

# **PART 236—MORTGAGE INSURANCE AND INTEREST REDUCTION PAYMENTS FOR RENTAL PROJECTS**

## **Subpart A—Eligibility Requirements for Mortgage Insurance**

13. Section 236.15 is amended to read as follows:

## **§ 236.15 Maximum interest rate.**

The mortgage shall bear interest at the rate agreed upon by the mortgagee and the mortgagor, which rate shall not exceed 8½ percent per annum with respect to mortgages receiving initial endorsement (or endorsement in cases involving insurance upon completion) on or after April 28, 1975.

(Sec. 211, 52 stat. 23; (12 U.S.C. 1715b). Interpret or applies sec. 236, 52 stat. 498; (12 U.S.C. 1715z-1)).

# **PART 241—SUPPLEMENTARY FINANCING FOR INSURED PROJECT MORTGAGES**

## **Subpart A—Eligibility Requirements**

14. Section 241.75 is amended to read as follows:

§ 241.75 Maximum interest rate.

The loan shall bear interest at the rate agreed upon by the lender and the borrower, which rate shall not exceed 8½ percent per annum with respect to loans insured on or after April 28, 1975. Interest shall be payable in monthly installments on the principal then outstanding.

(Sec. 211, 52 stat. 23; (12 U.S.C. 1715b). Interpret or applies sec. 241, 82 stat. 506; (12 U.S.C. 1715z-b)).

# **PART 242—MORTGAGE INSURANCE FOR HOSPITALS**

## **Subpart A—Eligibility Requirements**

15. Section 242.33 is amended to read as follows:

§ 242.33 Maximum interest rate.

The mortgage shall bear interest at the rate agreed upon by the mortgagee and the mortgagor, which rate shall not exceed 8½ percent per annum with respect to mortgages receiving initial endorsement (or endorsement in cases involving insurance upon completion) on or after April 28, 1975. Interest shall be payable in monthly installments on the principal then outstanding.

(Sec. 211, 52 stat. 23; (12 U.S.C. 1715b). Interpret or applies sec. 242, 82 stat. 509; (12 U.S.C. 1715z-7)).

# **PART 244—MORTGAGE INSURANCE FOR GROUP PRACTICE FACILITIES**

## **Subpart A—Eligibility Requirements**

16. In § 244.45 paragraph (a) is amended to read as follows:

§ 244.45 Maximum interest rate.

(a) The mortgage shall bear interest at the rate agreed upon by the mortgagee and the mortgagor, which rate shall not exceed 8½ percent per annum with respect to mortgages receiving initial endorsement (or endorsement in cases involving insurance upon completion) on or after April 28, 1975.

(Sec. 1104, 80 stat. 1275; (12 U.S.C. 1749aaa-3)).

Effective date. These amendments are effective as of April 28, 1975.

DAVID M. DEWILDE,  
Acting Assistant Secretary-  
Commissioner for Housing  
Production and Mortgage  
Credit.

### PART 83—STATIONS ON SHIPBOARD IN THE MARITIME SERVICES

#### Mandatory VHF Requirements

In FR Doc. 75-11763 appearing at page 19646 in the issue for Tuesday, May 6, 1975, on page 19649 change the section heading now reading § 38.547 to read "§ 83.547".

#### Title 49—Transportation

### CHAPTER V—NATIONAL HIGHWAY TRAFFIC SAFETY ADMINISTRATION, DEPARTMENT OF TRANSPORTATION

[Docket No. 71-13; Notice 9]

### PART 571—FEDERAL MOTOR VEHICLE SAFETY STANDARDS

#### Motor Vehicle Brake Fluids

This notice further responds to petitions for reconsideration of amendments to 49 CFR 571.116, Motor Vehicle Safety Standard No. 116, Motor Vehicle Brake Fluids, that were published in the FEDERAL REGISTER on August 22, 1974 (39 FR 30353, as corrected at 39 FR 32739). A partial response deleting color coding requirements was published on March 25, 1975 (40 FR 13219). This notice amends the standard in minor respects.

Petitions were received from General Motors Corporation, Ford Motor Com-

pany, Wagner Electric Corporation, Officine Alfieri Maserati, S.A. Automobiles Citroen, and U.S. Technical Research Corporation. Late-filed petitions were received from EIS Automotive and the Bell Company and in accordance with 49 CFR 553.31 they have been treated as petitions for rulemaking. The issues raised by the petitions and their disposition are set forth below.

**Revocation.** Ford petitioned to revoke the amendments adding DOT 5 brake fluids, because "it has reason to believe that they are incompatible with at least some of the brake systems currently used on Ford vehicles." Specifically Ford argues that the fluids "may cause hazardous deterioration of brake systems or their components." In support Ford referenced a recent letter from Bendix to the Non-Conventional Brake Fluid Task Group of the Society of Automotive Engineers, describing a series of tests conducted with silicone brake fluid "in a hydrovac brake system typical of the system used in some Ford products." NHTSA has learned that Bendix subsequently informed SAE that the tests were erroneously reported and recommended further testing. This agency finds that good cause has not been shown for the revocation, and Ford's petition is denied.

Ford also commented that DOT 5 fluid would not have sufficient electrical conductivity to permit the operation of its intended brake fluid level sensor to meet a requirement of Motor Vehicle Safety Standard No. 105-75 Hydraulic Brake Systems. The NHTSA regards this as a design problem, peculiar to Ford, that is outweighed by the safety advantages of allowing motor vehicle manufacturers and motorists the option of choosing a low-water-tolerant brake fluid. Ford's petition is denied.

**Fluid color.** A discussion of issues raised by the petitions for reconsideration of fluid color and labeling will be contained in a notice of proposed rulemaking on this subject to be published shortly. (Docket No. 71-13; Notice 10).

**Minor amendments.** An editorial error in the amendment to paragraph S5.1.5.2 published on September 11, 1974 (39 FR 32739) is corrected. Paragraph S5.2.2.3 is amended to remove superfluous references to "brake fluid." Paragraph S6.7.3 (a) is amended to include a reference to isopropanol. Finally, to agree with a change made in S6.12.4 (39 FR 21599) S6.12.1 is corrected by changing a reference to "120 hours" to "70 hours."

#### § 571.116 [Amended]

In consideration of the foregoing, 49 CFR 571.116, Motor Vehicle Safety Standard No. 116, is amended as follows:

1. Paragraph S5.1.5.2 is revised to read:

S5.1.5.2 *Chemical stability.* When DOT 3 or DOT 4 brake fluid is tested according to S6.5.4, the change in temperature of the refluxing fluid mixture shall not exceed 3.0°C (5.4°F) plus 0.05 degree for each degree that the ERBP of the fluid exceeds 225°C (437°F).

## RULES AND REGULATIONS

2. Paragraph S5.2.2.3(e) (1), (e) (3), and (e) (4) are revised to read as follows: § 5.2.2.3 . . . . .

(e) . . . . .  
(1) FOLLOW VEHICLE MANUFACTURER'S RECOMMENDATIONS WHEN ADDING HYDRAULIC SYSTEM MINERAL OIL.

(3) KEEP HYDRAULIC SYSTEM MINERAL OIL CLEAN. Contamination with dust or other materials may result in brake failure or costly repair.

(4) CAUTION: STORE HYDRAULIC SYSTEM MINERAL OIL ONLY IN ITS ORIGINAL CONTAINER. KEEP CONTAINER CLEAN AND TIGHTLY CLOSED. DO NOT REFILL CONTAINER OR USE OTHER LIQUIDS. (The last sentence is not required for containers with a capacity in excess of 5 gallons.)

3. The third sentence of paragraph S6.7.3(a) is revised to read: "After 144±4 hours remove the bottle from the chamber, quickly wipe it with a clean, lint-free cloth, saturated with ethanol, (isopropanol when testing DOT 5 fluids) or acetone."

4. The second sentence of paragraph S6.12.1 is revised to read: "One jar is heated for 70 hours at 70° C (158° F), and the other for 70 hours at 120° C (248° F)."

Effective date: May 16, 1975. Because the amendments correct errors and create no additional burden on any person it is found for good cause shown that an immediate effective date is in the public interest.

(Sec. 103, 112, 119, Pub. L. 89-563, 80 Stat. 718 (15 USC 1392, 1401, 1407); delegation of authority at 49 CFR 1.51).

Issued on May 12, 1975.

JAMES B. GREGORY,  
Administrator.

#### Title 50—Wildlife and Fisheries

### CHAPTER II—NATIONAL MARINE FISHERIES SERVICE, NATIONAL OCEANIC AND ATMOSPHERIC ADMINISTRATION, DEPARTMENT OF COMMERCE

### PART 240—REGULATED COMMERCIAL FISHERIES

At the 24th Annual Meeting held in Halifax, Nova Scotia, Canada, June 4-14, 1974, and the special meeting held in Miami, Florida, November 11-15, 1974, the International Commission for Northwest Atlantic Fisheries (ICNAF) recommended that member countries adopt certain conservation measures for 1975.

Therefore, it is the purpose of these regulations to carry out the recommendations of the Commission and to accomplish various administrative matters. The regulations deal with the following matters:

1. Confirms the regulations to include those waters adjacent to the west and south of the convention area (Statistical Area 6) (see § 240.2(b)).

2. Establishes a procedure for a license for an indefinite term of years instead of yearly (see § 240.3).

3. Establishes new incidental catch allowances for trip exemptions and permits the Regional Director to enter into an optional settlement agreement in lieu of per trip exemption (see § 240.4 (b), (c) and the appendix).

4. Changes the requirement for submission of logbook from vessels of 50 gross tons, or more to vessels of 100 gross tons or more (see § 240.5(b)).

5. Changes the catch quotas for haddock, cod, pollock, red fish, yellowtail flounder, witch flounder, American plaice, silver hake, red hake, herring and mackerel (see §§ 240.11, 240.21, 240.31 and 240.41).

6. A new Subpart F is added to establish a catch quota for all other finfish not mentioned in Subparts A through E.

7. A new Subpart G is added to establish a catch quota for squid.

8. A new Subpart H is added to establish an overall quota for all stocks and species.

9. Numerous administrative amendments are made which do not have a substantial effect on U.S. fishermen. In accordance with Executive Order 11821, dated November 27, 1974, it is hereby certified that the inflationary impact of this action on the Nation has been carefully evaluated. The additional federal expenditures required are so minimal that no substantial impact on the Nation is anticipated.

These regulations are issued under the authority contained in the Northwest Atlantic Fisheries Act of 1950 (16 U.S.C. 986). Because of the need for immediate guidance with respect to the provisions contained in these regulations and the fact that they relate to a foreign affairs function of the United States under 5 U.S.C. 553(a) (1), it is found unnecessary to issue a notice of proposed rule making under 5 U.S.C. 553(b) or subject these regulations to the effective date limitation of 5 U.S.C. 553(d). Therefore, under the provisions of 5 U.S.C. 553(d) (3) and 553(b) (B), these regulations are effective May 16, 1975.

Issued at Washington, D.C. and dated May 13, 1975.

JACK W. GEHRINGER,  
Acting Director,  
National Marine Fisheries Service.

In consideration of the foregoing, Part 240 is revised to read as follows:

#### SUBCHAPTER E—NORTHWEST ATLANTIC COMMERCIAL FISHERIES

### PART 240—REGULATED COMMERCIAL FISHERIES

#### Subpart A—General Provisions

Sec.  
240.1 Effective period of regulations.  
240.2 Definitions.  
240.3 Licensing provisions.  
240.4 Persons and vessels exempted.  
240.5 Reports and records.

## RULES AND REGULATIONS

#### Subpart B—Groundfish Fisheries

Sec.  
240.10 Definitions.  
240.11 Catch quota.  
240.12 Open season.  
240.13 Closed season and areas.  
240.14 Gear restrictions.  
240.15 General restrictions.

#### Subpart C—Flatfish Fisheries

240.20 Definitions.  
240.21 Catch quota.  
240.22 Open season.  
240.23 Closed season and areas.  
240.24 Gear restrictions.  
240.25 General restrictions.

#### Subpart D—Hake Fisheries

240.30 Definitions.  
240.31 Catch quota.  
240.32 Open season.  
240.33 Closed season and areas.  
240.34 Gear restrictions.  
240.35 General restrictions.

#### Subpart E—Pelagic Fisheries

240.40 Definitions.  
240.41 Catch quota.  
240.42 Open season.  
240.43 Closed season and areas.  
240.44 Gear restrictions.  
240.45 General restrictions.  
240.46 Size limits.

#### Subpart F—All Other Finfish

240.50 Definitions.  
240.51 Catch quota.

#### Subpart G—Squid Fisheries and Shellfish

240.60 Definitions.  
240.61 Catch quota.

#### Subpart H—Overall Quota

240.70 Definitions.  
240.71 Catch quota.

Appendix: Optional Settlement Agreement Form.

AUTHORITY: Northwest Atlantic Fisheries Act of 1950 as amended (16 Stat. 1069, 16 USC 986).

#### Subpart A—General Regulations

§ 240.1 Effective period of regulations.

These regulations apply for 1975.

#### § 240.2 Definitions.

(a) *Convention area.* The term "Convention area" means and includes all waters, except territorial waters, bounded by a line beginning at a point on the coast of Rhode Island in 71°40' west longitude; thence due south to 39°00' north latitude; thence due east to 42°00' west longitude; thence due north to 50°00' north latitude; thence due west to 44°00' west longitude; thence due north to the coast of Greenland; thence along the west coast of Greenland to 78°10' north latitude; thence southward to a point in 75°00' north latitude and 73°30' west longitude, thence along a rhumb line to a point in 69°00' north latitude and 50°00' west longitude; thence due south to 61°00' north latitude; thence due west to 64°30' west longitude; thence due south to the coast of Labrador; thence in a southerly direction along the coast of Labrador to the southern terminus

of its boundary with Quebec; thence in a westerly direction along the coast of Quebec, and in an easterly and southerly direction along the coasts of New Brunswick, Nova Scotia, and Cape Breton Island, to Cabot Strait; thence along the coasts of Cape Breton Island, Nova Scotia, New Brunswick, Maine, New Hampshire, Massachusetts and Rhode Island to the point of beginning.

(b) *Regulatory area.* The term "Regulatory Area" means and includes the whole of those portions of the Convention area and those adjacent waters to the west and south inhabited by species of fish which are regulated by the Commission and which are separately described as follows:

(1) *Subarea 1.* The term "Subarea 1" means that portion of the Convention area, including all waters except territorial waters, which lies to the north and east of a rhumb line from a point in 75°00' north latitude and 73°30' west longitude to a point in 69°00' north latitude and 59°00' west longitude; east of 59°00' west longitude; and to the north and east of a rhumb line from a point in 61°00' north latitude and 59°00' west longitude to a point in 52°15' north latitude and 42°00' west longitude.

(2) *Subarea 2.* The term "Subarea 2" means that portion of the Convention area, including all waters except territorial waters, lying to the south and west of Subarea 1, as defined in subparagraph (1) of this paragraph, and to the north of the parallel of 52°15' north latitude.

(3) *Subarea 3.* The term "Subarea 3" means that portion of the Convention area, including all waters except territorial waters, lying south of the parallel of 52°15' north latitude; and to the east of a line extending due north from Cape Bauld on the north coast of Newfoundland to 52°15' north latitude; to the north of the parallel of 39°00' north latitude; and to the east and north of a rhumb line extending in a northwesterly direction which passes through a point in 42°30' north latitude, 55°00' west longitude in the direction of a point in 47°50' north latitude, 60°00' west longitude, until it intersects a straight line connecting Cape Ray, on the coast of Newfoundland, with Cape North on Cape Breton Island; thence in a northeasterly direction along said line to Cape Ray.

(4) *Subarea 4.* The term "Subarea 4" means that portion of the Convention area, including all waters except territorial waters, lying to the west of Subarea 3 as described in subparagraph (3) of this paragraph, and to the east of a line described as follows: Beginning at the terminus of the international boundary between the United States of America and Canada in Grand Manan Channel, at a point 44°48'35.34" north latitude, 66°54'11.23" west longitude; thence due south to the parallel of 43°50' north latitude; thence due west to the me-

ridian of 67°40' west longitude; thence due south to the parallel of 42°40' north latitude; thence due east to a point in 66°00' west longitude; thence along a rhumb line in a southeasterly direction to a point in 42°00' north latitude, 65°40' west longitude; thence due south to the parallel of 39°00' north latitude.

(5) *Subarea 5.* The term "Subarea 5" means that portion of the Convention area, including all waters except territorial waters, bounded by a line beginning at the terminus of the international boundary between the United States of America and Canada in Grand Manan Channel at a point in 44°46'35.34" north latitude, 66°54'11.23" west longitude; thence due south to the parallel of 43°50' north latitude; thence due west to the meridian of 67°40' west longitude; thence due south to the parallel of 42°20' north latitude; thence due east to a point in 66°00' west longitude; thence along a rhumb line in a southeasterly direction to a point in 42°00' north latitude, 65°40' west longitude; thence due south to the parallel of 39°00' north latitude; thence due west to the meridian of 71°40' west longitude; thence due north to a point 3 statute miles off the coast of the State of Rhode Island; thence along the coasts of Rhode Island, Massachusetts, New Hampshire, and Maine at a distance of 3 statute miles to the point of beginning.

(6) *Statistical Area 6.* The term "Statistical Area 6" means that portion of the waters inhabited by species of fish which are regulated by the Commission including all waters except territorial waters bounded by a line beginning at a point on the coast of Rhode Island at 71°40' W. long.; thence due south to 39°00' N. lat.; thence due east to 42°00' W. long.; thence due south to 35°00' N. lat., thence due west to the coast of North America, thence northwards along the east coast of Hatteras Island, past Oregon Inlet along the coast of North Carolina, Virginia, Maryland, Delaware, New Jersey, New York, Connecticut, and Rhode Island to the point on Rhode Island at 71°40' W. long.

(c) *Regulated species.* The regulations in this part shall apply to the following species by the subareas they are included in and wherever in the regulations in this part the term "regulated species" is used, it shall apply to those in this list.

- (1) *In Subarea 1.* (i) Cod (*Gadus morhua* (L.)).
- (ii) Haddock (*Melanogrammus aeglefinus* (L.)).
- (iii) Ocean perch (redfish) (*Sebastes*).
- (iv) Halibut (*Hippoglossus hippoglossus* (L.)).
- (v) Grey sole (witch) (*Glyptocephalus cynoglossus* (L.)).
- (vi) Dab (American plaice) (*Hippoglossoides platessoides* (Fab.)).
- (vii) Greenland halibut (*Reinhardtius hippoglossoides* (Walb.)).
- (2) *In Subarea 2.* (i) Cod (*Gadus morhua* (L.)).
- (ii) Haddock (*Melanogrammus aeglefinus* (L.)).
- (iii) Ocean perch (redfish) (*Sebastes*).
- (iv) Halibut (*Hippoglossus hippoglossus* (L.)).

(v) Grey sole (witch) (*Glyptocephalus cynoglossus* (L.)).

(vi) Dab (American plaice) (*Hippoglossoides platessoides* (Fab.)).

(vii) Greenland halibut (*Reinhardtius hippoglossoides* (Walb.)).

(3) *In Subarea 3.* (i) Cod (*Gadus morhua* (L.)).

(ii) Haddock (*Melanogrammus aeglefinus* (L.)).

(iii) In aggregate: ocean perch (redfish) (*Sebastes*), except in the statistical division 3N, 3O, and 3P, halibut (*Hippoglossus hippoglossus* (L.)), grey sole (witch) (*Glyptocephalus cynoglossus* (L.)), yellowtail flounder (*Limanda ferruginea* (Storer)), dab (American plaice) (*Hippoglossoides platessoides* (Fab.)), Greenland halibut (*Reinhardtius hippoglossoides* (Walb.)), pollock (saithe) (*Pollachius virens* (L.)), white hake (*Urophycis tenuis* (Mitch.)).

(4) *In Subarea 4.* (i) Cod (*Gadus morhua* (L.)).

(ii) Haddock (*Melanogrammus aeglefinus* (L.)).

(iii) In aggregate: Flounders: grey sole (witch) (*Glyptocephalus cynoglossus* (L.)), yellowtail flounder (*Limanda ferruginea* (Storer)), blackback or lemon sole (winter flounder) (*Pseudopleuronectes americanus* (Walb.)), dab, American plaice (*Hippoglossoides platessoides* (Fab.)).

(5) *In Subarea 5.* (i) Cod (*Gadus morhua* (L.)).

(ii) Haddock (*Melanogrammus aeglefinus* (L.)).

(iii) Yellowtail flounder (*Limanda ferruginea* (Storer)).

(iv) Silver hake (*Merluccius bilinearis* (Mitch.)).

(v) Red hake (*Urophycis chuss* (Walb.)).

(vi) Herring (*Clupea harengus* (L.)).

(vii) Mackerel (*Scomber scombrus* (L.)).

(viii) Pollock (*Pollachius virens* (L.)).

(ix) Redfish (*Sebastes marinus* (L.)).

(x) In aggregate: Flounders: grey sole (witch) (*Glyptocephalus cynoglossus* (L.)), dab (American plaice) (*Hippoglossoides platessoides* (Fab.)), fluke (summer flounder) (*Paralichthys dentatus* (L.)), blackback or lemon sole (winter flounder) (*Pseudopleuronectes americanus* (Walb.)).

(xi) Short Finned Squid (*Illex illecebrosus*).

(xii) Long Finned Squid (*Loligo pealei*).

(xiii) Other finfish: All other finfish not mentioned by name excluding menhaden, tuna, billfish and sharks other than dogfish.

(d) *Chafer.* A protective covering of canvas, netting, or other material attached to the underside of the cod end only of the net to reduce and prevent damage, and a rectangular piece or pieces of netting attached to the upper side of the cod end only of the net to reduce and prevent damage, so long as the netting attached to the upper side of the cod end conforms to the specifications of either the "ICNAF-type chafer," the "multiple flap-type chafer," or the "Polish-type chafer," described below. For the purposes of this paragraph, the required mesh size, when measured wet after use, shall be deemed to be the average of the measurements of 20 consecutive meshes in a series across the nettings.

(1) ICNAF chafer. A chafer having the following characteristics:

(i) The width of the netting shall be at least 1½ times the width of the area of the cod end which is covered, such width to be measured at right angles to the long axis of the cod end.

(ii) Such netting may be fastened to the cod end of the trawl net only along the forward and lateral edges of the netting and at no other place in the netting.

(iii) On cod ends having a splitting strap, the netting shall be fastened in such a manner that it extends forward of the splitting strap no more than four meshes and ends not less than four meshes in front of the cod line mesh.

(iv) On cod ends not having a splitting strap, the netting shall not extend to more than one-third the length of the cod end measured from not less than four meshes in front of the cod line mesh.

(v) The netting shall not have a mesh size less than that specified for the cod end to which it is attached.

(2) *Multiple flap-type chafer.* A chafer having the following characteristics:

(i) Each piece of netting shall not exceed 10 meshes in length; each shall be at least the width of the cod end, such width being measured at right angles to the long axis of the cod end at the point of attachment; each shall be fastened by its forward edge only across the cod end at right angles to its long axis.

(ii) The aggregate length of all pieces of netting shall not exceed two-thirds the length of the cod end.

(iii) The netting shall not have a mesh size less than that specified for the cod end to which it is attached.

(3) *Polish-type chafer.* A chafer having the following characteristics:

(i) The rectangular piece of netting attached to the upper side of the cod end shall have a mesh size at least twice as large as that specified for the cod end to which it is attached and shall have a width the same as that for the cod end.

(ii) It shall be fastened to the cod end only along the forward, lateral, and rear edges of the netting so that the meshes exactly overlay the meshes of the cod end.

(iii) The netting shall be the same twine size and material as that of the cod end.

(e) *Closed season.* The time during which regulated species in specified areas may not be taken in quantities exceeding the amounts specified as incidental fisheries.

(f) *Cod end.* The bag-like extension attached to the after end of the belly of the trawl net and used to retain the catch.

(g) *Commission.* The International Commission for the Northwest Atlantic Fisheries established pursuant to the Convention.

(h) *Convention.* The International Convention for the Northwest Atlantic Fisheries signed at Washington, D.C., February 8, 1949, and amendments.

(i) *Contracting governments.* Governments party to the Convention.

(j) *Demersal species.* Fishes living at the bottom of the sea.

(k) *Executive Secretary.* The Executive Secretary of the International Commission for the Northwest Atlantic Fisheries.

(l) *Fishing.* The catching, taking or fishing for, or the attempted catching, taking, or fishing for any regulated species.

(m) *Incidental fisheries.* The inadvertent taking of regulated species while conducting fishing operations primarily for other species.

(n) *Mesh size.* Any part of the net, the average of the measurements of any 20 consecutive meshes in any row located at least 10 meshes from the side lacing measured when wet after use.

(o) *License.* A license issued by the National Marine Fisheries Service to enable the holder thereof to fish for, possess, transport, or deliver, by means of any fishing vessel, any regulated species.

(p) *Official or authorized official.* Any representative of the National Marine Fisheries Service (NMFS), U.S. Coast Guard, or U.S. Bureau of Customs, authorized to enforce this part.

(q) *Open season.* The time during which regulated species may lawfully be captured and taken on board a fishing vessel without limitation of the quantity permitted to be retained during each fishing voyage, except as otherwise provided in this part.

(r) *Person.* Any owner, master, or operator of a vessel.

(s) *Regional Director.* The Regional Director, Northeast Region, National Marine Fisheries Service, Federal Building, 14 Elm Street, Gloucester, Massachusetts 01930. Telephone number: Area code (617) 281-0640.

(t) *Service.* The National Marine Fisheries Service, National Oceanic and Atmospheric Administration, U.S. Department of Commerce.

(u) *Service Director.* The Director of the National Marine Fisheries Service.

(v) *Trawl net.* Any large bag net dragged in the sea by a vessel or vessels for the purpose of fishing.

(w) *Vessel.* Every kind, type or description of watercraft subject to the jurisdiction of the United States, used, or capable of being used, as a means of transportation on water.

(x) *Trip.* As used in connection with the trip exemption provided in § 240.3(b) means a departure from port, transit to the Convention area, participation in the fisheries, including incidental fisheries, and discharges any part of the catch on board.

§ 240.3 Licensing provisions.

(a) Any person or vessel desiring to fish for any regulated species within the waters under regulation by the Commission, or possess, transport, or deliver for sale, any regulated species taken within

waters regulated by the Commission, must first obtain a license for that purpose.

(b) The owner or operator of a vessel may obtain the appropriate license by furnishing on the registration form provided by the National Marine Fisheries Service information specifying the names and addresses of the vessel owner and master, the name of the vessel, official number, fish hold capacity (nearest 100 pounds), and the homeport of the vessel. The registration form shall be submitted, in duplicate, to the Regional Director, National Marine Fisheries Service, Gloucester, Massachusetts, 01930, who shall grant the requested license, without fee, for an indefinite term of years, such term to include the calendar year in which the license is issued. New licenses will be issued to replace lost or mutilated licenses. A license shall expire whenever vessel ownership changes, or there exists an intent by the owner or the master of the vessel to change the directed fishery or fisheries of such vessel. Application for new license, because of a change in vessel ownership (which shall include the names and addresses of both the purchaser and seller and be submitted by the purchaser), a change in the directed fishery or fisheries of the vessel, or the removal of a vessel from the directed fisheries for regulated species within the Convention Area, must be filed with the Regional Director no later than 10 days following the change on a form provided by the Regional Director.

(c) The owner or operator of any licensed vessel which is proposed to be used in fishing outside the Convention area may obtain a temporary suspension of the license until such time that the vessel returns to fish within the Convention area.

(d) The temporary suspension or modification of the license shall be granted upon either an oral or a written request, specifying the period of suspension or modification desired by an authorized State official or by an authorized official of the National Marine Fisheries Service, or Coast Guard. Such official shall make appropriate endorsement on the license evidencing the duration of its suspension or modification.

(e) The license issued by the National Marine Fisheries Service must be carried, at all times, on board the vessel for which it is issued and such license, the vessel, its gear and equipment shall be subject to inspection, at reasonable times, by authorized officials.

(f) Licenses issued under this part may be revoked by the Regional Director for violations of this part.

§ 240.4 Persons and vessels exempted.

(a) *Scientific investigations.* Any person operating a vessel authorized by the Secretary of Commerce to engage in fishing for scientific purposes is exempt from all the requirements of this part.

(b) *Trip Exemption.* A person or vessel subject to the jurisdiction of the United States possessing a valid license

and abiding by existing fishing gear restrictions, but subject to all seasonal, area, or species quota limitation closing for regulated species, may possess regulated species except haddock in 4VW as follows:

(1) Vessels operating in Subareas 4 or 5 or Statistical Area 6 for 10 days or more since leaving port or previously off loading any regulated species may possess amounts of any regulated species taken as an incidental catch not to exceed 10 percent by weight of all fish on board such vessel.

(2) Vessels operating in Subareas 4 or 5 or Statistical Area 6 for less than 10 days but for more than 48 hours and who have not landed or offloaded any regulated species within 10 days of leaving port may possess amounts of any regulated species taken as an incidental catch in quantities not to exceed 5,000 kg (11,020 lbs.) or 20 percent by weight, whichever is greater, of all fish on board such vessel.

(3) Vessels operating in Subareas 4 or 5 or Statistical Area 6 which have landed or offloaded any regulated species within 10 days of leaving port may possess amounts of any regulated species taken as an incidental catch in quantities not to exceed 2,500 kg (5,510 lbs.) or 15 percent by weight, whichever is greater, of all fish on board such vessel.

(c) *Special Exemption.* Notwithstanding (b) above or 240.11(a)(3) the Regional Director, at his discretion, and under such terms and conditions as he deems necessary, may enter into agreements with owners or operators fishing in Subareas 4 or 5 or Statistical Area 6. Such agreement shall set forth the method of computing an annual or quarterly exemption instead of trip exemptions. A form of which is attached to these Regulations as an appendix.

(d) *Excess taking.* The taking of excess amounts of such regulated species under these exemptions by a vessel fishing within Subarea 5 or Statistical Area 6 during the first 48 hour period subsequent to leaving port or off loading will not constitute a violation of these regulations.

§ 240.5 Reports and records.

(a) *Dealers.* (1) All persons, individuals, firms or corporations, at any port or place within the United States, that buy from other U.S. flag vessels or from a carrier licensed as a common carrier engaged in either interstate or intrastate commerce, any regulated species taken within the Convention area by any fishing vessel, shall make and shall furnish to an authorized officer of the National Marine Fisheries Service, within 72 hours of sale or within 72 hours after buying or receiving, or upon the vessel's return to any port of the United States, a complete record of each purchase, on forms supplied by the National Marine Fisheries Service.

(2) All persons purchasing or receiving any regulated species in the Convention area for transport to any port of the United States must maintain records

## RULES AND REGULATIONS

identical to those required under paragraph (a)(1) of this section.

(3) The possession by any person, firm or corporation of regulated species which such person, firm, or corporation knows to have been taken by a vessel of the United States without a valid license, is prohibited.

(b) *Owner or master.* (1) In the case of a vessel licensed under § 240.3, and fishing for any of the regulated species, the owner or master of vessels of 100 gross tons or more must maintain an accurate log of fishing operations showing date, type and size of gear used, locality fished, duration of fishing time or tow, and the estimated weight in pounds of each species taken at 12-hour intervals. Such logbooks shall be available for inspection by an authorized official in accordance with the ICAF International Inspection Scheme adopted at the Twenty-first Annual Meeting, May 27-June 4, 1971. The logbook shall be presented for examination and subsequent return to the master or owner of the vessel upon proper demand by any authorized official at any time during or at the completion of a fishing trip. Such required documentation will be maintained by the owner or master of the vessel for one year subsequent to the date of the last entry in the logbook.

(2) In the case of vessels of less than 100 gross tons licensed under § 240.3, and fishing for any of the regulated species, the owner or master may be required to maintain the logbook for sampling purposes at the option of an appropriate official of the United States.

(3) In the case of vessels desiring to fish for nonregulated species on a trip basis, no reports are required of the owner or master.

## Subpart B—Groundfish Fisheries

## § 240.10 Definitions.

(a) Unless otherwise defined herein, the terms used in this subpart will have the meanings ascribed to them in § 240.2.

(b) Regulations in this subpart will apply to haddock (*Melanogrammus aeglefinus* (L.)), cod (*Gadus morhua* (L.)), pollock (*Pollachius virens* (L.)), and redfish (ocean perch) (*Sebastes marinus* (L.)).

## § 240.11 Catch quota.

(a) An annual catch limitation is placed upon the quantity of haddock permitted to be taken in Division 4X of Subarea 4, and Subarea 5. The aggregate catch of haddock by persons or fishing vessels subject to the jurisdiction of the United States in each area is as follows:

(1) The annual catch of haddock by persons or fishing vessels fishing in Division 4X of Subarea 4 shall not exceed 2,000 metric tons.

(2) The annual catch of haddock by persons or fishing vessels fishing in Subarea 5, shall not exceed 4,450 metric tons.

(3) The incidental fishery for haddock, within Subareas 4 and 5, and Statistical Area 6, by persons or vessels subject to the jurisdiction of the United States shall be in accordance with the provisions of

§ 240.4 except that the incidental catch taken in Subdivisions 4V and 4W of Subarea 4 shall not exceed 2,268 kg (5000 lbs) or 10 percent by weight, whichever is greater, of all fish on board such vessel.

(b) An annual catch limitation is placed upon the quantity of cod permitted to be taken in Subdivision 4X of Subarea 4, and Subdivisions 5Y, and 5Z, of Subarea 5. The aggregate catch of cod by persons or fishing vessels subject to the jurisdiction of the United States, in each area, is as follows:

(1) The annual catch of cod in Subarea 4 defined as that portion of Subdivision 4X lying south and east of the straight lines joining coordinates, in the order listed: 44°20'N, 63°20'W; 43°00'N, 65°40'W; 43°00'N, 67°40'W; shall not exceed 300 metric tons.

(2) The annual catch of cod in Subdivision 5Y of Subarea 5 shall not exceed 9,000 metric tons.

(3) The annual catch of cod in Subdivision 5Z of Subarea 5 shall not exceed 19,000 metric tons.

(c) An annual catch limitation is placed upon the quantity of pollock permitted to be taken in Subdivisions 4V, 4W, and 4X, of Subarea 4, and Subarea 5. The aggregate catch of pollock in the above areas by persons or fishing vessels subject to the jurisdiction of the United States shall not exceed 11,500 metric tons.

(d) An annual catch limitation is placed upon the quantity of red fish (ocean perch) permitted to be taken in Subarea 2, Subdivision 3K of Subarea 3, Subdivisions 4V, 4W, and 4X of Subarea 4, and Subarea 5. The aggregate catch of red fish (ocean perch) by persons or fishing vessels subject to the jurisdiction of the United States in each area, is as follows:

(1) The annual catch of red fish (ocean perch) by persons or fishing vessels fishing in Subarea 2, and Subdivision 3K of Subarea 3, shall not exceed 750 metric tons.

(2) The annual catch of red fish (ocean perch) by persons or fishing vessels fishing in Subdivisions 4V, 4W, and 4X of Subarea 4 shall not exceed 7,430 metric tons.

(3) The annual catch of red fish (ocean perch) by persons or fishing vessels fishing in Subarea 5, shall not exceed 20,622 metric tons.

## § 240.12 Open season.

(a) The open season for regulated groundfish species in Subdivision 4Vs, Division 4X and Division 4W of Subarea 4, and Subarea 5, shall begin at 0001 hours of the 1st day of January 1975, and terminate at a time and a date to be determined and announced in the FEDERAL REGISTER. *Provided*, That the areas described in § 240.13 shall be closed to any vessel using gear capable of catching demersal species.

(b) The annual catch of haddock by persons or fishing vessels fishing in Subarea 5, shall not exceed 4,450 metric tons.

## § 240.13 Closed seasons and areas.

(a) The Director shall announce the closure of the season by publication of a notice in the FEDERAL REGISTER, specifying the time and date for the termina-

tion of specialized fishing for regulated groundfish species in Subarea 4 or 5, or any division thereof. The closure is determined in the following manner:

(1) The National Marine Fisheries Service maintains records of the catches of regulated groundfish species, except haddock, made in Subdivision 4Vs, Division 4X and Division 4W of Subarea 4 and Subarea 5, during the open season, by vessels under the jurisdiction of the United States participating in the fishery.

(2) When the accumulative and estimated prospective catch of regulated groundfish species, except haddock in each subarea, making allowance for the incidental catch for the remainder of the year, equals 100 percent of the allowable catch permitted under § 240.11, the Director shall promptly publish the notice, in the FEDERAL REGISTER, required in paragraph (a) of this section, and shall notify the Executive Secretary of the date on which vessels subject to the jurisdiction of the United States have ceased a specialized fishery.

(b) It shall be unlawful for any person or fishing vessel subject to the jurisdiction of the United States to use, during the period from 0001 hours March 1 to 2400 hours May 31 fishing gear capable of catching demersal species, including any trawl gear or similar devices, gillnet or hook and line except that in the area delineated in (1) below, hooks having a gape of not less than 3 cm may be used, in:

(1) Subarea 5, two areas bounded by straight lines connecting the following coordinates in the order listed:

(i) 69°55'W-42°10'N, 69°10'W-41°10'N, 68°30'W-41°35'N, 68°45'W-41°50'N, 69°00'W-41°50'N.

(ii) 67°00'W-42°20'N, 67°00'W-41°15'N, 65°40'W-41°15'N, 65°40'W-42°00'N, 66°00'W-42°20'N.

(2) It shall be unlawful for any person or fishing vessel subject to the jurisdiction of the United States to use, during the period from 0001 hours, February 1, to 2400 hours, May 31 fishing gear capable of catching demersal species, including any trawl gear or similar devices, gill net, or hook and line in Division 4X of Subarea 4 bounded by straight lines connecting the following coordinates, in the order listed:

67°00'W-43°00'N, 66°32'W-42°42'N, 66°32'W-42°20'N, 66°00'W-42°20'N, 65°44'W-42°04'N, 64°00'W-42°49'N, 64°00'W-43°30'N, 65°40'W-43°00'N.

(c) It shall be unlawful for any person subject to the jurisdiction of the United States to take fish, other than crustacea, utilizing fishing vessels over 130 feet in length, with fishing gear other than pelagic fishing gear (purse seines or true mid-water trawls, using mid-water trawl doors incapable of being fished on the bottom), in the area adjacent to the United States coast within such parts of Subarea 5, and Statistical Area 6, which lies north of 39°00'N, and north of straight lines connecting 73°30'W-39°00'N, 72°33'W-40°20'N, and 68°15'W-40°20'N, and south and west of a straight line drawn between the points: 68°15'W-40°20'N, and 70°00'W-43°17'N.

## RULES AND REGULATIONS

(d) It shall be unlawful for any person or fishing vessel subject to the jurisdiction of the United States permitted to fish in the areas defined according to § 240.13 (b) and (c) to attach any protective device to pelagic fishing gear or employ any means that would, in effect, make it possible to fish for demersal species.

## § 240.14 Gear restrictions.

(a) In Subareas 1, 2, and 3, no person shall fish for regulated species with a trawl net or nets, parts of nets, or netting of manila or of the trade named twines, under the chemical category of polypropylene, having a mesh size of less than 5½ inches (130 mm.), or a trawl net or nets or parts of nets, or netting of material other than manila or polypropylene twine, unless it shall have a selectivity equivalent to that of a 5½ inch (130 mm.) manila trawl net.

(b) In Subareas 4 and 5, no person shall fish for haddock or cod with a trawl net or nets, parts of nets, other than the cod end, or netting of manila or of the trade named twines, under the chemical category of polypropylene having a mesh size of less than 4½ inches (114 mm.) and having a cod end of meshes of less than 5½ inches (130 mm.).

(c) The use in fishing for haddock or cod within the Regulatory area of any device or method which would, or otherwise, have the effect of diminishing the size of said meshes of the trawl net is prohibited: *Provided*, That an approved chafer described in § 240.2(d) may be used.

## § 240.15 General restrictions.

(a) Except as provided in paragraphs (b), (c), and (d), of this section, after the dates announced in the manner provided in § 240.13(a), for the closing of the unrestrictive fishing for certain species in Division 4X or Division 4W of Subarea 4 and Subarea 5, it shall be unlawful for any master or other person in charge of a fishing vessel to possess such regulated ground fish species on board such vessel in those areas or to land such regulated ground fish species in those areas in any port or place until the next succeeding fishing season reopens on January 1 next.

(b) (1) Any fishing vessel which had departed port to engage in fishing for regulated groundfish species under the provisions of § 240.3 prior to the date of the closure for such regulated species in either Division 4X or 4W in Subarea 4, or Subarea 5, may continue to take and retain such species in the Division or Subarea for which the closure has been announced, for a period of time not to exceed 10 days, at which time fishing for such species in the closed Division or Subarea shall be prohibited. Within 48 hours after the expiration of the 10-day period, each such vessel must return to a port or place in the United States, and the master or person in charge must immediately, on his return, notify any officer of the National Marine Fisheries Service, U.S. Bureau of Customs or Coast Guard, of his arrival.

(2) Any master or person in charge of a fishing vessel, licensed pursuant to § 240.3, may continue to fish after the date of closure, in any subarea or division, the provisions of the next preceding paragraph notwithstanding, but should he elect to do so, the quantity of such regulated species in his possession on each trip must not exceed 5,000 pounds or 10 percent (10%) by weight of all other fish on board.

(c) Any master or person in charge of a fishing vessel, which has departed port after the date of closure of unrestrictive fishing for certain regulated groundfish species in Division 4X or 4W in Subarea 4, or Subarea 5, may take, possess on board, and land in any port or place, such regulated species as may be taken incidentally to a fishery for nonregulated species: *Provided*, That the master of the said vessel has on board the appropriate license as required under § 240.3(a) and complies with the limitations specified in § 240.4, and the reporting requirements, where required, in § 240.5(b): *Provided further*, That nothing contained herein shall be construed to amend, modify, or repeal those portions of the regulations relating to areas closed to all demersal fishing, which may be found in § 240.13(d).

(d) The provisions of this subpart shall apply to all fishing trips begun during the current calendar year, whether completed before January 1, or not.

(e) The provisions of this subpart shall be enforced in accordance with, and not supersede the provisions of § 240.4.

## Subpart C—Flatfish Fisheries

## § 240.20 Definitions.

(a) Unless otherwise defined herein, the terms used in this subpart will have the meanings ascribed to them in § 240.2.

(b) Regulations in this subpart will apply to American plaice (*Hippoglossoides platessoides* (Fab.)), Yellowtail flounder (*Limanda ferruginea* (Storer)), and other flounders in aggregate grey sole or witch (*Glyptocephalus gynoglossus* (L.)), dab or American plaice (*Hippoglossoides platessoides* (Fab.)), fluke or summer flounder (*Paralichthys dentatus* (L.)), blackback, lemon sole or winter flounder (*Pseudopleuronectes americanus* (Walb.)).

## § 240.21 Catch quota.

(a) An annual catch limitation is placed upon the total quantity of yellowtail flounder, witch flounder, and American plaice permitted to be taken by persons or fishing vessels subject to the jurisdiction of the United States.

(1) In Subdivisions 4V, 4W, and 4X, of Subarea 4. The aggregate catch of yellowtail flounder, witch flounder, and American plaice in the above areas by persons or fishing vessels subject to the jurisdiction of the United States shall not exceed 500 metric tons.

(2) The annual catch limitation placed upon yellowtail flounder, permitted to be taken by persons or fishing vessels subject to the jurisdiction of the United States east of 60°00' West longitude in

Subarea 5, shall not exceed 15,900 metric tons and shall be taken in quarterly increments as follows:

Quarter	Catch quota	Expected accumulated catch
Jan. 1 to Mar. 31.....	3,850	3,850
Apr. 1 to June 30.....	3,850	7,700
July 1 to Sept. 30.....	4,900	12,600
Oct. 1 to Dec. 31.....	3,300	15,900

(3) The annual catch quota of yellowtail flounder west of 69°00' West longitude in Subarea 5, and in Statistical Area 6, by persons or fishing vessels subject to the jurisdiction of the United States shall not exceed 3,990 metric tons. The incidental fishery for yellowtail flounder west of 69°00' West Longitude in Subarea 5 and in Statistical Area 6, by persons or fishing vessels subject to the jurisdiction of the United States shall not exceed 2,268 kg (5000 lbs) or 10 percent by weight, whichever is greater, of all fish on board such vessel.

(b) The Director may adjust the quarterly increments of this subpart by publication of a notice in the Federal Register.

(c) An annual catch limitation is placed upon the aggregate quantity of flounder other than yellowtail permitted to be taken by persons or fishing vessels subject to the jurisdiction of the United States in Subarea 5, and in Statistical Area 6. The aggregate catch of such species in the above areas by persons or fishing vessels subject to the jurisdiction of the United States shall not exceed 23,900 metric tons.

## § 240.22 Open season.

(a) The open season for regulated flatfish species in areas under quota in § 240.21, shall begin at 0001 hours local time on the 1st day of January 1975 and terminate at a time and date to be announced by the Director, by publication of a notice in the FEDERAL REGISTER. In the event of a closure during any quarter, open season fishing for yellowtail flounder shall resume on the first day of the next quarter.

## § 240.23 Closed season and areas.

(a) The Director shall announce the closure of the season by publication of a notice in the FEDERAL REGISTER, specifying the time and date for the termination of specialized fishery for certain regulated flatfish species in Subarea 3, and Subarea 5.

(b) The National Marine Fisheries Service maintains records of the catches of regulated flatfish species made during the open seasons in those areas under quota limitations specified in § 240.21 by vessels under the jurisdiction of the United States, participating in the fishery.

(c) When the accumulative and estimated catch of certain regulated flatfish species, making allowance for the incidental catch for the remainder of the year, equals 100 percent of the allowable catch permitted under § 240.21, the Director shall promptly notify the Ex-

Executive Secretary of the date on which vessels subject to the jurisdiction of the United States have ceased a specialized fishery.

(d) Announcement shall also be made by publication of a notice in the FEDERAL REGISTER of the closing time and date of the first, second, and third quarters when the Director has determined, on the basis of catch data and catch rates, that the accumulative catch (landings plus discards) of yellowtail flounder in Subarea 5, in either area (east or west of 69°00' W), will equal the quarterly quota established in § 240.21(b).

#### § 240.24 Gear restrictions.

(a) In Subareas 4 and 5, no person shall fish for yellowtail flounder with a trawl net or nets, parts of nets, other than the cod end, or netting of manila or of the trade named twines, under the chemical category of polypropylene having a mesh size of less than 4½ inches (114 mm.) and having a cod end of meshes of less than 5½ inches (130 mm.).

(b) The use in fishing for regulated species within the Regulatory area of any device or method which would have the effect of diminishing the size of said meshes or obstruct the meshes of the trawl net, is prohibited: *Provided*, That an approved chafer, described in § 240.2 (d) may be used.

#### § 240.25 General restrictions.

(a) Except as provided in paragraphs (a) (1) or (2) and (b) of this section, after the dates announced in the manner provided in § 240.23 for the closing of the fishing season or seasons, it shall be unlawful for any master or other person in charge of a fishing vessel to possess such regulated flatfish species in the closed Regulatory areas or to land such species taken in those areas in any port or place until the next succeeding open season.

(1) In the event of a closure of any of the first three quarters, as provided under § 240.23(d), any fishing vessel which had departed port to engage in yellowtail flounder fishing in Subarea 5 prior to the date of the closure, may continue to take and retain yellowtail flounder in the area subject to the closure for a period of time not to exceed 5 days, at which time fishing for yellowtail flounder in the closed area shall be prohibited.

(2) In the event of an annual closure as provided under § 240.23, any fishing vessel which had departed port to engage in fishing for regulated flatfish species in Subarea 5, prior to date of the closure, may continue to take and retain such species in the area subject to the closure, for a period of time not to exceed 10 days, at which time fishing in the closed area shall be prohibited. Within 24 hours after the expiration of either the 10-day or 5-day period, provided under the preceding paragraph, each such vessel must return to a port or place in the United States and the master or person in charge must immediately, on the return, notify any appropriate official of the National Marine Fisheries Service,

U.S. Bureau of Customs or Coast Guard, of his arrival.

(b) Any master or person in charge of a fishing vessel which has departed port after the date of closure in Subarea 5, may take, possess on board, and land in any port or place, such regulated flatfish species as may be taken incidentally in such closed area to a fishery for non-regulated species: *Provided*, That the owner or operator of the said vessel has on board the appropriate license as required under § 240.3(a) and complies with the limitations specified in § 240.4 and the reporting requirements, where required, in § 240.5(b). *Provided further*, That nothing contained herein shall be construed to amend, modify, or repeal those portions of the regulations relating to areas closed to all demersal fishing which may be found in § 240.13(d).

Nothing contained herein shall be construed to amend, modify, or repeal those portions of the regulations relating to those areas closed to demersal fishing as stated in § 240.13. The provisions of this subpart shall apply to all fishing trips begun during the current calendar year.

#### Subpart D—Hake Fisheries

##### § 240.30 Definitions.

(a) Unless otherwise defined herein, the terms used in this subpart will have the meanings ascribed to them in § 240.2.

(b) Regulations in this subpart will apply to silver hake, (*Merluccius bilinearis* (Mitch.)), and red hake, (*Urophycis chuss* (Walb.)).

##### § 240.31 Catch quota.

(a) An annual catch limitation is placed upon the quantity of silver hake permitted to be taken in Division 5Y and Subdivisions 5Ze and 5Zw of Subarea 5, and in Statistical Area 6. The aggregate catch of silver hake permitted to be taken by persons or fishing vessels subject to the jurisdiction of the United States in each area is as follows:

(1) The annual catch of silver hake in Division 5Y of Subarea 5 shall not exceed 13,000 metric tons.

(2) The annual catch of silver hake in Subdivision 5Ze of Subarea 5 shall not exceed 11,100 metric tons.

(3) The annual catch of silver hake in both Subdivision 5Zw of Subarea 5 and in Statistical Area 6 shall not exceed 18,900 metric tons.

(b) An annual catch limitation is placed upon the quantity of red hake permitted to be taken east of 69° West longitude in Division 5Z of Subarea 5 and West of 69° West longitude in Division 5Z of Subarea 5 and in Statistical Area 6. The aggregate catch of red hake by persons or fishing vessels subject to the jurisdiction of the United States, in each area is as follows:

(1) The annual catch of red hake east of 69°00' West longitude in Division 5Z of Subarea 5, shall not exceed 1,000 metric tons.

(2) The annual catch of red hake west of 69°00' West longitude in Division 5Z of Subarea 5 and in Statistical Area 6 shall not exceed 11,900 metric tons.

It shall be unlawful for any person subject to the jurisdiction of the United States to conduct a directed fishery for silver hake or red hake after closure of the fishery.

##### § 240.32 Open season.

(a) The open season for silver hake fishing in Division 5Y and 5Z of Subarea 5, and red hake fishing in Division 5Z of Subarea 5, shall begin at 0001 hours of the 1st day of January 1975 and terminate at a time and a date to be determined pursuant to § 240.33.

##### § 240.33 Closed season and areas.

(a) The Director shall announce the closure of the season by publication of a notice in the FEDERAL REGISTER, specifying the time and date for the termination of specialized fishery for silver hake or red hake in Subarea 5.

(b) The National Marine Fisheries Service maintains records of the catches of silver hake or red hake made in each Division of Subarea 5 during the open season by vessels, under the jurisdiction of the United States, participating in the fishery.

(c) When the accumulative and estimated prospective catch of silver hake and red hake in each Division of Subarea 5, making allowance for the incidental catch for the remainder of the year, equals 100 percent of the allowable catch permitted under § 240.31, the Director shall promptly notify the Executive Secretary of the date on which its vessels have ceased a specialized fishery.

##### § 240.34 Gear restrictions.

There are no gear restrictions regarding fishing for silver or red hake.

##### § 240.35 General restrictions.

(a) (1) Any fishing vessel which had departed port to engage in silver or red hake fishing under the provisions of § 240.3(a), prior to the date of closure of silver or red hake fishing in either Division 5Y or 5Z of Subarea 5, may continue to take and retain silver or red hake in the Divisions for which the closure has been announced for a period of time not to exceed 5 days, at which time fishing for silver or red hake in the closed Division shall be prohibited. Within 48 hours after the expiration of the 5-day period, each such vessel must return to a port or place in the United States and the master or person in charge must immediately, on his return, notify any appropriate officer of the National Marine Fisheries Service, U.S. Customs Service, or Coast Guard, of his arrival.

(2) Any master or person in charge of a fishing vessel licensed to take silver or red hake from waters of the Convention area may continue to fish after the date of closure in any Subarea or Division, the provisions of the next preceding paragraph notwithstanding, but should he elect to do so, the quantity of silver or red hake in his possession must not exceed 5,000 pounds or 10 percent (10 percent) by weight of all other fish on board.

(b) Any master or person in charge of a fishing vessel which has departed port after the date of closure of silver or red hake fishing in Division 5Y or 5Z of Subarea 5, may take and possess on board, and land in any port or place, such silver or red hake as may be taken incidentally to a fishery for nonregulated species: *Provided*, That the master of the said vessel has on board the appropriate license as required under, § 240.3(a) and complies with the limitations specified in § 240.4 and the reporting requirements, where required in § 240.5(b): *Provided further*, That nothing contained herein shall be construed to amend, modify, or repeal those portions of the regulations relating to areas closed to all demersal fishing, which may be found in § 240.13(d).

(c) The provisions of this subpart shall apply to all fishing trips begun during the current calendar year, whether completed before January 1, or not.

#### Subpart E—Pelagic Fisheries

##### § 240.40 Definitions.

(a) Unless otherwise defined herein, the terms used in this Subpart will have the meanings ascribed to them in Subpart A, § 240.2.

(b) Regulations in this subpart will apply to herring (*Clupea harengus* L.), mackerel (*Scomber scombrus* L.), and squid (all species).

##### § 240.41 Catch quota.

(a) An annual catch limitation is placed upon the quantity of herring permitted to be taken in Divisions 4X and 4W of Subarea 4, Divisions 5Y and 5Z of Subarea 5, and in Statistical Area 6. The aggregate catch by persons or fishing vessels subject to the jurisdiction of the United States in each area is as follows:

(1) The annual catch of herring by persons or fishing vessels fishing in Divisions 4X and 4W in Subarea 4 shall not exceed 1,000 metric tons.

(2) The annual catch of herring by persons or fishing vessels fishing in Division 5Y and Subarea 5 shall not exceed 10,750 metric tons.

(3) The annual catch of herring by persons or fishing vessels fishing in Division 5Z of Subarea 5, and in Statistical Area 6 shall not exceed 8,400 metric tons.

(b) An annual catch limitation is placed upon the quantity of mackerel permitted to be taken in Subareas 3 and 4 and 5 and in Statistical Area 6. The aggregate catch by persons or fishing vessels subject to the jurisdiction of the United States fishing in each area is as follows:

(1) The annual catch of mackerel by persons or fishing vessels fishing in Subareas 3 and 4 shall not exceed 1,000 metric tons.

(2) The annual catch of mackerel by persons or fishing vessels fishing in Subarea 5 and in Statistical Area 6 shall not exceed 4,700 metric tons.

##### § 240.42 Open season.

The open season for herring or mackerel shall begin at 0001 hours of the first day of January each year and terminate

in each subarea at a time and date to be determined and announced as provided in § 240.43.

##### § 240.43 Closed season and areas.

(a) The Service Director shall maintain records of the catches of herring or mackerel by fishing vessels subject to quota allocations in the specific areas and/or Subareas and Statistical Areas, or combination of such, as previously stated in § 240.41, during the open season. The Service Director shall announce the closure dates for herring or mackerel fishing in Divisions 5Y and 5Z of Subarea 5, when the accumulated catch and estimated catch of herring or mackerel, the quantity estimated to be taken before closure could be introduced, and the likely incidental catch for the remainder of the year, equal 100 percent of the allowable catch permitted under § 240.41. Such announcement of the season closure dates shall be made by publication of a notice in the FEDERAL REGISTER.

(b) The Executive Secretary shall maintain records of the catches by fishing vessels, of all contracting governments participating in fishing for herring, subject to quota regulations in Subarea 4, during open seasons for which specific allocations have not been assigned. The Executive Secretary shall notify the United States when the accumulated catch and estimated catch of herring in Divisions 4W and 4X of Subarea 4, the quantity estimated to be taken before closure could be introduced, and the likely incidental catch for the remainder of the year, equal 100 percent of the allowable catch permitted under § 240.41. The Service Director shall announce the closure dates for the herring fishing season for the specific areas and/or Subareas and Statistical Areas, or combination of such, as previously stated in § 240.41, within 10 days of the receipt of such notification from the Executive Secretary. Such announcement of the season closure dates shall be made by publication of a notice in the FEDERAL REGISTER.

##### § 240.44 Gear restrictions.

There are no gear restrictions regarding fishing for herring or mackerel.

##### § 240.45 General restrictions.

(a) Except as provided in § 240.4, and as provided below, after the date announced in manner provided in § 240.43, for the closing of the herring or mackerel fishing season, it shall be unlawful for any master or other person in charge of a fishing vessel to possess herring or mackerel taken in the closed subareas or to land herring taken in those subareas in any port or place until the next succeeding open season for herring or mackerel.

(b) In the event of an annual closure in the specific areas, and/or Subareas, and Statistical Areas, or combination of such, as previously stated in § 240.41, any fishing vessel, which had departed port to engage in herring or mackerel fishing in Subarea 5 prior to the date of closure, may continue to take and retain herring or mackerel in that subarea after the clo-

sure, for a period of time not to exceed 2 days, at which time fishing for herring or mackerel in the closed subarea shall be prohibited. Within 24 hours after the expiration of the 2-day period, each fishing vessel must return to a port or place in the United States, and the master or person in charge of the fishing vessel must then immediately notify an authorized official of the vessel's arrival in port.

(c) In the event of an annual closure as provided in § 240.43(b) in the specific areas and/or Subareas, and Statistical Areas, or combination of such, as previously stated in § 240.41, any fishing vessel, which had departed port to engage in herring fishing in Subarea 4 prior to the date of closure, may continue to take and retain herring in that subarea after the closure, for a period of time not to exceed 4 days, at which time fishing for herring in the closed subarea shall be prohibited. Within 24 hours after the expiration of the 4-day period, each fishing vessel must return to a port or place in the United States, and the master or person in charge of the fishing vessel must then immediately notify an authorized official of the vessel's arrival in port.

(d) For the purposes of law enforcement and inspection, duly authorized officials shall have reasonable access to any area on board a fishing vessel, transport, or shore facility where fish are landed, handled, stored, or processed, and to areas where fishing gear or parts of fishing gear are used, assembled, or stored.

##### § 240.46 Size limits.

A size limit is placed on the length of herring permitted to be taken by persons or fishing vessels, under the jurisdiction of the United States, in those portions of Division 4W south of 44°52'N. latitude and Division 4X south of 43°50'N. latitude of Subarea 4 and in Subarea 5.

(a) The taking or possession of herring less than 9 inches (22.7 cm), measured from the tip of the snout to the end of the tail, is prohibited except as provided in paragraph (b) of this section.

(b) A person may take herring on any trip less than 9 inches (22.7 cm), measured as specified in paragraph (a) of this section: *Provided*, that the total amount taken does not exceed 10 percent by weight or 25% by count of all herring caught in the areas above, specified by that fishing vessel during such trip. A trip shall be considered to be not more than 90 days on grounds as determined by examination of the logbook.

#### Subpart F—All Other Finfish

##### § 240.50 Definitions.

(a) Unless otherwise defined herein, the terms used in this subpart will have the meaning ascribed to them in Subpart A, § 240.2.

(b) Regulations of this subpart will apply to all other finfish taken by persons or fishing vessels subject to the jurisdiction of the United States in Subarea 5 and Statistical Area 6, and such other finfish not previously mentioned in § 240.10, 20, 30, and 40.

## § 240.51 Catch quota.

An annual catch limitation is placed upon the quantity of other finfish as defined in § 240.2(c)(5) permitted to be taken in Subarea 5 and in Statistical Area 6. The aggregate catch of all other finfish in the above areas by persons or fishing vessels subject to the jurisdiction of the United States shall not exceed 68,000 metric tons.

## Subpart G—Squid Fisheries and Shellfish § 240.60 Definitions.

(a) Unless otherwise defined herein, the terms used in this subpart will have the meanings ascribed to them in Subpart A, § 240.2.

(b) Regulations of this subpart will apply to all squid and shellfish taken by persons or fishing vessels subject to the jurisdiction of the United States in Subarea 5 and Statistical Area 6.

## § 240.61 Catch quota.

An annual catch limitation is placed upon the quantity of squids, short finned and long finned, permitted to be taken in Subarea 5 and in Statistical Area 6. The catch of such squid in the above areas by persons or fishing vessels subject to the jurisdiction of the United States shall not exceed 5,600 metric tons.

## Subpart H—Overall Quota

## § 240.70 Definitions.

(a) Unless otherwise defined herein, the terms used in this subpart will have the meanings ascribed to them in Subpart A, § 240.2.

(b) Regulations of this subpart will apply to all stocks and species in Subarea 5 and in Statistical Area 6 excluding menhaden, tuna, billfish and sharks other than dogfish.

## § 240.71 Catch quota.

The aggregate catch of all such stocks and species in the above areas by persons or fishing vessels subject to the jurisdiction of the United States shall not exceed 211,000 metric tons.

## APPENDIX

## OPTIONAL SETTLEMENT AGREEMENT FORM

This agreement is entered into between the United States Government and \_\_\_\_\_ (hereinafter "the owner"), owner of vessel \_\_\_\_\_ official number \_\_\_\_\_ (hereinafter "the vessel"), operating in the ground-fisheries in Subarea(s) \_\_\_\_\_ (hereinafter "settlement area") of the ICNAP

regulatory area, as defined in Chapter II, Subchapter E, Part 240 of Title 50 Code of Federal Regulations. This agreement covers the following species: \_\_\_\_\_ (hereinafter "settlement fish").

The purpose of this agreement is to provide for the settlement of cases involving violations of the Northwest Atlantic Fisheries Act of 1950, and in particular violations set forth in 50 CFR 240 \_\_\_\_\_ regarding regulations governing the taking of settlement fish in the settlement area. The purpose of this settlement agreement is to assure compliance with the principles of the Northwest Atlantic Fisheries Act of and, in accordance with the Fish and Wildlife Act of 1956, as amended, to take required steps for the development, advancement, management, conservation, and protection of the fisheries resources of the United States. The parties to this agreement agree as follows:

1. This agreement shall cover the period commencing on \_\_\_\_\_ and continuing for a period of \_\_\_\_\_ days and terminating on \_\_\_\_\_. Settlement under the provisions of \_\_\_\_\_ shall take place within ten (10) days of the conclusion of each quarter or period if otherwise stated.

2. The owner agrees that the master or other person in charge of the vessel shall maintain an accurate log of the fishing operations of the vessel, showing the date, type and size of gear used, locality fished, duration of fishing, time of tow, and the estimated weight of each species taken at 12-hour intervals. For the purpose of providing information useful in the implementation of the agreement and detecting violations thereof, the log book shall be made available for inspection and copying by an authorized official of the National Marine Fisheries Service within 48 hours of completion of each fishing voyage conducted by the vessel during the period set forth in paragraph 1.

3. The owner shall also notify the Regional Director in writing, within 48 hours of the sale of the catch of the vessel, of the total quantity of fish landed and the gross sales price and the quantity of settlement fish landed and the total price received for such settlement fish and shall supply a copy of a settlement sheet which accurately reflects the selling price of the catch and each species (to the extent species are separately sold) and the distribution thereof.

4. (a) In the event that the quantity of settlement fish taken on a trip exceeds 20 percent (the quantity permitted), the owner shall deposit with the Regional Director a sum representing 20 percent of the value to the owner of the excess settlement fish over that amount permitted.

(b) The value to the owner of excess settlement fish on each voyage during the period shall be computed by determining the value of the haddock taken in excess of the amount permitted by paragraph 4 on the basis of the average price received for all settlement fish on the trip.

5. The Regional Director shall maintain a record of the quantity of all fish including

settlement fish taken by the vessel, and the maximum amount of settlement fish permitted by the regulations for each trip completed during the period set forth in paragraph 1. At the end of such period, the Regional Director shall compute the total quantity of settlement fish taken during the period and the total amount of settlement fish permitted by regulation during that period, which is the sum of the maximum quantities of settlement fish permitted by paragraph 4 for each trip during the period.

6. If the total quantity of settlement fish taken during the period is equal to or less than the total amount permitted, the entire amount deposited shall be returned to the owner.

7. (a) If the total quantity of settlement fish taken during the period exceeds the total amount permitted during the period, the Regional Director shall retain from the amounts deposited during the period a sum representing the net value to the owner of the total net quantity of excess settlement fish for the period and shall return the remainder to the owner.

(b) The amount retained by the Regional Director shall be determined by:

(1) Subtracting the total quantity of settlement fish permitted during the period from the total quantity of settlement fish actually taken during the period.

(2) Multiplying the quantity of excess settlement fish by the average unit price actually received by the vessel for settlement fish on a trip for which a deposit was made pursuant to paragraph 4(a).

8. (a) Fishing voyages of a duration of four days or less shall be excluded from the computations provided herein unless the Regional Director determines that the trip is a bona fide fishing trip and not taken principally for the purpose of increasing the total quantity of settlement fish which might be taken during the period.

(b) A fishing voyage in respect of which the settlement fish on board exceeds \_\_\_\_\_ percent by weight of all fish on board caught in the settlement area shall not be included in the calculations as provided in paragraphs 6 and 7 of this agreement, but the owner agrees to forfeit to the Regional Director the value to the owner of the excess quantity of settlement fish with respect to that vessel. The amount of the forfeiture shall be computed as in paragraph 4.

## proposed rules

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rulemaking prior to the adoption of the final rules.

## DEPARTMENT OF AGRICULTURE

## Agricultural Marketing Service

## [7 CFR Part 917]

## FRESH PEARS, PLUMS, AND PEACHES GROWN IN CALIFORNIA

## Container and Pack Regulation

This notice invites written comment relative to a proposed amendment that would continue Peach Regulation 5 (§ 917.436; 40 FR 19633) indefinitely. Said regulation will expire on June 21, 1975, unless extended. The regulation specifies certain container marking and pack requirements for all interstate shipments of fresh California peaches and is effective under the marketing agreement and Order No. 917.

The proposed amendment was submitted by the Peach Commodity Committee, established pursuant to the marketing agreement, as amended, and Order No. 917, as amended (7 CFR Part 917), which regulate the handling of fresh pears, plums, and peaches grown in California. This is a regulatory program effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601-674).

All persons who submit written data, views, or arguments for consideration in connection with Peach Regulation 5, as published in the FEDERAL REGISTER on May 6, 1975, (40 FR 19633) of the proposed amendment published herein, shall file the same, in quadruplicate, with the Hearing Clerk, United States Department of Agriculture, Room 112A, Washington, D.C. 20250, not later than June 2, 1975. All written submissions made pursuant to this notice will be made available for public inspection at the office of the Hearing Clerk during regular business hours (7 CFR 1.27(b)).

Under the proposal, the provisions of § 917.436(b) preceding subparagraph (1) thereof (40 FR 19633) would be amended to read as follows:

## § 917.436 Peach Regulation 5.

(b) On and after May 7, 1975, no handler shall handle any package or container of any variety of peaches except in accordance with the following terms and conditions: . . .

Dated: May 13, 1975.

CHARLES R. BRADER,  
Deputy Director, Fruit and  
Vegetable Division, Agricultural  
Marketing Service.

[FR Doc.75-12915 Filed 5-15-75; 8:45 am]

## [7 CFR Part 930]

## CHERRIES GROWN IN MICHIGAN, NEW YORK, WISCONSIN, PENNSYLVANIA, OHIO, VIRGINIA, WEST VIRGINIA, AND MARYLAND

## Limitation of Handling

This notice invites comments relative to proposed amendment of rules and regulations established pursuant to Marketing Order No. 930. Such amendment would prescribe a minimum grade for reserve pool cherries, establish a uniform handler charge for processing, freezing, and the first 30 days storage of such cherries and set a uniform storage charge for each additional month of storage.

Said rules and regulations (Subpart—Rules and Regulations, 7 CFR Part 930-101-930.161) currently are in effect pursuant to Marketing Order No. 930 (7 CFR Part 930), regulating the handling of cherries grown in Michigan, New York, Wisconsin, Pennsylvania, Ohio, Virginia, West Virginia, and Maryland. This is a regulatory program effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601-674).

This proposed amendment of the rules and regulations was unanimously recommended by the Cherry Administrative Board, established under said order as the agency to administer the terms and provisions thereof. It proposes that reserve pool cherries meet at least the requirements of U.S. Grade B (§§ 52.801-52.812 of this title). It proposes that growers compensate handlers at the rate of 8.36 cents plus the cost of sugar, as of June 23, 1975, for each pound of reserve pool cherries received as raw unpitted cherries and processed into the form of 5 plus 1 frozen cherries (five pounds of raw pitted cherries combined with one pound of sugar) packed in new 30-pound containers and for the first 30 days storage in a suitable storage facility. It would also set a handler fee of 6.0 cents per container per month for storage thereafter of such cherries.

All persons who desire to submit written data, views, or arguments for consideration in connection with the proposed amendment shall file the same, in quadruplicate, with the Hearing Clerk, United States Department of Agriculture, Room 112, Administration Building, Washington, D.C. 20250, not later than June 16, 1975. All written submissions made pursuant to this notice will be made available for public inspection at the office of the Hearing Clerk during regular business hours (7 CFR 1.27(b)).

The proposed amendment is as follows:  
1. Paragraphs (c) and (d) of § 930.104 are amended to read as follows:

## § 930.104 Reserve pool requirements.

(c) Such cherries, for each handler who freezes cherries, shall reflect not less than the overall grade, quality, and condition of the total frozen production of said handler: *Provided*, That not less than 50 percent of said reserve pool cherries shall grade not lower than U.S. Grade "A" and the remainder not lower than U.S. Grade "B" (§§ 52.801-52.812 of this title) unless otherwise exempted by the Board.

(d) Such cherries, for each handler who does not freeze cherries and therefore obtains reserve cherries from another handler who does freeze cherries, shall reflect not less than the overall grade, quality, and condition of the total frozen production of the handler who freezes such cherries: *Provided*, That not less than 50 percent of said reserve pool cherries shall grade not lower than U.S. Grade "A" and the remainder not lower than U.S. Grade "B" (§§ 52.801-52.812 of this title) unless otherwise exempted by the Board.

2. Section 930.158 is amended to read as follows:

## § 930.158 Handler compensation charge.

(a) During the fiscal period ending April 30, 1976, each handler shall be compensated, as provided by § 930.58, by producers having an interest in the reserve pool, or their successors in interest:

(1) At the rate of \$0.0836 (8.36 cents) plus the cost of sugar as of June 23, 1975 (based on the manufacturers' price as averaged from three quotations, two of which shall be for beet sugar f.o.b. Michigan factories, and one for cane sugar f.o.b. New York) for each pound of reserve pool cherries received as raw unpitted cherries and processed into the form of 5 plus 1 frozen cherries (five pounds of raw pitted cherries combined with one pound of sugar) packed in new 30-pound capacity metal cans or any other 30 pound capacity containers as may be prescribed by the Board, as specified in § 930.104(a) of this subpart, and for storage in a suitable freezer storage facility for 30 days from the date the reserve pool cherries are placed in such storage facility; and

(2) At the rate of 6 cents per month for storage thereafter in a suitable freezer storage facility.

Dated: May 13, 1975.

CHARLES R. BRADER,  
Deputy Director, Fruit and  
Vegetable Division, Agricultural  
Marketing Service.

# DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

[14 CFR Part 71]

[Airspace Docket No. 75-RM-10]

## TRANSITION AREA

### Proposed Alteration

The Federal Aviation Administration is considering an amendment to Part 71 of the Federal Aviation Regulations which would alter the transition area at West Yellowstone, Montana.

Interested persons may participate in the proposed rule making by submitting such written data, views, or arguments as they may desire. Communications should be submitted in triplicate to the Chief, Air Traffic Division, Federal Aviation Administration, Park Hill Station, P.O. Box 7213, Denver, Colorado 80207. All communications received on or before June 16, 1975, will be considered before action is taken on the proposed amendment. No public hearing is contemplated at this time, but arrangements for informal conferences with Federal Aviation Administration officials may be made by contacting the Regional Air Traffic Division Chief. Any data, views, or arguments presented during such conferences must also be submitted in writing in accordance with this notice in order to become part of the record for consideration. The proposal contained in this notice may be changed in the light of comments received.

A public docket will be available for examination by interested persons in the office of the Regional Counsel, Federal Aviation Administration, 10455 E. 25th Avenue, Aurora, Colorado 80010.

An instrument landing system (ILS) is being installed to serve Runway 01 at Yellowstone Airport, West Yellowstone, Montana. Revised approach procedures have been developed and transition routes established based on the Targhee NDB at the outer marker site. It is necessary to alter controlled airspace at West Yellowstone to protect aircraft using this new navigational facility.

In consideration of the foregoing, the FAA proposes the following airspace action:

#### § 71.181 [Amended]

In 71.181 (40 FR 441) the description of the West Yellowstone, Mont., transition area is amended to read:

#### WEST YELLOWSTONE, MONT.

That airspace extending upward from 700 feet above the surface within 5 miles west and 9.5 miles east of the 026° and 206° bearings from the Targhee, Montana LOM (latitude 44°34'33" N, longitude 111°11'48" W), extending from 18 miles northeast to 18.5 miles southwest of the LOM; that airspace extending upward from 1200 feet above the surface within 5 miles each side of the 209° bearing from the LOM extending from the LOM to 41.5 miles southwest of the LOM, and 5 miles each side of the 304° bearing from the LOM extending from the LOM to the east edge of V343; that airspace extending upward from 10,700 MSL within a 29-mile radius of the Targhee LOM extending clockwise from the 081° bearing from the

LOM to 5 miles east of the 236° bearing from the LOM and within 5 miles each side of the 236° bearing from the LOM extending from the LOM to 50 miles southwest of the LOM; that airspace extending upward from 12,000 MSL within a 35-mile radius of the Targhee LOM extending clockwise from the 026° bearing from the LOM to the 081° bearing from the LOM; that airspace extending upwards from 13,000 MSL within a 35-mile radius of the Targhee LOM extending clockwise from the 315° bearing to the 026° bearing from the LOM, excluding that portion that overlies V343. This transition area is effective during the specific dates and times established in advance by a Notice to Airmen. The effective date and time will thereafter be continuously published in the Airman's Information Manual.

(Sec. 307(a) of the Federal Aviation Act of 1958, as amended (49 U.S.C. 1348(a)), and of Section 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)).)

Issued in Aurora, Colorado, on May 19, 1975.

M. M. MARTIN,  
Director,  
Rocky Mountain Region.

[FR Doc. 75-12868 Filed 5-15-75; 8:45 am]

#### [14 CFR Part 71]

(Airspace Docket No. 75-SO-49)

## TRANSITION AREA

### Proposed Alteration

The Federal Aviation Administration is considering an amendment to Part 71 of the Federal Aviation Regulations that would alter the Tri-City, Tenn., transition area.

Interested persons may submit such written data, views or arguments as they may desire. Communications should be submitted in triplicate to the Federal Aviation Administration, Southern Region, Air Traffic Division, P.O. Box 20636, Atlanta, Ga. 30320. All communications received on or before June 16, 1975, will be considered before action is taken on the proposed amendment. No hearing is contemplated at this time, but arrangements for informal conferences with Federal Aviation Administration officials may be made by contacting the Chief, Airspace and Procedures Branch. Any data, views or arguments presented during such conferences must also be submitted in writing in accordance with this notice in order to become part of the record for consideration. The proposal contained in this notice may be changed in light of comments received.

The official docket will be available for examination by interested persons at the Federal Aviation Administration, Southern Region, Room 645, 3400 Whipple Street, East Point, Ga.

The Tri-City transition area described in § 71.181 (40 FR. 441) would be amended as follows:

... Virginia Highlands Airport ... would be deleted and ... Virginia Highlands Airport; within an 8.5-mile radius of Hawkins County Airport, Rogersville, Tenn. (latitude 36°27'27" N, longitude 82°53'05" W) ... would be substituted therefor.

The proposed alteration is required to provide controlled airspace protection for

IFR operations at Hawkins County Airport. A prescribed instrument approach procedure to this airport, utilizing the Rogersville (private) Nondirectional Radio Beacon, is proposed in conjunction with the alteration of this transition area.

(Sec. 307(a) of the Federal Aviation Act of 1958 (49 U.S.C. 1348(a)) and of Sec. 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)).)

Issued in East Point, Ga., on May 8, 1975.

PHILLIP M. SWATEK,  
Director, Southern Region.

[FR Doc. 75-12869 Filed 5-15-75; 8:45 am]

#### [14 CFR Part 71]

(Airspace Docket No. 75-RM-13)

## TRANSITION AREA

### Proposed Alteration

The Federal Aviation Administration is considering an amendment to Part 71 of the Federal Aviation Regulations which would alter the transition area at Laramie, Wyoming.

Interested persons may participate in the proposed rule making by submitting such written data, views, or arguments as they may desire. Communications should be submitted in triplicate to the Chief, Air Traffic Division, Federal Aviation Administration, Park Hill Station, P.O. Box 7213, Denver, Colorado 80207. All communications received within 30 days after publication of this notice in the Federal Register will be considered before action is taken on the proposed amendment. No public hearing is contemplated at this time, but arrangements for informal conferences with Federal Aviation Administration officials may be made by contacting the Regional Air Traffic Division Chief. Any data, views, or arguments presented during such conferences must also be submitted in writing in accordance with this notice in order to become part of the record for consideration. The proposal contained in this notice may be changed in the light of comments received.

A public docket will be available for examination by interested persons in the office of the Regional Counsel, Federal Aviation Administration, 10455 E. 25th Avenue, Aurora, Colorado 80010.

On April 18, 1975, a notice was published in the Federal Register (40 FR. 17248) amending the transition area at Laramie, Wyoming. Subsequent to the publication of the final rule and prior to the effective date of the amendment, procedures were revised which would standardize the procedure turn altitude and the minimum holding altitude associated with the VOR RWY 12 SIAP. Additional 700-foot transition area is required to accommodate the revised procedures.

In consideration of the foregoing, the FAA proposes the following airspace action:

In § 71.181 (40 FR. 441) the description of the Laramie, Wyoming transition area, as amended by Docket

75-RM-6 (40 FR. 17248), is further amended to read as follows:

That airspace extending upward from 700 feet above the surface within a 9-mile radius of General Brees Field, Laramie, Wyoming (Lat. 41°18'50"N, Long. 105°40'25"W); within 5.5 miles south and 9.5 miles north of the Laramie, Wyoming VORTAC 301° radial extending from the 9-mile radius area to 18.5 miles northwest of the VORTAC and within 5 miles each side of the Laramie VORTAC 126° radial extending from the 9-mile radius area to 21 miles southeast of the VORTAC.

(Sec. 307(a) of the Federal Aviation Act of 1958, as amended, (49 U.S.C. 1348(a)), and of Section 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)).)

Issued in Aurora, Colorado, on May 16, 1975.

M. M. MARTIN,  
Director,  
Rocky Mountain Region.

[FR Doc. 75-12870 Filed 5-15-75; 8:43 am]

#### [14 CFR Part 71]

(Airspace Docket No. 75-CE-5)

## TRANSITION AREA

### Proposed Designation

The Federal Aviation Administration is considering amending Part 71 of the Federal Aviation Regulations so as to designate a transition area at Neodesha, Kansas.

Interested persons may participate in the proposed rule making by submitting such written data, views or arguments as they may desire. Communications should be submitted in triplicate to the Director, Central Region, Attention: Chief, Air Traffic Division, Federal Aviation Administration, Federal Building, 601 East 12th Street, Kansas City, Mo. 64106. All communications received on or before June 16, 1975 will be considered before action is taken on the proposed amendment. No public hearing is contemplated at this time, but arrangements for informal conferences with Federal Aviation Administration officials may be made by contacting the Regional Air Traffic Division Chief. Any data, views or arguments presented during such conferences must also be submitted in writing in accordance with this notice in order to become part of the record for consideration. The proposal contained in this notice may be changed in the light of comments received.

A public docket will be available for examination by interested persons in the Office of the Regional Counsel, Federal Aviation Administration, Federal Building, 601 East 12th Street, Kansas City, Mo. 64106.

A new public-use instrument approach procedure has been established for the Neodesha Municipal Airport, Neodesha, Kansas. Consequently, it is necessary to provide controlled airspace protection for aircraft executing this new approach procedure by designating a 700-foot transition area at Neodesha, Kansas.

In consideration of the foregoing, the Federal Aviation Administration proposes to amend Part 71 of the Federal Aviation Regulations as hereinafter set forth:

In § 71.181 (40 FR 441), the following transition area is added:

#### NEODESHA, KANSAS

That airspace extending upward from 700 feet above the surface within a 6½ mile radius of the Neodesha, Kansas Municipal Airport, excluding that portion which coincides with the Parsons, Kansas transition area.

(Sec. 307(a) of the Federal Aviation Act of 1958 (49 U.S.C. 1348), and of Section 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)).)

Issued in Kansas City, Missouri, on April 18, 1975.

C. R. MELUGIN, Jr.,  
Director, Central Region.

[FR Doc. 75-12871 Filed 5-15-75; 8:45 am]

#### [14 CFR Parts 25 and 121]

(Docket No. 9611; Notice No. 75-3A)

## SMOKE EMISSION FROM COMPARTMENT INTERIOR MATERIALS IN TRANSPORT CATEGORY AIRPLANES

### Extension of Comment Period

The Federal Aviation Administration proposed in Notice 75-3, published in the FEDERAL REGISTER on February 12, 1975 (40 FR 6506), to amend Parts 25 and 121 of the Federal Aviation Regulations to establish standards for the smoke emission characteristics of compartment interior materials used in transport category airplanes. It was indicated in Notice 75-3 that comments received on or before May 12, 1975, would be considered by the Administrator before taking action on the proposed rules.

By letter dated May 5, 1975, Peter M. Nemkov, Esq., on behalf of the Society of the Plastics Industry, Inc. (SPI), a trade association, requested a 30-day extension of time provided in Notice 75-3 for the submission of comments in order that the SPI position, with respect to certain areas of the proposed rules, could be fully coordinated with its membership. In view of the technical experience of the SPI members, some of which are aircraft compartment material manufacturers, the FAA believes that the requested extension of time should be granted.

I find that the petitioner has shown a substantive interest in the proposed rules, that good cause exists for the extension, and that the extension is consistent with the public interest.

Therefore, pursuant to the authority delegated to me by the Administrator, (14 CFR 11.45), the time within which comments on Notice 75-3 will be received is extended to June 11, 1975.

Issued in Washington, D.C. on May 9, 1975.

RICHARD P. SKULLY,  
Director,  
Flight Standards Service.

[FR Doc. 75-12867 Filed 5-15-75; 8:45 am]

## Hazardous Materials Regulations Board

### [49 CFR Part 177]

[Docket No. HM-110; Notice No. 75-5]

## USE OF CATALYTIC HEATERS IN CERTAIN MOTOR VEHICLES, AND REPAIRS TO VEHICLES IN CLOSED BUILDINGS

### Proposed Rule Making

On December 2, 1974, the Hazardous Materials Regulations Board (The Board) published Amendments Nos. 173-87 and 177-31 under Docket HM-110 (39 FR 41741). One portion of the amendment pertained to the use of catalytic heaters in the cargo compartment of a motor vehicle transporting flammable liquids or flammable compressed gases. The revision authorizes use of catalytic heaters in these motor vehicles if guards are installed to keep the cargo at least one foot away from the heater. The amendment was to become effective April 1, 1975, but those sections covered by this notice were postponed until October 1, 1975 (40 FR 12269).

After the revision was issued, a petition for reconsideration was received from Cargo Safe, Inc., a manufacturer of catalytic heaters, containing the following statement:

We believe the wording as it currently exists does not deal adequately with the temperature problem and can allow for dangerous catalytic heaters to be produced even though they conform to the present requirements.

Specifically, the petitioner seeks the addition of a limitation upon the temperature that may be reached on the outside surface of a catalytic heater used in the cargo compartment of a vehicle transporting flammable liquids or flammable compressed gases. Petitioner cited tests of a prototype heater, with guards 12 inches away from the heater, which allowed the outside skin temperature of the guard to reach 284° F.

After reviewing the data submitted in support of the petition, the Board has concluded that the petitioner's contention has merit. Accordingly, the Board proposes to add to paragraph (1) of § 177.834 a limit to the maximum temperature permitted on the outside surface of a catalytic heater which is used in the cargo compartment of motor vehicles transporting flammable liquids or flammable gases. However, the Board has not removed the requirement for the guard on the heater as the petitioner suggested because the guard affords protection against damage to packages coming in contact with the heater. The Board further believes that a catalytic heater needs to be marked so carriers will know if the heater complies with these requirements. Therefore, the Board is proposing that "Meets DOT Requirements" be marked on the heaters as a manufacturer's certification that the heater complies with the requirements of § 177.834 (1).

Upon further consideration, the Board believes that catalytic heaters should not be lighted or used in the cargo compartment of a motor vehicle containing flammable liquids or flammable gases if any

## PROPOSED RULES

flame is present on the catalyst or visible anywhere in the heater. Such a restriction is proposed to be added to § 177.834 (1) along with a requirement that catalytic heater manufacturers place a sign on each heater warning of this danger.

The Board also received a letter from Phillips Petroleum Company concerning the § 177.854(g) amendment; being different from what was proposed in the notice. After further review, it appears that the preamble did not clearly explain the rationale behind the final amendment, and that § 177.854(g) as amended does not clearly state the Board's intent. Therefore, what follows is a further explanation of the Board's decision and a proposed editorial revision of the section.

Prior to this rule making, § 177.854(g) contained a blanket prohibition against a vehicle containing any hazardous material being in a closed garage for repairs. In response to a petition, the Board proposed that this prohibition be lifted provided certain conditions existed in the closed garage. The proposed restriction was without regard to any particular class of hazardous material. Following a review of comments submitted, the Board decided that vehicles containing material which posed an inherent fire or explosion danger, i.e., explosives, flammable liquids or gases, should not be in a closed garage for repairs or maintenance regardless of the added conditions. Therefore, the amendment was written to allow vehicles containing hazardous materials, with certain exceptions, to be in a closed garage for repairs. This decision was a compromise between the original blanket prohibition and the proposed relaxation without regard to type of material on the vehicle. The Board is also proposing a definition for a closed building for purposes of § 177.854(g).

In consideration of the foregoing, in 49 CFR 177.834, paragraph (1) would be revised to read as follows:

## § 177.834 General requirements.

(1) *Use of cargo heaters with explosives and flammable commodities.*—(1) *Flammable liquids and flammable gases.* Except as provided in paragraphs (1)(2) and (1)(3) of this section, a flammable liquid or a flammable gas must not be loaded into a truck body or a trailer containing a combustion heater, or equipped with operable automatic temperature control equipment. Fuel tanks for automatic temperature control equipment must be emptied or removed from the vehicle, except that liquefied petroleum gas fuel tanks exterior to the vehicle body may have their valves closed and disconnected from the fuel feed lines instead of being emptied or removed.

(2) *Exceptions for catalytic heaters.* Flammable liquids and flammable gases may be loaded into or transported in the same cargo space of a truck body or trailer containing an operating catalytic heater provided—

(i) Guards are installed to prevent any cargo from being closer than 30.05 cm (12 inches) to the heater;

(ii) The heater is designed so that no part of the catalytic heater or its guard, which may come into contact with the cargo, will reach a temperature over 130° F. (55° C.);

(iii) There is no flame on the catalyst or anywhere in the heater;

(iv) The heater is marked "DO NOT LOAD INTO OR USE IN CARGO COMPARTMENT CONTAINING FLAMMABLE LIQUIDS OR GASES IF FLAME IS VISIBLE ON CATALYST OR IN HEATER;" and

(v) The heater is marked "MEETS DOT REQUIREMENTS." This marking will be considered a certification that the heater was manufactured in accordance with the requirements of this section.

(3) *Exception for certain automatic temperature control equipment.* A flammable liquid or a flammable gas may be transported in a vehicle equipped with automatic temperature control equipment if, (i) any electrical apparatus in the cargo compartment is of the non-sparking or explosion-proof type, (ii) no combustion apparatus is in the lading space; and (iii) there is no connection for return of air from the lading space to any combustion apparatus. The heating system must prevent heating of any part of the lading to a temperature of more than 130° F. (55° C.) and must conform to the requirements of § 393.77 of this title.

(4) *Explosives.* An explosive may not be loaded into a truck body or trailer which contains a combustion heater including a catalytic heater, or is equipped with operable automatic temperature control equipment. All fuel tanks for a heater or automatic temperature control equipment with which a truck body or trailer is equipped must be drained. All automatic heating or refrigeration machinery must be rendered inoperative by disconnection of the automatic controls and sources of power for its operation.

In 49 CFR 177.854, paragraph (g) would be revised to read as follows:

§ 177.854 Disabled vehicles and broken or leaking packages; repairs.

(g) *Repairs and maintenance to vehicles.* Except as provided in paragraph (h) of this section, no maintenance or repair using open flame or any type of welding may be performed on vehicles containing flammable liquids, flammable gases, oxidizers, or explosives.

(1) A vehicle containing explosives or a cargo tank containing a flammable liquid or a flammable gas (regardless of quantity) may not be inside a closed building for repairs or maintenance.

(2) A vehicle containing hazardous materials (other than one containing explosives or a cargo tank containing a flammable liquid or a flammable gas) may be inside a closed building for repairs or maintenance provided—

(i) There is no flame-producing or welding device in operation within the same enclosed area of the building; and

(ii) The vehicle has an operable means of motive power or is connected to an operable truck or truck tractor to facilitate its quick removal from the building.

(3) For purposes of this section, a closed building is any structure having a roof and at least three side walls, including any roll-up, sliding, or swing-out doors.

Interested persons are invited to give their views on these proposals. Communications should identify the docket number and be submitted in duplicate to the Secretary, Hazardous Materials Regulations Board, Department of Transportation, Washington, D.C. 20590. Communications received on or before July 15, 1975 will be considered before final action is taken on these proposals. All comments received will be available for examination by interested persons at the Office of the Secretary, Hazardous Materials Regulations Board, room 6215 Trans Point Building, Second and V Streets, SW., Washington, D.C., both before and after the closing date for comments.

This notice of proposed rule making is issued under the authority of the Transportation of Explosives Act (18 U.S.C. 831-835), and Section 6 of the Department of Transportation Act (49 U.S.C. 1655).

Issued in Washington, D.C. on May 9, 1975.

ROBERT A. KAYE,  
Board Member for the  
Federal Highway Administration.

[PR Doc. 75-12908 Filed 5-15-75; 8:45 am]

National Highway Traffic Safety  
Administration

[49 CFR Part 552]

[Docket No. 75-12; Notice 1]

PETITION PROCEDURES  
Proposed Rulemaking

This notice proposes a new regulation specifying the requirements for submission of petitions for rulemaking, and petitions for the commencement of defect or noncompliance proceedings, in accordance with section 124 of the National Traffic and Motor Vehicle Safety Act, 15 U.S.C. 1410a. It also describes the procedures the NHTSA would follow in acting upon the petition.

Section 124 of the Act was enacted as part of the Motor Vehicle and Schoolbus Safety Amendments of 1974. It provides that "Any interested person may file with the Secretary a petition requesting him (1) to commence a proceeding respecting the issuance of an order pursuant to section 103 or to commence a proceeding to determine whether to issue an order pursuant to section 152(b) of this Act." Section 103 is the basic authority for the issuance of motor vehicle safety standards. Section 152(b) is the provision, also enacted

## PROPOSED RULES

21487

as part of the 1974 Amendments, for a determination by the agency of a non-compliance with a safety standard or a defect related to motor vehicle safety. Section 124 also provides that "Within 120 days after filing of a petition . . . , the Secretary shall either grant or deny the petition." A denial must be accompanied by a FEDERAL REGISTER notice stating the reasons for the action.

The NHTSA receives several thousand communications per year, the great majority of which are intended simply to inform the agency of a problem encountered by the sender, to request information, or to make informal suggestions. Since the 1974 Amendments provide a deadline for agency action on petitions for rulemaking or for defect or non-compliance determinations, and require FEDERAL REGISTER notices for any disposition other than the commencement of the action requested, it is important that guidelines be established to clarify what incoming documents are to be treated as petitions. This agency has no intention of raising obstacles to the submission of petitions, and will liberally construe the requirements for petitioners who attempt to meet them. At the same time, in light of the considerable technical and legal effort required to make and implement a decision on each petition, it is important that "petition treatment" be limited to those documents actually intended by the sender to be petitions and receive formal disposition by the agency. Communications that do not qualify as petitions will continue to be treated under the regular NHTSA correspondence procedures.

A petition would be required to be written in English, have a heading that includes the word "Petition," and contain the name and address of the petitioner. The regulation would also reiterate the statutory requirements that the document "set forth facts which it is claimed establish that an order is necessary," and "set forth a brief description of the substance of the order which it is claimed should be issued." The regulation would provide that the petition should be addressed to the Administrator at the usual address. Mis-addressed petitions would not be denied petition treatment, but the 120-day period would not begin to run until the petition has been discovered and identified as such.

Upon receipt of a petition, the concerned Associate Administrator (usually the Associate Administrator for Motor Vehicle Programs) would conduct a technical review to determine whether there is a reasonable possibility that the requested order would be issued at the conclusion of the required proceedings (either for rulemaking or defect or non-compliance determinations). This review might consist solely of a review of in-house information, or it also might include some collection of other information, such as from the manufacturer of a vehicle with an alleged defect. Reflect-

ing the statute, the proposed procedures would allow an informal public hearing at this stage, at the discretion of the agency.

On the basis of the technical review, the Administrator or his delegate would decide whether there is a reasonable possibility of positive action, and grant or deny the petition accordingly, within the 120-day statutory period. If the subject of a granted petition were rulemaking, a rulemaking proceeding would promptly be initiated according to regular NHTSA procedures. If the subject were a safety-related defect or a noncompliance with the safety standards, the proceeding would commence with an investigation by the agency's Office of Defects Investigation or Office of Standards Enforcement respectively. In either case, of course, the ultimate disposition of the matter would depend on all the information and views developed during the rulemaking or investigatory proceedings. The grant of the petition would only determine the initiation of those proceedings. A denial would be noticed in the FEDERAL REGISTER, with reasons, within 30 days of the decision.

In light of the foregoing, it is proposed that a new Part 552, Petitions for Rulemaking, Defect, and Noncompliance Orders, be added to Title 49 of the Code of Federal Regulations, to read as set forth below.

Interested persons are invited to submit comments on the proposal. Comments should refer to the docket number and be submitted to: Docket Section, National Highway Traffic Safety Administration, Room 5108, 400 Seventh Street SW., Washington, D.C. 20590. It is requested but not required that 10 copies be submitted.

All comments received before the close of business on the comment closing date indicated below will be considered, and will be available for examination in the docket at the above address both before and after that date. To the extent possible, comments filed after the closing date will also be considered. However, the rulemaking action may proceed at any time after that date, and comments received after the closing date and too late for consideration in regard to the action will be treated as suggestions for future rulemaking. The NHTSA will continue to file relevant material as it becomes available in the docket after the closing date, and it is recommended that interested persons continue to examine the docket for new material.

Comment closing date: June 16, 1975.

Proposed effective date: June 16, 1975.

(Sec. 103, 119, 124, 152, Pub. L. 93-563, 80 Stat. 718 (16 U.S.C. 1392, 1407, 1410a, 1412); delegations of authority at 49 CFR 1.51 and 49 CFR 501.2)

Issued on May 13, 1975.

ROBERT L. CARTER,  
Associate Administrator,  
Motor Vehicle Programs.

## PART 552—PETITIONS FOR RULEMAKING, DEFECT, AND NONCOMPLIANCE ORDERS

Sec.	
552.1	Scope.
552.2	Purpose.
552.3	General.
552.4	Requirements for petition.
552.5	Improperly filed petitions.
552.6	Technical review.
552.7	Public hearing.
552.8	Determination whether to commence a proceeding.
552.9	Grant of petition.
552.10	Denial of petition.

## § 552.1 Scope.

This part establishes procedures for the submission and disposition of petitions filed by interested persons pursuant to the National Traffic and Motor Vehicle Safety Act and the Motor Vehicle Information and Cost Savings Act, to initiate rulemaking or to make a determination that a motor vehicle or item of replacement equipment does not comply with an applicable Federal motor vehicle safety standard or contains a defect which relates to motor vehicle safety.

## § 552.2 Purpose.

The purpose of this part is to enable the National Highway Traffic Safety Administration to identify and respond on a timely basis to petitions for rulemaking or defect or noncompliance determinations, and to inform the public of the procedures following in response to such petitions.

## § 552.3 General.

Any interested person may file with the Administrator a petition requesting him (1) to commence a proceeding respecting the issuance, amendment, or revocation of a motor vehicle safety standard, or (2) to commence a proceeding to determine whether to issue an order concerning the notification and remedy of a failure of a motor vehicle or item of replacement equipment to comply with an applicable motor vehicle safety standard or of a defect in such vehicle or equipment that relates to motor vehicle safety.

## § 552.4 Requirements for petition.

A petition filed under this part should be addressed and submitted to: Administrator, National Highway Traffic Safety Administration, 400 Seventh Street, SW., Washington, D.C. 20590. Each petition filed under this part must—

- Be written in the English language;
- Have, preceding its text, a heading that includes the word "Petition";
- Set forth facts which it is claimed establish that an order is necessary;
- Set forth a brief description of the substance of the order which it is claimed should be issued; and
- Contain the name and address of the petitioner.

## § 552.5 Improperly filed petitions.

(a) A petition that is not addressed as specified in § 552.4, but that meets the

V

5

## PROPOSED RULES

other requirements of that section, will be treated as a properly filed petition, received as of the time it is discovered and identified.

(b) A document that fails to conform to one or more of the requirements of § 552.4 (a) through (e) will not be treated as a petition under this part. Such a document will be treated according to the existing correspondence or other appropriate procedures of the NHTSA, and any suggestions contained in it will be considered at the discretion of the Administrator or his delegate.

## § 552.6 Technical review.

The appropriate Associate Administrator conducts a technical review of the petition, to determine whether there is a reasonable possibility that the requested order will be issued at the conclusion of the appropriate proceeding. The technical review may consist of an analysis of the material submitted, together with information already in the possession of the agency, or it may also include the collection of additional information, or a public hearing in accordance with § 552.7.

## § 552.7 Public hearing.

If the Associate Administrator decides that a public meeting on the subject of the petition would contribute to the determination whether to commence a proceeding, he issues a notice of public meeting for publication in the *Federal Register* to advise interested persons of the time, place, and subject matter of the public meeting and invite their participation. Interested persons may submit their views and evidence through oral or written presentation, or both. There will be no cross examination of witnesses. A transcript of the proceedings will be kept and exhibits may be accepted as part of the transcript. Sections 556 and 557 of Title 5, United States Code, do not apply to hearings held under this part. The Chief Counsel designates a member of his staff to serve as legal officer at the meeting.

## § 552.8 Determination whether to commence a proceeding.

At the conclusion of the technical review, the Administrator or his delegate determines whether there is a reasonable possibility that the order requested in the petition will be issued at the conclusion of the appropriate proceeding. If such a reasonable possibility is found, the petition is granted. If it is not found, the petition is denied. In either event, the petitioner is notified of the grant or denial not more than 120 days after receipt of the petition by the NHTSA.

## § 552.9 Grant of petition.

(a) If a petition for rulemaking with respect to a motor vehicle safety standard is granted, a rulemaking proceeding is promptly commenced in accordance with applicable NHTSA and statutory procedures. The granting of such a petition and the commencement of a rulemaking proceeding does not signify, however, that the rule in ques-

tion will be issued. A decision as to the issuance of the rule is made on the basis of all available information developed in the course of the rulemaking proceeding, in accordance with statutory criteria.

(b) If a petition with respect to a noncompliance or a defect is granted, a proceeding to determine the existence of the noncompliance or defect is promptly commenced by the initiation of an investigation by the Office of Standards Enforcement or the Office of Defects Investigation, as appropriate.

## § 552.10 Denial of petition.

If a petition is denied, a *FEDERAL REGISTER* notice of the denial is issued within 30 days of the denial, setting forth the reasons for denial of the petition.

[FR Doc. 75-12931 Filed 5-15-75; 8:45 am]

## FEDERAL LABOR RELATIONS COUNCIL

[5 CFR Parts 2411 and 2413]

## REVIEW FUNCTIONS OF THE COUNCIL AND CRITERIA FOR DETERMINING COMPELLING NEED FOR AGENCY POLICIES AND REGULATIONS

## Proposed Rulemaking

Notice is hereby given that the Federal Labor Relations Council, pursuant to section 4(b) of Executive Order 11491, as amended, is considering the adoption of revised rules governing the review functions of the Council and, pursuant to section 11(a) of the Order, is considering the adoption of rules to establish illustrative criteria for determining when a compelling need exists for internal agency policies or regulations concerning personnel policies and practices and matters affecting working conditions, within the meaning of section 11(a) of the Order.

A draft of the proposed rules is set out below as Parts 2411 and 2413 of Subchapter B of Chapter XIV of Title 5 of the Code of Federal Regulations. These Parts describe requirements and procedures for filing appeals to the Council, the criteria for determining compelling need, and the manner in which the council will process appeals, including issuance of its decisions.

Interested persons may submit views and suggestions in writing to the Executive Director, Federal Labor Relations Council, 1900 E Street NW., Washington, D.C. 20415. All communications received on or before June 6, 1975 will be considered before the Council takes final action on the proposed rules.

2411.53	Advisory opinions.
2411.54	Distribution of Council decisions.

**AUTHORITY:** 5 U.S.C. 3301, 7301; E.O. 11491, 3 CFR 1969 Comp., p. 191, 34 FR 17605; as amended by E.O. 11616, 3 CFR 1971 Comp., p. 191, 36 FR 17319; E.O. 11636, 3 CFR 1971 Comp., p. 232, 36 FR 24901; and by E.O. 11838, 40 FR 5743 and 7391.

## Subpart A—General Provisions

## § 2411.1 Scope.

This part sets forth the procedures under which the Council, as provided in section 4(c) of the order, will review decisions of the Assistant Secretary issued pursuant to section 6 of the order, negotiability issues as provided in section 11(c) of the order, and arbitration awards under the order.

## § 2411.2 Coverage.

This part applies to employees, agencies, and labor organizations covered by the order and for purposes of § 2411.49 to other interested persons.

## § 2411.3 Definitions.

In this part—

(a) "Order" means Executive Order 11491 of October 29, 1969, entitled "Labor-Management Relations in the Federal Service," as amended by Executive Order 11616 of August 26, 1971, by Executive Order 11636 of December 17,

1971, and by Executive Order 11838 of February 6, 1975.

(b) "Executive Director" means the Executive Director of the Council.

(c) "Party" means any person, employee, labor organization, or agency that participated as a party—

(1) In a matter that was decided by the Assistant Secretary under section 6 of the order; or

(2) In a matter that was decided by an agency head under section 11(c) of the order; or

(3) In a matter where the award of an arbitrator was issued under the order.

(d) "Assistant Secretary" means the Assistant Secretary of Labor for Labor-Management Relations, except that in matters arising under section 6(a) of the order involving the Department of Labor, it means the Vice Chairman of the Civil Service Commission.

(e) "Primary national subdivision" of an agency means a first-level organizational segment which has functions national in scope that are implemented in field activities.

(f) Terms defined in the order are used in this part with the meaning attached to them in the order.

## § 2411.4 Policy questions.

Notwithstanding the procedures set forth in this part, the Assistant Secretary or the Panel may refer for review and decision or general ruling by the Council any case involving a major policy issue that arises in a proceeding before, either of them. Any such referral shall be in writing and a copy of such referral shall be served on all parties to the proceeding. Before decision or general ruling, the Council shall obtain the views of the parties and other interested persons, orally or in writing, as it deems necessary and appropriate.

## Subpart B—Review of Decisions of the Assistant Secretary

## § 2411.11 Purpose.

This subpart, together with Subpart E, sets forth the procedures under which the Council will review decisions of the Assistant Secretary issued pursuant to section 6 of the order.

## § 2411.12 Considerations governing review.

A petition for review of a decision of the Assistant Secretary is not a matter of right, but of discretion, and, subject to the requirements of this part, will be granted only where there are major policy issues present or where it appears that the decision was arbitrary and capricious.

## § 2411.13 Who may file a petition; time limit for filing; opposition; service.

(a) Any party aggrieved by a final decision of the Assistant Secretary may petition the Council for review.

(b) The time limit for filing is 30 days from the date of the decision.

(c) An opposition to Council acceptance of a petition for review may be filed by any party within 30 days from the date of the petition.

## PROPOSED RULES

(d) A copy of the petition for review and of any opposition to acceptance shall be served by the filing party simultaneously on the other parties and on the Assistant Secretary.

## § 2411.14 Content of petition.

A petition must be a dated, self-contained document enabling the Council to rule on acceptance for review on the basis of its content without the necessity of recourse to the record. The petition must contain:

(a) A concise statement of the grounds on which review is requested;

(b) A summary of the evidence or rulings bearing on the issues, together with a summary of the arguments; and

(c) A copy of the decision of the Assistant Secretary which is being appealed including a copy of any decision, determination, report, or recommendation issued at an earlier stage in the proceeding and considered in his decision.

## § 2411.15 Council action on acceptance.

The Council shall review the petition and, if 50 percent or more of its members determine that the matter should be considered, the petition will be accepted. The Council shall promptly notify the parties whether the petition has been accepted or rejected.

## § 2411.16 Filing of briefs; Assistant Secretary as a party.

(a) Within 30 days from the date of the notice by the Council to the parties that the petition is accepted for review, the parties may file briefs with the Council (with specific references to the pertinent documents and, where applicable, with citations of authorities) which shall be served on the other parties.

(b) Where the Council grants review, the Assistant Secretary may, at his discretion, intervene and become a party to the proceeding.

## § 2411.17 Determinations of negotiability.

(a) Notwithstanding the procedures of this subpart, the Council, as provided in this section, will review a decision of the Assistant Secretary wherein it was necessary for him to make a negotiability determination in order to resolve the merits of an unfair labor practice complaint resulting from an alleged unilateral change in established personnel policies or practices or matters affecting working conditions.

(b) A petition for review of a decision wherein such a negotiability determination is made by the Assistant Secretary may be filed by the party subject to an adverse ruling under section 11(d) of the order.

(c) The time limit for filing is 30 days from the date of the Assistant Secretary's decision.

(d) A copy of the petition shall be served simultaneously on the other party and on the Assistant Secretary.

(e) A petition for review shall be dated and shall contain the following:

(1) A full and detailed statement of the aggrieved party's position including

reasons for disagreeing with the Assistant Secretary's decision as to whether a matter is negotiable under the order, without regard to the limitations in § 2411.51.

(2) A copy of pertinent documentary material including a copy of the Assistant Secretary's decision and a copy of any decision, determination, report, or recommendation issued at an earlier stage in the proceeding and considered in his decision.

(f) Within 30 days from the date of a petition for review of a decision wherein a negotiability determination is made by the Assistant Secretary, the other party shall file a full statement of its position on any matters relevant to the petition which it wishes the Council to consider in reaching its decision.

(g) The Assistant Secretary may, at his discretion, intervene and become a party to the proceeding.

(h) The Council shall give petitions filed under this section priority consideration.

(i) Subject to the requirements of this section, the Council shall issue its decision sustaining, setting aside in whole or in part, or remanding that portion of the decision of the Assistant Secretary wherein it was necessary for him to make a negotiability determination.

## § 2411.18 Council decision; compliance actions.

(a) A decision of the Assistant Secretary shall be sustained unless it is arbitrary and capricious or inconsistent with the purposes of the order.

(b) The Council shall issue its decision on the case sustaining, enforcing, modifying, and enforcing as so modified, setting aside in whole or in part, or remanding the decision of the Assistant Secretary.

(c) The Council has the overall responsibility to assure compliance with the Executive order and decisions rendered thereunder. However, the Council shall first remand the action to the Assistant Secretary for purposes of compliance consistent with its decision, without limitation on the power of the Council. If the Assistant Secretary finds the necessary action for compliance has not been taken, the matter shall revert to the Council for appropriate action.

## Subpart C—Review of Negotiability Issues

## § 2411.21 Purpose.

This subpart, together with Subpart E, sets forth the procedures under which the Council will review negotiability issues as provided in section 11(c) of the order.

## § 2411.22 Conditions governing review.

(a) The Council will consider a negotiability issue under the conditions prescribed by section 11(c) (4) of the order, namely: If, in connection with negotiations, the head of an agency (or his designee) has determined that a proposal is contrary to law, regulation, or the order and therefore not negotiable, a labor organization may appeal to the Council for a decision when—

(1) It disagrees with the agency head's determination that the proposal would violate applicable law, regulation of appropriate authority outside the agency, or the order; or

(2) It believes that the agency's regulations, as interpreted by the agency head, violate applicable law, regulation of appropriate authority outside the agency, or the order, or are not otherwise applicable to bar negotiations under section 11(a) of the order because they do not meet the criteria established in Part 2413 or because they were not issued at the agency headquarters level or at the level of a primary national subdivision.

(b) The Council will review a labor organization's appeal challenging an agency head's determination that an internal agency regulation bars negotiation only if the labor organization has first requested an exception to the regulation from the agency head and that request has been denied or has not been acted upon within the time limits prescribed by § 2411.24.

#### § 2411.23 Who may file a petition.

(a) A petition for review of a negotiability issue may be filed by a labor organization which is a party to the negotiations.

(b) An appeal challenging an agency regulation on grounds of failure to meet criteria established in Part 2413 or issuance below the agency headquarters or primary national subdivision level may be filed only by the national president of a labor organization (or his designee) or the president of a labor organization not affiliated with a national organization (or his designee).

#### § 2411.24 Time limits for filing.

(a) The time limit for filing is 30 days from the date of the agency head's determination; provided, however, that for appeals involving internal agency regulations asserted as a bar to negotiations the time limit shall be extended 15 days for requesting an exception to an agency regulation under § 2411.22(b) and 15 days for an agency head to act upon such request for an exception.

(b) Review of a negotiability issue may be requested by a labor organization under this subpart without a prior determination by the agency head, if the agency head has not made a decision.

(1) Within 45 days after a party to the negotiations initiates referral of the issue for determination, in writing, through prescribed agency channels; or

(2) Within 15 days after receipt by the agency head of a written request for such determination following referral through prescribed agency channels, or following direct submission if no agency channels are prescribed.

#### § 2411.25 Content of petition; service.

A petition for review shall be dated and shall contain the following:

(a) A statement setting forth the matter proposed to be negotiated as submitted to the agency head for determination.

(b) A copy of all pertinent material including the agency head's determination on the proposal, the labor organization's request for an exception if required by § 2411.22(b), the agency head's denial of an exception, and other relevant documentary material.

(c) A full and detailed statement of the labor organization's position and reasons for:

(1) Disagreeing with the agency head's determination that the proposal would violate applicable law, regulation of appropriate authority outside the agency, or the order; or

(2) Believing that the agency's regulations, as interpreted by the agency head, violate applicable law, regulation of appropriate authority outside the agency, or the order, or are not otherwise applicable to bar negotiations under section 11(a) of the order. The statement shall cite the particular section of any law, regulation, or the order believed to be violated by the agency's regulations or shall explain the grounds for contending the agency regulations fail to meet the criteria established in Part 2413 or the required level of issuance of such regulations under section 11(a) of the order.

(d) A copy of the petition shall be served simultaneously on the other party.

#### § 2411.26 Position of the agency; time limits for filing.

Within 30 days from the date of a petition for review of a negotiability issue the agency shall file a full statement of its position on any matters relevant to the petition which it wishes the Council to consider in reaching its decision.

#### § 2411.27 Referral by the Federal Service Impasses Panel.

(a) Notwithstanding the procedures of this subpart, except § 2411.22, when the Panel finds that a negotiability issue is impeding the resolution of a negotiation impasse, the Panel may refer the negotiability issue to the Council for decision.

(b) A referral by the Panel shall contain:

(1) The matter proposed to be negotiated as submitted to the agency head for determination;

(2) The agency head's determination thereon, the labor organization's request for an exception if required by § 2411.22(b), and the agency head's denial of an exception;

(3) Statements of position from each party with supporting evidence and argument; and

(4) Any other appropriate documents of record.

(c) The Panel may refer a negotiability issue for decision by the Council at any time during its consideration of a negotiation impasse.

(d) The Council will give such referrals priority consideration.

#### § 2411.28 Council decision.

Subject to the requirements of this part, the Council shall issue its decision sustaining or setting aside in whole or in

part, or remanding the agency head's determination.

#### Subpart D—Review of Arbitration Awards

##### § 2411.31 Purpose.

This subpart, together with Subpart E, sets forth the procedures under which the Council will review arbitration awards under the order.

##### § 2411.32 Considerations governing review.

The Council will grant a petition for review of an arbitration award only where it appears, based upon the facts and circumstances described in the petition, that the exceptions to the award present grounds that the award violates applicable law, appropriate regulation, or the order, or other grounds similar to those upon which challenges to arbitration awards are sustained by courts in private sector labor-management relations. The Council will not consider exceptions to an advisory arbitration award.

##### § 2411.33 Who may file a petition; time limits for filing; opposition; service.

(a) Any party aggrieved by an arbitration award may petition the Council for review.

(b) The time limit for filing is 30 days from the date of the award.

(c) An opposition to Council acceptance of a petition for review may be filed by any party within 30 days from the date of the petition.

(d) A copy of the petition shall be served simultaneously on the other party.

##### § 2411.34 Content of petition.

A petition must be a dated, self-contained document enabling the Council to rule on acceptance for review on the basis of its content without necessity of recourse to the record. The petition must contain:

(a) A concise statement of the grounds on which review is requested;

(b) A summary of the evidence or rulings bearing on the issues, together with a summary of the arguments; and

(c) A copy of the award of the arbitrator and other pertinent documents.

##### § 2411.35 Council action on acceptance.

The Council shall review the petition and, if 50 percent or more of its members determine that the matter should be considered, the petition will be accepted. The Council shall promptly notify the parties whether the petition has been accepted or rejected.

##### § 2411.36 Filing of briefs.

Within 30 days from the date of the notice by the Council to the parties that the petition is accepted for review, the parties may file briefs with the Council (with specific reference to the pertinent documents and, where applicable, with citations of authorities) which shall be served on the other parties.

##### § 2411.37 Council decision.

(a) An award of an arbitrator shall be modified, set aside in whole or in part, or remanded only on grounds that the award violates applicable law, appropriate regulation, or the order, or other grounds similar to those applied by the courts in private sector labor-management relations.

(b) The Council shall issue its decision sustaining, modifying, setting aside in whole or in part, or remanding the award.

##### Subpart E—General Requirements

##### § 2411.41 Interlocutory appeals.

There shall be no interlocutory appeals. The Council will not consider a petition for review until a final decision or award has been rendered.

##### § 2411.42 Approval of submission.

Except as provided in § 2411.23(b), the Council shall consider a petition from an agency or labor organization only when the head of the agency (or his designee), or the national president of the labor organization (or his designee), or the president of a labor organization not affiliated with a national organization (or his designee), as appropriate, has approved submission of the petition.

##### § 2411.43 Place and method of filing; acknowledgment.

(a) A document submitted to the Council pursuant to this part shall be filed with the Executive Director, Federal Labor Relations Council, 1900 E Street NW., Washington, D.C. 20415.

(b) Documents shall be filed with the Council by registered mail, by certified mail, or in person.

(c) A return post office receipt may serve as acknowledgement of receipt by the Council. The Council will otherwise acknowledge receipt of documents filed only when the filing party so requests and includes an extra copy of the document which the Council will date stamp upon receipt and return. If return is to be made by mail, the filing party shall include a self-addressed, stamped envelope for the purpose.

##### § 2411.44 Number of copies.

Unless otherwise provided by the Executive Director, any document filed with the Council under this part, together with any enclosure filed therewith, shall be submitted in an original and three copies.

##### § 2411.45 Time limits; computation; extension; waiver.

(a) When a time limit for filing is established under this part, the document must be received in the office of the Council before the close of business of the last day of the time limit.

(b) In computing any period of time prescribed or allowed by this part, the day of the act, event, or default from or after which the designated period of time begins to run shall not be included; but the last day of the period so computed shall be included, unless it is a Saturday, Sunday, or Federal legal holiday, in which event the period shall run until

the end of the next day which is not a Saturday, Sunday, or Federal legal holiday. Also, when a period of time prescribed or allowed is 7 days or less, intermediate Saturdays, Sundays, and Federal legal holidays shall be excluded in the computation.

(c) Any request for the reconsideration of a decision of the Assistant Secretary, the award of an arbitrator, or the determination of an agency head shall not operate to extend the time limits established in this part.

(d) The Executive Director may extend any time limit provided in this part for good cause shown, and shall notify the parties of any such extension. Requests for extensions of time shall be filed in writing 5 days in advance of the established time limit for filing, shall state the position of other parties on the request for extension, and shall be served simultaneously on the other parties.

(e) The Executive Director may waive any expired time limit in this part in extraordinary circumstances. Requests for waiver of time limits shall state the position of other parties on the request for waiver and shall be served simultaneously on the other parties.

##### § 2411.46 Service; statement of service.

(a) Any party filing a document as provided in this part is responsible for simultaneously serving a copy on the other parties including all representatives of other parties who entered appearances in the subject proceeding before the Assistant Secretary, the agency head, or the arbitrator, as the case may be, and on any interested person who has been granted permission by the Executive Director to present written and/or oral argument as an amicus curiae.

(b) In any matter involving review of a decision of the Assistant Secretary, the Assistant Secretary shall be served with a copy of all documents filed with the Council.

(c) Service shall be made by registered or certified mail or in person. A return post office receipt or other written receipt executed by the party or person served shall be proof of service.

(d) A signed and dated statement of service shall be submitted at the time of filing. Statement of service shall include the names of the parties and persons served, their addresses, the nature of the document served, and the manner in which service was made.

##### § 2411.47 Stay of decision or award; requests; criteria.

(a) A request for a stay shall be entertained only in conjunction with and as a part of a petition for review of a decision of the Assistant Secretary or an award of an arbitrator. The filing of a petition for review shall not itself operate as a stay of the decision or award involved in the proceedings.

(b) Consistent with § 2411.41, the Council will not consider a request for stay unless a final decision or award has been rendered.

(c) A request for a stay of a decision of the Assistant Secretary or of an award

of an arbitrator shall contain a full statement of the grounds on which the stay is requested and shall be subject to the same time limits for filing as those established with respect to the filing of a petition for review of such decision or award.

(d) A timely request for a stay of a final decision or award shall operate as a temporary stay pending a decision by the Council on the request and such temporary stay shall be deemed effective from the date of the decision or award which is stayed.

(e) A request for stay of an Assistant Secretary's decision will be granted only where it appears, based upon the facts and circumstances presented:

(1) In a representation case, that—

(i) There is a strong likelihood of success on the merits of the appeal;

(ii) In the absence of a stay the applicant will suffer irreparable injury;

(iii) The issuance of a stay will not have a serious adverse effect on other parties to the case; and

(iv) The public interest will not be harmed by the grant of a stay.

(2) In an unfair labor practice case, that—

(i) There is a reasonable likelihood that the appeal will be accepted for review; and

(ii) A careful balancing of all the equities, including the public interest, warrants issuance of a stay.

(f) A request for stay of an arbitrator's award will be granted only where it appears, based upon the facts and circumstances presented that:

(1) There is a reasonable likelihood that the petition will be accepted for review; and

(2) A careful balancing of all the equities, including the public interest, warrants issuance of a stay.

(g) A request for a stay in other types of cases will be granted only where it appears, based upon the facts and circumstances presented, that:

(1) There is a reasonable likelihood the appeal will be accepted for review; and

(2) A careful balancing of all the equities, including the public interest, warrants issuance of a stay.

The Council, in its discretion, may permit oral argument under such circumstances and conditions as it deems appropriate. Unless otherwise ordered, a hearing of oral argument shall be open to the public.

##### § 2411.48 Oral argument.

Upon petition of an interested person, a copy of which petition shall be served on the parties, and as the Executive Director deems appropriate, the Executive Director may grant permission for the presentation of written and/or oral argument at any stage of the proceedings by an amicus curiae and the parties shall be notified of such action by the Council.

##### § 2411.50 Transfer of record.

Upon request by the Council, the Assistant Secretary or the appropriate

agency shall transfer the record in the case to the Council.

**§ 2411.51 Matters not previously presented; judicial notice.**

Consistent with the scope of review set forth in this part, the Council will not consider evidence offered by a party, or any issue, which was not presented in the proceedings before the Assistant Secretary, an agency head, or an arbitrator. The Council may, however, take judicial notice of such matters as would be proper.

**§ 2411.52 Other documents.**

(a) The Executive Director, in his discretion, may grant leave to file other documents as he deems appropriate.

(b) A copy of such other documents shall be served simultaneously on the other parties or persons.

**§ 2411.53 Advisory opinions.**

The Council shall not issue advisory opinions.

**§ 2411.54 Distribution of Council decisions.**

Copies of decisions by the Council shall be furnished to the parties and other interested persons and made available at the office of the Council.

**PART 2413—CRITERIA FOR DETERMINING COMPELLING NEED FOR AGENCY POLICIES AND REGULATIONS**

Sec.  
2413.1 Purpose.  
2413.2 Illustrative criteria.

**AUTHORITY:** 5 U.S.C. 3301, 7301; E.O. 11491, 3 CFR 1969 Comp., p. 191, 34 FR 17605; as amended by E.O. 11616, 3 CFR 1971 Comp., p. 191, 36 FR 17319; E.O. 11636, 3 CFR 1971 Comp., p. 232, 36 FR 24901; and by E.O. 11838, 40 FR 5743 and 7391.

**§ 2413.1 Purpose.**

Section 11(a) of Executive Order 11491 of October 29, 1969, as amended, requires, among other things, that an agency and a labor organization that has been accorded exclusive recognition, through appropriate representatives, shall meet at reasonable times and confer in good faith with respect to personnel policies and practices and matters affecting working conditions, so far as may be appropriate under applicable published agency policies and regulations for which a compelling need exists under criteria established by the Federal Labor Relations Council and which are issued at the agency headquarters level or at the level of a primary national subdivision. The purpose of this part is to establish illustrative criteria for determining when a compelling need exists for an agency policy or regulation concerning personnel policies and practices and matters affecting working conditions, within the meaning of section 11(a) of the order.

**§ 2413.2 Illustrative criteria.**

A compelling need exists for an applicable agency policy or regulation concerning personnel policies and practices and matters affecting working conditions

when the policy or regulation meets one or more of the following illustrative criteria:

(a) The policy or regulation is essential, as distinguished from helpful or desirable, to the accomplishment of the mission of the agency or the primary national subdivision;

(b) The policy or regulation is essential, as distinguished from helpful or desirable, to the management of the agency or the primary national subdivision;

(c) The policy or regulation is necessary to insure the maintenance of basic merit principles;

(d) The policy or regulation implements a mandate to the agency or primary national subdivision under law or other outside authority, which implementation is essentially nondiscretionary in nature; or

(e) The policy or regulation establishes personnel policies or practices or matters affecting working conditions where uniformity is required for equitable treatment of all or a substantial segment of the employees of the agency or primary national subdivision.

For the Council.

HENRY B. FRAZIER III,  
Executive Director.

[PR Doc.75-12355 Filed 5-15-75; 8:45 am]

**FEDERAL POWER COMMISSION**

[18 CFR Parts 3, 260]

[Docket No. R-472]

**REPORTING FORM 69**

**Alternate Fuel Demand of Direct End Use Customers of Interstate Pipeline Companies Due to Natural Gas Curtailments; Notice of Proposed Rulemaking**

MAY 12, 1975.

Notice is hereby given, pursuant to section 553 of Title 5 of the United States Code and the Natural Gas Act, sections 4, 5, 7, 8, 10, 14, 15 and 16 (52 Stat. 822, 823, 824, 825, 826, 828, 829, 830; 56 Stat. 83, 84; 61 Stat. 459; 76 Stat. 72 (15 U.S.C. 717c, 717d, 717f, 717g, 717i, 717m, 717n, 717o)) that the Federal Power Commission (FPC) proposes to add a new form which is to be filed by all interstate pipeline companies subject to its jurisdiction that supply natural gas directly to end-use customers. The proposed form is required in order to determine the alternate fuel supplies that will be needed to meet the requirements of those end-use customers who will not be able to continue to satisfy their requirements with natural gas due to the imposition of increasing levels of curtailment upon such customers by interstate pipeline companies or foreign suppliers of natural gas. In order to obtain this information the Commission proposes to add a new § 260.—to Part 260 *Statements and Reports (Schedules)* of Subchapter G *Approved Forms, Natural Gas Act* of Chapter 1 of Title 18 of the Code of Federal Regulations.

The Commission in its Order No. 523 issued in Docket No. R-472 on February 6, 1975, withheld passing upon the

inclusion of Schedule 1B and Schedule 1C in FPC Form No. 16 in deference to numerous comments that had been submitted by interested parties. It was noted in the Order that the comments urged postponement of any action in this proceeding until agreement was reached among the Commission, the Federal Energy Administration (FEA) and the National Association of Regulatory Utility Commissioners (NARUC) on expanded information desired by the FEA. The order also stated the proceeding would be renounced based on such changes. A Notice of Conference with respect to the formulation of expanded data collection forms was issued on February 12, 1975, and published in the *FEDERAL REGISTER* on February 24, 1975 (40 FR 7967). The new § 260.—proposed herein is the outgrowth of a series of conferences held with respect to this matter. The importance of acquisition of the data sought is strongly confirmed by the existence of increasing and continued shortages of natural gas.

By its Order No. 431 issued on April 15, 1971, in Docket No. R-418, 45 FPC 570, the Commission promulgated § 2.70 of its General Policy and Interpretations to provide that jurisdictional pipeline companies should

... take all steps necessary for the protection of as reliable and adequate service as present supplies and capacities will permit during the 1971-1972 heating season and thereafter ...

Since the promulgation of Order No. 431, the critical national shortage of natural gas has necessitated significant curtailments in the service rendered by interstate pipeline companies to both their direct industrial and resale customers. The likelihood of supply shortages of increasing severity continuing into the future is apparent.

Customers falling into either industrial or interruptible classifications are generally the most critically affected. This is due to the curtailment priority that is normally accorded customers of this nature in times of shortage. During the course of the 1974-1975 heating season, the Commission received increasing numbers of petitions requesting extraordinary relief indicating that essential natural gas needs of such customers could not be satisfied due to actual and projected gas supply deficiencies by many interstate pipelines. In most instances the Commission has been able to make provision for sufficient relief to prevent the complete shut-down of many industrial plants even though some downtime has been and will be experienced because of significant natural gas curtailments.

Therefore, it is necessary that the Commission obtain information relating to the extent of the shortage of natural gas that end use customers being served directly by interstate suppliers of natural gas will experience in the future on a regular basis and those alternate fuels, if any, that can be utilized in lieu of the natural gas.

Accordingly, in order to have available such data on a systematic basis, a new

report, Form 69 (Attachment A), to be filed by all jurisdictional suppliers of natural gas (including LNG and SNG) to end use customers is herein proposed.

The proposed Form 69 was developed by the Federal Power Commission in coordination with the FEA, NARUC, and other governmental agencies participating informally. The coordinated effort contemplates that the FEA will circulate a similar form in order to acquire substantially identical data from all suppliers of natural gas (to end use customers) who are beyond the jurisdiction of this Commission, but within the scope of the FEA's jurisdiction. It is contemplated that the coordination of efforts to date, and such future coordination as required, will enable the FPC to issue pursuant to the rulemaking requirements of the Administrative Procedure Act, a Form 69 which will be substantially identical to the form the FEA will issue.

If and when Form 69 is promulgated by the Commission, Form 69 will be filed with this Commission only by jurisdictional suppliers. Suppliers of natural gas who are not subject to the jurisdiction of the Federal Power Commission will not be affected by the promulgation of Form 69 but will be required to continue filing the FEA form with FEA. Those suppliers of natural gas subject to FPC jurisdiction would file only with the FPC. In this way, a single coordinated form may be filed by those reporting with the FPC in satisfaction of mutual reporting requirements of both the FPC and the FEA. This is intended to reduce the burden on those persons reporting and will further enable better coordination of information between the FPC and the FEA as well as with the members of NARUC.

Copies of the filings will be routinely provided to FEA because the FEA, in the furtherance of its statutory responsibilities, must have complete access to the data to be submitted under the FPC's proposed complementary Form. It would be to the mutual benefit of all if a duplication of effort in the collection of data of common interest to both these federal agencies could be averted by providing copies of the completed FPC Form 69 to the FEA rather than requiring it to undertake a separate and independent effort to acquire the identical information.

The information to be obtained by Form 69 may be of value not only to FPC and FEA but also to other federal and state agencies with fuel allocation or associated responsibilities. The Commission, therefore, specifically solicits the comments of all interested parties on the question of whether the information obtained on Form 69 should be provided to FEA and other federal or state agencies, or placed in the Commission's public files, in an aggregate or disaggregate form without breaching any right to confidentiality which respondents might claim with respect to the information set out in their reports.

The proposed report Form 69 would be filed four times each year and would reflect data on a quarterly basis with reporting quarters ending with the following dates: March 31st, June 30th, September 30th and December 31st. The report would not have to be filed with the Commission until thirty (30) days subsequent to the aforementioned reporting periods prescribed by the form. The three quarters on the form subsequent to the actual reporting period are to be filled out to indicate the estimates of the requirements of each end use customer for the successive nine month period. At the working conferences which were held to develop this form it was strongly urged that there be a submission of proposed Form 69 on a one time basis to reflect actual usage experience for one annual base period, i.e., from April 1, 1974, through March 31, 1975. The actual data reported for the base period provides a basis from which to measure incremental curtailment and is helpful in analyzing the estimate in the quarterly submission. This one time submission of the form for the period April, 1974, through March, 1975, is also proposed herein.

It is proposed that the first report should be filed for the data covering the quarter ending June 30, 1975, along with the one time report. The first report would be due on August 15, 1975. It is further proposed that § 3.170 of the General Rules be amended to include Form No. 69.

The amendments proposed herein would be issued under the authority granted to the Federal Power Commission by the Natural Gas Act as amended, particularly sections 4, 5, 7, 8, 10, 14, 15 and 16 thereof (52 Stat. 822, 823, 824, 825, 826, 828, 829, 830; 56 Stat. 83, 84; 61 Stat. 459, 76 Stat. 72; 15 U.S.C. 717c, 717d, 717f, 717g, 717i, 717m, 717n, 717o).

A. Accordingly, it is proposed to amend Part 260 *Statements and Reports (Schedules)*, in Subchapter G *Approved Forms, Natural Gas Act*, Chapter 1, Title 18 of the Code of Federal Regulations by adding a new § 260.—prescribing new FPC Form No. 69 Report of Alternate Fuel Demand Due to Natural Gas Curtailments, in the form set out in Attachment A hereto. New § 260.—, will read:

**§ 260.—Form No. 69 Report of alternate fuel demand due to natural gas curtailments.**

(a) The form Alternate Fuel Demand Due to Natural Gas Curtailments designated as FPC Form No. 69 is prescribed.

(b) Each natural gas company making direct sales in interstate commerce of natural gas (including SNG and LNG) to customers consuming such gas shall prepare and file with the Commission an original and three copies of Report of Alternate Fuel Demand Due to Natural Gas Curtailments, FPC Form No. 69 on or before August 15, 1975, for the actual annual period from April 1, 1974, to March 31, 1975, and for the quarterly period ending June 30th and thereafter on a quarterly basis on or before April 30th, July 30th, October 30th, and January 30th of each year.

B. Further, it is proposed to amend § 3.170 of Part 3 *Organization; operation; information and requests; miscellaneous charges; ethical standards*, Subchapter A *General Rules*, Chapter I, Title 18 of the Code of Federal Regulations, to read as follows:

**§ 3.170 Approved forms, etc.**

(a) The following is a list of approved forms, statements, and reports, under the Natural Gas Act, descriptions of which have been published in Subchapter G, Parts 250 and 260 of this chapter.

(—) Form No. 69 report of alternate fuel demand due to natural gas curtailments § 260.— of this chapter.

Any interested person may submit to the Federal Power Commission, 825 North Capitol Street, N.E., Washington, D.C., 20426, not later than June 13, 1975, data, views comments or suggestions in writing concerning the proposed regulation and form. Written submissions will be placed in the Commission's public files and will be available for public inspection at the Commission's Office of Public Information, Washington, D.C., 20426, during regular business hours. The Commission will consider all such written submissions before acting on the matters proposed herein. An original and 14 conformed copies should be filed with the Secretary of the Commission. Submissions to the Commission should indicate the name, title and mailing address of the person to whom communications in regard to the proposal should be addressed and whether the person filing them requests a conference with the staff of the Federal Power Commission to discuss the proposed regulation and report form. The staff, in its discretion, may grant or deny requests for conference.

The Secretary shall cause prompt publication of this notice to be made in the *FEDERAL REGISTER*.

By direction of the Commission.

KENNETH F. PLUMB,  
Secretary.

SECURITIES AND EXCHANGE  
COMMISSION

[17 CFR Part 240]

[Release No. 34-11402; File No. S7-563]

ARREST AND INDICTMENT RECORDS OF  
ASSOCIATED PERSONS

## Broker-Dealers' Maintenance

The Securities and Exchange Commission has under consideration a proposed amendment of Rule 17a-3(a)(12)(A)(8) under the Securities Exchange Act of 1934 [17 CFR 240.17a-3(a)(12)(i)(h)1]. Rule 17a-3(a)(12)(A) presently requires every member of a national securities exchange who transacts a business in securities directly with others than members of a national securities exchange, and every broker or dealer who transacts a business in securities through the medium of any such member, and every registered broker or dealer to obtain from each associated person a questionnaire or application for employment containing, among other things, a record of any arrests, indictments, or convictions for any felony or misdemeanor, except minor traffic offenses. The Commission proposes to amend Rule 17a-3(a)(12)(A)(8) to limit the reference to arrests or indictments to crimes which are related to the safe operation of the securities industry.

## DISCUSSION

Rule 17a-3(a)(12) was adopted October 6, 1961 and became effective November 10, 1961. In addition to arrest, indictment, and conviction records, the Rule requires that records be maintained on the background, education, and business experience of associated persons. The Release lists two reasons for requiring such information: First, that "good business practice" calls for the retention of "fairly detailed data concerning the experience and past record of partners, officers, salesmen, traders and other employees handling funds, securities or transactions for the firm." Second, that

Rule 17a-3(a)(12)(B) defines an associated person to be a "partner, officer, director, salesman, trader, manager, or any employee handling funds or securities or soliciting transactions or accounts for such member, broker or dealer."

Form SECO-2, the Personnel Form for nonmember brokers and dealers, requests similar information. On December 13, 1974, the Commission proposed amending Form SECO-2 by the substitution of Form U-4, a uniform application for registration of associated persons. (Securities Exchange Act Release No. 11135, 39 FR 45382.) Insofar as the requirements regarding arrest records, indictments, and convictions are concerned, Form U-4 would be modified, if necessary, to contain limitations similar to Rule 17a-3(a)(12)(A)(8).

Securities Exchange Act Release No. 8646 [28 FR 9629].

the Commission would benefit in its broker-dealer inspections and enforcement activities from the availability of such records.

While these conclusions remain valid, the Commission is concerned that requiring the maintenance of records of all arrests and indictments (other than minor traffic offenses) may be too broad and as such may no longer comport with public policy and should not be required by Commission rule. The Commission is cognizant of the potential detrimental inferences which may be drawn from arrest records. As stated by Judge Irving Ben Cooper of the United States District Court for the Southern District of New York:

Those of us who deal with the daily practicalities presented by the bread-and-butter portions of court calendars find that, in the main irreparable injury is done a defendant acquitted after a trial: the fact of his arrest is very often sufficient to rule him out of consideration for employment.

At the same time, the securities industry bears a heavy burden of public trust and confidence; the protection of customers' funds and securities is paramount. The Commission deems it important that broker-dealers obtain and maintain extensive information on the background of associated persons. In proposing to amend Rule 17a-3(a)(12)(A)(8), the Commission is attempting to balance these sometimes conflicting objectives.

Recent developments have led the Commission to review whether the benefit to be derived from the maintenance of records of all arrests and indictments is outweighed by the potential damage to the civil rights of the individuals involved. At the same time, the Commission believes that the securities industry has certain requirements which justify, as a matter of business necessity and the public interest, maintaining certain arrest and indictment records of persons dealing with customers' funds and securities.

PROPOSED REVISION OF RULE 17(A)(12)  
(A)(8)

The Commission believes that the extent of the records of arrests and indictments required to be kept pursuant to Commission rule should be reconsidered. Rule 17a-3(a)(12)(A)(8) is not on its face discriminatory since it does not mandate that persons with arrest or indictment records be denied consideration for employment. Nevertheless, the Rule may indirectly have such an effect in certain cases. The Commission, therefore, proposes to limit the requirement concerning arrest and indictment records to crimes which are of such a nature as to

\* Quoted in Hess and LePoole, Abuse of the Record of Arrest Not Leading to Conviction, 13 CRIME & DELINQUENCY 494, 496 (1967).

impact directly on the safe operation of the securities business.

While the Commission proposes that the maintenance of arrest records be limited, it is apparent that persons convicted of crimes may not be suitable for employment in the securities industry. Accordingly, the Commission proposes to continue to require employers in the securities industry to maintain records of all convictions, other than minor traffic offenses, of their employees.

## STATUTORY AUTHORITY

The amendment to § 240.17a-3(a)(12)(i)(h) of Chapter II of Title 17 of the Code of Federal Regulations would be adopted pursuant to section 17(a) and section 23(a) of the Securities Exchange Act of 1934 and would read as follows:

Section 240.17a-3 is amended by revising (a)(12)(i)(h) to read as set forth below:

§ 240.17a-3 Records to be made by certain exchange members, brokers and dealers.

(a) . . . . .  
(12)(i) . . . . .

(h) A record of any arrest or indictment for any felony or misdemeanor involving the purchase, sale or delivery of any security or arising out of the conduct of the business of a broker, dealer, fiduciary, investment company, investment adviser, underwriter, bank, trust company, insurance company or other financial institution, or involving any crime in which violence or threats of violence against any person, dishonesty, the wrongful taking of any property, or any manner of fraud was a factor or involving conspiracy to commit any of the foregoing and a record of any conviction for any felony or any misdemeanor, except minor traffic offenses, of which he has been the subject.

Secs. 17(a), 23(a), 48 Stat. 897, 901; Secs. 4, 8, 49 Stat. 1379; Sec. 5, 52 Stat. 1076; 15 U.S.C. 78q(a), 78w.

## CONCLUSION

Interested persons may submit their comments on the proposed amendment of Rule 17a-3(a)(12)(A)(8) in writing on or before June 18, 1975 to George A. Fitzsimmons, Secretary, Securities and Exchange Commission, 500 North Capitol Street, NW., Washington, D.C. 20549. All such communications should bear File No. S7-563 and will be available for public inspection.

By the Commission.

MAY 7, 1975.

[SEAL] SHIRLEY E. HOLLIS,  
Assistant Secretary.

POTASSIUM CHLORIDE, OTHERWISE  
KNOWN AS MURIATE OF POTASH,  
FROM CANADATentative Determination To Modify or  
Revoke Dumping Finding

A finding of dumping with respect to potassium chloride, otherwise known as muriate of potash, from Canada was made in Treasury Decision 69-265 which was published in the FEDERAL REGISTER on December 19, 1969 (34 FR 19904).

After due investigation, it has been determined, tentatively, that potassium chloride exported by Brockville Chemical Industries, Limited, Montreal, Quebec, Canada; Hudson Bay Mining and Smelting Co., Limited, Toronto, Ontario, Canada; and Swift Canadian Co., Limited, Etobicoke, Ontario, Canada is not being, nor likely to be, sold for export to the United States at less than fair value within the meaning of the Antidumping Act, 1921, as amended (19 U.S.C. 160 et seq.). The investigation indicated that, with the exception of some sporadic sales for which dumping duties in de minimus amounts were found to accrue, all sales by these firms for a period of two years from the finding of dumping have been made at not less than fair value, and each of these firms has furnished written assurances that future sales of potassium chloride for export to the United States will not be made at less than fair value.

Accordingly, notice is hereby given that the Department of the Treasury intends to modify the finding of dumping with respect to potassium chloride, otherwise known as muriate of potash, from Canada to exclude potassium chloride sold for export to the United States by Brockville Chemical Industries, Limited, Hudson Bay Mining and Smelting Co., Limited, and Swift Canadian Co., Limited, from the finding.

In accordance with § 153.37, Customs Regulations (19 CFR 153.37), interested persons may present written views or arguments, or request in writing that the Secretary of the Treasury afford an opportunity to present oral views.

Any requests that the Secretary of the Treasury afford an opportunity to present oral views should be addressed to the Commissioner of Customs, 2100 K Street, NW., Washington, D.C. 20229, in time to be received by his office not later than 10 days from the date of publication of this notice in the FEDERAL REGISTER. Such requests must be accompanied

by a statement outlining the issues to be discussed.

Any written views or arguments should likewise be addressed to the Commissioner of Customs in time to be received by his office not later than June 16, 1975.

This notice is published pursuant to § 153.41(c) of the Customs Regulations (19 CFR 153.41(c)).

[SEAL] DAVID R. MACDONALD,  
Assistant Secretary of  
the Treasury.

## DEPARTMENT OF DEFENSE

## Office of the Secretary

## ACQUISITION ADVISORY GROUP

## Advisory Committee Meeting

The Acquisition Advisory Group will meet in closed session on 3 June 1975 at the IDA Building, Arlington, Virginia.

The mission of the Acquisition Advisory Group is to examine and assess the recommendations made by the Army Materiel Acquisition Review Committee, the Navy Marine Corps Acquisition Review Committee and the Secretary of the Air Force relative to major weapon systems acquisition which suggest changes of current procedures or policies in the Office of the Secretary of Defense. The Acquisition Advisory Group will report its findings and recommendations to the Deputy Secretary of Defense.

The purpose of this meeting is to discuss the operations of the military departments and segments of the Office of the Secretary of Defense as they relate to the Defense Systems Acquisition Review Council (DSARC) process. The participants will specifically be discussing major weapon systems and their acquisition. Therefore, a considerable amount of the presentations will be devoted to matters that are specifically required by Executive Order to be kept secret in the interest of national defense. This will involve presentations by various Assistant Secretaries of Defense and the Director, Defense Research and Engineering. The Group will intermittently be discussing classified information. It is neither practicable nor feasible to separate the discussions of classified and non-classified material.

In accordance with section 10(d) of Appendix I, Title 5, United States Code, it has been determined that this Acquisition Advisory Group meeting concerns matters listed in section 552(b) of Title 5 of the United States Code, specifically subparagraph (1) thereof, and that ac-

cordingly this meeting will be closed to the public.

MAURICE W. ROCHE,  
Director, Correspondence and  
Directives, OASD (Comptroller).

## DEPARTMENT OF THE INTERIOR

## Fish and Wildlife Service

## ENDANGERED SPECIES

## Determination of Critical Habitat

MAY 13, 1975.

Notice is hereby given that the Department of the Interior intends to determine "critical habitat" for 108 currently listed "Endangered" species of the United States and Puerto Rico.

A notice which has been published in the FEDERAL REGISTER by the Department of the Interior and the Department of Commerce (FR Vol. 40, No. 78; April 22, 1975; pp. 17764-17765) provides a concept of "critical habitat" as it relates to section 7 of the Endangered Species Act of 1973 (16 U.S.C. 1531-1543). The concept is as follows:

"Habitat" could be considered to consist of a spatial environment in which a species lives and all elements of that environment including, but not limited to, land and water area, physical structure and topography, flora, fauna, climate, human activity, and the quality and chemical content of soil, water, and air. "Critical Habitat" for any endangered or threatened species could be the entire habitat or any portion thereof, if, and only if, any constituent element is necessary to the normal needs or survival of that species. The following vital needs are relevant in determining "critical habitat" for a given species:

- (1) Space for normal growth, movements, or territorial behavior;
- (2) Nutritional requirements, such as food, water or minerals;
- (3) Sites for breeding, reproduction, or rearing of offspring;
- (4) Cover or shelter; or
- (5) Other biological, physical, or behavioral requirements.

Under this concept, the destruction, disturbance, modification, curtailment, or subjection to human activity of habitat considered "critical" for a given species would not conform with section 7 of the Endangered Species Act of 1973, if such an action might be expected to result in a reduction in the numbers or distribution of that species of sufficient magnitude to place the species in further

jeopardy, or in a restriction of the potential and reasonable expansion or recovery of that species. It must be emphasized that because the primary intent of the Fish and Wildlife Service and the National Marine Fisheries Service is to maintain and restore presently threatened and endangered species, application of the term "critical" is not restricted to the habitat necessary to support a minimum population. It is emphasized further that only specific

Whip-poor-will, Puerto Rican	<i>Caprimulgus noctitherus</i>
Woodpecker, ivory-billed	<i>Campephilus principalis</i>
Woodpecker, red-cockaded	<i>Dendrocopos borealis</i>

## MAMMALS

Bat, Hawaiian hoary	<i>Lasiurus cinereus semotis</i>
Bat, Indiana	<i>Myotis sodalis</i>
Cougar, Eastern	<i>Felis concolor cougar</i>
Deer, Columbian white-tailed	<i>Odocoileus virginianus leucurus</i>
Deer, Key	<i>Odocoileus virginianus clavium</i>
Ferret, black-footed	<i>Mustela nigripes</i>
Fox, San Joaquin kit	<i>Vulpes macrotis mutica</i>
Manatee, Florida (sea cow)	<i>Trichechus manatus latirostris</i>
Mouse, salt marsh harvest	<i>Reithrodontomys raviventris</i>
Panther, Florida	<i>Felis concolor coryi</i>
Prairie Dog, Utah	<i>Cynomys parvidens</i>
Pronghorn, Sonoran	<i>Antilocapra americana sonoriensis</i>
Rat, Morro Bay kangaroo	<i>Dipodomys heermanni morroensis</i>
Squirrel, Delmarva Peninsula fox	<i>Sciurus niger cinereus</i>
Wolf, Eastern timber	<i>Canis lupus lycaon</i>
Wolf, Northern Rocky Mountain	<i>Canis lupus irremotus</i>
Wolf, red	<i>Canis rufus</i>

Although we are seeking information on "critical habitat" for all of the above, we are particularly interested in receiving data quickly on the following ten high priority species: Indiana bat, Mississippi sandhill crane, whooping crane, manatee, American peregrine falcon, San Joaquin kit fox, blunt-nosed leopard lizard, California condor, black-footed ferret, and pallia. The Fish and Wildlife Service will determine "critical habitat" for these key species as rapidly as possible.

The Fish and Wildlife Service requests that all Federal, State, and private agencies, organizations, and individuals concerned with endangered and threatened species of fauna and flora submit information and maps that would assist in delineating the "critical habitat" of those species currently appearing on the official list. The Service requests further that all concerned parties provide information on the specific kinds of actions that could be permitted and those that should be prohibited within the area so delineated as "critical."

As sufficient information on "critical habitat" is gathered for each of the species now listed, the Fish and Wildlife Service will publish a proposed rulemaking in the FEDERAL REGISTER. This rulemaking will identify spatial environments, including geographical boundaries where possible, considered to be "critical habitat" for the species in question, and will identify those elements of that environment which must be protected from adverse actions by man. Routinely, 60 days will be allowed for comments, criticisms, and alternative recommendations before publication of a final rulemaking on any specific "critical habitat."

In the future, where possible and desirable, as new candidate species for the "endangered" or "threatened" classification are proposed in the FEDERAL REGISTER, each such proposal also will contain a proposed designation of "critical habitat" for that species.

LYNN A. GREENWALT,  
Director, Fish and Wildlife Service.

[FR Doc. 75-12947 Filed 5-15-75; 8:45 am]

National Park Service  
NORTH ATLANTIC REGIONAL  
ADVISORY COMMITTEE

## Notice of Meeting

Notice is hereby given in accordance with the Federal Advisory Committee Act, Pub. L. 92-463, that a meeting of the North Atlantic Regional Advisory Committee will be held on June 10, 1975, at the North Atlantic Regional Office, Room 715, 150 Causeway Street, Boston, Massachusetts, from 9 a.m. to 4 p.m.

The purpose of the North Atlantic Regional Advisory Committee is to provide for the free exchange of ideas between the National Park Service and the public, and to facilitate the solicitation of advice or other counsel from members of the public on problems and programs pertinent to the North Atlantic Region of the National Park Service.

The members of the Advisory Committee are as follows:

Mr. John N. Cole  
Topsham, Maine  
Mrs. George Downing  
Providence, Rhode Island  
Ms. Helen Fenske  
Green Village, New Jersey  
Dr. Charles H. W. Foster  
Needham, Massachusetts  
Mr. George T. Hamilton  
Lee, New Hampshire  
Dr. John P. Keith  
New York, New York  
Mr. Frederick R. Micha  
Ontario, New York  
Dr. William A. Miering  
Gales Ferry, Connecticut  
Mr. William B. Pinney  
Montpelier, Vermont

The matters to be discussed at this meeting include:

1. North Atlantic Regional Advisory Committee procedures.
2. North Atlantic Regional Advisory Committee priorities.
3. Master Plans in the North Atlantic Region.
4. Summer Operations in North Atlantic Region Parks.

The meeting will be open to the public. However, facilities and space for accommodating members of the public are limited and it is expected that not more than 25 persons will be able to attend the session. Any member of the public may file with the committee a written statement concerning the matters to be discussed. Persons wishing further information concerning this meeting, or who wish to submit written statements, may contact David A. Richie, Deputy Regional Director, North Atlantic Regional office at 617-223-3769. Minutes of the meeting will be available for public inspection four weeks after the meeting at the office of the North Atlantic Region, 150 Causeway Street, Boston, Massachusetts.

Dated: May 5, 1975.

DAVID A. RICHIE,  
Acting Regional Director,  
North Atlantic Region.

**PROPOSED WILDLIFE ENHANCEMENT  
PROJECT MATTAMUSKEET NATIONAL  
WILDLIFE REFUGE**

**Availability of Draft Environmental  
Statement**

Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969, Pub. L. 91-190, the Department of the Interior has prepared a draft environmental statement for the Proposed Wildlife Enhancement Project, Mattamuskeet National Wildlife Refuge, Hyde County, North Carolina, and invites written comments within on or before June 30, 1975.

The proposal recommends construction of eight low-dike marsh impoundments totaling 2,420 acres within the Mattamuskeet National Wildlife Refuge, Hyde County, North Carolina, and renovation of 12 miles of existing canals originating within the refuge and extending to Pamlico Sound in order to enhance wildlife management capabilities of the refuge.

Copies of the draft statement are available for inspection at the following locations:

**DEPARTMENT OF AGRICULTURE**

**Rural Electrification Administration  
FLORENCE TELEPHONE CO., INC.  
Proposed Loan Guarantee**

Under the authority of Pub. L. 93-32 (87 Stat. 65) and in conformance with applicable agency policies and procedures as set forth in REA Bulletin 320-22, "Guarantee of Loans for Telephone Facilities," dated February 4, 1975, published in proposed form in the *Federal Register*, September 16, 1974 (Vol. 39 No. 180, pages 33228-33229) notice is hereby given that the Administrator of REA will consider providing a guarantee supported by the full faith and credit of the United States of America for a loan in the approximate amount of \$5,200,000 to Florence Telephone Company, Inc., Prentiss, Mississippi. The

loan funds will be used to finance the construction of facilities to extend telephone service to new subscribers, and improve telephone service for existing subscribers.

Legally organized lending agencies capable of making, holding and servicing the loan proposed to be guaranteed may obtain information and details of the proposed project from Mr. Jack A. Kiser, President, Florence Telephone Company, Inc., P.O. Box 758, Prentiss, Mississippi 39474.

To assure consideration, proposals must be submitted on or before June 16, 1975 to Mr. Jack A. Kiser. The right is reserved to give such consideration and make such evaluation or other disposition of all proposals received, as the Florence Telephone Company, Inc. and REA deem appropriate. Prospective lenders are advised that financing for this project is available from the Federal Financing Bank under a standing loan commitment agreement with the Rural Electrification Administration.

Copies of REA Bulletin 320-22 are available from the Director, Information Services Division, Rural Electrification Administration, U.S. Department of Agriculture, Washington, D.C. 20250.

Dated at Washington, D.C., this 12th day of May 1975.

DAVID A. HAMIL,  
Administrator,

Rural Electrification Administration.

**Office of the Secretary**

**CASCADE HEAD SCENIC-RESEARCH AREA,  
SIUSLAW NATIONAL FOREST—OREGON**

**Notice of Proposed Guidelines**

The purpose of this notice is to propose guidelines to be used by the Secretary of Agriculture in determining what constitutes a substantial change in land use or maintenance of certain non-federally owned lands within the Cascade Head Scenic-Research Area.

Public Law 93-535 (88 Stat. 1732), enacted on December 22, 1974, established this area. It further provides that, if an owner(s) of land within certain portions of the area makes a substantial change in land use or maintenance, the land becomes subject to condemnation.

Interested persons may submit comments on the proposed guidelines to the Forest Service, c/o Land Classification, Room 1004, 1621 North Kent Street, Arlington, Virginia 22209. Comments received before June 16, 1975 will be considered before final action is taken on the proposed guidelines. Copies of all written comments received will be available for examination at the location above between 8:15 a.m. and 4:45 p.m. on regular workdays. The proposed guidelines may be changed in light of comments received.

1. **Introduction**—a. **Purpose.** Public Law 93-535 (88 Stat. 1732), enacted on December 22, 1974, established the Cas-

cade Head Scenic-Research Area. Section 5(b) of the Act requires the Secretary to publish guidelines which shall be used by him to determine what constitutes a substantial change in land use or maintenance for the nonfederally owned property within the area. The guidelines are based on the general management objectives applicable to the entire area. These objectives are to provide present and future generations with the use and enjoyment of certain ocean headlands, rivers, streams, estuary, and forested areas; to promote the protection and study of significant areas for research and scientific purposes, and to promote a more sensitive relationship between man and his adjacent environment.

b. **Scope.** These guidelines are published to be used by the Secretary to determine what constitutes a substantial change in land use purposes, and manner, and maintenance from conditions existing on June 1, 1974. Any change which is proposed or occurs after June 1, 1974, will be evaluated against these guidelines.

c. **Delegation of authority.** Section 5(c) of the Act provides that, at least 30 days prior to any substantial change of use or maintenance of any non-federally owned land within the area, the owner or owners of such land shall provide notice of such proposed change to the Secretary or his designee in accordance with these guidelines. The District Ranger, Hebo Ranger District, Siuslaw National Forest, Hebo, Oregon 97122, is designated the Secretary's representative to whom such notices should be given.

d. **Definitions.** Terms used in the guidelines have the following specific meanings.

(1) **Act**—Public Law 93-535 of December 22, 1974, establishing Cascade Head Scenic-Research Area in the State of Oregon;

(2) **Area**—the Scenic-Research Area;

(3) **Subareas**—the four subareas within the Scenic-Research Area as established by Section 3(c) of the Act;

(4) **Secretary**—the Secretary of Agriculture;

(5) **Base property**—a single contiguous landownership existing on June 1, 1974. Property includes the structures and other improvements on the land;

(6) **Documentation**—the evidence of existing conditions, including written descriptions and photographs;

(7) **Environmental design criteria**—includes the following standards for construction activities:

(a) the design borrows colors, shapes, materials and other conditions from the surrounding natural environment and is planned to compliment the natural setting;

(b) vegetative cover disturbance is limited to the construction site;

(c) erosion control measures are adequate to protect the soil, water, and other environmental values; and

(d) roads are located and constructed to minimize impact on the land and should not be wider than necessary;

(8) **Purpose of use**—the objective for which anything exists, is done, made, or used (what it is used for);

(9) **Manner of use**—a way of doing, being done, happening, or mode of action. Manner of use is complementary to purpose of use, and involves degree, kind, or intensity of use within a purpose of use category;

(10) **Purpose of use category**—a classification of the purpose for which land was used on June 1, 1974. There are nine categories defined in the guidelines;

(11) **Maintenance**—the way the property is cared for.

2. **Provisions of guidelines**—a. **Acquisition of land.** (1) The Secretary may acquire any land or interest in land, including scenic easements, through any of the following methods:

(a) purchase with consent of owner;

(b) donation;

(c) exchange; and

(d) condemnation, which is the acquisition of land, or interests in land, without the consent of the owner and with the payment of just compensation to the owner.

(2) The Act provides that, in all subareas of the Area except the estuary and associated wetlands subarea, the Secretary may not acquire any land or interest in land without the consent of the owner or owners so long as the owner or owners use such land for substantially the same purposes and in the same manner as it was used and maintained on June 1, 1974. However, even if a substantial change has not occurred, the Secretary may acquire any land or interests in land without the consent of the owner or owners when such land is in imminent danger of being used for different purposes or in a different manner from the use or uses existing on June 1, 1974.

(3) In the estuary and associated wetlands subarea, the Secretary may acquire any land or interests in land without the consent of the owner at any time, after public hearing.

(4) When land is subject to acquisition without the consent of the owner or owners, the Secretary has the discretion to determine which tracts of land will be acquired by condemnation and whether to acquire part or all of the base property. In making this determination, the Secretary may consider whether the substantial change furthers the purposes of the Act.

b. **Change in boundaries of subareas.** The Secretary may, after public hearing or other appropriate means for public participation, adjust the boundaries of the subareas to reflect changing natural conditions or to provide for more effective management.

c. **Amendment of guidelines.** The Secretary may make such amendments to the Guidelines as are considered necessary to further the purposes of the Act.

d. **Appeals.** A decision of a Forest Officer under these guidelines may be appealed as provided by 36 CFR 211.2.

3. **Procedures for implementing guidelines**—a. **Inventory and Identification.** The District Ranger shall conduct an inven-

tory of the base properties within the Area, and identify the purpose(s) and manner of use and maintenance of the base property that existed on June 1, 1974. Each base property will have at least one purpose of use category, but a base property may have more than one purpose of use category. During the identification process, the District Ranger shall consult with the owner or owners and provide means for other public involvement, as the District Ranger considers appropriate.

b. **Notification of Substantial Change.** Section 5(c) of the Act requires the owner or owners of non-federally owned land in the Area to notify the Secretary or his designee, the District Ranger, of a proposed substantial change in use or maintenance at least 30 days prior to that change. An owner or owners of land or interests in land in the Area should notify the District Ranger of any proposed change or activity in order to obtain a determination as to whether the proposed change or activity is considered a substantial change.

c. **Response to Notification of Proposed Change.**

(1) In the estuary and associated wetlands subarea, the District Ranger shall, within 30 days after receipt of the notice, take the following actions:

(a) Acknowledge receipt of the notice;

(b) Notify the owner whether the proposed action is or is not considered by the Forest Supervisor to be compatible with the protection and perpetuation of the unique natural values of the subarea; and

(c) Inform the owner of any immediate acquisition plans, including a notice of public hearing.

(2) In all other subareas, the District Ranger shall, within 30 days after receipt of the notice, take one of the following actions:

(a) Notify the owner that the proposed action is not considered a substantial change;

(b) Notify the owner that the proposed action is considered a substantial change;

(c) Request additional, specific information from the owner. When sufficient information is received, the District Ranger shall, within 30 days after receipt of the necessary information, take action (a) or (b);

d. **Response to substantial change if prior notice is not given.** When an owner or owners makes a change that is considered to be a substantial change under these Guidelines, section 5(c) of the Act is violated. The District Ranger may notify the owner or owners that the change is considered to be a substantial change and that the Secretary may acquire his property by condemnation.

4. **Guidelines**—a. **Purpose of use categories.** The following purpose of use categories are defined. Each base property in the area will have at least one of these categories:

(1) **Agriculture.** Land used for raising and harvesting crops, livestock, and other agricultural products, including (a)

dwellings, barns, buildings, and other improvements customarily used in conjunction with farming, and (b) small wooded areas and lands which were formerly used for agriculture and are not covered by other purpose use categories.

(2) **Forestry.** Land used for production of timber and other forest products, including roads and other improvements necessary for timber production but not including quarry sites, log storage areas, and manufacturing sites, such as sawmills.

(3) **Public.** All non-federally owned public land, including highways, roadways, boat ramps, and other areas owned or controlled by State, county or local governmental agencies.

(4) **Commercial service.** Land used for producing, marketing, and providing goods and services to the public for profit, or used in conjunction with a profit-making activity.

(5) **Recreation and/or educational.** Land developed and managed for specific recreational or educational pursuits; e.g., hiking, picnicking, horseback riding, environmental observation, organizational camping, platted open space, boating, educational pursuit, etc.

(6) **Residential.** Land use for residential occupancy, including lands on which construction of the residence itself had started on or before June 1, 1974, as evidenced by foundations, footings, or other housing construction.

(7) **Residential, unoccupied.** Platted subdivisions which have been approved by appropriate county and State agencies and upon which some or all utilities were installed as of June 1, 1974, but upon which no housing construction had begun as of June 1, 1974. This category also includes lands other than subdivisions upon which some or all utilities were installed as of June 1, 1974, but upon which housing construction had not begun as of June 1, 1974.

(8) **Unimproved property.** Land which has not been developed, including land which has been platted or sold for development, but upon which no actual construction had started on or before June 1, 1974.

(9) **Scenic and scientific.** Unoccupied and undeveloped land (except for scientific instrumentation) which is managed or set aside for scenic or scientific purposes.

b. **Effect of a change in purpose of use category.** A change in the purposes of use of a base property which would have the effect of changing, adding, or deleting a purpose of use category will be considered a substantial change.

c. **Effect of change in manner of use.** A substantial change may occur in manner of use without any change in the purposes of use. In determining if there has been a substantial change in manner of use, the Secretary will consider, but is not limited to, the following criteria:

(1) Change in the kind of use, i.e., the kind of crops, livestock, services, and other items;

## NOTICES

(2) Change in the intensity of use;  
 (3) Change in the impact on visual quality;  
 (4) Change in the vegetation (shrubs and trees), as in removal or addition, except as modified by (7) below;

(5) Change in the number of buildings on the property, except the construction of residential amenities such as garages, woodsheds, building additions, etc., which meet the environmental design criteria, and except when construction had started prior to June 1, 1974;

(6) Change in existing structures, as in replacement or reconstruction, and including whether the change approximates conditions existing on June 1, 1974, or meets environmental design criteria;

(7) In the forest category, the Secretary will also consider whether timber-harvest activity closely duplicates the pattern of harvest activity of the past 10 years; and

(8) In the public category, the Secretary will also consider whether the activities are necessary for the public welfare, safety, or security.

d. *Effect of a change in maintenance.* The condition of non-federally owned land or improvements may deteriorate to the point that a substantial change has occurred. The District Ranger may notify the owner or owners that:

(1) The deterioration in maintenance of the base property is considered a substantial change; and

(2) The property is subject to condemnation.

PAUL A. VANDER MYDE,  
 Deputy Assistant Secretary.

## NATIONAL INDUSTRIAL ENERGY CONSERVATION COUNCIL

## Public Meeting

A meeting of the Sub-Council on Public Awareness of the National Industrial Energy Conservation Council will be held on Monday, June 16, 1975, from 10 a.m. to 12 noon, in Conference Room "D", First Floor, Main Commerce Building, 14th and Constitution Avenue, Washington, D.C. 20230.

The Sub-Council will meet to consider staff reports leading to the development of a report to the National Industrial Energy Conservation Council on the subject of increasing the level of public awareness as to the nature and extent of the energy problem and ways of addressing this problem.

The public will be permitted to attend and a limited number of seats will be available for that purpose. To the extent that time permits, members of the public may present oral statements to the Sub-Council. Interested persons are also invited to file written statements with the Sub-Council before or after the meeting.

Persons who wish to attend the meeting should contact Robert M. Jackson, at the Office of Energy Programs, Room 2011, U.S. Department of Commerce, 14th and Constitution Ave. NW, Washington, D.C. 20230—(202) 967-3535.

HERBERT K. SCHMITZ,  
 Executive Director, National Industrial Energy Conservation Council.

## INDUSTRY POLICY ADVISORY COMMITTEE FOR MULTILATERAL TRADE NEGOTIATIONS

## Closed Meeting

Pursuant to the provisions of the Federal Advisory Committee Act (Pub. L. 92-463), notice is hereby given that a meeting of the Industry Policy Advisory Committee for Multilateral Trade Negotiations ("IPAC") will be held on Friday, June 20, 1975, 1:30-4 p.m., in Room 4830, U.S. Department of Commerce, 14th and E Streets, NW., Washington, D.C. 20230.

The IPAC was established on February 6, 1974, to advise, consult with and make recommendations to the Special Representative for Trade Negotiations and the Secretary of Commerce on matters concerning the multilateral trade negotiations (MTN) being undertaken by the United States.

Agenda items for the meeting are as follows:

I. Review and Discussion of Classified Information and Advisory Input Relating to the Current Status of the MTN and the Overall U.S. Policy Positions Relating Thereto.

II. Review of Classified Information and IPAC Advisory Input Regarding the Following Specific MTN Issues:

A. Possible Groundrules for an International Code Covering Export Subsidies and the Trade Effects of Domestic Aids to Industry.

B. Formulation of a U.S. Government Policy on the Nature and Extent of Possible International Rules Governing the Question of Raw Materials Supply in World Trade.

C. Consideration of an International Code in Government Procurement.

III. Discussion Regarding the Classified Reports of the Industry Sector Advisory Committees (ISACs).

The Assistant Secretary of Commerce for Administration, with the concurrence of the General Counsel, formally determined on May 6, 1975, pursuant to section 10(d) of the Federal Advisory Committee Act, that this meeting should be exempt from the provisions of sections 10(a)(1) and 10(a)(3) of the Act (relating to open meetings and public participation therein) because the agenda items will be concerned with matters listed in 5 U.S.C. 522(b)(1), i.e., it is specifically required by Executive Order 11652 that such matters be kept secret in the interest of national security. The information and materials to be discussed at the meeting will be properly classified pursuant to said Executive Order.

Accordingly, pursuant to the aforementioned determination, the meeting

will be closed to the public. All committee members have appropriate security clearances. Written statements may be submitted at any time before or after the meeting.

For further information, contact Ms. Clare Soponis, Industry Consultations Policy Staff, Room 3028, U.S. Department of Commerce, Washington, D.C. 20230, telephone (202) 967-3268.

In accordance with paragraph (4) of the order of the United States District Court for the District of Columbia in *Aviation Consumer Project, et al. v. C. Langhorne Washburn et al.*, September 10, 1974, as amended September 23, 1974 (Civil Action No. 1838-73), the Complete Notice of Determination to close the meeting of the IPAC is hereby published.

Dated: May 6, 1975.

LAWRENCE A. FOX,  
 Deputy Assistant Secretary for  
 International Economic Policy  
 and Research.

Dated: May 6, 1975.

MITCHELL NEWDELMAN,  
 Director of Industry Liaison, Office  
 of the Special Representative  
 for Trade Negotiations.

[FR Doc. 75-12909 Filed 5-15-75; 8:45 am]

## SEMICONDUCTOR TECHNICAL ADVISORY COMMITTEE

## Partially Closed Meeting

Pursuant to the provisions of the Federal Advisory Committee Act, 5 U.S.C. App. I (Supp. III, 1973), notice is hereby given that a meeting of the Semiconductor Technical Advisory Committee will begin on Tuesday, June 17, 1975, at 9:30 a.m., in Room 5230, Main Commerce Building, 14th and Constitution Avenue NW, Washington, D.C. and will continue on June 18 to the conclusion of the agenda.

The Semiconductor Technical Advisory Committee was initially established on January 3, 1973. On December 20, 1974, the Acting Assistant Secretary for Administration, approved the recharter and extension of the Committee for two additional years, pursuant to section 5(c)(1) of the Export Administration Act of 1969, as amended, 50 U.S.C. App. sec. 2404 (c)(1) (Supp. III, 1973) and the Federal Advisory Committee Act.

The Committee advises the Office of Export Administration, Bureau of East-West Trade, with respect to questions involving technical matters, world-wide availability and actual utilization of production and technology, and licensing procedures which may affect the level of export controls applicable to semiconductor products, including technical data related thereto, and including those whose export is subject to multilateral (COCOM) controls.

The Committee meeting agenda has five parts:

## General Session

- (1) Opening remarks by the Chairman.
- (2) Presentation of papers or comments by the public.
- (3) Discussion of discrete semiconductors.
- (4) Discussion of integrated circuits.

## Executive Session

- (5) Discussion of matters properly classified under Executive Order 11652 dealing with the U.S. and COCOM control program and strategic criteria related thereto.

The Public will be permitted to attend the General Session for the morning of June 17, 1975, at which a limited number of seats will be available to the public. To the extent time permits members of the public may present oral statements to the Committee. Written statements may be submitted at any time before or after the meeting.

With respect to agenda item (5), the Assistant Secretary of Commerce for Administration, with the concurrence of the delegate of the General Counsel, formally determined on December 16, 1974, pursuant to section 10(d) of the Federal Advisory Committee Act that the matters to be discussed in the Executive Session should be exempt from the provisions of the Act relating to open meetings and public participation therein, because the Executive Session will be concerned with matters listed in 5 U.S.C. 522(b)(1), i.e., it is specifically required by Executive Order 11652 that they be kept confidential in the interest of the national security. All matters have been properly classified under the Executive Order. All Committee members have appropriate security clearances.

Minutes of the open portion of the meeting will be available upon written request addressed to the Central Reference and Records Inspection Facility, Room 7043, U.S. Department of Commerce.

For further information, contact Mr. Charles C. Swanson, Director, Operations Division, Office of Export Administration, Domestic and International Business Administration, Room 1620, U.S. Department of Commerce, Washington, D.C. 20230, telephone: A/C 202-967-4196.

In accordance with paragraph (4) of the Order of the United States District Court for the District of Columbia in *Aviation Consumer Action Project, et al. v. C. Langhorne Washburn, et al.*, September 10, 1974, as amended, September 23, 1974 (Civil Action No. 1838-73), the Complete Notice of Determination to close portions of the series of meetings of the Semiconductor Technical Advisory Committee and of any subcommittees thereof, was published in the *FEDERAL REGISTER* (40 FR 18, appearing in the issue of January 2, 1975).

Dated: May 13, 1975.

RAUER H. MEYER,  
 Director, Office of Export Administration, Bureau of East-West Trade.

## INFORMATION MAGNETICS, INC. AND GRESHAM-INFOMAG, LTD.

## Order Extending Denial of Export Privileges

In the matter of Information Magnetics, Inc. (Infomag), Goleta, California and Gresham-Infomag, Ltd., Weybridge, Surrey, England, Respondents.

By Order dated December 2, 1974, (39 FR 42935) the export privileges of the above-titled firms were temporarily denied for a period of 60 days. On January 30, 1975 (40 FR 6383), that period was extended to March 17, 1975. On March 17, 1975, (40 FR 13015) that period was again extended to May 18, 1975. Pending final disposition of the proceedings, the period of temporary denial, as set forth in Paragraph IV of the Order dated December 2, 1974, is continued for an additional 60 days to July 15, 1975. All other terms and conditions of the Order, the interpretations thereof, and the exceptions thereto, remain in full force and effect.

Dated: May 14, 1975.

## Maritime Administration

[Docket No. S-443]

## PACIFIC FAR EAST LINE, INC.

## Application Amendment

Notice is hereby given that the application of Pacific Far East Line, Inc., for amendment of its service description to increase subsidized calls in the Pacific Northwest, which was noticed in the *FEDERAL REGISTER* of April 1, 1975 (40 FR 14624), and pursuant to which timely petitions for leave to intervene were submitted by Sea-Land Service, Inc., American President Lines, Ltd., States Steamship Company, and United States Lines, Inc., has been amended. As the matter has not yet been set for hearing, this Notice is to advise of amendment of the application in Docket No. S-443 to provide for direct calls and an increase to 24 calls annually.

The amended application is for LASH vessels of Pacific Far East Line, Inc. operating on the Operator's subsidized Trade Route No. 29 service to call at ports in Oregon, Washington, British Columbia, and Alaska on up to 24 sailings annually for carriage of cargoes between those areas and foreign ports on the service.

Any person, firm or corporation having any interest in such application and desiring a hearing on issues pertinent to section 605(c) of the Merchant Marine Act, 1936, as amended (46 U.S.C. 1175), should, by the close of business on May 29,

1975 notify the Secretary, Maritime Subsidy Board, in writing in triplicate, and file petition for leave to intervene in accordance with the Rules of Practice and Procedure of the Maritime Subsidy Board.

In the event a section 605(c) hearing is ordered to be held, the purpose thereof will be to receive evidence relevant to (1) whether the application is one with respect to a vessel to be operated in an essential service, served by citizens of the United States which would be in addition to the existing service, or services, and if so, whether the service already provided by vessels of United States registry in such essential service is inadequate, and (2) whether in the accomplishment of the purposes and policy of the Act additional vessels should be operated thereon.

If no request for hearing and petition for leave to intervene is received within the specified time, or if the Maritime Subsidy Board determines that petitions for leave to intervene filed within the specified time do not demonstrate sufficient interest to warrant a hearing, the Maritime Subsidy Board will take such action as may be deemed appropriate.

(Catalog of Federal Domestic Assistance Program No. 11.504 Operating-Differential Subsidy)  
 Dated: May 12, 1975.

By Order of the Maritime Administration.

Dated: May 12, 1975.

## CONSTRUCTION OF BULK/CONTAINER/RO-RO COMBINATION CARRIERS OF ABOUT 33,000 DWT

## Computation of Foreign Cost; Notice of Intent

Notice is hereby given of the Intent of the Maritime Subsidy Board, pursuant to the provisions of section 502(b) of the Merchant Marine Act 1936, as amended, to compute the estimated foreign cost of the construction of Bulk/Container/Ro-Ro Combination Carriers of about 33,000 DWT.

Any person, firm or corporation having any interest (within the meaning of section 502(b)) in such computations may file written statements by the close of business on June 13, 1975, with the Secretary, Maritime Subsidy Board, Maritime Administration, Room 3099B, Department of Commerce Building, 14th & E Streets NW., Washington, D.C. 20230.

Dated: May 14, 1975.

By Order of the Maritime Subsidy Board, Maritime Administration.

JAMES S. DAWSON, JR.,  
 Secretary.

# CONSTRUCTION OF CONTAINERSHIPS, MA DESIGN C8-S-85d

## Computation of Foreign Cost; Notice of Intent

Notice is hereby given of the intent of the Maritime Subsidy Board, pursuant to the provisions of section 502(b) of the Merchant Marine Act 1936, as amended, to compute the estimated foreign cost of the construction of containerships, MA Design C8-S-85d.

Any person, firm or corporation having any interest (within the meaning of section 502(b)) in such computations may file written statements by the close of business on June 16, 1975, with the Secretary, Maritime Subsidy Board, Maritime Administration, Room 3099B, Department of Commerce Building, 14th & E Streets, NW., Washington, D.C. 20230.

Dated: May 14, 1975.

By Order of the Maritime Subsidy Board Maritime Administration.

JAMES S. DAWSON, Jr.,  
Secretary.

[FR Doc.75-13106 Filed 5-15-75; 8:45 am]

# CONSTRUCTION OF TANKERS OF BETWEEN 42,000 TO 52,000 DWT

## Recomputation of Foreign Cost; Notice of Intent

Notice is hereby given of the intent of the Maritime Subsidy Board, pursuant to the provisions of section 502(b) of the Merchant Marine Act 1936, as amended, to recompute the estimated foreign cost of the construction of tankers of between 42,000 and 52,000 DWT, since there appears to have been a significant change in shipbuilding market conditions since the previous determination of estimated foreign cost was made.

Any person, firm or corporation having any interest (within the meaning of section 502(b)) in such computations may file written statements by the close of business on May 23, 1975, with the Secretary, Maritime Subsidy Board, Maritime Administration, Room 3099B, Department of Commerce Building, 14th & E Streets, NW., Washington, D.C. 20230.

Dated: May 14, 1975.

By Order of the Maritime Subsidy Board Maritime Administration.

JAMES S. DAWSON, Jr.,  
Secretary.

## NEW YORK ZOOLOGICAL SOCIETY Issuance of Permit To Take and Import Marine Mammals

On April 1, 1975, notice was published in the FEDERAL REGISTER (40 FR 14624)

that an application had been filed with the National Marine Fisheries Service by New York Zoological Society. The Zoological Park, Bronx, New York 10460, for a permit to take four (4) Atlantic bottlenosed dolphins (*Tursiops truncatus*) for the purpose of public display.

Notice is hereby given that, on May 9, 1975, and as authorized by the provisions of the Marine Mammal Protection Act of 1972 (16 U.S.C. 1361-1407), the National Marine Fisheries Service issued a permit to New York Zoological Society, subject to certain conditions set forth therein.

The Permit is available for review by interested persons in the Office of the Director, National Marine Fisheries Service, Department of Commerce, Washington, D.C. 20235, Office of the Regional Director, National Marine Fisheries Service, Southeast Region, Duval Building, 9450 Gandy Boulevard, St. Petersburg, Florida 33702, and in the Office of the Regional Director, National Marine Fisheries Service, Northeast Region, Federal Building, 14 Elm Street, Gloucester, Massachusetts 01930.

Dated: May 8, 1975.

ROBERT F. HUTTON,  
Associate Director for Resource  
Management, National Marine  
Fisheries Service.

# SEA WORLD

## Notice of Receipt of Application for Public Display Permit

Notice is hereby given that the following Applicant has applied in due form for a permit to take marine mammals for public display, as authorized by the Marine Mammal Protection Act of 1972 (16 U.S.C. 1361-1407), and the Regulations Governing the Taking and Importing of Marine Mammals.

Sea World, Incorporated, 1720 South Shores Road, San Diego, California 92109, to take six (6) northern elephant seals (*Mirounga angustirostris*) for the purpose of public display.

The elephant seals will be taken by the Applicant from offshore islands along the coasts of the State of California or Mexico.

The elephant seals will be initially maintained, for acclimation captivity, at Sea World of San Diego, California. Subsequently, the elephant seals will be maintained and displayed at Sea World facilities in San Diego, California, in Cleveland, Ohio and in Orlando, Florida. The animals will be maintained in the following facilities:

### Sea World of San Diego:

- Housing tank—1,400 gallons, 10 feet in diameter, 2½ feet deep, 131 square feet haulout area.
- Housing tank—9,000 gallons, 16 feet in diameter, 6 feet deep, 426 square feet haulout area.
- Housing tanks (2)—each 5,000 gallons, 8 feet wide, 17 feet long, 6 feet deep, 226 and 214 square feet haulout area, respectively.
- Housing tanks (2)—each 17,500 gallons, 10 feet wide, 34 feet long, 7 feet deep, 81 square feet haulout area.
- Semi-circular performance pool—30,360 gallons, 76 feet long, 12 feet wide, 5 feet 3 inches average depth, 848 square feet haulout area.

### Sea World of Florida:

- Triangular holding pool—3,870 gallons, 10 feet by 16 feet by 18 feet in surface dimensions, 4 feet deep, 200 square feet haulout area.
- Triangular holding pool—3,200 gallons, 12 feet by 15 feet by 15 feet in surface dimensions, 4 feet deep, 200 square feet haulout area.
- Seal holding area—pool of 1,800 gallons, 9 feet wide, 11 feet long, 3 feet deep, 133 square feet haulout area.
- Semi-circular performance pool—61,850 gallons, 110 feet long, 13 feet wide, 6 feet average depth, 444 square feet haulout area.

### Sea World of Ohio:

- Holding area—Pool of 6,600 gallons, 18 feet wide, 19 feet long, 5 feet deep, 138 square feet haulout area.
- Semi-circular performance pool—60,000 gallons, 77 feet long, 12 feet wide, 5 feet 6 inches average depth, 500 square feet haulout area.

The arrangements and facilities for transporting and maintaining the marine mammals requested in the above application have been inspected by a licensed veterinarian, who has certified that such arrangements and facilities

are adequate to provide for the well-being of the requested animals.

Documents submitted in connection with the above application are available for review in the Office of the Director, National Marine Fisheries Service, Department of Commerce, Washington, D.C. 20235, and the Offices of the Regional Director, National Marine Fisheries Service, Northeast Region, Federal Building, 14 Elm Street, Gloucester, Massachusetts 01930, the Regional Director, National Marine Fisheries Service, Southwest Region, 300 South Ferry Street, Terminal Island, California 90731, and the Regional Director, National Marine Fisheries Service, Southeast Region, Duval Building, 9450 Gandy Boulevard, St. Petersburg, Florida 33702.

Concurrent with the publication of this notice in the FEDERAL REGISTER, the Secretary of Commerce is forwarding copies of this application to the Marine Mammal Commission and the Committee of Scientific Advisors.

Interested parties may submit written data or views, or requests for a public hearing on this application to the Director, National Marine Fisheries Service, Department of Commerce, Washington, D.C. 20235 on or before June 16, 1975. The holding of such a hearing is at the discretion of the Director.

All statements and opinions contained in this notice in support of this application are those of the Applicant and do not necessarily reflect the views of the National Marine Fisheries Service.

Dated: May 12, 1975.

ROBERT F. HUTTON,  
Associate Director for Resource  
Management National Marine  
Fisheries.

# UNIVERSITY OF CALIFORNIA Notice of Modification of Permit

Notice is hereby given that, pursuant to the provisions of § 216.33(d) and (e) of the Regulations Governing the Taking and Importing of Marine Mammals (39 FR 1851, January 15, 1974), the Scientific Research Permit issued to Paul J. Ponganis, University of California, Santa Cruz, California 95064, on January 31, 1975, is modified, by means of Modification No. 1, in the following manner:

The authorized Pacific white-sided dolphins may be taken from coastal areas of central and southern California, rather than solely from the area of Monterey Bay, California.

This modification is effective May 16, 1975.

The Permit, as modified, is available for review in the Office of the Director, National Marine Fisheries Service, Department of Commerce, Washington, D.C. 20235, and in the Office of the Regional Director, National Marine Fisheries Service, Southwest Region, 300

# UNIVERSITY OF FLORIDA

## Issuance of a Permit To Take Marine Mammals

On February 12, 1975, notice was published in the FEDERAL REGISTER (40 FR 6521), that an application had been filed with the National Marine Fisheries Service by Mr. Nicholas R. Hall and Dr. William R. Dawson, Department of Neurosciences and Ophthalmology, College of Medicine, University of Florida, Gainesville, Florida 32610 to take up to twenty (20) Atlantic bottlenosed dolphins (*Tursiops truncatus*) for scientific research.

Notice is hereby given that on May 8, 1975, and pursuant to the provisions of the Marine Mammal Protection Act of 1972 (16 U.S.C. 1361-1407), the National Marine Fisheries Service issued a permit for the above described taking to Nicholas R. Hall and William W. Dawson, subject to certain conditions set forth therein. The Permit is available for review by interested persons in the Office of the Director, National Marine Fisheries Service, Washington, D.C. 20235, and the Office of the Regional Director, National Marine Fisheries Service, Southeast Region, Duval Building, 9450 Gandy Boulevard, St. Petersburg, Florida 33702.

Dated: May 8, 1975.

ROBERT F. HUTTON,

## Center for Disease Control MEDICAL LABORATORY SERVICES ADVISORY COMMITTEE

### Notice of Meeting

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (Public Law 92-463), the Center for Disease Control announces the following Committee meeting:

Name: Medical Laboratory Services Advisory Committee.

Date: June 2 and 3, 1975.

Place: Classroom 3, Building 2, Center for Disease Control, 1600 Clifton Road, NE., Atlanta, Georgia 30333.

Time: 9 a.m.

Type of Meeting: Open.

Contact Person: Roslyn Q. Robinson, Ph.D.,

Executive Secretary of Committee, Building 1, Room 1007, Center for Disease Con-

trol, 1600 Clifton Road, NE., Atlanta, Georgia, 30333, Phone: AC-404, 633-3311, extension 3262.

Purpose: The Committee is charged with advising the Director, Center for Disease Control, on various laboratory matters and proposed regulations and evaluating the approaches of the Bureau of Laboratories, CDC, and recommending revisions or additions.

Agenda: The Committee will consider and discuss proposed revised regulations for quality control under the Clinical Laboratories Improvement Act of 1967.

Agenda items are subject to change as priorities dictate.

The meeting will be open to public observation and participation. A roster of members and other relevant information regarding the meeting may be obtained from the contact person listed above.

Dated: May 9, 1975.

DAVID J. SENCER,  
Director, Center for  
Disease Control.

# Office of Education TEACHER CORPS

## Closing Date for Receipt of Applications

Notice is hereby given that pursuant to the authority contained in Part B-1 of the Education Professions Development Act of 1965, as amended (79 Stat. 1255-1258 as amended (20 U.S.C. 1101-1107(a))), applications are being accepted from institutions of higher education and local educational agencies for funding the second year of "Ninth Cycle" Teacher Corps project grants.

In order to be assured of consideration for support, applications must be received by the U.S. Office of Education, Application Control Center on or before June 20, 1975.

A. Applications sent by mail. An application sent by mail should be addressed as follows: U.S. Office of Education, Application Control Center, 400 Maryland Avenue, SW., Washington, D.C. 20202, Attention: 13.489. An application sent by mail will be considered to be received on time by the Application Control Center if:

(1) The application was sent by registered or certified mail not later than June 16, 1975 as evidenced by the U.S. Postal Service postmark on the wrapper or envelope, or on the original receipt from the U.S. Postal Service; or

(2) The application is received on or before the closing date by either the Department of Health, Education, and Welfare, or the U.S. Office of Education mail rooms in Washington, D.C. (In establishing the date of receipt, the Commissioner will rely on the time-date stamp of such mail rooms or other documentary evidence of receipt maintained by the Department of Health, Education, and Welfare, or the U.S. Office of Education.)

B. Hand delivered applications. An application to be hand delivered must be

## NOTICES

delivered to the U.S. Office of Education Application Control Center, Room 5673, Regional Office Building Three, 7th and D Streets SW., Washington, D.C. Hand delivered applications will not be accepted by the Application Control Center after 4 p.m. Washington, D.C. time, on the closing date.

**C. Program information and forms.** Information and application forms may be obtained from the Teacher Corps, Office of the Commissioner, Office of Education, Washington, D.C. 20202.

**D. Applicable regulations.** The regulations applicable to this program are the Office of Education General Provisions Regulations (45 CFR Part 100a).

In reviewing these applications, the Commissioner will utilize the review criteria set forth in 45 CFR 100.26a, as well as determining:

(1) whether satisfactory progress, as indicated by site visits, progress reports, and other relevant data, has been made in implementing the previously approved work program, and

(2) whether the application meets the criteria upon which the original proposal was evaluated. (For the convenience of applicants, a copy of these criteria is attached as an appendix to this notice.)

Dated: May 10, 1975.

T. H. BELL,

U.S. Commissioner of Education.

(Catalog of Federal Domestic Assistance Number 13.489—Teacher Corps—Operations and Training)

## APPENDIX

The criteria used during Fiscal Year 1974 for the funding of applications under the Teacher Corps program were as follows:

The extent to which the applicant(s) proposes to increase the educational opportunities available to children in school attendance areas having concentrations of low-income families (as determined in accordance with 45 CFR 118.17(d)), and to improve the quality and broaden the programs of teacher preparation as indicated by the following:

(1) **Instructional program.** The extent to which it is shown that the proposed instructional program is individualized for students at the local school level and the extent to which a plan is proposed which (i) provides for adequate means of identifying and evaluating teacher-internal and qualified teacher competencies, and (ii) provides for training necessary to prepare such interns and teachers to serve in schools in areas having concentrations of low-income families (including training necessary to deal with children with learning or behavioral difficulties in regular classrooms of such schools).

(2020 U.S.C. 1101, 1103)

(2) **Parent and community involvement.** The extent to which the application (i) delineates specific opportunities for consultation with and involvement of parents of children to be served by the proposed project in the planning, development, implementation, and evaluation of such project; (ii) includes evidence that such participation has been encouraged and has in fact occurred in the development of the application; (iii) provides for developing the capabilities of such parents, residents in the community, and secondary education and college students to serve as part-time tutors

or full-time instructional assistants in the project (including, where appropriate, provision for university courses) and (iv) sets forth policy and procedures for adequate dissemination of program plans and evaluations to such parents and the public.

(20 U.S.C. 1101, 1103, 1231d)

(3) **Institutional adoption.** The extent to which the proposed project is designed in such a manner as to facilitate the adoption into its overall instructional program of successful elements of the project by the applicant institution or agency.

(20 U.S.C. 1101, 1103)

## NATIONAL ADVISORY COUNCIL ON ADULT EDUCATION

## Public Meeting

Notice is hereby given, pursuant to section 10(a) (2) of the Federal Advisory Committee Act (Pub. L. 92-463), that the next meeting of the National Advisory Council on Adult Education will be held on June 12-13, 1975, from 9 a.m. to 5 p.m., and on June 14, 1975, from 9 a.m. to 1 p.m., at the Statler Hilton Hotel, Sixteenth and K Streets NW., Washington, D.C.

The National Advisory Council on Adult Education is established under Section 311 of the Adult Education Act (80 Stat. 1216.20 U.S.C. 1201). The Council is directed to:

Advise the Commissioner in the preparation of general regulations and with respect to policy matters arising in the administration of this title, including policies and procedures governing the approval of State plans under section 306 and policies to eliminate duplication, and to effectuate the coordination of programs under this title and other programs offering adult education activities and services.

The Council shall review the administration and effectiveness of programs under this title, make recommendations with respect thereto, and make annual reports to the President of its findings and recommendations (including recommendations for changes in this title and other Federal laws relating to adult education activities and services). The President shall transmit each such report to the Congress together with his comments and recommendations.

The meeting of the Council shall be open to the public. The proposed agenda includes:

Reports on the Council's projects for 311 (d)—program review.  
Parent/Early Childhood Education.  
State Advisory Councils.  
Adult Education Clearinghouse.  
Reports and meetings of the Council's three standing committees and the Executive Committee.

FY-77 adult education appropriations and Council operational budget.  
Adult education reports from USOE officials.  
Community education.

Records shall be kept of all Council proceedings (and shall be available for public inspection at the Office of the National Advisory Council on Adult Education located in Room 323, Pennsylvania Bldg., 425 13th Street, NW., Washington, D.C. 20004).

Signed at Washington, D.C. on May 12, 1975.

GARY A. EYRE,  
Executive Director, National  
Advisory Council on Adult  
Education.

[FR Doc.75-12906 Filed 5-15-75; 8:45 am]

## BILINGUAL EDUCATION FELLOWSHIPS

## Notice of Closing Date for Receipt of Applications

Pursuant to the authority contained in the Bilingual Education Act, as amended (Title VII of the Elementary and Secondary Education Act of 1965, as amended by section 105 of the Education Amendments of 1974, Pub. L. 93-380, 84 Stat. 151, 20 U.S.C. 880b), the Commissioner of Education hereby gives notice that applications are being accepted from institutions of higher education which previously have submitted, and have had approved by the Commissioner, a request for participation in the Bilingual Education Fellowship Program in accordance with notices published in the *FEDERAL REGISTER* on March 28, 1975 (40 FR 14109) and on April 10, 1975 (40 FR 16231). This notice covers applications during the current fiscal year in the award of fellowships to persons preparing to become trainers of bilingual education teachers. Separate notices for submission of applications for assistance under the Bilingual Education Act were published in the *FEDERAL REGISTER* on March 12, 1975 (40 FR 11627) and on April 10, 1975 (40 FR 16231).

Applications must be received by the U.S. Office of Education Application Control Center on or before June 10, 1975.

**A. Applications sent by mail.** An application sent by mail should be addressed as follows: U.S. Office of Education, Application Control Center, 400 Maryland Avenue SW., Washington, D.C. 20202, Attention: 13.403. An application sent by mail will be considered to be received on time by the Application Control Center if:

(1) The application was sent by registered or certified mail not later than June 5, 1975, as evidenced by the U.S. Postal Service postmark on the wrapper or envelope, or on the original receipt from the U.S. Postal Service; or

(2) The application is received on or before the closing date by either the Department of Health, Education, and Welfare, or the U.S. Office of Education mail rooms in Washington, D.C. (In establishing the date of receipt, the Commissioner will rely on the time-date stamp of such mail rooms or other documentary evidence of receipt maintained by the Department of Health, Education, and Welfare, or the U.S. Office of Education).

**B. Hand delivered applications.** An application to be hand delivered must be taken to the U.S. Office of Education Application Control Center, Room 5673, Regional Office Building Three, 7th and D Streets SW., Washington, 20202. Hand delivered applications will be accepted daily between the hours of 8 a.m. and 4 p.m. Washington, D.C. time, except

Saturdays, Sundays, or Federal holidays. Applications will not be accepted after 4 p.m. on the closing date.

**C. Program information and forms.** Information and forms may be obtained from the Division of Bilingual Education, Bureau of School Systems, Office of Education, Room 3600, 7th and D Streets, SW., Washington, D.C. 20202.

As part of Public Law 93-380 (the Education Amendments of 1974) enacted August 21, 1974, the Commissioner of Education was authorized to award fellowships for study in the field of bilingual education teacher training.

In accord with the notice of proposed rulemaking printed in the *FEDERAL REGISTER* on March 12, 1975, fellowships will be awarded by the Commissioner solely for participation in programs previously approved by him on the basis of requests for participation submitted in accord with applicable law and regulations.

In awarding fellowships to individuals selected by him from among those nominated through the applications requested by this notice, the Commissioner will be guided by the relative need for teachers for programs of bilingual education, of various groups of individuals with limited English-speaking ability and by available indicia as to the likelihood that individual nominees will, after the fellowship period, pursue a permanent career in bilingual education teacher training.

**D. Applicable regulations.** The regulations applicable to this program include the Office of Education General Provisions Regulations (45 CFR Part 100a).

Amendments to the regulations for Bilingual Education Programs (45 CFR Part 123), were published as a notice of proposed rulemaking in the *FEDERAL REGISTER* on March 12, 1975 (40 FR 11627). Substantial changes in the current regulations in Part 123 with respect to conditions regarding awards of assistance, activities which may be assisted, priorities and criteria governing award decisions, post award requirements, and other relevant matters were proposed in such notice. Part 123, as altered by such amendments as republished in final form, will govern the operation of the program.

(20 U.S.C. 880b)

Dated: May 12, 1975.

(Catalog of Federal Domestic Assistance Number 13.403; Bilingual Education).

T. H. BELL,

U.S. Commissioner of Education.

Office of the Secretary  
NEW HAMPSHIRE

## Physicians Regarding Intention To Enter Into Agreement Designating Professional Standards Review Organization

Notice is hereby given, in accordance with section 1152(f) of the Social Security Act and 42 CFR 100.104, that the Secretary of Health, Education, and Welfare proposes, subject to satisfactory completion of the contract negotiation process, and completion of required changes in the organizational structure and formal plan, to enter into an agreement with the New Hampshire Foundation for Medical Care for the State of New Hampshire, which area is designated a Professional Standards Review Organization area in 42 CFR 101.33.

The Secretary has determined that the New Hampshire Foundation for Medical Care is qualified to assume the duties and responsibilities of a Professional Standards Review Organization as specified in Title XI, Part B of the Social Security Act. The aforementioned organization is incorporated according to the laws of the State of New Hampshire, as a nonprofit professional organization whose membership is voluntary and comprises at least 25 percentum of the licensed doctors of medicine or osteopathy engaged in active practice in the State of New Hampshire.

As stipulated in its Articles of Incorporation, the principal officers of the New Hampshire Foundation for Medical Care are:

## NAME AND OFFICE HELD

1. Paul J. Driscoll, M.D., President.
2. John M. Sherwin, M.D., Vice President.
3. James P. Philpott, M.D., Secretary-Clerk.
4. A. Richard Chase, Treasurer.

The official address of the corporation is Durham Road, Durham, New Hampshire 03824.

Any licensed doctor of medicine or osteopathy engaged in active practice in the State of New Hampshire who objects to the Secretary entering into an agreement with the New Hampshire Foundation for Medical Care on the grounds that this organization is not representative of the doctors in such area may, on or before June 16, 1975, mail such objection in writing to the Director, Office of Professional Standards Review, Department of Health, Education, and Welfare, P.O. Box 1588, FDR Station, New York, New York 10022. All such objections must include the physician's address, the location(s) of his office, his signature, and a certification that such physician is engaged in the active practice of medicine or osteopathy (i.e., direct patient care and related clinical activities, administrative duties in medical facility or other health related institution, and/or medical or osteopathic teaching or research activity).

Pursuant to 42 CFR 101.103, the Secretary has determined that 1,152 doctors

of medicine and osteopathy are engaged in active practice in the State of New Hampshire. In the event that more than 10 per centum of such doctors express objections as described in the preceding chapter, the Secretary will, in accordance with 42 CFR 101.106, conduct a poll of all such doctors of medicine or osteopathy in such area to determine whether the New Hampshire Foundation for Medical Care is representative of such doctors in such area.

Dated: May 12, 1975.

HENRY E. SIMMONS,

Acting Deputy Assistant Secretary for Health, Director, Office of Professional Standards Review.

[FR Doc.75-12942 Filed 5-15-75; 8:45 am]

## PSRO AREA I OF THE STATE OF WISCONSIN

## Physicians Regarding Intention To Enter Into Agreement Designating Professional Standards Review Organization

Notice is hereby given, in accordance with section 1152(f) of the Social Security Act and 42 CFR 100.104, that the Secretary of Health, Education, and Welfare proposes, subject to satisfactory completion of the contract negotiation process, and completion of required changes in the organizational structure and formal plan, to enter into an agreement with the Wisconsin Professional Standards Review Organization for PSRO Area I, which area is designated a Professional Standards Review Organization area in 42 CFR 101.55.

The Secretary has determined that the Wisconsin Professional Standards Review Organization is qualified to assume the duties and responsibilities of a Professional Standards Review Organization as specified in Title XI, Part B of the Social Security Act. The aforementioned organization is incorporated according to the laws of the State of Wisconsin, as a nonprofit professional organization whose membership is voluntary and comprises at least 25 percentum of the licensed doctors of medicine or osteopathy engaged in active practice in PSRO Area I of the State of Wisconsin.

As stipulated in its Articles of Incorporation, the principal officers of the Wisconsin Professional Standards Review Organization are:

## NAME AND OFFICE HELD

1. M. F. Huth, M.D., Chairman.
2. R. F. Jewell, M.D., Vice-Chairman.
3. A. I. Frelburg, D.O., Secretary.
4. J. B. McKenzie, M.D., Treasurer.

The official address of the corporation is 330 East Lakeside Street, Madison, Wisconsin 53701.

Any licensed doctor of medicine or osteopathy engaged in active practice in PSRO Area I of the State of Wisconsin who objects to the Secretary entering into an agreement with the Wisconsin Professional Standards Review Organization on the grounds that this organization is not representative of the doctors in such area

may, on or before June 16, 1975, mail such objection in writing to the Director, Office of Professional Standards, Review, Department of Health, Education and Welfare, P.O. Box 1588, FDR Station, New York, New York 10222. All such objections must include the physician's address, the location(s) of his office, his signature, and a certification that such physician is engaged in the active practice of medicine or osteopathy (i.e., direct patient care and related clinical activities, administrative duties in medical facility or other health related institution, and/or medical or osteopathic teaching or research activity).

Pursuant to 42 CFR 101.103, the Secretary has determined that 2963 doctors of medicine and osteopathy are engaged in active practice in PSRO Area I of the State of Wisconsin. In the event that more than 10 per centum of such doctors express objections as described in the preceding chapter, the Secretary will, in accordance with 42 CFR 101.106, conduct a poll of all such doctors of medicine or osteopathy in such area to determine whether the Wisconsin Professional Review Organization is representative of such doctors in such area.

Dated: May 12, 1975.

**OFFICE OF THE REGIONAL DIRECTOR,  
REGION V CHICAGO, ILLINOIS**  
Statement of Organization, Functions and Delegations of Authority

Part 1 of the Statement of Organization, Functions and Delegations of Authority of the Department of Health, Education, and Welfare, Office of the Secretary, is amended to add under section 1E85.20 Functions, the functions of the Office of the Assistant Regional Director for Planning and Evaluation and the Office of the Assistant Regional Director for Intergovernmental Affairs. The amended statement reads as follows:

**H. Office of the Assistant Regional Director for Planning and Evaluation (1E8561).**

1. Serves as a principal advisor to the Regional Director in identifying and directing activities to meet the needs and requirements for the planning and evaluation of HEW and related Federal, State, local and private human resources programs within the Region.

2. Identifies needs, opportunities and mechanisms for Regional Office inter-agency coordination in planning and evaluation activities, in order to better accomplish Regional Office goals and objectives.

3. Establishes and maintains an inter-governmental issues identification and a resolution process, in coordination with

the Assistant Regional Director, Intergovernmental Affairs (ARD/IGA), and with this process:

a. coordinates identification and analysis of HEW-related issues needing policy clarification, and facilitates resolution of such issues; and

b. identifies on a geographic basis needs and problems in the Region with a special emphasis on target and special concern groups, and descriptions of available resources.

4. Establishes with the ARD/IGA an intergovernmental review and comment process in order to:

a. disseminate proposed National policies, legislation and regulations within the Region;

b. analyze these proposals for Regional implications, especially in light of Regional observations of needs; and

c. participate in Master Planning Calendar activities including the forward planning process, development of preliminary budgets and model State legislation.

5. Coordinates an evaluation planning and management process which:

a. provides an interface with Central Office evaluation planning process;

b. for HEW programs managed by the Regional Office, identifies information needs for Regional decision-making, and prepares a Regional Office plan for developing, implementing and utilizing evaluation results;

c. identifies programs directly operated by the RD, information needed to describe programs progress and then develops instrument and techniques for measuring progress in reaching program goals; and

d. ensures dissemination of evaluation results for all DHEW programs throughout the Region.

6. Works with Regional Agencies and the Audit Agency to improve evaluation and monitoring capabilities within the Region.

7. Assists the ARD/IGA in developing and monitoring in the implementation of a Regional capacity building plan. Identifies and assesses the constraints which impede current and/or potential participants from preparing effective program designs. Develops strategies for eliminating constraints and improving capacities. Assists the ARD/IGA in planning for and monitoring the provisions of technical or financial assistance to general purpose governments in the development of integrated services and management systems.

8. Establishes, in coordination with the Assistant Regional Director for Administration and Management and ARD/IGA, procedural and substantive criteria for the management review of those project grants covered by the RDRS system, all developmental assistance programs, all programs serving cross-agency target groups and agency efforts at reviewing State plans.

9. Assists the ARD/IGA in the accomplishment of Regional manpower responsibilities by the Regional Manpower Coordination Units.

10. Directs and coordinates the Regional activities related to the operation of the Operational Planning System.

1. Office of the Assistant Regional Director for Intergovernmental Affairs (1E8541).

1. Serves as a principal representative to the Regional Director and supervises a staff unit to help accomplish the Department's intergovernmental, technical assistance and program coordination mission in the Region.

2. Serves as the Regional Director's representative in establishing and maintaining systematic contacts with the Office of Governors, Congressmen, State legislators, county executives and Mayors. Recommends alternative methods for achieving goals and objectives, exercising priorities and implementing policies pertaining to relationships with State and local general purpose governments.

3. As a result of establishing a system for intergovernmental contacts, establishes and maintains a process for the identification of intergovernmental issues; refers these issues to the Regional Director, Assistant Regional Director for Planning and Evaluation (ARD/P&E), and the Regional Agency Heads for proper analysis and resolution; and coordinates the dissemination of information on problems that have been resolved to State and local governments and representatives of private interest groups.

4. In cooperation with the ARD/P&E and Regional Agency Heads, coordinates and monitors procedures for securing timely State and local GPG review and comment on appropriate policies, legislation, and regulations; keeps Regional Office and Headquarters staff informed about major current developments concerning major new human resource legislation and policies at the State and local levels.

5. Identifies and brings to the attention of the ARD/P&E, problems and issues in the States that may be amenable to DHEW evaluation efforts; facilitate, in coordination with the ARD/P&E, the dissemination of significant human resource evaluation, and monitoring findings to and from State and local governments.

6. Ensures that the Regional Office role in the implementation of DHEW policies, through such systems as OPS, is clearly spelled out to State and local general purpose governments. In cooperation with the ARD/P&E, develops a process for disseminating information on operational objectives to State and local governments and special concerns groups. In cooperation with the ARD/P&E and the Regional Agency Heads, attempts to ensure that State and local governments institute adequate mechanisms for implementing major common operational objectives. Provides for an exchange of information and interface with other Departments where interdepartmental efforts are required to implement policies.

7. Coordinates the planning and delivery of technical assistance to assist

States and local general purpose government in the accomplishment of common program objectives.

8. Develops and monitors, in coordination with ARD/P&E and Regional Agencies, implementation of a capacity building plan. Identifies and assesses the constraints which impede current and/or potential participants from developing effective delivery systems. Develops strategies for eliminating constraints and improving capacities. Plans for and monitors the provision of technical or financial assistance to general purpose governments in the development of integrated services and management systems.

9. Participates from time to time in interagency or interdepartmental studies with responsibility for fact-finding, analysis, and making recommendations to top-level policy-making officials about National and intergovernmental program planning.

10. Provides guidance and staff support to the Federal Regional Council, in connection with operations and activities that require coordination with Federal, State and local governments. This includes responsibility for maximizing the Federal Regional Council's potential for improving the quality and effectiveness of intergovernmental operations. Coordinates Regional participation on the Federal Executive Board, its committees and task forces.

11. Has leadership responsibility for carrying out the Regional Office responsibilities for the CETA program. Administers and assures that the Regional Office manpower work plan is being accomplished. Participates actively in the implementation of Departmental policy for CETA through the Regional Office Manpower Coordinator and Regional Agency program-related staff. Assures and identifies the inter-relationships of DHEW CETA activities with related Departmental initiatives such as capacity building and services integration.

12. Assures that DHEW resources are provided to special concerns groups, including Indian Reservations. Develops and maintains systematic contact with Indian reservation tribal leaders, and the principal representatives of special concerns groups.

13. Ensures that the provisions of the National Environmental Policy Act are carried out. Monitors the preparation of environmental impact statements by appropriate agencies.

Dated: May 9, 1975.

**THOMAS S. McFER,**  
Acting Assistant Secretary for  
Administration and Management.

[FR Doc. 75-12944 Filed 5-15-75; 8:45 am]

**COMMISSION ON CIVIL RIGHTS  
MASSACHUSETTS**

**Amendment to Notice of Hearing**

Notice of a hearing given April 25, 1975, 40 FR 18213, is hereby amended. New language is indicated by italics.

**COUNCIL ON ENVIRONMENTAL  
QUALITY**

**ENVIRONMENTAL IMPACT STATEMENTS**

**Availability**

Environmental impact statements received by the Council on Environmental Quality from May 5, 1975 to May 9, 1975. The date of receipt for each statement is noted in the statement summary. Under Council Guidelines the minimum period for public review and comment on draft environmental impact statements in forty-five (45) days from this FEDERAL REGISTER notice of availability. (July 1, 1975). The thirty (30) day period for each final statement begins on the day the statement is made available to the Council and to commenting parties. Copies of individual statements are available for review from the originating agency. Back copies will also be available at cost from the Environmental Law Institute, 1346 Connecticut Avenue, Washington, D.C. 20036.

DEPARTMENT OF AGRICULTURE  
Contact: David Ward, Acting Coordinator,  
Environmental Quality Activities, Office of  
the Secretary, U.S. Department of Agriculture,  
Room 331-E, Administration Building,  
Washington, D.C. 20250, (202) 447-3853.

**FOREST SERVICE**

**Final**  
Garden Valley Planning Unit, Boise National Forest, Valley County, Boise, Idaho, May 9: The statement refers to a land use plan for the 241,800 acre Garden Valley Planning Unit of Boise National Forest. The plan attempts to determine the desired balance of development and protection for each management unit. The most significant adverse impact is on fish and wildlife. Livestock use in and around stream channels will remove needed streambank cover, cause streambanks to cave in, and increase sedimentation. Road construction, timber harvest, grazing, and campground development will have an adverse effect on aesthetics. (ELR Order No. 50692.)

**Final**  
Aquatic Weed Control, Apache National Forest, Arizona and New Mexico, May 5: Proposed is an aquatic weed control program for five lakes on the Apache National Forest. Mechanical and chemical (Diquat) methods, individually and in combination, would be used. The overabundant aquatic vegetation is considered esthetically displeasing, and interferes with the effective and proper harvest of fishery resources. The statement indicates that there will be no significant impact to the physical or biological environment. (52 pages). Comments made by: DOI, USDA, EPA, State and local agencies, and private citizens and groups. (ELR Order No. 50674.)

**Final**  
Winger/Grass Lake Power, Minnesota, Polk, Clearwater, and Beltrami Counties, Minn., May 8: Proposed is the granting of a loan to the Minnkota Power Coop. in order to finance 38 miles of 230kV power line from Winger, Minn. to the Grass Lake Station southeast of Wilton, Minn. Included is an additional 18 mile section to be constructed and owned by the Otter Tail Power Co. Adverse impacts will include the cutting of timber, soil erosion, aesthetic effects, and temporary construction disruption. (two

Notice is hereby given pursuant to the provisions of the Civil Rights Act of 1957, 71 Stat. 634, as amended, that a public hearing of the U.S. Commission on Civil Rights will commence on June 16, 1975, at the John F. Kennedy Federal Building, Room 2003A, Government Center, Boston, Massachusetts. An Executive Session, if appropriate, may be convened at any time during the hearing.

The purpose of the hearing is to collect information concerning legal developments constituting a denial of equal protection of the laws under the Constitution because of race, color, religion, sex, or national origin particularly concerning public school desegregation and equal educational opportunity; to appraise the laws and policies of the Federal Government with respect to denials of equal protection of the laws under the Constitution because of race, color, religion, sex, or national origin particularly concerning public school desegregation and equal educational opportunity; and to disseminate information with respect to denials of equal protection of the law under the Constitution because of race, color, religion, sex, or national origin particularly concerning public school desegregation and equal educational opportunity.

Dated at Washington, D.C., May 13, 1975.

**ARTHUR S. FLEMMING,**  
Chairman.

[FR Doc. 75-13015 Filed 5-14-75; 9:56 am]

**CIVIL SERVICE COMMISSION  
FEDERAL EMPLOYEES PAY COUNCIL**

**Notice of Meeting**

Pursuant to section 10(a)(2) of the Federal Advisory Committee Act, Public Law 92-463, notice is hereby given that the Federal Employees Pay Council will meet at 2 p.m. on Wednesday, June 11, 1975. This meeting will be held in room 5323 of the U.S. Civil Service Commission building, 1900 E Street, NW., and will consist of continued discussions on the fiscal year 1976 comparability adjustment for the statutory pay systems of the Federal Government.

The Chairman of the U.S. Civil Service Commission is responsible for the making of determinations under section 10(d) of the Federal Advisory Committee Act as to whether or not meetings of the Federal Employees Pay Council shall be open to the public. He has determined that this meeting will consist of exchanges of opinions and information which, if written, would fall within exemptions (2) or (5) of 5 U.S.C. 552(b). Therefore, this meeting will not be open to the public.

For the President's Agent.

**RICHARD H. HALL,**  
Advisory Committee Management Officer for the President's Agent.

volumes). Comments made by: DOI, USDA, EPA, DOT, FPC, and State agencies. (ELR Order No. 50688.)

#### DEPARTMENT OF DEFENSE

##### ARMY CORPS

Contact: Mr. Francis X. Kelly, Director, Office of Public Affairs, Attn: DAEN-PAP, Office of the Chief of Engineers, U.S. Army Corps of Engineers, 1000 Independence Avenue, SW., Washington, D.C. 20314, (202) 693-6861.

##### Draft

Cornville Dam and Lake, Operation, Johnson and Linn Counties, Iowa, May 5: The statement refers to the operation of the Cornville Dam and Lake placed in operation in 1958. No new construction or alterations are planned. Present adverse effects include: increases in the water table both above and below the lake; probable increases of undesirable algae blooms; disruption of travel on some secondary roads during flood stages; continued existence of a barren area between conservation and flood pool levels which is aesthetically unpleasing; and a probable increase in the frequency at which upstream easement lands are inundated. (Rock Island District.) (ELR order No. 50675.)

Red Rock Dam and Lake, Maintenance, several counties, Iowa, May 8: Proposed is the operation and maintenance of Red Rock Dam and Lake Red Rock which provides flood protection and low-flow augmentation downstream. Adverse impacts include periodic inundation of terrestrial habitat between 725 msl and 780 msl, an estimated 4,400 acre-feet of sediment deposited in the upper reaches of the lake, seasonal fluctuations in lake levels resulting in an unstable environment for aquatic life, and periodic inundation of historical and archaeological sites. (Rock Island District.) (ELR order No. 50689.)

Lake Borgne Vicinity Navigation Projects, Louisiana, May 5: Proposed are navigation projects for operation and maintenance of the Mississippi River—Gulf Outlet, and Bayou Dupre, La Loutre, St. Malo, and Yecloskey, all in the vicinity of Lake Borgne, Louisiana. Total project length is 111.3 miles. Dredge material will be deposited in both contained, diked disposal areas, and in open water in Breton Sound. Benthic habitats will be disrupted, and effects of resuspension of pollutants when dredged material is resuspended is yet to be determined. (New Orleans District.) (ELR order No. 50685.)

Lake Pontchartrain Tributaries, O & M, Louisiana, May 5: The navigation project provides for maintaining channels of specified dimensions in the Amite River; Bayou Manchac; Tickfaw, Natchitoches, Ponchatoula, Blood Rivers; Tangipahoa River; Chefuncte and Bouque Falls; Bayou Lacombe; Bayou Bonfouca; and Pass Manchac in the Lake Pontchartrain Basin, Louisiana. The action consists principally of maintenance dredging, clearing and snagging operations of the aforementioned streams. Benthic communities in the channel bottom will be disrupted and destroyed by dredging, and the terrestrial habitat will be destroyed in the diked land disposal sites. (New Orleans District.) (ELR order No. 50677.)

Gulf Intracoastal Waterway Projects, Louisiana, Terrebonne County, La., May 5: The statement concerns four navigation projects for maintenance dredging of channels of specified dimensions in the Houma Navigation Canal, Little Caillon Bayou, Bayou Grand Caillon and Le Carpe (waterway from the Gulf Intracoastal Waterway to Bayou Dulac), and Bayou Terrebonne. The primary impact of the proposed operation and maintenance dredging would be the continuing use of approximately 7,930 acres for

#### NOTICES

disposal of dredged material. (New Orleans District.) (ELR order No. 50678.)

Replacement of Vermilion Lock, GIWW, Vermilion County, La., May 5: The project provides for construction of an earth-chambered sector-gated replacement lock to operate in consonance with other features to assure efficient function of the overall Gulf Intracoastal Waterway system and to provide control of marsh salinities and conservation of freshwater supplies in the project area. The primary adverse impact is the displacement of 332 acres of marshland with dredged material, and the conversion of 13 acres of marshland to channel bottom. (New Orleans District.) (ELR order No. 50686.)

Winona Flood Control and Waterfront Development, Winona County, Minn., May 5: The statement refers to a project for flood control and waterfront development along the Mississippi River at Winona. Construction of a flood barrier along the riverfront and downstream portion of Winona would continue as would floodplain regulations. The environment of the area would be adversely affected from construction and increased activity. (St. Paul District.) (ELR order No. 50671.)

Pomme de Terre Lake, Hickory and Polk Counties, Mo., May 5: The statement concerns the continued operation and maintenance of Pomme de Terre Lake consisting of water control operations, operation and maintenance of recreation areas, and management of project land and water resources. An adverse effect associated with the project is the overuse of project facilities and lands that has caused environmental damage. Other problems associated with fluctuating lake levels include disruption of recreation use, erosion of the lake shore and disruption of the fish and wildlife use of project lands and waters. (ELR order No. 50668.)

Rivergate-North Portland Flood Control, Multnomah County, Ore., May 5: Proposed is the construction of a levee system around the perimeter of the western end of the north Portland peninsula including earthen dikes, a flood wall section, and a closure embankment in Columbia Slough. One controlled outlet channel would be constructed to regulate water levels in Smith and Hybee Lakes. Recreation development is also included in the plan. Adverse economic opportunity impacts may be felt by the Columbia Boulevard Industries, and temporary construction disruption will result. (Portland District.) (ELR order No. 50669.)

Yaquina Bay and River, Channels and Breakwaters, Lincoln County, Ore., May 5: The statement concerns a project for operation and maintenance of the channels and breakwaters in Yaquina Bay and River. Included in the plan is jetty maintenance, channel construction and maintenance, and turning basin maintenance. The action will alter ocean bottom, estuary bottom, some wetlands, and some terrestrial areas by disposal of dredged materials and will resuspend toxic substances. Benthic organisms on 475 acres of channel bottom will be destroyed. (Portland District.) (ELR order No. 50670.)

Water Filtration Plant Flood Protection (2), Virginia, May 6: The action is flood protection of the city of Richmond, Virginia's municipal water filtration plant, located west of Richmond on the James River. The protection consists of modifications and additions to approximately 2,100 feet of existing walls around three sides of the water filtration plant proper. One vehicular and two railroad closures are required in the protective wall. Construction disruption will result. (Norfolk District.) (ELR order No. 50681.)

##### Final

Sacramento River, Bank Protection Project, Butte, Glenn, and Tehama Counties, Calif.,

May 6: The statement refers to the proposed installation of bank protection at intermittent sites along the Sacramento River from Chico Landing to Red Bluff. Adverse impacts include loss of aesthetics, wildlife, and other natural riparian values of the river. (Sacramento District.) Comments made by: EPA, DOI, DOC, DOT, USDA, State and local agencies, private citizens and groups. (ELR order No. 50679.)

Gypsum Small Flood Protection, Kansas, May 5: Proposed is the construction of a small flood protection project consisting of a highflow diversion channel and a levee around Gypsum, Kansas. Adverse impact include: temporary loss of vegetative cover at the proposed borrow area and diversion channel; reduction of wildlife habitat; temporary adverse effects due to construction activities; relocation of one family; minor inundation of areas outside the levee; and loss of approximately 50 acres of agricultural land. (Kansas City District.) Comments made by: USDA, HEW, HUD, DOI, DOT, State and local agencies and concerned citizens. (ELR order No. 50666.)

Los Esteros Dam and Lake Project, De Baca and Guadalupe Counties, N. Mex., May 6: Proposed is the construction and operation of the Los Esteros Dam Project for purposes of flood control, sediment retention, and irrigation water storage for 100 years. Los Esteros Lake will be operated in conjunction with Summer Lake for optimum flood protection. The project will inundate from 6,550 acres to 10,000 acres due to periodic flooding and will convert 14 miles of free-flowing stream to slack water. (Albuquerque District.) Comments made by: DOI, USDA, DOT, HEW, EPA, and State agencies. (ELR order No. 50680.)

#### DEPARTMENT OF HUD

Contact: Mr. Richard H. Brown, Director, Office of Environmental Quality, Room 7258, 451 7th Street, S.W., Washington, D.C. 20410, (202) 755-6308, Section 104(h).

##### Draft

Vegas Heights Community Development, Las Vegas, Nevada, May 9: The project is to provide urbanization improvements, i.e., streets, curbs, gutters, parking lanes, sidewalks, driveways, and street lighting to the Vegas Heights area of the City of Las Vegas, Nevada. The proposed project area is contained in the neighboring residential area bounded by Highland Avenue on the west, Carey Avenue on the north, "H" Street on the east, and Lake Mead Boulevard on the south. Construction disruption will result. (ELR order no. 50694.)

#### NEW ENGLAND RIVER BASINS COMMISSION

##### Draft

S.E. New England Water and Land Resources, Massachusetts, Rhode Island and Connecticut, May 5: The New England River Basin Commission proposes to transmit a report recommending policies and actions for balanced conservation, management, and development of the water and related land resources of Southeast New England. The report contains a series of 130 policies and structural and non-structural solutions in the following areas: water supply, water quality, land use, outdoor recreation, sport fishing, port development, urban waterfront use, sand and gravel extraction, flooding and erosion, electrical power, petroleum facilities, and solid waste management. Actions are directed to all levels of government and private interests. (ELR order No. 50676.)

#### NUCLEAR REGULATORY COMMISSION

Contact: Mr. A. Giambusso, Director of Division of Reactor Licensing, P-722, NRC, Washington, D.C. 20555, (301) 492-7373.

##### Draft

Perkins Nuclear Station, Units 1-3, Construction, Davie County, N.C., May 7: Proposed is the issuance of a construction permit to the Duke Power Company for the construction of the Perkins Nuclear Station Units 1, 2, and 3. The units will produce 3817 MWT and 1280 MWe each. Make-up water for cooling will be drawn from and discharged to the Yadkin River. A total of 2402 acres will be used for the PNS site, displacing 26 families from the site proper and another 16 families from the Carter Creek area. Aquatic organisms entrained in the service water system will be killed due to thermal and mechanical shock, and there is potential for impingement of aquatic organisms at the intake structure as proposed. (ELR order No. 50683.)

##### Final

Fulton Generating Station, Lancaster County, Pa., May 8: Proposed is the issuance of construction permits to the Philadelphia Electric Company for the Station. Two identical high-temperature gas-cooled reactors (HTGR's) will be employed to produce 300 MWT each. A steam turbine generator will convert this heat to 1,120 MWe (net) for each unit. A closed-cycle, natural draft cooling tower system will be utilized, with water drawn from Conowingo Pond at a maximum (HTGR's) will be employed to produce 3000 acre site. Comments made by: AEP, USDA, DOI, HEW, DOC, FPC, EPA, HUD, USCG, COE, and State agencies. (ELR order No. 50687.)

#### DEPARTMENT OF TRANSPORTATION

Contact: Mr. Martin Convisser, Director, Office of Environmental Affairs, 400 7th Street, S.W., Washington, D.C. 20590, (202) 426-4357.

#### FEDERAL HIGHWAY ADMINISTRATION

##### Draft

Williams Interstate Freeway, I-40, Coclino County, Ariz., May 9: The statement concerns a 5.4 mile section of I-40 approximately 5 mile north of the City of Williams, Arizona. The project provides for the construction of two divided 38-foot roadways with an interchange in West Williams at Second Street and three railroad overpasses. The facility will require right-of-way on largely unimproved land. (ELR order No. 50691.)

I-82, Union Gap to Prosser, Prosser Vicinity, (S), Yakima and Benton Counties, Wash., May 5: Part One of the statement serves as a supplement to a final EIS concerning the section of I-82 from Union Gap to Prosser and Part Two serves as a final to a draft EIS concerning I-82 in the Prosser Vicinity. The entire segment will run approximately 47 miles and will displace families and businesses. (ELR order No. 50667.)

##### Final

SR 38, Forest Highway 68, San Bernardino County, Calif., May 5: The project involves the upgrading of Forest Highway 68, State Route 38 in the San Bernardino National Forest, San Bernardino County. The project extends from the Forest Boundary 5.3 miles east to Forest Home Boulevard. The plan includes grading, paving and structures necessary to provide a two-lane, 45 m.p.h. design speed facility. Adverse impacts include normal construction disruptions, and slight increases in noise levels at certain areas. (57 pages.) Comments made by: DOT, EPA, COE, USDA, State and local agencies. (ELR order No. 50673.)

Colorado Forest Highway Route 15, Gunnison County, Colo., May 8: The proposed project will provide the improvement of 6.7

#### NOTICES

miles of substandard section from the west foot or bottom of McClure Pass southerly to connect to the roadway along the Paonia Reservoir completed by the Bureau of Reclamation in 1908. The facility will provide an all-weather 2-lane access road to the North Fork Valley. The project will require natural resources such as grazing lands and wildlife habitat for right-of-way, and will result in disruption of aesthetics, vegetation, fishery, and water quality during construction. (233 pages.) Comments made by: (ELR order No. 50690.)

I-95, Russell Street to Hanover Street (Supplement), Baltimore County, Md., May 6: The statement is a supplement to a final environmental impact statement filed with CEQ 17 April 1974, and is in anticipation of the design and construction of a one-mile segment of an 8-lane controlled access expressway crossing over Middle Branch of the Patuxent River of the Baltimore Harbor. Dredging and spoil disposal will be necessary, and an unspecified number of families and businesses will be displaced. Comments made by: EPA, DOT, DOI, State and local agencies. (ELR order No. 50682.)

U.S. 45, Columbus to Shannon, Mississippi, May 5: The proposed project consists of relocating U.S. 45 from U.S. 82 west of Columbus to U.S. 45 at Shannon, a distance of approximately 48 miles. Seven alternative relocation alignments are discussed in the statement. There will be displacements of families and businesses no matter what alternative is chosen. Comments made by: COE, USDA, EPA, State and local agencies. (ELR order No. 50673.)

#### U.S. POSTAL SERVICE

##### Draft

Kennedy Airport Air-Mail Facility, Queens County, N.Y., May 9: Proposed is the construction of a 650,000 square foot building at the Kennedy International Airport to transfer, process, and distribute air mail. The facility, which will allow for the consolidation at one site the functions currently conducted at three dispersed sites, would be constructed on a 20-acre site near the north boundary of the airport. (71 pages.) (ELR order No. 50693.)

GARY L. WIDMAN,  
General Counsel.

[PR Doc.75-12879 Filed 5-15-75;8:45 am]

#### ENVIRONMENTAL IMPACT STATEMENTS

##### Availability

The following list, filed with the Council by the United States Coast Guard pursuant to Council Guideline 40 CFR 1500.6 (e), indicate those administrative actions that USCG has determined will require the preparation of environmental impact statements under NEPA.

#### COAST GUARD

DRAFT (D) AND FINAL (F) ENVIRONMENTAL IMPACT STATEMENTS (EIS) BEING PREPARED BY THE U.S. COAST GUARD

DEIS—Proposed Coast Guard Station at Provincetown, Mass. (revised DEIS)

FEIS—For the location, construction and operation of the U.S. Coast Guard New London Station, Research and Development Center, and support facilities in New London, Conn.

FEIS—Proposed Loran C Chain—Gulf Coast DEIS—Proposed Multi-purpose facility at Berwick, LA

DEIS—Proposed General Rules for Vessel Traffic System, Berwick Bay, LA

FEIS—Proposed Regulations to implement Title II, Ports and Waterways Safety Act of 1972

FEIS—Proposed Vessel Traffic System, Houston/Galveston, TX

FEIS—Proposed Loran C Chain, U.S. West Coast, Gulf of Alaska

DEIS—Point Reyes Housing Sewage Disposal Plan, CA

DEIS—Deepwater Port Regulations (revised DEIS)

DEIS—Northbrook Housing, IL (project may be deleted)

FEIS—Proposed Coast Guard Station (Design Station), Santa Rosa Island, FL

DEIS—Proposed Loran C Station, Seneca Army Depot, NY

DEIS—Proposed routes US 22 highway bridge across the Ohio River between Wierton, W. Va. and Stubenville, Ohio.

DEIS—Proposed Belmont Street bridge across the Kansas River at Lawrence, Kansas.

DEIS—Proposed route 18 highway bridge across the Raritan River in New Brunswick, N.J.

DEIS—Proposed Calhoun Street bridge across the Delaware River between Morrisville, Pa. and Trenton, N.J.

DEIS—Proposed Merrick Rd. bridge across Seaforth Creek in Mineola, N.Y.

DEIS—Proposed ramps for the downtown expressway to the I-95 highway bridge across the James River in Richmond, Va.

FEIS—Proposed highway bridge across Station Creek for access to a planned residential development on St. Phillip Island in Beaufort County, S.C.

DEIS—Proposed 78th Ave. bridge across the Gulf Intracoastal Waterway in Seminole Beach, Florida.

DEIS—Proposed James Point bridge across the St. John River in Jacksonville, Fla.

DEIS—Proposed highway bridge across the Calcasieu Lake in Cameron, Louisiana.

DEIS—Proposed highway bridge across the Hog Bayou in Grand Cheniere, Louisiana.

DEIS—Proposed highway bridge across the Wolf River in Fremont, Wisconsin.

FEIS—Proposed replacement of the Dumbarton Bridge across San Francisco Bay, San Mateo and Alameda Counties, California.

NEGATIVE DECLARATIONS PREPARED AND FILED IN COAST GUARD HEADQUARTERS DURING THE FIRST QUARTER OF CY 1975

Construct 11 single family dwellings in Springs, East Hampton, Suffolk County, Long Island, NY.

Amend Title 48 CFR to require improved structural fire protection of tank ships, and to require inerting of cargo tanks in tank ships of 100,000 deadweight tons (DWT) and over and combination carriers of 50,000 DWT and over.

Proposed Coast Guard Station, Monterey, CA.

Proposed rehabilitation of Coast Guard Base, Charleston, SC.

Proposed Replacement of M/V Rhode Island at USCG Fire and Safety Test Facility, Mobile, Ala.

NEGATIVE DECLARATIONS FOR FINAL BRIDGE PERMIT ACTIONS

# COMMITTEE FOR PURCHASE FROM THE BLIND AND OTHER SEVERELY HANDICAPPED

## PROCUREMENT LIST 1975

### Notice of Proposed Addition

Notice is hereby given pursuant to section 2(a)(2) of Pub. L. 92-28; 85 Stat. 79, of the proposed addition of the following commodities to Procurement List 1975, November 12, 1974 (39 FR 39964).

### CLASS 6230

Desk Light 6230-00-299-7771

Comments and views regarding these proposed additions may be filed with the Committee not later than June 16, 1975. Communications should be addressed to the Executive Director, Committee for Purchase from the Blind and Other Severely Handicapped, 2009 Fourteenth Street North, Suite 610, Arlington, Virginia 22201.

This notice is automatically cancelled six months from the date of this FEDERAL REGISTER.

By the Committee.

C. W. FLETCHER,  
Executive Director.

## ENVIRONMENTAL PROTECTION AGENCY

[FRL 373-3; OPP-32000/250]

### RECEIPT OF APPLICATIONS FOR PESTICIDE REGISTRATION

#### Data To Be Considered in Support of Applications

On November 19, 1973, the Environmental Protection Agency (EPA) published in the FEDERAL REGISTER (38 FR 31862) its interim policy with respect to the administration of section 3(c)(1)(D) of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended. This policy provides that EPA will, upon receipt of every application for registration, publish in the FEDERAL REGISTER a notice containing the information shown below. The labeling furnished by the applicant will be available for examination at the Environmental Protection Agency, Room EB-31, East Tower, 401 M Street SW., Washington, D.C. 20460.

On or before July 15, 1975, any person who (a) is or has been an applicant, (b) believes that data he developed and submitted to EPA on or after October 21, 1972, is being used to support an application described in this notice, (c) desires to assert a claim for compensation under section 3(c)(1)(D) for such use of his data, and (d) wishes to preserve his right to have the Administrator determine the amount of reasonable compensation to which he is entitled for such use of the data, must notify the Administrator and the applicant named in the notice in the FEDERAL REGISTER of his claim by certified mail. Notification to the Administrator should be addressed to the Information Coordination Section, Technical Services Division (WH-569), Office of Pesticide Programs, 401 M Street, SW., Washing-

ton, D.C. 20460. Every claimant must include, at a minimum, the information listed in the interim policy of November 19, 1973.

Applications submitted under 2(a) or 2(b) of the interim policy will be processed to completion in accordance with existing procedures. Applications submitted under 2(c) of the interim policy cannot be made final until the 60 day period has expired. If no claims are received within the 60 days period, the 2(c) application will be processed according to normal procedure. However, if claims are received within the 60 day period, the applicants against whom the claims are asserted will be advised of the alternatives available under the Act. No claims will be accepted for possible EPA adjudication which are received after July 15, 1975.

Dated: May 8, 1975.

JOHN B. RITCH, Jr.,  
Director, Registration Division.

#### APPLICATIONS RECEIVED (OPP-32000/250)

EPA Reg. No. 8111-5. Aero Industries, Inc., Box 282, Emmetsburg IA 50536. AERO-FOG THERMAL AEROSOL INSECTICIDE PYRETHRIN. Active Ingredients: Pyrethrin 0.30%; Technical Piperonyl Butoxide (Equivalent to 0.48% (butylcarbityl) (6-propylpiperonyl) ether and 0.12% related compounds) 0.60%; N-Octyl bicycloheptene dicarboximide 1.00%; Mineral Seal Oil 73.10%. Method of Support: Application proceeds under 2(c) of interim policy. Republished: Added use. PM17

EPA File Symbol 35909-E. Associated Water Conditioners, Inc., Route 202, Mt. Kemble Ave., Morristown NJ 07960. BIOCID 464. Active Ingredients: N-Alkyl (50% C14, 40% C12, 10% C16) dimethyl benzyl ammonium chloride 10%. Method of Support: Application proceeds under 2(c) of interim policy. PM31

EPA File Symbol 551-EGT. Baird & McGuire, Inc., South St., Holbrook MA 02343. ROACH SPRAY CONTAINS BAYGON. Active Ingredients: o-Isopropoxyphenyl methylcarbamate 1.0%; Isoparaffinic hydrocarbons 83.7%. Method of Support: Application proceeds under 2(c) of interim policy. PM12

EPA File Symbol 5667-OL. Barrett Chem. Co., Inc., H & Luzerne Sts., Philadelphia PA 19124. BARRETT'S DISINFECTANT CLEANER NO. 14. Active Ingredients: Didecyl dimethyl ammonium chloride 2.5%; Tetrasodium ethylenediamine tetraacetate 2.0%; Sodium carbonate 1.5%. Method of Support: Application proceeds under 2(b) of interim policy. PM31

EPA File Symbol 4543-0. Chemley Products Co., PO Box North Town Station, Chicago IL 60659. NO SCALD ETHOXYQUIN CONCENTRATE "250". Active Ingredients: Ethoxyquin 55.5. Method of Support: Application proceeds under 2(c) of interim policy. PM25

EPA Reg. No. 239-739. Chevron Chemical Co., 340 Hensley St., Richmond CA 94804. ORTHO MALATHION 50 INSECT SPRAY. Active Ingredients: Malathion (0,0-dimethyl dithiophosphate of diethyl mercaptosuccinate) 50%; Aromatic Petroleum Derivative Solvent 33%. Method of Support: Application proceeds under 2(c) of interim policy. PM16

EPA File Symbol 729-AA. Gulf Oil Corp., Gulf Bldg., Houston TX 77002. GULF-SPRAY WASP AND HORNET KILLER FORMULA 1. Active Ingredients: (5-Benzyl-3-furyl)methyl 2,2-dimethyl-3-(2-methylpropenyl) cyclopropanecarboxylate 0.250%; Related compounds 0.084%; Aromatic petroleum hydrocarbons 0.331%; Petroleum distillates 53.375%. Method of Support: Application proceeds under 2(c) of interim policy. PM17

EPA File Symbol 729-AL. Gulf Oil Corp., GULFSPRAY WASP AND HORNET KILLER. Active Ingredients: (5-Benzyl-3-furyl) methyl 2,2-dimethyl-3-(2-methylpropenyl) cyclopropane carboxylate 0.150%; Related compounds 0.020%; Aromatic petroleum hydrocarbons 0.199%; 2-(1-methylethoxy) phenol methyl carbamate 0.500%; Petroleum distillates 53.098%. Method of Support: Application proceeds under 2(c) of interim policy. PM17

EPA File Symbol 729-AT. Gulf Oil Corp., GULFSPRAY WASP AND HORNET KILLER FORMULA 11. Active Ingredients: (5-Benzyl-3-furyl) methyl 2,2-dimethyl-3-(2-methylpropenyl) cyclopropane carboxylate 0.150%; Related compounds 0.020%; Aromatic petroleum hydrocarbons 0.199%; 2-(1-methylethoxy) phenol methyl carbamate 0.500%; Petroleum distillates 53.09%. Method of Support: Application proceeds under 2(c) of interim policy. PM17

EPA File Symbol 407-GOE. Imperial Inc., PO Box 423, Shenandoah IA 51601. IMPERIAL DORMANT SPRAY OIL. Active Ingredients: Petroleum Oils 90%. Method of Support: Application proceeds under 2(c) of interim policy. PM13

EPA File Symbol 3417-EE. Mission Chemical Co., 4990 Naples St., San Diego CA 92110. PAL-O-CLEAN. Active Ingredients: n-alkyl (50% C14, 40% C12, 10% C16) dimethyl benzyl ammonium-chloride 4.8%; Sodium carbonate 3.5%. Method of Support: Application proceeds under 2(c) of interim policy. PM31

EPA File Symbol 3417-ER. Mission Chemical Co., 4990 Naples St., San Diego CA 92110. BACTOLL FORMULA A. Active Ingredients: n-Alkyl (50% C14, 40% C12, 10% C16) dimethyl benzyl ammonium chloride 5.0%; Tetra sodium salt of ethylene diamine tetraacetic acid 2.3%; Sodium carbonate 2.0%. Method of Support: Application proceeds under 2(c) of interim policy. PM31

EPA Reg. No. 3125-302. Chemagro Agricultural Div., of Mobay Chemical Corp., Box 4913, Kansas City MO 64120. MORESTAN 25% WETTABLE POWDER MITICIDE-FUNGICIDE IN WATER SOLUBLE PACKETS. Active Ingredients: 6-Methyl-1,3-dithiolol[4,5-b] quinoxalin - 2 - one 25%. Method of Support: Application proceeds under 2(b) of interim policy. Republished: Added use. PM13

EPA Reg. No. 1839-27. Onyx Chemical Co., Div. of Millmaster-Onyx Corp., 190 Warren St., Jersey City NJ 07302. BTC-2125M-P40 CONCENTRATED GERMICIDE. Active Ingredients: n-Alkyl (50% C12, 30% C14, 17% C16, 3% C18) Dimethyl Benzyl ammonium chlorides 50%. Method of Support: Application proceeds under 2(c) of interim policy. PM31

EPA Reg. No. 1839-55. Onyx Chemical Co., Div. of Millmaster-Onyx Corp., 190 Warren St., Jersey City NJ 07302. BTC-2125M-P40 CONCENTRATED GERMICIDE. Active Ingredients: n-Alkyl (60% C14, 30% C16, 5% C12, 5% C18) dimethyl benzyl ammonium chloride 20%; n-Alkyl (60% C12, 32% C14) dimethyl ethylbenzyl ammonium chloride 20%. Method of Support: Appli-

cation proceeds under 2(b) of interim policy. PM 31

EPA File Symbol 11625-EO. Peterson/Puritan, Inc., Danville IL 61832. P/P INSECTICIDE NO. 7. Active Ingredients: Isopropyl Alcohol 0.500%; 2,2-Dichlorovinyl Dimethyl Phosphate 0.460%; Related Compounds 0.040%; (5-Benzyl-3-furyl) methyl 2,2-dimethyl-3-(2-methylpropenyl) cyclopropane carboxylate 0.250%; Related Compounds 0.034%; Aromatic Petroleum Hydrocarbons 0.332%; Petroleum Distillates 18.250%. Method of Support: Application proceeds under 2(c) of interim policy. PM13

EPA Reg. No. 5009-4. Tretolite, Div. of Petro-lite Corp., 369 Marshall Ave., St. Louis MO 63119. X-CIDE 320 INDUSTRIAL BACTERICIDE. Active Ingredients: Alkyl-1,3-propylene diamine acetates (Alkyl-Octyl 8%; Decyl 9%; Dodecyl 47%; Tetradecyl 18%; Hexadecyl 8%; Octadecyl 5%; Octadecenyl 5%) 42.41%; Isopropanol 9.61%. Method of Support: Application proceeds under 2(a) of interim policy. Republished: Added new uses. PM33

EPA File Symbol 655-LGE. Prentiss Drug & Chemical Co., Inc., 363 Seventh Ave., New York NY 10001. PRENTOX PYRONYL POULTRY HOUSE & BARN ULV FLY SPRAY. Active Ingredients: Pyrethrins 2.00%; Piperonyl Butoxide, Technical (Equivalent to 3.20% (Butylcarbityl) (6-propylpiperonyl) Ether and 0.80% related compounds) 4.00%; N-octyl bicycloheptene dicarboximide 5.66%; Petroleum Distillates 87.34%. Method of Support: Application proceeds under 2(c) of interim policy. PM17

EPA File Symbol 10419-E. Protex Wax Products, Inc., 1225 48th Ave., Oakland CA 94601. COMMERCIAL DISINFECTANT CLEANER. Active Ingredients: Didecyl dimethyl ammonium chloride 2.5%; Tetrasodium ethylenediamine tetraacetate 2.0%; Sodium Carbonate 1.5%. Method of Support: Application proceeds under 2(c) of interim policy. PM31

EPA File Symbol 201-GIU. Shell Chemical Co., A Div. of Shell Oil Co., Shell Tower, Houston, TX 77001. SHELL CYCLO SOL 31 HERBICIDE. Active Ingredients: Aromatic Petroleum naphtha 100%. Republished: Method of Support: Application proceeds under 2(b) rather than 2(c) of interim policy. PM24

EPA File Symbol 36739-R. Sinton Supply Co., Inc., 204 E. Sample St., S. Bend IN 46623. SINCO POOL-ADE SUPER SHOK. Active Ingredients: Sodium Hypochlorite 12.5%. Method of Support: Application proceeds under 2(c) of interim policy. PM34

EPA Reg. No. 476-2149. Stauffer Chemical Co., 1200 S. 47th St., Richmond CA 94804. CLENSCO CLEAR. Active Ingredients: N-Alkyl (60% C14, 30% C16, 5% C12, 5% C18) dimethyl benzyl ammonium chlorides 5%; N-Alkyl (68% C12, 32% C14) dimethyl ethylbenzyl ammonium chlorides 5%. Method of Support: Application proceeds under 2(c) of interim policy. PM31

EPA File Symbol 36245-R. Superior Chemical Products Co., 220 Hubbard Rd., Youngstown OH 44505. JANUS ALGICIDE. Active Ingredients: Methylododecylbenzyl trimethyl ammonium chloride 8%; methylododecylstyrene bis (trimethyl ammonium chloride) 2%. Method of Support: Application proceeds under 2(c) of interim policy. PM24

EPA File Symbol 10292-EL. Venus Laboratories, 1028 Industrial Dr., Bensenville IL 60106. DAIRY CATTLE SPRAY 920. Active Ingredients: Pyrethrins 0.05%; Piperonyl butoxide, technical (Consists of 0.08% (butylcarbityl) (6-propylpiperonyl) ether and 0.02% other related compounds) 0.10%;

N-octyl bicycloheptene dicarboximide 0.16%; Di-n-propyl isocinchomeronate 0.20%; Petroleum distillate 99.49%. Method of Support: Application proceeds under 2(c) of interim policy. PM17

EPA File Symbol 6231-G. Wes-Tex Chemical Co., 287 E. 3rd St., Mt. Vernon NY 10650. WES-TEX BAKTRI-SIDE THE MODERN SANITIZER, DEODORANT. Active Ingredients: n-Alkyl (50% C14, 40% C12, 10% C16) dimethyl benzyl ammonium chloride 10%. Method of Support: Application proceeds under 2(c) of interim policy. PM31

EPA File Symbol 769-VLE. Woolfolk Chemical Works, Inc., PO Box 938, Fort Valley GA 31030. SECURITY 4% DIAZINON DUST. Active Ingredients: 0,0-diethyl, 0-(2-isopropyl-6-methyl-4-pyrimidinyl) phosphorothioate 4.0%. Method of Support: Application proceeds under 2(c) of interim policy. PM15

### RECEIPT OF APPLICATIONS FOR PESTICIDE REGISTRATION

#### Data To Be Considered in Support of Applications

On November 19, 1973, the Environmental Protection Agency (EPA) published in the FEDERAL REGISTER (38 FR 31862) its interim policy with respect to the administration of section 3(c)(1)(d) of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended. This policy provides that EPA will, upon receipt of every application for registration, publish in the FEDERAL REGISTER a notice containing the information shown below. The labeling furnished by applicant will be available for examination at the Environmental Protection Agency, Room EB-31, East Tower, 401 M Street SW., Washington, D.C. 20460.

On or before July 15, 1975, any person who (a) is or has been an applicant, (b) believes that data he developed and submitted to EPA on or after October 21, 1972, is being used to support an application described in this notice, (c) desires to assert a claim for compensation under section 3(c)(1)(D) for such use of his data, and (d) wishes to preserve his right to have the Administrator determine the amount of reasonable compensation to which he is entitled for such use of the data, must notify the Administrator and the applicant named in the notice in the FEDERAL REGISTER of his claim by certified mail. Notification to the Administrator should be addressed to the Information Coordination Section, Technical Services Division (WH-569), Office of Pesticide Programs, 401 M Street, SW., Washington DC 20460. Every such claimant must include, at a minimum, the information listed in the interim policy of November 19, 1973.

Applications submitted under 2(a) or 2(b) of the interim policy will be processed to completion in accordance with existing procedures. Applications submitted under 2(c) of the interim policy cannot be made final until the 60 day period has expired. If no claims are received within the 60 day period, the

# FEDERAL ENERGY ADMINISTRATION ENERGY SUPPLY AND ENVIRONMENTAL COORDINATION

## Notice of Intention To Issue Prohibition Orders to Certain Powerplants

The Federal Energy Administration ("FEA") hereby gives notice of its intention to issue prohibition orders, pursuant to the authorities granted it by section 2 of the Energy Supply and Environmental Coordination Act of 1974 (ESECA) and in accordance with 10 CFR Parts 303 and 305, to the following powerplants:

Docket No.	Owner	Powerplant No.	Generating station	Location
OFU-006	Potomac Electric Power Co.	1	Morgantown	Newburg, Md.
OFU-027	do.	2	do.	do.
OFU-028	Virginia Electric Power Co.	3	Chesapeake	Chesapeake, Va.
OFU-029	do.	4	do.	do.
OFU-030	do.	5	do.	do.
OFU-031	do.	6	do.	do.
OFU-032	do.	1	Yorktown	Yorktown, Va.
OFU-033	do.	2	do.	do.
OFU-034	do.	1	Portsmouth	Chesapeake, Va.
OFU-035	do.	2	do.	do.
OFU-036	do.	3	do.	do.
OFU-037	do.	4	do.	do.
OFU-038	Baltimore Gas & Electric Co.	1	Craney	Baltimore, Md.
OFU-039	do.	2	do.	do.
OFU-040	do.	3	Liverdale	do.
OFU-041	do.	4	do.	do.
OFU-042	do.	1	Wagner	do.
OFU-043	do.	2	do.	do.
OFU-044	Delmarva Power & Light Co.	1	Edge Moor	Wilmington, Del.
OFU-045	do.	2	do.	do.
OFU-046	do.	3	do.	do.
OFU-047	do.	4	do.	do.

FEA hereby also gives notice of the opportunity for oral and written presentation of data, views, and arguments on these proposed prohibition orders.

The proposed orders would prohibit the powerplants listed above from burning natural gas or petroleum products as their primary energy source.

Prior to issuance of a prohibition order to a powerplant, section 2 of ESECA re-

quires that FEA make certain findings. FEA's initial conclusions with respect to, and rationale in support of, these findings are set out, with respect to each of the powerplants, at the conclusion of this notice. These findings and rationales may be amended as a result of written or oral comments received by FEA pursuant to this notice and other information available to FEA. The findings will

be included, with any amendments, in a prohibition order when it is issued.

Upon conclusion of the proceedings described in this notice, FEA may determine to issue prohibition orders to some or all of the powerplants listed above. These prohibition orders will not become effective, however, (1) until either, (a) the Administrator of the Environmental Protection Agency ("EPA") notifies the FEA, in accordance with section 119(d) (1)(B) of the Clean Air Act, that the powerplant will be able on and after July 1, 1975, to burn coal and to comply with all applicable air pollution requirements without a compliance date extension under section 119, or (b) if no notification is given by EPA, the date that the Administrator of EPA certifies pursuant to section 119(d) (1)(B) of the Clean Air Act is the earliest date that the powerplant will be able to comply with all applicable air pollution requirements of section 119 of that Act; and (2) until FEA has considered the environmental impact of such order pursuant to § 305.9 of the FEA regulations that implement section 2 of ESECA and has served the affected powerplant a Notice of Effectiveness, as provided in § 303.10 (b) and 303.37(b) of those regulations. The date the prohibition order will be effective will be stated in the notice of effectiveness.

The notice of effectiveness will contain a compliance schedule to insure that the powerplant will be able to comply with the prohibition of the burning of natural gas or petroleum products as a primary energy source on the date the order becomes effective.

Public comment on the proposals to issue prohibition orders to the powerplants listed above is invited in the form of written and oral presentation of data, views and arguments. Comments should relate to individual docket numbers and should make clear to which docket number the individual comment is addressed.

Comments should address (1) the adequacy and validity of each of the proposed findings and the rationale in support of the findings; (2) the identification of any site-specific environmental impacts resulting from the proposed prohibition orders that were not identified or described in the Environmental Impact Statement (EIS 75-1, dated April 25, 1975) for the FEA program to implement section 2 of ESECA; and (3) any other relevant aspects or impacts of the proposed prohibition order. With respect to comments regarding any impact on air quality that might result from a proposed prohibition order, however, it should be recognized that ESECA has assigned to EPA the primary responsibility for analyzing the effect of any such order on the Nation's air quality, and for determining the applicable air pollution requirements that apply to the powerplant that has been issued an order. It is expected that in almost every case, a powerplant to which a prohibition order is issued will be eligible to apply to EPA for a compliance date extension. In connection with that application, EPA must

## NOTICES

also provide an opportunity for written comment and oral presentation of data, views and arguments by interested persons. In addition, FEA will make a site-specific environmental analysis after the issuance of each order, but prior to service of the Notice of Effectiveness, and there will be an opportunity for public comment if the analysis indicates that significant site-specific impacts are likely to result from a prohibition order.

If oral presentation is to be made, it is requested that any detailed, technical data, views, and arguments be made in written comments submitted in support of the oral presentation, and that the oral presentation itself be a summary of those more detailed comments.

A public hearing on the proposed prohibition orders will be held beginning at 9 a.m., e.d.t., on May 27, 1975, in Conference Room B, FEA Region III, 1421 Cherry Street, Philadelphia, Pennsylvania, to receive oral presentation of data, views and arguments from interested persons. Any person who has an interest in the subject of the hearing, or who is a representative of a group or class of persons which has an interest in the subject of the hearing, may make a written request, or a verbal request if confirmed in writing, for an opportunity to make oral presentation. That request should be directed to Alfred C. Metz, Jr., Federal Energy Administration, Room 1002, 1421 Cherry Street, Philadelphia, Pennsylvania (215) 597-3607 and must be received before 4:30 p.m. e.d.t., May 22, 1975. The request may be hand-delivered to Alfred C. Metz, Jr., Room 1002, FEA Region III, 1421 Cherry Street, Philadelphia, Pennsylvania between the hours of 8 a.m. and 4:30 p.m. e.d.t., Monday through Friday. The person making the request should be prepared to describe the interest concerned: if appropriate, to state why he or she is a proper representative of a group or class of persons which has such an interest; and to give a concise summary of the proposed oral presentation and a phone number where he or she may be contacted through May 23, 1975. Each person selected to be heard will be so notified by the FEA by 4:30 p.m. e.d.t., May 23, 1975 and must submit a minimum of 20 copies of the statement to Alfred C. Metz, Room 1002, 1421 Cherry Street, Philadelphia, Pennsylvania 19102 before 4:30 p.m., May 23, 1975.

The FEA reserves the right to limit the number of representatives of a particular group or class of persons to be heard at the hearing, to schedule their or other person's presentations, and to establish the procedures governing the conduct of the hearing. The length of time allocated to each presentation may be limited, based on the number of persons requesting to be heard.

An FEA official will be designated to preside at the hearing. It will not be judicial or evidentiary-type hearing. During an oral presentation, questions may be asked only by those conducting the hearing, and there will be no cross-examination of persons making oral presenta-

tions. At the conclusion of all initial oral presentations, each person who has made an oral statement will be given the opportunity, if he or she so desires, to make a rebuttal statement. The rebuttal statements will be given in the order in which the initial statements were made and will be subject to time limitations.

Any interested person may submit questions to be asked of any person making an oral presentation at the hearing to FEA Region III, Alfred C. Metz, Jr., Room 1002, 1421 Cherry Street, Philadelphia, Pennsylvania 19102, before 9 a.m. e.d.t., May 27, 1975. Any person who makes an oral statement or any other person who wishes to ask a question at the hearing may submit the questions, in writing, to the presiding officer. The FEA, or the presiding officer if the question is submitted at the hearing, will determine whether the question is relevant, and whether time limitations permit it to be presented for answer.

Any further procedural rules necessary for the proper conduct of the hearing will be announced by the presiding officer.

A transcript of the hearing will be made and the entire record of the hearing, including the transcript will be retained by the FEA and made available for inspection at the FEA Region III, Reception Lobby, 10th Floor, 1421 Cherry Street, Philadelphia, Pennsylvania 19102, and FEA Administrator's Reception Area, Room 3400, Federal Building, 12th and Pennsylvania Avenue NW., Washington, D.C., Monday through Friday. Anyone may purchase a copy of the transcript from the reporter.

Interested persons are invited to submit written comments consisting of data, views, or arguments with respect to the proposed prohibition order to Executive Communications, Federal Energy Administration, Box DD, Washington, D.C. 20461.

Comments should be identified on the outside of the envelope in which they are transmitted and on other documents submitted to FEA Executive Communications (or the Regional Office) with the designation "Proposed Prohibition Order for the \_\_\_\_\_ Powerplant." Fifteen copies should be submitted.

All written comments received by 4:30 p.m., e.d.t., May 29, 1975, all oral presentations and all other relevant information submitted to or otherwise available to FEA will be considered by FEA prior to issuance of any prohibition order.

Any information or data considered by the person furnishing it to be confidential must be so identified and submitted in writing, one copy only. The FEA reserves the right to determine the confidential status of the information or data and to treat it according to its determination.

The sections of ESECA that are relevant to the proposed prohibition orders are stated below:

### Sec. 1. Short-Title; Purpose.

(b) The purposes of this Act are (1) to provide for a means to assist in meeting the

essential needs of the United States for fuels, in a manner which is consistent, to the fullest extent practicable, with existing national commitments to protect and improve the environment.

#### Sec. 2. Coal Conversion and Allocation.

(a) The Federal Energy Administrator—  
(1) shall by order, prohibit any powerplant, and

(2) may, by order, prohibit any major fuel burning installation, other than a powerplant, from burning natural gas or petroleum products as its primary energy source, if the Federal Energy Administrator determines such powerplant or installation on the date of enactment of this Act [June 22, 1974] has the capability and necessary plant equipment to burn coal, and if the requirements of subsection (b) are met.

(b) The requirements referred to in subsection (a) are as follows:

(1) An order under subsection (a) may not be issued with respect to a powerplant or installation unless the Federal Energy Administrator finds (A) that the burning of coal by such plant or installation, in lieu of petroleum products or natural gas, is practicable and consistent with the purposes of this Act, (B) that coal and coal transportation facilities will be available during the period the order is in effect, and (C) in the case of a powerplant, that the prohibition under subsection (a) will not impair the reliability of service in the area served by such plant. Such an order shall be rescinded or modified to the extent the Federal Energy Administrator determines that any requirement described in subparagraph (A), (B), or (C) of this paragraph is no longer met; and such an order may at any time be modified if the Federal Energy Administrator determines that such order, as modified, complies with the requirements of this section.

(3) (A) Before issuing an order under subsection (a) which is applicable to a powerplant or installation after June 30, 1975 (or modifying an order to which paragraph (2) applies, so as to apply such order to a powerplant or installation after such date), the Federal Energy Administrator shall give notice to the public and afford interested persons an opportunity for oral and written presentations of data, views, and arguments.

(B) An order (or modification thereof) described in subparagraph (A) of this paragraph shall not become effective until (1) the Administrator of the Environmental Protection Agency notifies the Federal Energy Administrator under section 119(d)(1)(B) of the Clean Air Act that such plant or installation will be able on and after July 1, 1975, to burn coal and to comply with all applicable air pollution requirements without a compliance date extension under section 119(c) of such Act, or (2) if such notification is not given, the date which the Administrator of the Environmental Protection Agency certifies pursuant to section 119(d)(1)(B) of such Act is the earliest date that such plant or installation will be able to comply with all applicable requirements of such section 119. Such order (or modification) shall not be effective during any period certified by the Administrator of the Environmental Protection Agency under section 119(d)(3)(B) of such Act.

(e) For purposes of this section:

(1) The term "powerplant" means a fossil-fuel fired electric generating unit which produces electric power for purposes of sale or exchange.

(2) The term "coal" includes coal derivatives.

(f) (1) Authority to issue orders or rules under subsections (a) through (d) of this section shall expire at midnight, June 30, 1975. Such a rule or order may take effect at any time before January 1, 1979.

(2) Authority to amend, repeal, rescind, modify, or enforce such rules or orders shall expire at midnight, December 31, 1978; but the expiration of such authority shall not affect any administrative or judicial proceeding which relates to any act or omission which occurred prior to January 1, 1979.

Copies of the FEA regulations implementing section 2 of ESECA (10 CFR, Parts 303, 305 and 307) are available from the FEA Regional Office, 1421 Cherry Street, Room 1001, Philadelphia, Pennsylvania 19102, (215) 597-9066.

Any questions regarding this notice should be directed to Alfred C. Metz, Jr., FEA Region III, 1421 Cherry Street, Philadelphia, Pennsylvania 19102 (215) 597-3607.

(Energy Supply and Environmental Coordination Act of 1974 (Pub. L. 93-319); Federal Energy Administration Act of 1974 (Pub. L. 93-275); E.O. 11790 (39 FR 23185).)

Issued in Washington, D.C., May 12, 1975.

ROBERT E. MONTGOMERY, Jr.,  
General Counsel,  
Federal Energy Administration.

1. OFU-026, 027, POTOMAC ELECTRIC POWER COMPANY, POWERPLANTS 1 AND 2, GENERATING STATION—MORGANTOWN, NEWSBURG, MARYLAND

(a) Proposed findings and rationale for findings:

1. Capability and necessary plant equipment finding. Based on an analysis of the information submitted to or otherwise available to FEA, FEA proposes to find that on June 22, 1974, these powerplants had the capability and necessary plant equipment to burn coal. This proposed finding is based on facts, interpretations and assumptions stated below:

(A) These powerplants had in place on June 22, 1974, a boiler that was capable of burning coal, in that such boiler had been designed and constructed, or had been modified to enable it to burn coal as its primary energy source, or to burn coal and another fossil fuel interchangeably as its primary energy source, notwithstanding the fact that on June 22, 1974, such powerplant may not have been burning coal as its primary energy source.

(B) Based on information filed with FEA on March 17, 1975 by The Potomac Electric Power Company, the following significant equipment or facilities would have to be acquired or substantially refurbished:

1. Strengthening of coal bunkers;  
2. Powerplant Number 2 reheater surface removal;

3. Addition of one pulverizer.

FEA assumes that on June 22, 1974, these powerplants had all other significant equipment and facilities associated with the burning of coal.

(C) Within the meaning of ESECA and the regulations promulgated pursuant thereto, the equipment and facilities listed in paragraph (b) do not individually or in combination constitute a lack of capability and necessary plant equipment to burn coal as of June 22, 1974.

(1) Burning of coal in lieu of natural gas or petroleum products is practicable and consistent with the purposes of ESECA. Based on an analysis of the information

submitted or otherwise available to FEA, FEA proposes to find that the burning of coal by the powerplants in lieu of petroleum products or natural gas, is practicable and consistent with the purposes of ESECA. This proposed finding is based on the facts, interpretations and assumptions stated below.

(A) (1) Revenue requirements. (a) The investment costs that result from the acquisition and refurbishment of equipment and facilities associated with the burning of coal by the powerplants are estimated to be approximately \$1,450,000. This estimate is based on existing FEA information and on information filed with the FEA by the powerplant concerning items of equipment and facilities that would have to be acquired or refurbished and the costs of such acquisition or refurbishment.

(1) Costs of acquisition or refurbishing equipment are allocated as follows:

(A) \$0 to comply with air pollution control requirements of the Clean Air Act.

(B) \$1,450,000 to make those technical plant and equipment adjustments associated with the burning of coal, as well as to comply with environmental requirements other than those imposed by the Clean Air Act.

(b) The increase in operating costs other than fuel costs that result from the burning of coal are estimated to be approximately \$36,000 per year.

(c) (1) The price of petroleum products available to the powerplants is approximately \$1.50 to \$1.60 per million Btus. The price of coal of the type used by the powerplants is approximately \$1.13 to \$1.23 per million Btus. The burning of coal by the powerplants will result in a reduction of 27 cents to 47 cents per million Btus or \$17 to \$30 million per year.

(2) The Maryland Public Utility Commission permits the inclusion of increased fuel costs in the rate base through a fuel adjustment clause and, if there is a decrease in the cost of fuel as a result of burning coal, there will be a decrease in such rate base.

(d) The total annual incremental increase in revenue requirements resulting from costs associated with burning coal as opposed to oil is \$244,000.

(2) Financial capabilities. (a) Based on the most recent financial statements and capital expenditure programs of Potomac Electric Power Company, as well as other information available to FEA, it has been determined that the prohibition order for the powerplants is practicable. This financial assessment included an evaluation of generally accepted financial ratios; effects on capitalization as a result of the costs of burning of coal; impact on current and future construction programs; and possible impacts on rates.

This assessment incorporated, but was not limited to, consideration of the \$1,450 million investment requirement (or 1 percent) in relation to net property and plant of the company of \$1.5 billion and 1975-1977 construction budget estimate of the company of \$470 million, or 3 percent; the total capitalization of the company of \$1.5 billion; the change in 1974 to 1976 construction budgets of \$262 million to \$149 million; and the 30 years remaining useful life of the plants. These assessments, the above findings, and other evaluations of the general financial health of the company were the basis of this finding.

(B) Because this prohibition order will discourage the use of natural gas or petroleum products and encourage the increased use of coal, FEA proposed to find that its issuance will be consistent with the purpose of ESECA "to provide a means to assist in meeting the essential needs of the United States for fuels." Further, on the basis of the

environmental analyses conducted by FEA, the analyses of air quality impacts which EPA is required to conduct prior to effectiveness of a prohibition order, as well as the necessity for the powerplant to comply with the Clean Air Act and other applicable environmental protection requirements, FEA proposes to find that the prohibition order is also consistent with the purpose of ESECA to provide for a means to meet the Nation's essential fuel needs "in a manner which is consistent, to the fullest extent practicable, with existing national commitments to protect and improve the environment."

(3) Coal and coal transportation facilities will be available during the period the prohibition order is in effect. Based on an analysis of the information submitted to or otherwise available to FEA, FEA proposes to find that coal and coal transportation facilities will be available to these powerplants during the period until December 31, 1978. The period until December 31, 1978 is the period during all or part of which the prohibition order to which these findings relate will be in effect. This proposed finding is based upon the following factors, interpretations, and assumptions:

(A) (1) It is estimated that it will be practicable to produce coal nationally as follows:

Year:	Production (million tons)
1975.....	662
1976.....	679
1977.....	707
1978.....	735

(2) The estimated national demand, excluding any increased demand resulting from FEA action under the authority of section 2 of ESECA, is as follows:

Year:	Demand (million tons)
1975.....	640
1976.....	664
1977.....	688
1978.....	716

(3) The estimated additional national demand for coal resulting from the prohibition order to which this finding relates, and from FEA actions under authority of section 2 of ESECA, will be as follows:

Year:	Demand (million tons)
1975.....	0.7
1976.....	4.0
1977.....	13.6
1978.....	16.2

(4) Coal of the specific type required for use by this powerplant has been identified in the reserves of the Northern and Southern Appalachian coal supply regions, which consist of Bureau of Mines Districts 1 through 8 and 13.

(5) It is estimated that it will be practicable to produce coal from the Northern and Southern Appalachian coal supply regions as follows:

Year:	Production (million tons)
1975.....	406
1976.....	402
1977.....	407
1978.....	412

(6) The regional and national production estimates stated in items (1) and (5) assume a surge capacity, or ability to increase production over normal levels, of approximately 4 percent. A 1975 study by the Bureau of Mines of the Department of the Interior indicates a national surge capacity of approximately up to 6 percent. In response to an industry survey in late 1974, the coal industry itself indicated that it had a surge capacity of up to 8 percent. By comparison, the increased national demand for coal re-

sulting from the prohibition order to which this finding relates and other FEA actions under section 2 of ESECA, is less than one tenth of a percent in 1975, increasing to a maximum of 2.3 percent in 1978 of estimated national demand stated in item (2). A market survey of traditional coal suppliers to FEA Region 3 consumers indicates that there is ample production capability to support increased demand for coal from this region resulting from the prohibition order to which this finding relates and other FEA actions under section 2 of ESECA.

(7) No State or local laws or policies which would limit the extraction of this coal have been found by FEA or brought to FEA's attention.

(8) The estimated demand for coal from these supply regions, excluding any increased demand resulting from FEA actions under the authority of section 2 of ESECA, is as follows:

Year:	Demand (million tons)
1975.....	390
1976.....	394
1977.....	395
1978.....	398

(9) The estimated additional demand for coal from these supply regions resulting from the prohibition order to which this finding relates and from other FEA orders under section 2 of ESECA, will be as follows:

Year:	Demand (million tons)
1975.....	0.4
1976.....	2.5
1977.....	10.2
1978.....	12.4

(10) On the basis of the above information, FEA proposes to find that the estimated production of coal of the specific type required for use by this powerplant exceeds the estimated demand for such coal by amounts adequate to support a conclusion that such coal will be available to these powerplants during the period until December 31, 1978.

(B) (1) Adequate rail facilities exist between these coal supply regions and the powerplant to transport the coal that will be used by such powerplant pursuant to this order.

(2) There is a spur line which will be able to deliver this coal from the main rail line to these powerplants.

(3) Sufficient rolling stock will be available to the Penn Central, Pittsburgh & Shawmut R.R.; Lake Erie, Franklin, Clarion R.R., and Western Maryland Railway for transporting this coal during the period until December 31, 1978.

(iv) The prohibition of the burning of natural gas or petroleum products as its primary energy source will not impair the reliability of service in the area served by the affected powerplant. Based on an analysis of the information submitted to or otherwise available to FEA, and after consultation with the Federal Power Commission, FEA proposes to find that the prohibition of the Morgantown Units #1 and #2 powerplants of the Potomac Electric Power Co. from burning natural gas or petroleum products as their primary energy source will not impair the reliability of service in the area served by such powerplants. This proposed finding is based on the facts, assumptions, and interpretations stated below:

(A) (1) The subject powerplants are part of the Pennsylvania-New Jersey-Maryland (PJM) power dispatching system and in the geographical area of the Mid-Atlantic Area Council (MAAC). The reserve capacity of the interconnected systems will provide emergency resource of electric power and enhance the reliability of service.

(2) The subject powerplants now use coal on a regular basis. The powerplants can use,

and have used, coal as the primary energy source.

(3) The powerplants have used coal and oil in combination in various proportions up to 85 percent oil.

(4) No reconversion or outage time for reconversion is necessary.

(B) For the reasons set forth above, the FEA finds that the burning of coal by Morgantown Units #1 and #2 powerplants, in lieu of petroleum products or natural gas will not result in the impairment of the "reliability of service in the area served" within the meaning of ESECA and the regulation promulgated pursuant thereto.

2. OFU-028, 029, 030, 031 VIRGINIA ELECTRIC POWER COMPANY, POWERPLANTS 3, 4, 5, AND 6, GENERATING STATION—CHESTERFIELD, CHESTER, VIRGINIA.

(a) Proposed findings and rationale for findings.

1. Capability and necessary plant equipment to burn coal. Based on an analysis of the information submitted to or otherwise available to FEA, FEA proposes to find that on June 22, 1974, these powerplants had the capability and necessary plant equipment to burn coal. This proposed finding is based on facts, interpretations and assumptions stated below:

(A) These powerplants had in place, on June 22, 1974, a boiler that was capable of burning coal, in that such boiler had been designed and constructed, or had been modified to enable it to burn coal as its primary energy source, or to burn coal and another fossil fuel interchangeably as its primary energy source, notwithstanding the fact that on June 22, 1974, such powerplant may not have been burning coal as its primary energy source.

(B) Based on information filed with FEA on March 14, 1975 by The Virginia Electric and Power Company, the following significant equipment or facilities would have to be acquired or substantially refurbished:

1. Boiler.  
a. Burner corner repair (buckets, dampers).  
b. Relocation of side ignitors and oil guns.  
c. Recalibration and modification of boiler controls.  
d. Removal of refractory from furnace walls.

e. Repair of IR-soot blowers.  
f. Change-out water wall orifices in lower drums.

g. Installation of preheater elements.  
h. Remove air bypass arrangement in air system.

1. Repairs to electrostatic precipitators;  
2. Coal handling system.

a. Inspection and repair of coal feeders and mills.  
b. Repair coal burner piping;

3. Ash handling system.  
a. Replace dry fly ash handling system,  
b. Repair pyrite handling system,  
c. Ash pond needed in 3 to 5 years;

4. Coal storage equipment.  
a. Repair railroad tracks,  
b. Overhaul coal crusher,

c. Repair car dumper and coal feeders,  
d. Repair tractor and locomotive,  
e. Replace "F&H" conveyor belts,

f. Inspect and calibrate scales.

FEA assumes that on June 22, 1974, these powerplants had all other significant equipment and facilities associated with the burning of coal.

(C) Within the meaning of ESECA and the regulations promulgated pursuant thereto, the equipment and facilities listed in paragraph (b) do not individually or in combination constitute a lack of capability and necessary plant equipment to burn coal as of June 22, 1974.

(1) Burning of coal in lieu of natural gas or petroleum products is practicable and consistent with the purposes of ESECA.

Based on an analysis of the information submitted or otherwise available to FEA, FEA proposes to find that the burning of coal by Powerplants #3, 4, 5, 6 at the Chesterfield Generating Station, #1, 2 at the Yorktown Generating Station, #1, 2, 3, 4 at the Portsmouth Generating Station, in lieu of petroleum products or natural gas, is practicable and consistent with the purposes of ESECA. This proposed finding is based on the facts, interpretations and assumptions stated below.

(A) (1) *Revenue requirements.* (a) The investment costs that result from the acquisition and refurbishment of equipment and facilities associated with the burning of coal by the above listed powerplants are estimated to be approximately \$48,378,000. This estimate is based on existing FEA information and on information filed with the FEA by the powerplants concerning items of equipment and facilities that would have to be acquired or refurbished and the costs of such acquisition or refurbishment.

(1) Costs of acquisition or refurbishing equipment are allocated as follows:

(A) \$47,520,000 to comply with air pollution control requirements of the Clean Air Act.

(B) \$858,000 to make those technical plant and equipment adjustments associated with the burning of coal, as well as to comply with environmental requirements other than those imposed by the Clean Air Act.

(b) The increase in operating costs other than fuel costs that result from the burning of coal are estimated to be approximately \$1,452,000 per year.

(c) (1) The price of petroleum products available to the powerplant is approximately 1.80 cents to 1.90 cents per million Btus. The price of coal of the type used by the above listed powerplants is approximately 1.55 cents to 1.65 cents per million Btus. The burning of coal by the above listed powerplants will result in a reduction of .15 cents to .35 cents per million Btus or \$18 million to \$42 million per year.

(2) The Virginia Public Utility Commission permits the inclusion of increased fuel costs in the rate base through a fuel adjustment clause and, if there is a decrease in the cost of fuel as a result of burning coal, there will be a decrease in such rate base.

(d) The total annual incremental increase in revenue requirements resulting from costs associated with burning coal as opposed to oil is \$13,557,000.

(2) *Financial capabilities.* (a) Based on the most recent financial statements and capital expenditure programs of Virginia Electric Power Company, as well as other information available to FEA, FEA proposes to find that the prohibition orders for the above listed powerplants is practicable. This financial assessment included an evaluation of generally accepted financial ratios; effects on capitalization as a result of the costs of burning of coal; impact on current and future construction programs; and possible impacts on rates. This assessment incorporated, but was not limited to, consideration of: the \$48 million investment requirement (or 1.5 percent) in relation to net property and plant of the company of \$3,194 million and 1975-1977 construction budget estimate of the company of \$2.7 billion (or 1.8 percent); the total capitalization of the company of \$3,003 billion; the change in 1974 to 1975 construction budgets of \$395 million to \$1 billion and the 20 years remaining useful life of the plants. These assessments, the above findings, and other evaluations of the general financial health of the company were the basis of this finding.

(B) Because this prohibition order will discourage the use of natural gas or petroleum

products and encourage the increased use of coal, FEA proposes to find that its issuance would be consistent with the purpose of ESECA "to provide a means to assist in meeting the essential needs of the United States for fuels." Further, on the basis of the environmental analyses conducted by FEA, the analyses of air quality impacts which EPA is required to conduct prior to effectiveness of a prohibition order, as well as the necessity for the powerplant to comply with the Clean Air Act and other applicable environmental protection requirements, FEA proposes to find that the prohibition order is also consistent with the purpose of ESECA to provide for a means to meet the Nation's essential fuel needs "in a manner which is consistent, to the fullest extent practicable, with existing national commitments to protect and improve the environment."

(3) *Coal and coal transportation facilities* will be available during the period the prohibition order is in effect. Based on an analysis of the information submitted to or otherwise available to FEA, FEA proposes to find that coal and coal transportation facilities will be available to these powerplants during the period until December 31, 1978. The period until December 31, 1978 is the period during all or part of which the prohibition order to which these findings relate will be in effect. This proposed finding is based upon the following facts, interpretations, and assumptions:

(A) (1) It is estimated that it will be practicable to produce coal nationally as follows:

Year:	Production (million tons)
1975	662
1976	679
1977	707
1978	735

(2) The estimated national demand, excluding any increased demand resulting from FEA action under the authority of section 2 of ESECA, is as follows:

Year:	Demand (million tons)
1975	640
1976	664
1977	688
1978	716

(3) The estimated additional national demand for coal resulting from the prohibition order to which this finding relates, and from FEA actions under authority of section 2 of ESECA, will be as follows:

Year:	Demand (million tons)
1975	0.7
1976	4.0
1977	13.6
1978	18.2

(4) Coal of the specific type required for use by this powerplant has been identified in the reserves of the Northern and Southern Appalachian Coal supply regions, which consist of Bureau of Mines Districts 1 through 8 and 13.

(5) It is estimated that it will be practicable to produce coal from the Northern and Southern Appalachian coal supply regions as follows:

Year:	Production (million tons)
1975	406
1976	402
1977	407
1978	412

(6) The regional and national production estimates stated in items (1) and (5) assume a surge capacity, or ability to increase production over normal levels, of approximately

4 percent. A 1975 study by the Bureau of Mines of the Department of the Interior indicates a national surge capacity of approximately up to 6 percent. In response to an industry survey in late 1974, the coal industry itself indicated that it had a surge capacity of up to 8 percent. By comparison, the increased national demand for coal resulting from the prohibition order to which this finding relates and other FEA actions under section 2 of ESECA, is less than one tenth of a percent in 1975, increasing to a maximum of 2.3 percent in 1978 of estimated national demand stated in item (2). A market survey of traditional coal suppliers to FEA Region 3 consumers indicates that there is ample production capability to support increased demand for coal from this region resulting from the prohibition order to which this finding relates and other FEA actions under section 2 of ESECA.

(7) No State or local laws or policies which would limit the extraction of this coal have been found by FEA or brought to FEA's attention.

(8) The estimated demand for coal from these supply regions, excluding any increased demand resulting from FEA actions under the authority of section 2 of ESECA, is as follows:

Year:	Demand (million tons)
1975	390
1976	394
1977	395
1978	398

(9) The estimated additional demand for coal from these supply regions resulting from the prohibition order to which this finding relates and from other FEA orders under section 2 of ESECA, will be as follows:

Year:	Demand (million tons)
1975	0.4
1976	2.5
1977	10.2
1978	12.4

(10) On the basis of the above information, FEA proposes to find that the estimated production of coal of the specific type required for use by this powerplant exceeds the estimated demand for such coal by amounts adequate to support a conclusion that such coal will be available to these powerplants during the period until December 31, 1978.

(B) (1) Adequate rail facilities exist between these coal supply regions and the powerplant to transport the coal that will be used by such powerplant pursuant to this order.

(2) There is a spur line which will be able to deliver this coal from the main rail line to these powerplants.

(3) Sufficient rolling stock will be available to the Seaboard Coast Line R.R.; Southern R.R.; Norfolk & Western R.R.; or Louisville & Nashville R.R.; for transporting this coal during the period until December 31, 1978.

(4) The prohibition of the burning of natural gas or petroleum products as its primary energy source will not impair the reliability of service in the area served by the affected powerplants. Based on an analysis of the information submitted to or otherwise available to FEA, and after consultation with the Federal Power Commission, FEA proposes to find that the prohibition of the Chesterfield Units #3, #4, #5 and #6 powerplants of the Virginia Electric Power Company from burning natural gas or petroleum products as their primary energy source will not impair the reliability of service in the area served by such powerplants. This finding is based on the facts, assumptions, and interpretations stated below.

(A) (1) *Interconnections and power dispatching.* (a) The Chesterfield Units are within the geographical area of Southeastern Electric Reliability Council (SERC) regional electric reliability council.

(b) They are interconnected with and their operations and planning are coordinated with the VACAR subregion of SERC.

(c) Dispatching of electric power is controlled by Virginia Electric Power Company.

(d) "Dispatching system" as used in this finding means Virginia Electric Power Company.

(2) *Forecast peak loads.* (a) Forecast for peak loads for the dispatching system during the year in which the Virginia Electric Power Company is expected to be implementing the herein prohibition order is as follows:

Summer Load Period (June-Aug.) 1976, Peak 7920 MWe, July; Fall Load Period (Sept.-Nov.) 1976 Peak 7500 MWe, Sept.;

Powerplant designations	Fuel	Type of change	Capacity change (megawatts)	Status and effective date
Possum Point Unit No. 5	Residual oil	Addition	+845	Under construction. Commencement of commercial operation July 1975.
Reeves Avenue	No. 2 oil	Retirement	-95	Dec. 31, 1975.
12th St.	do.	do.	-80	Do.

(4) *Scheduled outages.* (a) A scheduled outage of 3 weeks for Unit #3, 4 weeks for Unit #4, 5 weeks for Unit #5, and 5 weeks for Unit #6 is estimated to be required to make any modification, installation, or other physical adjustment associated with cessation of the burning of natural gas or petroleum products as the powerplants' primary energy source. Immediately following modification during on-line testing and adjustment, the powerplants will be less than fully dependable. This period should not exceed 30 days.

Modifications are forecast to commence approximately October 1, 1976 and to be completed and fully tested by May 1, 1977.

(b) Planned maintenance of other powerplants and nuclear plant refueling during the period the powerplant will be implementing the herein prohibition order within the dispatching system are numerous. An average of 700 MWe of loss capability during the fall and spring periods and 1400 MWe during the winter period is forecast.

(5) *Net dependable capacity.* The forecast net dependable capacity for the dispatching system during the period (shown as quarter years) in which the powerplants are expected to be implementing the herein prohibition order and the next quarter following is: Fall 1976, 9004 MWe; Winter 1976-77, 9004 MWe; Spring 1977, 9004 MWe.

(6) *Gross reserve margin-dispatching system.*

(a) The expected minimum gross reserve margin (difference between net system capability and peak load in percent of peak load) of the dispatching system for the load periods specified are as follows: Fall 1976, 20.1%; Winter 1976-77, 40.5%; Spring 1977, 70.5%.

(b) After deducting the net capacity of units scheduled for maintenance or refueling during these same load periods. The expected minimum reserve margins are: Fall 1976, 10.7%; Winter 1976-77, 18.6%; Spring 1977, 57.3%.

(7) *Derating.* There will be no derating of the powerplants when using coal as the primary energy sources.

(8) *System stability.* Available information regarding system stability for the dispatching system has been evaluated for each of the load periods stated in paragraph (5) and the issuance of prohibition order to the powerplants will not cause a significant system stability problem.

Winter Load Period (Dec.-Feb.) 1976-77, Peak 6410 MWe, Jan.; Spring Load Period (March-May) 1977, Peak 5280 MWe, May.

(b) The peak loads forecast have been compared with the peak loads in previous similar periods and the compound load growth rate for these forecasts is 5.6 percent, which is considered reasonable.

(3) *Capacity.* (a) The present net dependable capacity of all powerplants of the dispatching system that now are engaged in the sale or exchange of electric power is 8340 MWe.

(b) Additions, retirements, and powerplants reratings during the period in which Virginia Electric Power Company will be implementing the herein prohibition order, as listed below, will cause the following changes in net dependable capacity of such dispatching system:

Powerplant designations	Fuel	Type of change	Capacity change (megawatts)	Status and effective date
Possum Point Unit No. 5	Residual oil	Addition	+845	Under construction. Commencement of commercial operation July 1975.
Reeves Avenue	No. 2 oil	Retirement	-95	Dec. 31, 1975.
12th St.	do.	do.	-80	Do.

(B) *Reliability of service.* (1) The estimated gross reserve margin of the dispatching system during the implementation period associated with the commencement the burning of coal as a primary energy source is forecast to range between 10.7 percent and 57.3 percent, depending upon the date of the period of powerplant outage. By scheduling the implementation period during the fall of 1976 through spring 1977 load period, the estimated gross dispatching system's reserve margin will be above 10.7 percent, and the Federal Power Commission considers this to be an acceptable reserve margin.

(2) If dispatching system conditions at the time of the implementation period are as presently forecast by FEA in this finding, there will be no impairment of reliability of service, within the meaning of ESECA and the regulations promulgated thereunder, in the area served by Virginia Electric Power Company.

(3) Existing transmission system interconnections with other utilities are presently scheduled to transfer approximately 300 megawatts out of the dispatching system; with the capacity to transfer approximately 1800 additional megawatts of power into the dispatching system. This capacity will provide emergency resource of electric power during the implementation period and will enhance the reliability of service.

3. OPF-032, 033, VIRGINIA ELECTRIC POWER COMPANY, POWERPLANTS 1 AND 2, GENERATING STATION—YORKTOWN, YORKTOWN, VIRGINIA

(a) *Proposed findings and rationale for findings.*

1. *Capability and necessary plant equipment finding.* Based on an analysis of the information submitted to or otherwise available to FEA, FEA proposes to find that on June 22, 1975 these powerplants had the capability and necessary plant equipment to burn coal. This proposed finding is based on facts, interpretations and assumptions stated below:

(A) These powerplants had in place, on June 22, 1974, a boiler that was capable of burning coal, in that such boiler had been designed and constructed, or had been modified to enable it to burn coal as its primary energy source, or to burn coal and another fossil fuel interchangeably as its primary energy source, notwithstanding the fact that on June 22, 1974, such powerplant may not

have been burning coal as its primary energy source.

(B) Based on information filed with FEA on March 14, 1975 by The Virginia Electric and Power Company, the following significant equipment or facilities would have to be acquired or substantially refurbished:

1. Boiler.
- a. Burner corner repairs (buckets, dampers).
- b. Relocation of side igniters and oil guns.
- c. Removal of burner shrouds.
- d. Installation of coal piping.
- e. Recalibration of boiler controls.
- f. Removal of refractory from furnace walls.
2. Coal handling system.
- a. Inspection and repair of coal feeders and mills.
3. Ash handling system.
- a. Repair dry fly ash handling system.
- b. Obtain ash hauling contractor.
- c. Increase size of ash pond.
4. Coal storage equipment.
- a. Repair tractors.
- b. Repair locomotive.
- c. Repairs to car shaker, conveyor, and crusher.
- d. Replace "E" Conveyor Belt.

FEA assumes that on June 22, 1974, these powerplants had all other significant equipment and facilities associated with the burning of coal.

(C) Within the meaning of ESECA and the regulations promulgated pursuant thereto, the equipment and facilities listed in paragraph (b) do not individually or in combination constitute a lack of capability and necessary plant equipment to burn coal as of June 22, 1974.

(1) *Burning of coal in lieu of natural gas or petroleum products is practicable and consistent with the purposes of ESECA.* Based on an analysis of the information submitted to or otherwise available to FEA, FEA proposes to find that the burning of coal by Powerplants # 3,4,5,6 at the Chesterfield Generating Station, #1,2 at the Yorktown Generating Station, #1,2,3,4 at the Portsmouth Generating Station, in lieu of petroleum products or natural gas, is practicable and consistent with the purposes of ESECA. This proposed finding is based on the facts, interpretations and assumptions stated below.

(A) (1) *Revenue requirements.* (a) The investment costs that result from the acquisition and refurbishment of equipment and facilities associated with the burning of coal by the above listed powerplants are estimated to be approximately \$48,378,000. This estimate is based on existing FEA information and on information filed with the FEA by the powerplants concerning items of equipment and facilities that would have to be acquired or refurbished and the costs of such acquisition or refurbishment.

(1) Costs of acquisition or refurbishing equipment are allocated as follows:

(A) \$47,520,000 to comply with air pollution control requirements of the Clean Air Act.

(B) \$858,000 to make those technical plant and equipment adjustments associated with the burning of coal, as well as to comply with environmental requirements other than those imposed by the Clean Air Act.

(b) The increase in operating costs other than fuel costs that result from the burning of coal are estimated to be approximately \$1,452,000 per year.

(c) (1) The price of petroleum products available to the powerplant is approximately 1.80 cents to 1.90 cents per million Btus. The price of coal of the type used by the above listed powerplants is approximately 1.55 cents to 1.65 cents per million Btus. The burning of coal by the above

listed powerplants will result in a reduction of .15 cents to .35 cents per million Btus or \$18 million to 42 million per year.

(11) The Virginia Public Utility Commission permits the inclusion of increased fuel costs in the rate base through a fuel adjustment clause and, if there is a decrease in the cost of fuel as a result of burning coal, there will be a decrease in such rate base.

(d) The total annual incremental increase in revenue requirements resulting from costs associated with burning coal as opposed to oil is \$13,557,000.

(2) *Financial capabilities.* (a) Based on the most recent financial statements and capital expenditure programs of Virginia Electric Power Company, as well as other information available to FEA, FEA proposes to find that the prohibition orders for the above listed powerplants is practicable. This financial assessment included an evaluation of generally accepted financial ratios; effects on capitalization as a result of the costs of burning of coal; impact on current and future construction programs; and possible impacts on rates. This assessment incorporated, but was not limited to, consideration of: the \$48 million investment requirement (or 1.5 percent) in relation to net property and plant of the company of \$3.194 billion and 1975-1977 construction budget estimate of the company of \$2.7 billion (or 1.8 percent); the total capitalization of the company of \$3.003 billion; the change in 1974 to 1975 construction budgets of 395 million to 1 billion and the 20 years remaining useful life of the plants. These assessments, the above findings, and other evaluations of the general financial health of the company were the basis of this finding.

(B) Because this prohibition order will discourage the use of natural gas or petroleum products and encourage the increased use of coal, FEA proposes to find that its issuance would be consistent with the purpose of ESECA "to provide a means to assist in meeting the essential needs of the United States for fuels." Further, on the basis of the environmental analyses conducted by FEA, the analyses of air quality impacts which EPA is required to conduct prior to effectiveness of a prohibition order, as well as the necessity for the powerplant to comply with the Clean Air Act and other applicable environmental protection requirements, FEA proposes to find that the prohibition order is also consistent with the purpose of ESECA to provide for a means to meet the Nation's essential fuel needs "in a manner which is consistent, to the fullest extent practicable, with existing national commitments to protect and improve the environment."

(11) *Coal and coal transportation facilities will be available during the period the prohibition order is in effect.* Based on an analysis of the information submitted to or otherwise available to FEA, FEA proposes to find that coal and coal transportation facilities will be available to these powerplants during the period until December 31, 1978. The period until December 31, 1978 is the period during all or part of which the prohibition order to which these findings relate will be in effect. This proposed finding is based upon the following facts, interpretations, and assumptions:

(A) (1) It is estimated that it will be practicable to produce coal nationally as follows:

Year:	Production (million tons)
1975	662
1976	679
1977	707
1978	735

(2) The estimated national demand, excluding any increased demand resulting from FEA action under the authority of section 2 of ESECA, is as follows:

Year:	Demand (million tons)
1975	640
1976	664
1977	688
1978	716

(3) The estimated additional national demand for coal resulting from the prohibition order to which this finding relates, and from FEA actions under authority of section 2 of ESECA, will be as follows:

Year:	Demand (million tons)
1975	0.7
1976	4.0
1977	13.6
1978	16.2

(4) Coal of the specific type required for use by this powerplant has been identified in the reserves of the Northern and Southern Appalachian Coal supply regions, which consist of Bureau of Mines Districts 1 through 8 and 13.

(5) It is estimated that it will be practicable to produce coal from the Northern and Southern Appalachian coal supply regions as follows:

Year:	Production (million tons)
1975	406
1976	402
1977	407
1978	412

(6) The regional and national production estimates stated in items (1) and (5) assume a surge capacity, or ability to increase production over normal levels, of approximately 4 percent. A 1975 study by the Bureau of Mines of the Department of the Interior indicates a national surge capacity of approximately up to 6 percent. In response to an industry survey in late 1974, the coal industry itself indicated that it had a surge capacity of up to 8 percent. By comparison, the increased national demand for coal resulting from the prohibition order to which this finding relates and other FEA actions under section 2 of ESECA, is less than one tenth of a percent in 1975, increasing to a maximum of 2.3 percent in 1978 of estimated national demand stated in item (2). A market survey of traditional coal suppliers to FEA Region 3 consumers indicates that there is ample production capability to support increased demand for coal from this region resulting from the prohibition order to which this finding relates and other FEA actions under section 2 of ESECA.

(7) No State or local laws or policies which would limit the extraction of this coal have been found by FEA or brought to FEA's attention.

(8) The estimated demand for coal from these supply regions, excluding any increased demand resulting from FEA actions under the authority of section 2 of ESECA, is as follows:

Year:	Demand (million tons)
1975	390
1976	394
1977	395
1978	398

(9) The estimated additional demand for coal from these supply regions resulting from the prohibition order to which this finding relates and from other FEA orders under section 2 of ESECA, will be as follows:

Year:	Demand (million tons)
1975	0.4
1976	2.5
1977	10.2
1978	12.4

(10) On the basis of the above information, FEA proposes to find that the estimated production of coal of the specific type required for use by this powerplant exceeds the estimated demand for such coal by amounts adequate to support a conclusion that such coal will be available to these powerplants during the period until December 31, 1978.

(B) (1) Adequate rail facilities exist, between these coal supply regions and the powerplant to transport the coal that will be used by such powerplant pursuant to this order.

(2) There is a spur line which will be able to deliver this coal from the main rail line to these powerplants.

(3) Sufficient rolling stock will be available to the Chesapeake & Ohio Railway for transporting this coal during the period until December 31, 1978.

(iv) The prohibition of the burning of natural gas or petroleum products as its primary energy source will not impair the reliability of service in the area served by the affected powerplants. Based on an analysis of the information submitted to or otherwise available to FEA, and after consultation with the Federal Power Commission, FEA proposes to find that the prohibition of the Yorktown Units #1 and #2 powerplants of the Virginia Electric Power Company from burning natural gas or petroleum products as their primary energy source will not impair the reliability of service in the area served by such powerplants. This proposed finding is based on the facts, assumptions, and interpretations stated below:

(A) (1) *Interconnections and power dispatching.* (a) The Yorktown Units are within the geographical area of the Southeastern Electric Reliability Council (SERC) regional electric reliability council.

(b) It is interconnected with and its operations and planning are coordinated with the other members of the VACAR subregion of SERC. Agreements among the VACAR companies include scheduled outage coordination and reserve assistance. The Virginia Electric Power Company is also interconnected with utilities that are members of either the PJM Power Pool or the East Central Area Reliability Council.

(c) Dispatching of electric power within the VEPCO service area is controlled by Virginia Electric Power Company.

(d) "Dispatching system" as used in this finding means Virginia Electric Power Company.

(2) *Forecast peak loads.* (a) Forecast of peak loads for the dispatching system during the year in which the Yorktown Units are expected to be implementing the herein prohibition order is as follows:

Summer Load Period (June-Aug.) 1975. Peak 7500 MWe, July; Fall Load Period (Sept.-Nov.) 1975, Peak 7100 MWe, Sept.; Winter Load Period (Dec.-Feb.) 1975-76 Peak 6070 MWe, Jan.; Spring Load Period (March-May) 1976, Peak 5000 MWe, May.

(b) The peak loads forecast have been compared with peak loads in previous similar periods and the compound load growth rate for these forecast is 5.6 percent, which is considered reasonable.

(3) *Capacity.* (a) The present net dependable capacity of all powerplants of the

dispatching system that now are engaged in the sale or exchange of electric power is 8340 MWe.

(b) Additions, retirements, and powerplant reratings during the period in which

Powerplant designation	Fuel	Type of change	Capacity change (megawatts)	Status and effective date
Possum Point unit No. 5	Residual oil	Addition	+845	Under construction. Planned in-service date is July 1975.
Reeves Avenue No. 2 oil		Retirement	-95	Dec. 31, 1975.
12th St. do		do	-86	Do.

(4) *Scheduled outages.* (a) A scheduled outage of 4 weeks for Unit #1 and 3 weeks for Unit #2 is estimated to be required to make any modification, installation, or other physical adjustment associated with cessation of the burning of natural gas or petroleum products as the powerplants' primary energy source. Immediately following modification during on-line testing and adjustment, the powerplants will be less than fully dependable. This period should not exceed 30 days.

Modifications are forecast to commence approximately October 1, 1975, and to be complete and fully tested by February 1, 1976.

(b) Planned maintenance of other powerplants and nuclear plant refueling during the period the powerplants will be implementing the herein prohibition order will cause the dispatching system to average 700 megawatts of lost capability during the fall load period and 1400 megawatts during the winter load period.

(5) *Net dependable capacity.* The forecast net dependable capacity for the dispatching system during the period (shown as quarter years) in which the powerplants are expected to be implementing the herein prohibition order and the next quarter following is: Fall 1975, 9185 MWe; Winter 1975-76, 9004 MWe.

(6) *Gross reserve margin-dispatching system.* (a) The expected minimum gross reserve margin (difference between net system capability and peak load in percent of peak load) of the dispatching system for the load periods specified are as follows: Fall 1975, 29.4 percent; Winter 1975-76, 48.3 percent.

(b) After deducting the net capacity of units scheduled for maintenance or refueling during these same load periods. The expected minimum reserve margins are: Fall 1975, 19.5 percent; Winter 1975-76, 25.2 percent.

(7) *Derating.* There will be no derating of the powerplants when using coal as their primary energy source.

(8) *System stability.* Available information regarding system stability for the dispatching system has been evaluated for each of the load periods stated in paragraph (5) and the issuance of a prohibition order to the powerplants will not cause a significant system stability problem.

(B) *Reliability of service.* (1) The estimated gross reserve margin of the dispatching system during the implementation period associated with the commencement of the burning of coal as a primary energy source is forecast to range between 19.5 percent and 25.2 percent, depending upon the date of the period of powerplant outage. By scheduling the implementation period during the fall or winter load periods, the estimated gross dispatching system's reserve margin will be above 19.5 percent, and the Federal Power Commission considers this to be an acceptable reserve margin.

(2) If dispatching system conditions at the time of the implementation period are as presently forecast by FEA in this proposed finding, there will be no impairment of reliability of service within the meaning of

the Virginia Electric Power Company will be implementing the herein prohibition order, as listed below, will cause the following changes in net dependable capacity of such dispatching system:

Powerplant designation	Fuel	Type of change	Capacity change (megawatts)	Status and effective date
Possum Point unit No. 5	Residual oil	Addition	+845	Under construction. Planned in-service date is July 1975.
Reeves Avenue No. 2 oil		Retirement	-95	Dec. 31, 1975.
12th St. do		do	-86	Do.

ESECA and the regulations promulgated thereunder, in the area served by Virginia Electric Power Company.

(3) Existing transmission system interconnections with other utilities are presently scheduled to transfer approximately 300 megawatts, out of the dispatching system; however, the capacity to transfer approximately 1800 megawatts of power into the dispatching system exists. This capacity will provide emergency resource of electric power during the implementation period and will enhance the reliability of service.

4. OFU-034 035, 036, 037, VIRGINIA ELECTRIC POWER COMPANY, POWERPLANTS 1, 2, 3 AND 4, GENERATING STATION — PORTSMOUTH, CHESAPEAKE, VIRGINIA.

(a) *Proposed findings and rationale for findings.*

1. *Capability and necessary plant equipment finding.* Based on an analysis of the information submitted to or otherwise available to FEA, FEA proposes to find that on June 22, 1974, these powerplants had the capability and necessary plant equipment to burn coal. This proposed finding is based on facts, interpretations and assumptions stated below:

(A) These powerplants had in place, on June 22, 1974, a boiler that was capable of burning coal, in that such boiler had been designed and constructed, or had been modified to enable it to burn coal as its primary energy source, or to burn coal and another fossil fuel interchangeably as its primary energy source, notwithstanding the fact that on June 22, 1974, such powerplant may not have been burning coal as its primary energy source.

(B) Based on information filed with FEA on March 14, 1975, by The Virginia Electric and Power Company, the following significant equipment or facilities would have to be acquired or substantially refurbished:

- Boiler.
- Boiler corner repair (buckets, dampers).
- Relocation of side igniters and oil guns.
- Recalibration of boiler controls.
- Repair of IR-soot blowers.
- Ash pit repairs.
- Install wear plates on I.D. fan blades.
- Removal of refractory from furnace walls.
- Change-out of orifices in lower drums.
- Repair preheaters.
- Replace mechanical collector cones.
- Repairs to electrostatic precipitator (Unit No. 4);
- Coal handling system.
- Inspection and repair of coal feeders and mills.
- Repair to coal burner piping;
- Ash handling system.
- Reinstall dry fly ash system;
- Coal storage equipment.
- Replace "D" Conveyor Belt.
- Repair railroad tracks and switches.
- Obtain locomotive and tractor.
- Replace stock-out boom conveyor belt.

FEA assumes that on June 22, 1974, these powerplants had all other significant equip-

ment and facilities associated with the burning of coal.

(C) Within the meaning of ESECA and the regulations promulgated pursuant thereto, the equipment and facilities listed in paragraph (b) do not individually or in combination constitute a lack of capability and necessary plant equipment to burn coal as of June 22, 1974.

(11) *Burning of coal in lieu of natural gas or petroleum products is practicable and consistent with the purposes of ESECA.* Based on an analysis of the information submitted to or otherwise available to FEA, FEA proposes to find that the burning of coal by Powerplants # 3,4,5,6 at the Chesterfield Generating Station, #1,2 at the Yorktown Generating Station, #1,2,3,4 at the Portsmouth Generating Station, in lieu of petroleum products or natural gas is practicable and consistent with the purposes of ESECA. This proposed finding is based on the facts, interpretations and assumptions stated below.

(A) (1) *Revenue requirements.* (a) The investment costs that result from the acquisition and refurbishment of equipment and facilities associated with the burning of coal by the above listed powerplants are estimated to be approximately \$48,376,000. This estimate is based on existing FEA information and on information filed with the FEA by the powerplants concerning items of equipment and facilities that would have to be acquired or refurbished and the costs of such acquisition or refurbishment.

(1) Costs of acquisition or refurbishing equipment are allocated as follows:

(A) \$47,520,000 to comply with air pollution control requirements of the Clean Air Act.

(B) \$858,000 to make those technical plant and equipment adjustments associated with the burning of coal, as well as to comply with environmental requirements other than those imposed by the Clean Air Act.

(b) The increase in operating costs other than fuel costs that result from the burning of coal are estimated to be approximately \$1,452,000 per year.

(c) (1) The price of petroleum products available to the powerplant is approximately 1.80 cents to 1.90 cents per million Btus. The price of coal of the type used by the above listed powerplants is approximately 1.55 cents to 1.65 cents per million Btus. The burning of coal by the above listed powerplants will result in a reduction of .15 cents to .35 cents per million Btus or \$18 million to 42 million per year.

(11) The Virginia Public Utility Commission permits the inclusion of increased fuel costs in the rate base through a fuel adjustment clause and, if there is a decrease in the cost of fuel as a result of burning coal, there will be a decrease in such rate base.

(d) The total annual incremental increase in revenue requirements resulting from costs associated with burning coal as opposed to oil is \$13,557,000.

(2) *Financial capabilities.* (a) Based on the most recent financial statements and capital expenditure programs of Virginia Electric Power Company, as well as other information available to it, FEA proposes to find that the prohibition orders for the above listed powerplants is practicable. This financial assessment included an evaluation of generally accepted financial ratios; effects on capitalization as a result of the costs of burning of coal; impact on current and future construction programs; and possible impacts on rates. This assessment incorporated, but was not limited to, consideration of: the \$48 million investment requirement (or 1.5 percent) in relation to net property and plant of the company of \$3.194 billion and 1975-1977 construction budget estimate of the

company of \$2.7 billion (or 1.8 percent); the total capitalization of the company of \$3.003 billion; the change in 1974 to 1975 construction budgets of 395 million to 1 billion and the 20 years remaining useful life of the plants. These assessments, the above findings, and other evaluations of the general financial health of the company were the basis of this finding.

(B) Because this prohibition order will discourage the use of natural gas or petroleum products and encourage the increased use of coal, FEA proposes to find that its issuance would be consistent with the purpose of ESECA "to provide a means to assist in meeting the essential needs of the United States for fuels." Further, on the basis of the environmental analyses conducted by FEA, the analyses of air quality impacts which EPA is required to conduct prior to effectiveness of a prohibition order, as well as the necessity for the powerplant to comply with the Clean Air Act and other applicable environmental protection requirements, FEA proposes to find that the prohibition order is also consistent with the purpose of ESECA to provide for a means to meet the Nation's essential fuel needs. "In a manner which is consistent, to the fullest extent practicable, with existing national commitments to protect and improve the environment."

(iii) Coal and coal transportation facilities will be available during the period the prohibition order is in effect. Based on an analysis of the information submitted to or otherwise available to FEA, FEA proposes to find that coal and coal transportation facilities will be available to these powerplants during the period until December 31, 1978. The period until December 31, 1978 is the period during all or part of which the prohibition order to which these findings relate will be in effect. This proposed finding is based upon the following facts, interpretations, and assumptions:

(A) (1) It is estimated that it will be practicable to produce coal nationally as follows:

Year:	Production (million tons)
1975	662
1976	679
1977	707
1978	735

(2) The estimated national demand, excluding any increased demand resulting from FEA action under the authority of section 2 of ESECA, is as follows:

Year:	Demand (million tons)
1975	640
1976	664
1977	688
1978	716

(3) The estimated additional national demand for coal resulting from the prohibition order to which this finding relates, and from FEA actions under authority of section 2 of ESECA, will be as follows:

Year:	Demand (million tons)
1975	0.7
1976	4.0
1977	13.6
1978	16.2

(4) Coal of the specific type required for use by this powerplant has been identified in the reserves of the Northern and South-

ern Appalachian Coal supply regions, which consist of Bureau of Mines Districts 1 through 8 and 13.

(5) It is estimated that it will be practicable to produce coal from the Northern and Southern Appalachian coal supply regions as follows:

Year:	Production (million tons)
1975	406
1976	402
1977	407
1978	412

(6) The regional and national production estimates stated in items (1) and (5) assume a surge capacity, or ability to increase production over normal levels, of approximately 4 percent. A 1975 study by the Bureau of Mines of the Department of the Interior indicates a national surge capacity of approximately up to 6 percent. In response to an industry survey in late 1974, the coal industry itself indicated that it had a surge capacity of up to 8 percent. By comparison, the increased national demand for coal resulting from the prohibition order to which this finding relates and other FEA actions under section 2 of ESECA, is less than one tenth of a percent in 1975, increasing to a maximum of 2.3 percent in 1978 of estimated national demand stated in item (2). A market survey of traditional coal suppliers to FEA Region 3 consumers indicates that there is ample production capability to support increased demand for coal from this region resulting from the prohibition order to which this finding relates and other FEA actions under section 2 of ESECA.

(7) No State or local laws or policies which would limit the extraction of this coal have been found by FEA or brought to FEA's attention.

(8) The estimated demand for coal from these supply regions, excluding any increased demand resulting from FEA actions under the authority of section 2 of ESECA, is as follows:

Year:	Demand (million tons)
1975	390
1976	394
1977	395
1978	398

(9) The estimated additional demand for coal from these supply regions resulting from the prohibition order to which this finding relates and from other FEA orders under section 2 of ESECA, will be as follows:

Year:	Demand (million tons)
1975	0.4
1976	2.5
1977	10.2
1978	12.4

(10) On the basis of the above information, FEA proposes to find that the estimated production of coal of the specific type required for use by this powerplant exceeds the estimated demand for such coal by amounts adequate to support a conclusion that such coal will be available to these powerplants during the period until December 31, 1978.

(B) (1) Adequate rail facilities exist between these coal supply regions and the

powerplant to transport the coal that will be used by such powerplant pursuant to this order.

(2) There is a spur line which will be able to deliver this coal from the main rail line to these powerplants.

(3) Sufficient rolling stock will be available to the Norfolk & Western R. R. for transporting this coal during the period until December 31, 1978.

(iv) The prohibition of the burning of natural gas or petroleum products as its primary energy source will not impair the reliability of service in the area served by the affected powerplants. Based on an analysis of the information submitted to or otherwise available to FEA, and after consultation with the Federal Power Commission, FEA proposes to find that the prohibition of the Portsmouth Units No. 1, No. 2, No. 3, and No. 4 powerplants of the Virginia Electric Power Company from burning natural gas or petroleum products as their primary energy source will not impair the reliability of service in the area served by such powerplants. This proposed finding is based on the facts, assumptions, and interpretations stated below:

(A) (1) Interconnections and power dispatching.

(a) The Portsmouth Units are within the geographical area of the Southeastern Electric Reliability Council (SERC) regional electric reliability council.

(b) It is interconnected with and its operations and planning are coordinated with the other members of the VACAR Subregion of SERC. Agreements among the VACAR companies include scheduled outage coordination and reserve assistance. The Virginia Electric Power Company is also interconnected with utilities that are members of either the PJM Power Pool or the East Central Area Reliability Council.

(c) Dispatching of electric power within the Virginia Electric Power Company service area is controlled by Virginia Electric Power Company.

(d) "Dispatching system" as used in this finding means Virginia Electric Power Company.

(2) Forecast peak loads. (a) Forecast peak loads for the dispatching system during the year in which the Portsmouth Units are expected to be implementing the herein prohibition order is as follows:

Year:	Peak Load (MW)
1975	7500
1976	7100
1977	6070
1978	5000

(b) The peak loads forecast have been compared with peak loads in previous similar periods and the compound load growth rate for these forecasts is 5.6 percent, which is considered reasonable.

(3) Capacity. (a) The present net dependable capacity of all powerplants of the dispatching system that now are engaged in the sale or exchange of electric power is 8340 MWe.

(b) Additions, retirements, and powerplant ratings during the period in which the Virginia Electric Power Company will be implementing the herein prohibition order, as listed below, will cause the following changes in net dependable capacity of such dispatching system:

Powerplant designation	Fuel	Type of change	Capacity change (megawatts)	Status and effective date
Possum Point unit No. 5	Residual oil	Addition	+845	Under construction. Planned in-service date is July 1975.
Reeves Ave. 12th St.	No. 2 oil	Retirement	-95	Dec. 31, 1975.
	do.	do.	-88	Do.

(4) Scheduled outages. (a) A scheduled outage of 3 weeks for Unit #1, 3 weeks for Unit #2, 3 weeks for Unit #3, and 4 weeks for Unit #4 is estimated to be required to make any modification, installation, or other physical adjustment associated with cessation of the burning of natural gas or petroleum products as the powerplants' primary energy source. Immediately following modification during on-line testing and adjustment, the powerplants will be less than fully dependable. This period should not exceed 30 days for each unit.

Modifications are forecast to commence approximately November 1, 1975, and to be complete and fully tested by April 1, 1976.

(b) Planned maintenance of other powerplants rated 100 MWe or higher and nuclear plant refueling during the period the prohibition order will be implementing the herein prohibition order will cause the dispatching system to average 700 megawatts of lost capability during the fall load period and 1400 megawatts during the winter load period.

(5) Net dependable capacity. The forecast net dependable capacity for the dispatching system during the period (shown as quarter years) in which the powerplants are expected to be implementing the herein prohibition order and the next quarter following is: Fall 1975, 9185 MWe; Winter 1975-76, 9004 MWe.

(6) Gross reserve margin-dispatching system. (a) The expected minimum gross reserve margin (difference between net system capability and peak load in percent of peak load) of the dispatching system for the load periods specified are as follows: Fall 1975, 29.4 percent; Winter 1975-76, 48.3 percent.

(b) After deducting the net capacity of units scheduled for maintenance or refueling during these same load periods, The expected minimum reserve margins are: Fall 1975, 17.0 percent; Winter 1975-76, 25.2 percent.

(7) Derating. There will be no derating of the powerplants when using coal as the primary energy source.

(8) System stability. Available information regarding system stability for the dispatching system has been evaluated for each of the load periods stated in paragraph (5) and the issuance of a prohibition order to the powerplants will not cause a significant system stability problem.

(B) Reliability of service. (1) The estimated gross reserve margin of the dispatching system during the implementation period associated with the commencement of the burning of coal as a primary energy source is forecast to range between 17.0 percent and 25.2 percent, depending upon the date of the period of powerplant outage. By scheduling the implementation period during the fall and winter load periods the estimated gross dispatching system's reserve margin will be above 17.0 percent, and the Federal Power Commission considers this to be an acceptable reserve margin.

(2) If dispatching system conditions at the time of the implementation period are as presently forecast by FEA in this finding, there will be no impairment of reliability of service, within the meaning of ESECA and the regulations promulgated thereunder, in the area served by the Virginia Electric Power Company.

(3) Existing transmission system interconnections with other utilities are presently

scheduled to transfer approximately 300 megawatts out of the dispatching system; however, the capacity to transfer approximately 1800 megawatts of power into the dispatching system exists. This capacity will provide emergency resource of electric power during the implementation period and will enhance the reliability of service.

5. OFU-038, 039, BALTIMORE GAS AND ELECTRIC COMPANY, POWERPLANTS 1 AND 2, GENERATING STATION—CRANE, BALTIMORE, MARYLAND

(a) Proposed findings and rationale for findings.

1. Capability and necessary plant equipment finding. Based on an analysis of the information submitted to or otherwise available to FEA, FEA proposes to find that on June 22, 1974, these powerplants had the capability and necessary plant equipment to burn coal. This proposed finding is based on facts, interpretations and assumptions stated below:

(A) These powerplants had in place, on June 22, 1974, a boiler that was capable of burning coal, in that such boiler had been designed and constructed, or had been modified to enable it to burn coal as its primary energy source, or to burn coal and another fossil fuel interchangeably as its primary energy source, notwithstanding the fact that on June 22, 1974, such powerplant may not have been burning coal as its primary energy source.

(B) Based on information filed with FEA on April 14, 1975 by The Baltimore Gas and Electric Company, the following significant equipment or facilities would have to be acquired or substantially refurbished:

1. Repairs to flyash transport system;
2. Rebuild crusher;
3. 2 Bulldozers;
4. Upgrade RR;
5. Car thaw pits;
6. New belting;
7. Boiler studding and sandblasting;
8. Boiler burner studding;
9. Sootblowing work;
10. Work on monkey coil and floor;
11. Rebuild gas recirculating fans;
12. Work on air heater;
13. Spare parts inventory;
14. Flyash bunker;
15. Ash blower;
16. Ash sluice pump.

FEA assumes that on June 22, 1974, these powerplants had all other significant equipment and facilities associated with the burning of coal.

(C) Within the meaning of ESECA and the regulations promulgated pursuant thereto, the equipment and facilities listed in paragraph (b) do not individually or in combination constitute a lack of capability and necessary plant equipment to burn coal as of June 22, 1974.

(ii) Burning of coal in lieu of natural gas or petroleum products is practicable and consistent with the purposes of ESECA. Based on an analysis of the information submitted to or otherwise available to FEA, FEA proposes to find that the burning of coal by Powerplants #4, 5 at the Riverside Generating Station, #1, 2 at the Wagner Generating Station, #1, 2 at the Crane Generating Station, in lieu of petroleum products or natural gas, is practicable and consistent

with the purposes of ESECA. This proposed finding is based on the facts, interpretations and assumptions stated below.

(A) (1) Revenue requirements. (a) The investment costs that result from the acquisition and refurbishment of equipment and facilities associated with the burning of coal by the above listed powerplants are estimated to be approximately \$19,717,000. This estimate is based on existing FEA information and on information filed with the FEA by the powerplants concerning items of equipment and facilities that would have to be acquired or refurbished and the costs of such acquisition or refurbishment.

(i) Costs of acquisition or refurbishing equipment are allocated as follows:

(A) \$18,440,000 to comply with air pollution control requirements of the Clean Air Act.

(B) \$3,277,000 to make those technical plant and equipment adjustments associated with the burning of coal, as well as to comply with environmental requirements other than those imposed by the Clean Air Act.

(b) The increase in operating costs other than fuel costs that result from the burning of coal are estimated to be approximately \$68,000 per year.

(c) (1) The price of petroleum products available to the powerplant is approximately \$2.20 to \$2.30 per million Btus. The price of coal of the type used by the above listed powerplants is approximately \$1.35 to \$1.45 per million Btus. The burning of coal by the above listed powerplants will result in a reduction of .75 cents to .95 cents per million Btus or \$30 million to \$40 million per year.

(ii) The Maryland Public Utility Commission permits the inclusion of increased fuel costs in the rate base through a fuel adjustment clause and, if there is a decrease in the cost of fuel as a result of burning coal, there will be a decrease in such rate base.

(d) The total annual incremental increase in revenue requirements resulting from costs associated with burning coal as opposed to oil is \$3,689,000.

(2) Financial capabilities. (a) Based on the most recent financial statements and capital expenditure programs of Baltimore Gas and Electric Company, as well as other information available to it, FEA proposes to find that the prohibition orders for the above listed powerplants is practicable. This financial assessment included an evaluation of generally accepted financial ratios; effects on capitalization as a result of the costs of burning of coal; impact on current and future construction programs; and possible impacts on rates. This assessment incorporated, but was not limited to, consideration of: the \$19.7 million investment requirement (or 1.0 percent) in relation to the net property and plant of the company of \$1.89 billion and 1975-1977 construction budget estimate of the company of \$350 million (or 1.9 percent); the total capitalization of the company of \$1.91 billion; the change in 1974 to estimated 1975 construction budgets of \$231 million to \$350 million; and the 15 years remaining useful life of the plants. These assessments, the above findings, and other evaluations of the general financial health of the company were the basis of this finding.

(B) Because this prohibition order will discourage the use of natural gas or petroleum products and encourage the increased use of coal, FEA proposes to find that its issuance would be consistent with the purpose of ESECA "to provide a means to assist in meeting the essential needs of the United States for fuels." Further, on the basis of the environmental analyses conducted by FEA, the analyses of air quality impacts which EPA is required to conduct prior to effectiveness of a prohibition order, as well

7  
5

as the necessity for the powerplant to comply with the Clean Air Act and other applicable environmental protection requirements, FEA proposes to find that the prohibition order is also consistent with the purpose of ESECA to provide for a means to meet the Nation's essential fuel needs "in a manner which is consistent, to the fullest extent practicable, with existing national commitments to protect and improve the environment."

(iii) Coal and coal transportation facilities will be available during the period the prohibition order is in effect. Based on an analysis of the information submitted to or otherwise available to FEA, FEA proposes to find that coal and coal transportation facilities will be available to these powerplants during the period until December 31, 1978. The period until December 31, 1978 is the period during all or part of which the prohibition order to which these findings relate will be in effect. This proposed finding is based upon the following facts, interpretations, and assumptions:

(A) (1) It is estimated that it will be practicable to produce coal nationally as follows:

Year:	Production (million tons)
1975	662
1976	679
1977	707
1978	735

(2) The estimated national demand, excluding any increased demand resulting from FEA action under the authority of section 2 of ESECA, is as follows:

Year:	Demand (million tons)
1975	640
1976	664
1977	688
1978	716

(3) The estimated additional national demand for coal resulting from the prohibition order to which this finding relates, and from FEA actions under authority of section 2 of ESECA, will be as follows:

Year:	Demand (million tons)
1975	0.7
1976	4.0
1977	13.6
1978	16.2

(4) Coal of the specific type required for use by this powerplant has been identified in the reserves of the Northern and Southern Appalachian Coal supply regions, which consist of Bureau of Mines Districts 1 through 8 and 13.

(5) It is estimated that it will be practicable to produce coal from the Northern and Southern Appalachian coal supply regions as follows:

Year:	Production (million tons)
1975	406
1976	402
1977	407
1978	412

(6) The regional and national production estimates stated in items (1) and (5) assume a surge capacity, or ability to increase production over normal levels, of approximately 4 percent. A 1975 study by the Bureau of Mines of the Department of the Interior indicates a national surge capacity of approximately up to 6 percent. In response to an industry survey in late 1974, the coal industry itself indicated that it had a surge capacity of up to 8 percent. By comparison, the increased national demand for coal resulting from the prohibition order to which this finding relates and other FEA actions

under section 2 of ESECA, is less than one-tenth of a percent in 1975, increasing to a maximum of 2.3 percent in 1978 of estimated national demand stated in item (2). A market survey of traditional coal suppliers to FEA Region 3 consumers indicates that there is ample production capability to support increased demand for coal from this region resulting from the prohibition order to which this finding relates and other FEA actions under section 2 of ESECA.

(7) No State or local laws or policies which would limit the extraction of this coal have been found by FEA or brought to FEA's attention.

(8) The estimated demand for coal from these supply regions, excluding any increased demand resulting from FEA actions under the authority of section 2 of ESECA, is as follows:

Year:	Demand (million tons)
1975	390
1976	394
1977	395
1978	398

(9) The estimated additional demand for coal from these supply regions resulting from the prohibition order to which this finding relates and from other FEA orders under section 2 of ESECA, will be as follows:

Year:	Demand (million tons)
1975	0.4
1976	2.5
1977	10.2
1978	12.4

(10) On the basis of the above information, FEA proposes to find that the estimated production of coal of the specific type required for use by this powerplant exceeds the estimated demand for such coal by amounts adequate to support a conclusion that such coal will be available to these powerplants during the period until December 31, 1978.

(B) (1) Adequate rail facilities exist between these coal supply regions and the powerplant to transport the coal that will be used by such powerplant pursuant to this order.

(2) There is a spur line which will be able to deliver this coal from the main rail line to these powerplants.

(3) Sufficient rolling stock will be available to the Penn Central for transporting this coal during the period until December 31, 1978.

Powerplant designation	Fuel	Type of change	Capacity change (megawatts)	Status and effective date
Bergen No. 4	Light oil	Addition	+34	June 1975.
McKee Run No. 3	Oil	do.	+110	Do.
Eddystone No. 4	Oil	do.	+400	March 1976.
Eddystone No. 3	Oil	Retraining	+56	June 1976.
Bergen No. 4	Light oil	do.	+11	Do.

(4) Scheduled outages. (a) A scheduled outage of 4 weeks for each unit is estimated to be required to make any modification, installation, or other physical adjustment associated with cessation of the burning of natural gas or petroleum products as the powerplants' primary energy source. Immediately following modification during on-line testing and adjustment, the powerplants will be less than fully dependable. This period should not exceed 30 days. Modifications are forecast to commence approximately March 15, 1976 and to be completed and fully tested by July 15, 1976.

(b) Planned maintenance of other powerplants rated 100 MWe or higher and nuclear plant refueling during the period the power-

(iv) The prohibition of the burning of natural gas or petroleum products as its primary energy source will not impair the reliability of service in the area served by the affected powerplant. Based on an analysis of the information submitted to or otherwise available to FEA, and after consultation with Federal Power Commission, FEA proposes to find that the prohibition of the Crane Units #1 and #2 powerplants of Baltimore Gas and Electric Company (BG&E) from burning natural gas or petroleum products as their primary energy source will not impair the reliability of service in the area served by such powerplants. This proposed finding is based on the facts, assumptions, and interpretation stated below:

(A) (1) Interconnections and power dispatching. (a) The Riverside Units are within the geographical area of the Mid-Atlantic Area Council (MAAC) regional electric reliability council.

(b) They are interconnected with and their operations are coordinated with the Pennsylvania-New Jersey-Maryland (PJM) power pool.

(c) Dispatching of electric power in the BG&E service area is controlled by PJM.

(d) "Dispatching system" as used in this finding means PJM.

(2) Forecast peak loads. (a) Forecast of peak loads for the dispatching system during the year in which the Crane Units are expected to be implementing the herein prohibition order is as follows:

Spring Load Period (March-May) 1976, Peak 25,680 MWe, May; Summer Load Period (June-Aug.) 1976, Peak 33,670 MWe, July; Fall Load Period (Sept.-Nov.) 1976, Peak 30,730 MWe, Sept.; Winter Load Period (Dec.-Feb.) 1976-77, Peak 28,290 MWe, Jan.

(b) The peak loads forecast have been compared with peak loads in previous similar periods and the compound load growth rate for these forecasts is 5 percent, which is considered reasonable.

(3) Capacity. (a) The present net dependable capacity of all powerplants of the dispatching system that now are engaged in the sale or exchange of electric power is 41,555 MWe.

(b) Additions, retirements, and powerplant reratings on the PJM system during the period in which Baltimore Gas and Electric Company will be implementing the herein prohibition order, as listed below, will cause the following changes in net dependable capacity of such dispatching system:

Powerplant designation	Fuel	Type of change	Capacity change (megawatts)	Status and effective date
Bergen No. 4	Light oil	Addition	+34	June 1975.
McKee Run No. 3	Oil	do.	+110	Do.
Eddystone No. 4	Oil	do.	+400	March 1976.
Eddystone No. 3	Oil	Retraining	+56	June 1976.
Bergen No. 4	Light oil	do.	+11	Do.

plant will be implementing the herein prohibition order within the dispatching system are numerous. The average total capacity lost due to maintenance during the spring period is forecast as 6000 MWe and 900 MWe during the summer period.

(5) Net derating capacity. The forecast net dependable capacity for the dispatching system during the period (shown as quarter years) in which the powerplants are expected to be implementing the herein prohibition order and the next quarter following is: Spring 1976, 44,554 MWe; Summer 1976, 44,621 MWe.

(6) Gross reserve margin-dispatching system. (a) The expected minimum gross reserve margin (difference between net system

capability and peak load in percent of peak load) of the dispatching system for the load periods specified are as follows: Spring 1976, 73.5 percent; Summer 1976, 82.5 percent.

(b) After deducting the net capacity of units scheduled for maintenance or refueling during these same load periods. The expected minimum reserve margins are: Spring, 1976, 50.1 percent; Summer 1976, 59.9 percent.

(7) Derating. There will be no derating of the powerplants when using coal as the primary energy source.

(8) System stability. Available information regarding system stability for the dispatching system has been evaluated for each of the load periods stated in paragraph (5) and the issuance of a prohibition order to the powerplants will not cause a significant system stability problem.

(B) Reliability of service. (1) The estimated gross reserve margin of the dispatching system during the implementation period associated with the commencement the burning of coal as a primary energy source is forecast to range between 29.9 percent and 50.1 percent, depending upon the date of the period of powerplant outage. By scheduling the implementation period during the spring 1976 load period, the estimated gross dispatching system's reserve margin will be above 29 percent, and the Federal Power Commission considers this to be an acceptable reserve margin.

(2) If dispatching system conditions at the time of the implementation period are as presently forecast by FEA in this finding, there will be no impairment of reliability of service, within the meaning of ESECA and the regulations promulgated thereunder, in the area served by the Baltimore Gas and Electric Company.

(3) Existing transmission system interconnection with other utilities are presently scheduled to transfer approximately 50 megawatts into the dispatching system; with the capacity to transfer approximately 1000 additional megawatts of power into the dispatching system. This capacity will provide emergency resource of electric power during the implementation period and will enhance the reliability of service.

6. OFU-040, 041, BALTIMORE GAS AND ELECTRIC COMPANY, POWERPLANTS 4 AND 5, GENERATING STATION—RIVERSIDE, BALTIMORE, MARYLAND

(a) Proposed findings and rationale for findings.

1. Capability and necessary plant equipment finding. Based on an analysis of the information submitted to or otherwise available to FEA, FEA proposes to find that on June 22, 1974, these powerplants had the capability and necessary plant equipment to burn coal. This proposed finding is based on facts, interpretations and assumptions stated below:

(A) These powerplants had in place on June 22, 1974, a boiler that was capable of burning coal, in that such boiler had been designed and constructed, or had been modified to enable it to burn coal and another fossil fuel interchangeably as its primary energy source, notwithstanding the fact that on June 22, 1974, such powerplant may not have been burning coal as its primary energy source.

(B) Based on information filed with FEA on April 14, 1975 by The Baltimore Gas and Electric Company, the following significant equipment or facilities would have to be acquired or substantially refurbished:

1. Work on ash hopper feeder;
2. Bottom ash sluice pump;
3. Boiler work;
4. Coal transport system;
5. Coal unloader;

6. Crawler crane for ash pits;
7. Bulldozer;
8. Ash transport system;
9. Spare parts inventory.

FEA assumes that on June 22, 1974, these powerplants had all other significant equipment and facilities associated with the burning of coal.

(C) Within the meaning of ESECA and the regulations promulgated pursuant thereto, the equipment and facilities listed in paragraph (b) do not individually or in combination constitute a lack of capability and necessary plant equipment to burn coal as of June 22, 1974.

(ii) Burning of coal in lieu of natural gas or petroleum products is practicable and consistent with the purposes of ESECA. Based on an analysis of the information submitted to or otherwise available to FEA, FEA proposes to find that the burning of coal by Powerplants #4,5 at the Riverside Generating Station, #1,2 at the Wagner Generating Station, #1,2 at the Crane Generating Station, in lieu of petroleum products or natural gas, is practicable and consistent with the purposes of ESECA. This proposed finding is based on the facts, interpretations and assumptions stated below.

(A) (1) Revenue requirements. (a) The investment costs that result from the acquisition and refurbishment of equipment and facilities associated with the burning of coal by the above listed powerplants are estimated to be approximately \$19,717,000. This estimate is based on existing FEA information and on information filed with the FEA by the powerplants concerning items of equipment and facilities that would have to be acquired or refurbished and the costs of such acquisition or refurbishment.

(1) Costs of acquisition or refurbishing equipment are allocated as follows:

(A) \$16,440,000 to comply with air pollution control requirements of the Clean Air Act.

(B) \$3,277,000 to make those technical plant and equipment adjustments associated with the burning of coal, as well as to comply with environmental requirements other than those imposed by the Clean Air Act.

(b) The increase in operating costs other than fuel costs that result from the burning of coal are estimated to be approximately \$68,000 per year.

(c) (i) The price of petroleum products available to the powerplant is approximately \$2.20 to \$2.30 per million Btus. The price of coal of the type used by the above listed powerplants is approximately \$1.35 to \$1.45 per million Btus. The burning of coal by the above listed powerplants will result in a reduction of 75 cents to 95 cents per million Btus or \$30 million to \$40 million per year.

(ii) The Maryland Public Utility Commission permits the inclusion of increased fuel costs in the rate base through a fuel adjustment clause and, if there is a decrease in the cost of fuel as a result of burning coal, there will be a decrease in such rate base.

(d) The total annual incremental increase in revenue requirements resulting from costs associated with burning coal as opposed to oil is \$3,689,000.

(2) Financial capabilities. (a) Based on the most recent financial statements and capital expenditure programs of Baltimore Gas and Electric Company, well as other information available to it, FEA proposes to find that the prohibition orders for the above listed powerplants is practicable. This financial assessment included an evaluation of generally accepted financial ratios; effects on capitalization as a result of the costs of burning of coal; impact on current and future construction programs; and possible impacts on rates. This assessment incorpo-

rated, but was not limited to, consideration of: the \$19.7 million investment requirement (or 1.0 percent) in relation to the net property and plant of the company of \$1.89 billion of the company of \$360 million (or 1.9 percent); the total capitalization of the company of \$1.91 billion; the change in 1974 to estimated 1975 construction budgets of \$231 million to \$350 million; and the 15 years remaining useful life of the plants. These assessments, the above findings, and other evaluations of the general financial health of the company were the basis of this finding.

(B) Because this prohibition order will discourage the use of natural gas or petroleum products and encourage the increased use of coal, FEA proposes to find that its issuance would be consistent with the purpose of ESECA "to provide a means to assist in meeting the essential needs of the United States for fuels." Further, on the basis of the environmental analyses conducted by FEA, the analyses of air quality impacts which EPA is required to conduct prior to effectiveness of a prohibition order, as well as the necessity for the powerplant to comply with the Clean Air Act and other applicable environmental protection requirements, FEA proposes to find that the prohibition order is also consistent with the purpose of ESECA to provide for a means to meet the Nation's essential fuel needs "in a manner which is consistent, to the fullest extent practicable, with existing national commitments to protect and improve the environment."

(iii) Coal and coal transportation facilities will be available during the period the prohibition order is in effect. Based on an analysis of the information submitted to or otherwise available to FEA, FEA proposes to find that coal and coal transportation facilities will be available to these powerplants during the period until December 31, 1978. The period until December 31, 1978 is the period during all or part of which the prohibition order to which these findings relate will be in effect. This proposed finding is based upon the following facts, interpretations, and assumptions:

(A) (1) It is estimated that it will be practicable to produce coal nationally as follows:

Year:	Production (million tons)
1975	662
1976	679
1977	707
1978	735

(2) The estimated national demand, excluding any increased demand resulting from FEA action under the authority of section 2 of ESECA, is as follows:

Year:	Demand (million tons)
1975	640
1976	664
1977	688
1978	716

(3) The estimated additional national demand for coal resulting from the prohibition order to which this finding relates, and from FEA actions under authority of section 2 of ESECA, will be as follows:

Year:	Demand (million tons)
1975	0.7
1976	4.0
1977	13.6
1978	16.2

(4) Coal of the specific type required for use by this powerplant has been identified in the reserves of the Northern and Southern

Appalachian Coal supply regions, which consist of Bureau of Mines Districts 1 through 8 and 13.

(5) It is estimated that it will be practicable to produce coal from the Northern and Southern Appalachian coal supply regions as follows:

Year:	Production (million tons)
1975	406
1976	402
1977	407
1978	412

(6) The regional and national production estimates stated in items (1) and (5) assume a surge capacity, or ability to increase production over normal levels, of approximately 4 percent. A 1975 study by the Bureau of Mines of the Department of the Interior indicates a national surge capacity of approximately up to 8 percent. In response to an industry survey in late 1974, the coal industry itself indicated that it had a surge capacity of up to 8 percent. By comparison, the increased national demand for coal resulting from the prohibition order to which this finding relates and other FEA actions under section 2 of ESECA, is less than one tenth of a percent in 1975, increasing to a maximum of 2.3 percent in 1978 of estimated national demand stated in item (2). A market survey of traditional coal suppliers to FEA Region 3 consumers indicates that there is ample production capability to support increased demand for coal from this region resulting from the prohibition order to which this finding relates and other FEA actions under section 2 of ESECA.

(7) No State or local laws or policies which would limit the extraction of this coal have been found by FEA or brought to FEA's attention.

(8) The estimated demand for coal from these supply regions, excluding any increased demand resulting from FEA actions under the authority of section 2 of ESECA, is as follows:

Year:	(million tons) Demand
1975	390
1976	394
1977	395
1978	398

(9) The estimated additional demand for coal from these supply regions resulting from the prohibition order to which this finding relates and from other FEA orders under section 2 of ESECA, will be as follows:

Year:	(million tons) Demand
1975	4
1976	2.5
1977	10.2
1978	12.4

(10) On the basis of the above information, FEA proposes to find that the estimated production of coal of the specific type required for use by this powerplant exceeds the estimated demand for such coal by amounts adequate to support a conclusion that such coal will be available to these powerplants during the period until December 31, 1978.

(B) (1) Adequate rail and barge facilities exist between these coal supply regions and the powerplant to transport the coal that will be used by such powerplant pursuant to this order.

(2) There is a waterway which will be able to deliver this coal from the main rail line to these powerplants.

(3) Sufficient rolling stock will be available to the Penn Central for transporting

this coal during the period until December 31, 1978.

(iv) *The prohibition of the burning of natural gas or petroleum products as its primary energy source will not impair the reliability of service in the area served by the affected powerplants.* Based on an analysis of the information submitted to or otherwise available to FEA, and after consultation with the Federal Power Commission, FEA proposes to find that the prohibition of the Riverside Units #4 and #5 powerplants of Baltimore Gas and Electric Company (BG&E) from burning natural gas or petroleum products as their primary energy source will not impair the reliability of service in the area served by such powerplants. This proposed finding is based on the facts, assumptions, and interpretation stated below:

(A) (1) *Interconnections and power dispatching.* (a) The Riverside Units are within the geographical area of the Mid-Atlantic Area Council (MAAC) regional electric reliability council.

(b) They are interconnected with and their operations are coordinated with the Pennsylvania-New Jersey-Maryland (PJM) power pool.

(c) Dispatching of electric power in the BG&E service area is controlled by PJM.

Powerplant designation	Fuel	Type of change	Capacity change (megawatts)	Status and effective date
Borgen No. 1	Light oil	Addition	+34	June 1975.
McKee Run No. 3	Oil	do.	+110	do.

(4) *Scheduled outages.* (a) A scheduled outage of one week for each unit is estimated to be required to make any modification, installation or other physical adjustment associated with cessation of the burning of natural gas or petroleum products as the powerplants' primary energy source. Immediately following modification during on-line testing and adjustment, the powerplants will be less than fully dependable. This period should not exceed 30 days.

Modifications are forecast to commence approximately November 1, 1975 and to be completed and fully tested by January 15, 1976.

(b) Planned maintenance of other powerplants and nuclear plant refueling during the period the powerplant will be implementing the herein prohibition order are numerous. Average total capability lost due to maintenance during subject period is 5700 MWe.

(5) *Net dependable capacity.* The forecast net dependable capacity for the dispatching system during the period (shown as quarter years) in which the powerplants are expected to be implementing the herein prohibition order and the next quarter following is: Fall 1975, 44,154 MWe; Winter 1975-76, 44,154 MWe.

(6) *Gross reserve margin-dispatching system.* (a) The expected minimum gross reserve margin (difference between net system capability and peak load in percent of peak load) of the dispatching system for the load periods specified are as follows: Fall 1975, 51.5 percent; Winter 1975-76, 65.3 percent.

(b) After deducting the net capacity of units scheduled for maintenance or refueling during these same load periods, the expected minimum reserve margins are: Fall 1975, 32.0 percent; Winter 1975-76, 44.0 percent.

(7) *Derating.* There will be no derating of the powerplants when using coal as the primary energy source.

(8) *System stability.* Available information regarding system stability for the dispatching system has been evaluated for each of the load periods stated in paragraph (5) and the issuance of a prohibition order to the

(d) "Dispatching system" as used in this finding means PJM.

(2) *Forecast peak loads.* (a) *Forecast of peak loads for the dispatching system during the year in which the Riverside Units are expected to be implementing the herein prohibition order is as follows:*

Summer Load Period (June-Aug.) 1975, Peak 31,930 MWe, July; Fall Load Period (Sept.-Nov.) 1975, Peak 29,140 MWe, Sept.; Winter Load Period (Dec.-Feb.) 1975-76, Peak 28,710 MWe, Jan.; Spring Load Period (March-May) 1976, Peak 25,680 MWe, May.

(b) The peak loads forecast have been compared with peak loads in previous similar periods and the compound load growth rate for these forecasts is 5 percent, which is considered reasonable.

(3) *Capacity.* (a) The present net dependable capacity of all powerplants of the dispatching system that now are engaged in the sale or exchange of electric power is 41,555 MWe.

(b) Additions, retirements, and powerplant reratings on the PJM system during the period in which Baltimore Gas and Electric Company will be implementing the herein prohibition order, as listed below, will cause the following changes in net dependable capacity of such dispatching system:

powerplants will not cause a significant system stability problem.

(B) *Reliability of service.* (1) The estimated gross reserve margin of the dispatching system during the implementation period associated with the commencement of the burning of coal as a primary energy source is forecast to range between 32% and 44%, depending upon the date of the period of powerplants outage. By scheduling the implementation period during the fall or winter load period the estimated gross dispatching system's reserve margin will be above 30%, and the Federal Power Commission considers this to be an acceptable reserve margin.

(2) If dispatching system conditions at the time of the implementation period are as presently forecast by FEA in this finding, there will be no impairment of reliability of service, within the meaning of ESECA and the regulations promulgated thereunder, in the area served by the Baltimore Gas and Electric Company.

(3) Existing transmission system interconnections with other utilities are presently scheduled to transfer approximately 50 megawatts of power into the dispatching system. This capacity will provide emergency resource of electric power during the implementation period and will enhance the reliability of service.

7. OFU-042, 043, BALTIMORE GAS AND ELECTRIC COMPANY, POWERPLANTS 1 AND 2, GENERATING STATION—WAGNER, BALTIMORE, MARYLAND

(a) *Proposed findings and rationale for findings.*

1. *Capability and necessary plant equipment finding.* Based on an analysis of the information submitted to or otherwise available to FEA, FEA proposes to find that on June 22, 1974, these powerplants had the capability and necessary plant equipment to burn coal. This proposed finding is based on facts, interpretations and assumptions stated below:

(A) These powerplants had in place, on June 22, 1974, a boiler that was capable of

burning coal, in that such boiler had been designed and constructed, or had been modified to enable it to burn coal as its primary energy source, or to burn coal and another fossil fuel interchangeably as its primary energy source, notwithstanding the fact that on June 22, 1974, such powerplant may not have been burning coal as its primary energy source.

(B) Based on information filed with FEA on April 14, 1975 by The Baltimore Gas and Electric Company, the following significant equipment or facilities would have to be acquired or substantially refurbished:

1. Superheater;
2. Crawler crane for ash pits;
3. Boiler work;
4. Work on air heater;
5. Conveyor system;
6. Bottom ash transport system;
7. Flyash transport system;
8. Spare parts inventory;
9. Ash piling;
10. Ash sluice pump.

FEA assumes that on June 22, 1974, these powerplants had all other significant equipment and facilities associated with the burning of coal.

(C) Within the meaning of ESECA and the regulations promulgated pursuant thereto, the equipment and facilities listed in paragraph (b) do not individually or in combination constitute a lack of capability and necessary plant equipment to burn coal as of June 22, 1974.

(ii) *Burning of coal in lieu of natural gas or petroleum products is practicable and consistent with the purposes of ESECA.* Based on an analysis of the information submitted or otherwise available to FEA, FEA proposes to find that the burning of coal by Powerplants # 4, 5 at the Riverside Generating Station, # 1, 2 at the Wagner Generating Station, # 1, 2 at the Crane Generating Station, in lieu of petroleum products or natural gas, is practicable and consistent with the purposes of ESECA. This proposed finding is based on the facts, interpretations and assumptions stated below.

(A) (1) *Revenue requirements.* (a) The investment costs that result from the acquisition and refurbishment of equipment and facilities associated with the burning of coal by the above listed powerplants are estimated to be approximately \$19,717,000. This estimate is based on existing FEA information and on information filed with the FEA by the powerplants concerning items of equipment and facilities that would have to be acquired or refurbished and the costs of such acquisition or refurbishment.

(i) Costs of acquisition or refurbishing equipment are allocated as follows:

(A) \$16,440,000 to comply with air pollution control requirements of the Clean Air Act.

(B) \$3,277,000 to make those technical plant and equipment adjustments associated with the burning of coal, as well as to comply with environmental requirements other than those imposed by the Clean Air Act.

(b) The increase in operating costs other than fuel costs that result from the burning of coal are estimated to be approximately \$68,000 per year.

(c) (1) The price of petroleum products available to the powerplant is approximately \$2.20 to \$2.30 per million Btus. The price of coal of the type used by the above listed powerplants is approximately \$1.35 to \$1.45 per million Btus. The burning of coal by the above listed powerplants will result in a reduction of .75¢ to .95¢ per million Btus or \$30 million to \$40 million per year.

(ii) The Maryland Public Utility Commission permits the inclusion of increased fuel

costs in the rate base through a fuel adjustment clause and, if there is a decrease in the cost of fuel as a result of burning coal, there will be a decrease in such rate base.

(d) The total annual incremental increase in revenue requirements resulting from costs associated with burning coal as opposed to oil is \$3,689,000.

(2) *Financial capabilities.* (a) Based on the most recent financial statements and capital expenditure programs of Baltimore Gas and Electric Company, well as other information available to it, FEA proposes to find that the prohibition orders for the above listed powerplants is practicable. This financial assessment included an evaluation of generally accepted financial ratios; effects on capitalization as a result of the costs of burning of coal; impact on current and future construction programs; and possible impacts on rates. This assessment incorporated, but was not limited to, consideration of: the \$19.7 million investment requirement (or 1.0 percent) in relation to the net property and plant of the company of \$1.89 Billion and 1975-1977 construction budget estimate of the company of \$350 million (or 1.9 percent); the total capitalization of the company of \$1.91 Billion; the change in 1974 to estimated 1975 construction budgets of \$231 million to \$350 million; and the 15 years remaining useful life of the plants. These assessments, the above findings, and other evaluations of the general financial health of the company were the basis of this finding.

(B) Because this prohibition order will discourage the use of natural gas or petroleum products and encourage the increased use of coal, FEA proposes to find that its issuance would be consistent with the purpose of ESECA "to provide a means to assist in meeting the essential needs of the United States for fuels." Further, on the basis of the environmental analyses conducted by FEA, the analyses of air quality impacts which EPA is required to conduct prior to effectiveness of a prohibition order, as well as the necessity for the powerplant to comply with the Clean Air Act and other applicable environmental protection requirements, FEA proposes to find that the prohibition order is also consistent with the purpose of ESECA to provide for a means to meet the Nation's essential fuel needs. "In a manner which is consistent, to the fullest extent practicable, with existing national commitments to protect and improve the environment."

(iii) *Coal and coal transportation facilities will be available during the period the prohibition order is in effect.* Based on an analysis of the information submitted to or otherwise available to FEA, FEA proposes to find that coal and coal transportation facilities will be available to these powerplants during the period until December 31, 1978. The period until December 31, 1978 is the period during all or part of which the prohibition order to which these findings relate will be in effect. This proposed finding is based upon the following facts, interpretations, and assumptions:

A (1) It is estimated that it will be practicable to produce coal nationally as follows:

Year:	Production (million tons)
1975	662
1976	679
1977	707
1978	735

(2) The estimated national demand, excluding any increased demand resulting from FEA action under the authority of section 2 of ESECA, is as follows:

Year:	Demand (million tons)
1975	640
1976	664
1977	688
1978	716

(3) The estimated additional national demand for coal resulting from the prohibition order to which this finding relates, and from FEA actions under authority of section 2 of ESECA, will be as follows:

Year:	Demand (million tons)
1975	.7
1976	4.0
1977	13.6
1978	16.2

(4) Coal of the specific type required for use by this powerplant has been identified in the reserves of the Northern and Southern Appalachian Coal supply regions, which consist of Bureau of Mines Districts 1 through 8 and 13.

(5) It is estimated that it will be practicable to produce coal from the Northern and Southern Appalachian coal supply regions as follows:

Year:	Production (million tons)
1975	406
1976	402
1977	407
1978	412

(6) The regional and national production estimates stated in items (1) and (5) assume a surge capacity, or ability to increase production over normal levels, of approximately 4 percent. A 1975 study by the Bureau of Mines of the Department of the Interior indicates a national surge capacity of approximately up to 6 percent. In response to an industry survey in late 1974, the coal industry itself indicated that it had a surge capacity of up to 8 percent. By comparison, the increased national demand for coal resulting from the prohibition order to which this finding relates and other FEA actions under section 2 of ESECA, is less than one tenth of a percent in 1975, increasing to a maximum of 2.3 percent in 1978 of estimated national demand stated in item (2). A market survey of traditional coal suppliers to FEA Region 3 consumers indicates that there is ample production capability to support increased demand for coal from this region resulting from the prohibition order to which this finding relates and other FEA actions under section 2 of ESECA.

(7) No State or local laws or policies which would limit the extraction of this coal have been found by FEA or brought to FEA's attention.

(8) The estimated demand for coal from these supply regions, excluding any increased demand resulting from FEA actions under the authority of section 2 of ESECA, is as follows:

Year:	Demand (million tons)
1975	390
1976	394
1977	395
1978	398

(9) The estimated additional demand for coal from these supply regions resulting from the prohibition order to which this finding relates and from other FEA orders under section 2 of ESECA, will be as follows:

Year:	Demand (million tons)
1975	.4
1976	2.5
1977	10.2
1978	12.4

(10) On the basis of the above information, FEA has concluded that the estimated production of coal of the specific type required for use by this powerplant exceeds the estimated demand for such coal by amounts adequate to support a conclusion that such coal will be available to the powerplant during the period until December 31, 1978.

(b) (1) Adequate rail and barge facilities exist between these coal supply regions and the powerplant to transport the coal that will be used by such powerplant pursuant to this order.

(2) There is a waterway which will be able to deliver this coal from the main rail line to the powerplant.

(3) Sufficient rolling stock will be available to the Penn Central for transporting this coal during the period until December 31, 1978.

(iv) The prohibition of the burning of natural gas or petroleum products as its primary energy source will not impair the reliability of service in the area served by the affected powerplants. Based on an analysis of the information submitted to or otherwise available to FEA, and after consultation with the Federal Power Commission, FEA proposes to find that the prohibition of the Wagner Units #1 and #2 powerplants of Baltimore Gas and Electric Company (BG&E) from burning natural gas or petroleum products as their primary energy source will not impair the reliability of service in the area served by such powerplants. This proposed finding is based on the facts, assumptions and interpretations stated below:

(A) (1) *Interconnections and power dispatching.* (a) The Wagner Units are within the geographical area of the Mid-Atlantic Area Council (MAAC) regional electric reliability council.

(b) They are interconnected with and their operations are coordinated with the Pennsylvania-New Jersey-Maryland (PJM) power pool.

(c) Dispatching of electric power in the BG&E service area is controlled by PJM.

(d) "Dispatching system" as used in this finding means PJM.

(2) *Forecast peak loads.* (a) Forecast of peak loads for the dispatching system during the year in which the Wagner Units are expected to be implementing the herein prohibition order is as follows:

Summer Load Period (June-Aug.) 1975, Peak 31,930 MWe, July; Fall Load Period (Sept.-Nov.) 1975, Peak 29,140 MWe, Sept.; Winter Load Period (Dec.-Feb.) 1975-76, Peak 26,710 MWe, Jan.; Spring Load Period (March-May) 1976, Peak 25,680 MWe, May.

(b) The peak loads forecast have been compared with peak loads in previous similar periods and the compound load growth rate for these forecasts is 5 percent, which is considered reasonable.

(3) *Capacity.* (a) The present net dependable capacity of all powerplants of the dispatching system that now are engaged in the sale or exchange of electric power is 41,555 MWe.

(b) Additions, retirements, and powerplants reratings on the PJM system during the period in which Baltimore Gas and Electric Company will be implementing the herein prohibition order, as listed below, will cause the following changes in net dependable capacity of such dispatching system:

(4) *Scheduled outages.* (a) A scheduled outage of one week for each unit is estimated to be required to make any modification, installation or other physical adjustment associated with cessation of the burning of natural gas or petroleum products as the powerplants' primary energy source. Immediately following modification during on-line testing and adjustment, the powerplants will be less than fully dependable. This period should not exceed 15 days.

Modifications are forecast to commence approximately December 1, 1975, and to be complete and fully tested by February 1, 1976.

(b) Planned maintenance of other powerplants and nuclear plant refueling during the period the powerplants will be implementing the herein prohibition order, within the dispatching system are numerous. Average total capability lost due to maintenance during subject period is 5700 MWe.

(5) *Net dependable capacity.* The forecast net dependable capacity for the dispatching system during the period (shown as quarter years) in which the powerplants are expected to be implementing the herein prohibition order and the next quarter following is: Winter 1975-76, 44,154 MWe; Spring 1976, 44,554 MWe.

(6) *Gross reserve margin-dispatching system.* (a) The expected minimum gross reserve margin (difference between net system capability and peak load in percent of peak load) of the dispatching system for the load periods specified are as follows: Winter 1975-76, 65.3 percent; Spring 1976, 73.5 percent.

(b) After deducting the net capacity of units scheduled for maintenance or refuel-

ing during these same load periods. The expected minimum reserve margins are: Winter 1975-76, 44.0 percent; Spring 1976, 51.3 percent.

(7) *Derating.* There will be no derating of the powerplants when using coal as their primary energy source.

(8) *System stability.* Available information regarding system stability for the dispatching system has been evaluated for each of the load periods stated in paragraph (5) and the issuance of a prohibition order to the powerplants will not cause a significant system stability problem.

(B) *Reliability of service.* (1) The estimated gross reserve margin of the dispatching system during the implementation period associated with the commencement the burning of coal as a primary energy source is forecast to range between 44 percent and 51 percent, depending upon the date of the period of powerplant outage. By scheduling the implementation period during the winter or spring load period of 1976, the estimated gross dispatching system's reserve margin will be above 44 percent, and the Federal Power Commission considers this to be an acceptable reserve margin.

(2) If dispatching system conditions at the time of the implementation period are as presently forecast by FEA in this finding, there will be no impairment of reliability of service, within the meaning of ESECA and the regulations promulgated thereunder, in the area served by Baltimore Gas and Electric Company.

(3) Existing transmission system interconnections with other utilities are presently scheduled to transfer approximately 50 mega-

watts into the dispatching system with the capacity to transfer approximately 1000 additional megawatts of power into the dispatching system. This capacity will provide emergency resource of electric power during the implementation period and will enhance the reliability of service.

8. OFU-044, 045, 046, 047, DELMARVA POWER AND LIGHT COMPANY, POWERPLANTS 1, 2, 3, AND 4, GENERATING STATION—EDGE MOOR, WILMINGTON, DELAWARE

(a) Proposed findings and rationale for findings.

1. *Capability and necessary plant equipment finding.* Based on an analysis of the information submitted to or otherwise available to FEA, FEA proposes to find that on June 22, 1974, these powerplants had the capability and necessary plant equipment to burn coal. This proposed finding is based on facts, interpretations and assumptions stated below:

(A) These powerplants had in place, on June 22, 1974, a boiler that was capable of burning coal, in that such boiler had been designed and constructed, or had been modified to enable it to burn coal as its primary energy source, or to burn coal and another fossil fuel interchangeably as its primary energy source, notwithstanding the fact that on June 22, 1974, such powerplants may not have been burning coal as its primary energy source.

(B) Based on information filed with FEA on April 11, 1975 by The Delmarva Power and Light Company, the following significant equipment or facilities would have to be acquired or substantially refurbished:

1. Coal handling (including repairs to locomotive, conveyors, crushers, chutes, track, electrical and instrumentation);

2. Ash handling (including repairs to grinders and ash pumps and installation of a new ash pond);

3. Dust handling (including repairs to vacuum system, silos, piping, electrical and instrumentation and acquisition of a new truck);

4. Coal fed and preparation (including repairs to coal scales, mills, feeders, exhausters, burners piping and bunkers);

5. Boiler (including repairs to combustion controls, fans, boiler ash pits, precipitator, and superheaters).

FEA assumes that on June 22, 1974, these powerplants had all other significant equipment and facilities associated with the burning of coal.

(C) Within the meaning of ESECA and the regulations promulgated pursuant thereto, the equipment and facilities listed in paragraph (b) do not individually or in combination constitute a lack of capability and necessary plant equipment to burn coal as of June 22, 1974.

(ii) *Burning of coal in lieu of natural gas or petroleum products is practicable and consistent with the purposes of ESECA.* Based on an analysis of the information submitted or otherwise available to FEA, FEA proposes to find that the burning of coal by the powerplants, in lieu of petroleum products or natural gas, is practicable and consistent with the purposes of ESECA. This proposed finding is based on the facts, interpretations and assumptions stated below.

(A) (1) *Revenue requirements.* (a) The investment costs that result from the acquisition and refurbishment of equipment and facilities associated with the burning of coal by the powerplants are estimated to be approximately \$12,980,000. This estimate is based on existing FEA information and on information filed with the FEA by the powerplant concerning items of equipment and facilities that would have to be acquired or refurbished and the costs of such acquisition or refurbishment.

(b) Because this prohibition order will discourage the use of natural gas or petroleum products and encourage the increased use of coal, FEA proposes to find that its issuance would be consistent with the purpose of ESECA "to provide a means to assist in meeting the essential needs of the United States for fuels." Further, on the basis of the environmental analyses conducted by FEA, the analyses of air quality impacts which EPA is required to conduct prior to effectiveness of a prohibition order, as well as the necessity for the powerplant to comply with the Clean Air Act and other applicable environmental protection requirements, FEA proposes to find that the prohibition order is also consistent with the purpose of ESECA to provide for a means to meet the Nation's essential fuel needs. "In a manner which is consistent, to the fullest extent practicable, with existing national commitments to protect and improve the environment."

(iii) *Coal and coal transportation facilities will be available during the period the prohibition order is in effect.* Based on an analysis of the information submitted to or otherwise available to FEA, FEA proposes to find that coal and coal transportation facilities will be available to these powerplants during the period until December 31, 1978. The period until December 31, 1978 is the period during all or part of which the prohibition order to which these findings relate will be in effect. This proposed finding is based upon the following facts, interpretations, and assumptions:

(A) (1) It is estimated that it will be practicable to produce coal nationally as follows:

Year: 1975 ----- 662  
1976 ----- 679  
1977 ----- 707  
1978 ----- 735

(2) The estimated additional demand, excluding any increased demand resulting from FEA action under the authority of section 2 of ESECA, is as follows:

Year: 1975 ----- 640  
1976 ----- 664  
1977 ----- 688  
1978 ----- 716

(3) The estimated additional national demand for coal resulting from the prohibition order to which this finding relates, and from FEA actions under authority of section 2 of ESECA, will be as follows:

Year: 1975 ----- 7  
1976 ----- 4.0  
1977 ----- 13.6  
1978 ----- 16.2

(4) Coal of the specific type required for use by this powerplant has been identified in the reserves of the Northern and Southern Appalachian Coal supply regions, which consist of Bureau of Mines Districts 1 through 8 and 13.

(5) It is estimated that it will be practicable to produce coal from the Northern and Southern Appalachian coal supply regions as follows:

Year: 1975 ----- 406  
1976 ----- 402  
1977 ----- 407  
1978 ----- 412

(6) The regional and national production estimates stated in items (1) and (5) assume a surge capacity, or ability to increase production over normal levels, of approximately 4 percent. A 1975 study by the Bureau of Mines of the Department of the Interior indicates a national surge capacity of approximately up to 6 percent. In response to an industry survey in late 1974, the coal industry itself indicated that it had a surge capacity of up to 8 percent. By comparison, the increased national demand for coal resulting from the prohibition order to which this finding relates and other FEA actions under section 2 of ESECA, is less than one tenth of a percent in 1975, increasing to a maximum of 2.3 percent in 1978 of estimated national demand stated in item (2). A market survey of traditional coal suppliers to FEA Region 3 consumers indicates that there is ample production capability to support increased demand for coal from this region resulting from the prohibition order to which this finding relates and other FEA actions under section 2 of ESECA.

(7) No State or local laws or policies which would limit the extraction of this coal have been found by FEA or brought to FEA's attention.

(8) The estimated demand for coal from these supply regions, excluding any increased demand resulting from FEA actions under the authority of section 2 of ESECA, is as follows:

Year: 1975 ----- 390  
1976 ----- 394  
1977 ----- 395  
1978 ----- 398

(9) The estimated additional demand for coal from these supply regions resulting from the prohibition order to which this finding relates and from other FEA orders under section 2 of ESECA, will be as follows:

Year: 1975 ----- 2.5  
1976 ----- 10.2  
1977 ----- 12.4

(10) On the basis of the above information, FEA proposes to find that the estimated production of coal of the specific type required for use by this powerplant exceeds the estimated demand for such coal by amounts adequate to support a conclusion that such coal will be available to these powerplants during the period until December 31, 1978.

(B) (1) Adequate rail facilities exist between these coal supply regions and the powerplant to transport the coal that will be used by such powerplant pursuant to this order.

(2) There is a spur line which will be able to deliver this coal from the main rail line to these powerplants.

(3) Sufficient rolling stock will be available to the Penn Central for transporting this coal during the period until December 31, 1978.

(iv) The prohibition of the burning of natural gas or petroleum products as its primary energy source will not impair the reliability of service in the area served by the affected powerplants. Based on the analysis of the information submitted to or otherwise available to FEA, and after consultation with the Federal Power Commission, FEA proposes to find that the prohibition of the Edge Moor Units #1, #2, #3 and #4 powerplants of the Delmarva Power and Light Company from burning natural gas or petroleum products as their primary energy source will not impair the reliability of service in the area served by such powerplants. This proposed finding is based on the facts, assumptions and interpretations stated below:

(A) (1) *Interconnections and power dispatching.* (a) The Edge Moor Units are within the geographical area of the Mid-Atlantic Area Council (MAAC) regional electric reliability council.

(b) They are interconnected with and their operation is coordinated with the Philadelphia Electric Company which in turn is interconnected with and its operations are coordinated with the Pennsylvania-New Jersey-Maryland (PJM) Power Pool.

(c) Dispatching of electric power is controlled by PJM.

(d) "Dispatching system" as used in this finding means PJM.

(2) *Forecast peak loads.* (a) Forecast of peak loads for the dispatching system during the year in which the Delmarva Power and Light Company is expected to be implementing the herein prohibition order is as follows:

Summer Load Period (June-Aug.) 1976, Peak 33,670 MWe, July; Fall Load Period (Sept.-Nov.) 1976, Peak 30,730 MWe, Sept.;

Winter Load Period (Dec.-Feb.) 1976-77, Peak 28,290 MWe, Jan.; Spring Load Period (March-May) 1977, Peak 27,070 MWe, May.

(b) The peak loads forecast have been compared with peak loads in previous similar periods and the compound load growth rate for these forecasts is 5 percent, which is considered reasonable.

(3) *Capacity.* (a) The present net dependable capacity of all powerplants of the dis-

patching system that now are engaged in the sale or exchange of electric power is 41,555 MWe.

(b) Additions, retirements, and powerplant reratings from the present to the end of the period in which Delmarva Power and Light Company will be implementing the herein prohibition order, as listed below, will cause the following changes in net dependable capacity of such dispatching system:

Powerplant designation	Fuel	Type of change	Capacity change (megawatts)	Status and effective date
Bergen No. 4	Light oil	Addition	+34	June 1975.
McKee Run No. 3	Oil	do	+110	Do
Eddystone No. 4	Oil	do	+100	March 1976.
Eddystone No. 3	Oil	Retiring	-54	June 1976.
Bergen No. 4	Light oil	do	+11	Do.
Gilbert No. 4	Oil	Addition	+126	November 1976.
Salem No. 1	Nuclear	do	+1100	December 1976.

(4) *Scheduled outages.* (a) A scheduled outage of 60 days is estimated to be required to make any modification, installation, or other physical adjustment associated with cessation of the burning of natural gas or petroleum products as the powerplants' primary energy source. Immediately following modification during on-line testing and adjustment, the powerplants will be less than fully dependable. This period should not exceed 30 days.

Modifications are forecast to commence approximately September 1, 1976 and to be completed and fully tested by December 1, 1976.

(b) Planned maintenance of other powerplants during the period the powerplant will be implementing the herein prohibition order within the PJM system are numerous. The average total capability lost due to maintenance during this period is 6000 MWe.

(5) *Net dependable capacity.* The forecast net dependable capacity for the dispatching system during the period (shown as quarter years) in which the powerplant is expected to be implementing the herein prohibition order and the next quarter following is: Fall 1976, 42,418 MWe; Winter 1976-77, 44,842 MWe.

(6) *Gross reserve margin-dispatching system.* (a) The expected minimum gross reserve margin (difference between net system capability and peak load in percent of peak load) of the dispatching system for the load periods specified are as follows: Fall 1976, 33.0 percent; Winter 1976-77, 58.5 percent. (b) After deducting the net capacity of units scheduled for maintenance or refueling during these same load periods. The expected minimum reserve margins are: Fall 1976, 18.5 percent; Winter 1976-77, 37.3 percent.

(7) *Derating.* There will be no derating of the powerplants when using coal as the primary energy source.

(8) *System stability.* Available information regarding system stability for the dispatching system has been evaluated for each of the load periods stated in paragraph (5) and the issuance of a prohibition order to the powerplants will not cause a significant system stability problem.

(B) *Reliability of service.* (1) The estimated gross reserve margin of the dispatching system during the implementation period associated with the commencement of the burning of coal as a primary energy source is forecast to range between 18.5 percent and 37.3 percent, depending upon the date of the period of powerplant outage. By scheduling the implementation period during the winter 1976-77 load period, the estimated gross dispatching system's reserve margin will be above 30 percent, and the Federal Power Commission considers this to be an acceptable reserve margin.

(2) If dispatching system conditions at the time of the implementation period are as presently forecast by FEA in this finding, there will be no impairment of reliability of service, within the meaning of ESECA and the regulations promulgated thereunder, in the area served by Delmarva Power and Light Company.

(3) Existing transmission system interconnections with other utilities are presently scheduled to transfer approximately 50 megawatts into the dispatching system; with the capacity to transfer approximately 1000 additional megawatts of power into the dispatching system. This capacity will provide emergency resource of electric power during the implementation period and will enhance the reliability of service.

#### CERTAIN POWERPLANTS

##### Amendment of Notice of Intention to Issue Prohibition Orders

The Federal Energy Administration hereby amends the Notice of Intention to Issue Prohibition Orders to Certain Powerplants published in the FEDERAL REGISTER dated May 9, 1975 (40 FR 20491) that pertains to certain powerplants located in FEA Region VII, and hereby amends the Notice of Intention to Issue Prohibition Orders to Certain Powerplants published below in the FEDERAL REGISTER dated May 16, 1975 (40 FR 21516) that pertains to certain powerplants located in FEA Region III. With respect to the period for public comment, each notice is amended to provide the following:

To facilitate the submission of data, views and arguments to supplement either the oral presentation or written comments, the record of the public hearing shall remain open for a period of two weeks from the first day of the public hearing. Such supplementary written data, views or argument shall be filed with Executive Communications, Federal Energy Administration, Box DD, Washington, D.C. 20461. In the event that such supplementary data, views or argument can only be submitted by oral presentation, a request for a conference, in accordance with 10 CFR 303.171, shall be submitted to the FEA Regional Office. To ensure that FEA receives the tran-

script of such oral presentation before the record closes, any oral presentation must be made within 12 days from the first day of the public hearings.

(Energy Supply and Environmental Coordination Act of 1974 (Pub. L. 93-319); Federal Energy Administration Act of 1974 (Pub. L. 93-275); E.O. 11790 (39 FR 23185))

Issued in Washington, D.C., May 15, 1975.

ROBERT E. MONTGOMERY, JR.,  
General Counsel,  
Federal Energy Administration.

#### FEDERAL POWER COMMISSION

[Docket No. CI75-503]

##### ANADARKO PRODUCTION CO.

##### Order Granting Intervention Setting Hearing Date and Prescribing Procedure

MAY 9, 1975.

On February 20, 1975, Anadarko Production Company (Anadarko) filed in Docket No. CI75-503 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the sale for resale and delivery of natural gas in interstate commerce to Panhandle Eastern Pipe Line Company (Panhandle) for a period of one year with pre-granted abandonment from two wells in Morton County, and one well in Stevens County, Kansas.

Anadarko requests authority to sell to Panhandle volumes of gas available from the Low "C" Nos. 4 and 5 Gas Units in Morton County and the Taylor "B" No. 1 Gas Unit in Stevens County for one year at a price of 50.72301 cents per Mcf with a Btu adjustment from 1,000 Btu/cubic ft. Anadarko states that it proposes the subject sale to meet Panhandle's emergency need for gas supplies.

Anadarko states that it will bear the cost of all facilities necessary for the subject sale except gas metering facilities, although Anadarko claims to be able to make the subject gas sale to Panhandle without the need for substantial new facilities.

Anadarko states that upon termination of its contract with Panhandle, it will connect the subject wells to its intrastate system for delivery to industrial and domestic customers under long term contracts.

Anadarko commenced 60-day emergency sales from the Low C No. 3, Taylor B No. 1 and Low C No. 5 wells on February 14, 19 and 25, 1975, respectively, pursuant to § 157.29 of the regulations at a rate of 50.72301 cents (14.65 psia) subject to Btu adjustment plus tax reimbursement. Anadarko proposes to continue delivering to Panhandle's line<sup>1</sup> in Sec. 21-T34S-R38W, Stevens County and Sec. 17-T33S-R40W, Morton County, Kansas, all volumes available from the subject

<sup>1</sup> Panhandle advised that it has constructed facilities at a cost of \$12,600 to receive the gas.

wells (approximately 2,500 Mcf per month).

In Opinion No. 699-B (52 FPC —), which reinstated the limited-term certificate provisions of Section 2.70(b) (3) of the Commission's General Policy and Interpretations, the Commission stated that applicants for limited-term certificates "will have the burden of demonstrating by substantial evidence that the price for which certification is sought is the lowest price at which that particular supply of gas may be obtained for the interstate market and that the supply of gas is available only for the limited period for which certification is sought." (Mimeo p. 6)

Since the proposed price is equal to the national rate, there is no price issue.

In support of its request for a one year limited term certificate, Anadarko, by supplemental information filed on March 27, 1975, makes the following points:

(1) For several years Anadarko has operated an intrastate pipeline and gathering system in Western Kansas in the vicinity of the wells covered by the subject docket.

(2) This system serves industrial and domestic requirements under long term contracts—more specifically: an electric generating plant; a meat packing plant; the City of Liberal, Kansas; and numerous irrigation and agricultural service customers.

(3) The gas supply for this system has declined to the point that additional reserves are needed to support Anadarko's sales contract obligations.

(4) It intends to connect the subject wells to its own gathering system following termination of the limited term certificate.

(5) The availability of materials, right-of-way and internal budget planning are such that Anadarko is willing to make production from the wells covered by this application available to the interstate market for the period requested.

The Commission stated that the purpose of Order No. 699-B is "to attract available natural gas supplies from the intrastate market to the interstate market." On other occasions, however, the Commission has stated that it is not so interested in attracting intrastate gas to allow producers repeatedly and at short intervals to play the intrastate and interstate markets against one another in order to drive up the price of their gas.<sup>2</sup> Anadarko has not demonstrated by substantial evidence that the limited term is justified.

A petition to intervene in support of the application was filed by Panhandle on March 27, 1975.

Based on the facts currently before us, we believe that a formal hearing should be held to afford the Applicant

<sup>2</sup> Opinion No. 699-B, supra, mimeo p. 4.

<sup>3</sup> See order denying authorization for extension of emergency sale, denying limited-term certificate of public convenience and necessity, and granting petition to intervene, Wayne J. Spears, in Docket No. CI75-218, issued December 20, 1974.

an opportunity to establish through the presentation of credible evidence that the subject gas can reasonably be expected to be no longer available for sale after the prescribed limited term.

*The Commission finds.* (1) The intervention of Panhandle in this proceeding may be in the public interest.

(2) It is necessary and proper in the public interest and to aid in the enforcement of the provisions of the Natural Gas Act that the issues in this proceeding be scheduled for hearing in accordance with the procedures set forth below.

*The Commission orders.* (A) Panhandle is hereby permitted to intervene in this proceeding, subject to the Rules and Regulations of the Commission; *Provided, however,* That the participation of such intervenor shall be limited to matters affecting asserted rights and interests as specifically set forth in said petition for leave to intervene; and *Provided, further,* That the admission of said intervenor shall not be construed as recognition by the Commission that it might be aggrieved by any order or orders of the Commission entered in this proceeding.

(B) Pursuant to the authority of the Natural Gas Act, particularly section 7 and 15 thereof, the Commission's rules of practice and procedure, and the regulations under the Natural Gas Act, a public hearing shall be held on June 26, 1975, at 10 a.m. (e.d.t.) in a hearing room of the Federal Power Commission, 825 North Capitol Street NE., Washington, D.C. 20426.

(C) On or before June 17, 1975, Anadarko and any supporting party shall file with the Commission and serve upon all parties, including Commission Staff, their testimony and exhibits in support of their positions.

(D) An Administrative Law Judge to be designated by the Chief Administrative Law Judge—(see Delegation of Authority, 18 CFR 3.5(d)) shall preside at, and control this proceeding in accordance with the policies expressed in the Commission's rules of practice and procedure and the purposes expressed in this order.

By the Commission.

[SEAL] KENNETH F. PLUMB,  
Secretary.

[Docket No. E-9419]

#### ARKANSAS-MISSOURI POWER CO.

##### Notice of Filing of Letter Agreement

MAY 8, 1975.

Take notice that on May 1, 1975, Arkansas-Missouri Power Company (Ark-Mo) tendered for filing a Letter of Agreement dated April 2, 1975 between the Arkansas Electric Cooperative (Ark-co) and Ark-Mo. Ark-Mo states that the Agreement provides for the sale by Ark-Mo of short-term firm power for the period between June 1, 1975 and May 31, 1976, and that revenues therefrom should be about \$1,159,580 for the

12-month period. Ark-Mo requests an effective date of June 1, 1975.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before May 21, 1975. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,  
Secretary.

[FR Doc.75-12882 Filed 5-15-75;8:45 am]

[Docket Nos. CP75-317, CP75-318, CP75-319, CP75-320]

#### CONSOLIDATED GAS SUPPLY CORP.

##### Notice of Applications

MAY 8, 1975.

Take notice that on April 28, 1975, Consolidated Gas Supply Corporation (Applicant), 445 West Main Street, Clarksburg, West Virginia 26301, filed in Docket Nos. CP75-317, CP75-318, CP75-319 and CP75-320 applications pursuant to Section 7(b) of the Natural Gas Act for permission and approval to abandon sales of natural gas onshore and offshore Louisiana, all as more fully set forth in the applications, which are on file with the Commission and open to public inspection.

Applicant states that the sales it wishes to abandon have been authorized from wells which are no longer capable of producing and from reservoirs which have been depleted.

Applicant proposes in Docket No. CP75-317 to abandon the sale of natural gas to Texas Gas Transmission Corporation from Applicant's LL&E "K" No. 1 well in the Bayou Piquant Field, Terrebonne Parish, Louisiana.

Applicant proposes in Docket No. CP75-318 to abandon the sale of natural gas to United Gas Pipe Line Company from the Waterford No. 1 Well in the Lirette Field, Terrebonne Parish, Louisiana.

Applicant proposes in Docket No. CP75-319 to abandon the sale of gas to Tennessee Gas Pipeline Company, a Division of Tenneco Inc., from the S/L 3503 No. 1 well in the East Atchafalaya Bay Field, St. Mary Parish, Louisiana.

Applicant proposes in Docket No. CP75-320 to abandon the sale to Texas Gas Transmission Corporation of gas from the S/L 1172 Nos. 1, 1D, 2, 2D, 3, 4, 4D, 5 and 8 wells, in the Block Four Field, East Cameron Area, Offshore Zone One, Louisiana.

Any person desiring to be heard or to make any protest with reference to said applications should on or before May 21,

1975, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10) and the regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure, hearings will be held without further notice before the Commission on these applications if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that permission and approval for the proposed abandonments are required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that formal hearings are required, further notice of such hearings will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearings.

KENNETH F. PLUMB,  
Secretary.

[FR Doc. 75-12883 Filed 5-15-75; 8:45 am]

[Docket No. RP75-94]

#### GREAT LAKES GAS TRANSMISSION CO. Proposed Changes in FPC Gas Tariff

MAY 8, 1975.

Take notice that Great Lakes Gas Transmission Company (Great Lakes), on April 30, 1975, tendered for filing proposed changes to the following tariff sheets to its FPC Gas Tariff, First Revised Volume No. 1 and Original Volume No. 2:

FIRST REVISED VOLUME NO. 1

Fourth Revised Sheet No. 4  
First Revised Sheet No. 11  
Sixteenth Revised Sheet No. 57

ORIGINAL VOLUME NO. 2

Tenth Revised Sheet No. 53  
Second Revised Sheet No. 53-F  
First Revised Sheet No. 53-G  
First Revised Sheet No. 77

Great Lakes states that the proposed tariff sheet changes would produce increased revenues of \$12,000,000 based on sales and transportation volumes for the test year (twelve months ended December 31, 1974, as adjusted). The Company further states that the changes would

also establish a new base average cost of gas purchased for future Purchased Gas Adjustments.

Great Lakes states that the proposed rates reflect an increase in the rate of return to 10.75 percent, which includes a rate of return on equity of 16.00 percent, an increase in the depreciation rate on transmission plant from 3.75 percent to 4.65 percent and increases in other operating expenses. Great Lakes has requested an effective date of June 14, 1975, for the proposed increase.

Great Lakes also states that copies of this filing have been served upon its customers and the Public Service Commission of Michigan and Wisconsin.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before May 23, 1975. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,  
Secretary.

[FR Doc. 75-12884 Filed 5-15-75; 8:45 am]

[Docket No. E-7740]

#### INDIANA AND MICHIGAN ELECTRIC CO. Order Granting Motion in Part and Requiring the Payment of Refunds

MAY 9, 1975.

On June 13, 1972, Indiana and Michigan Electric Company (I&M) tendered for filing with the Commission a wholesale rate increase applicable to 23 municipal and cooperative customers. Of those customers, Richmond Power and Light (Richmond), Anderson, Indiana (Anderson) and a group of cooperatives (Cooperatives), filed motions to reject I&M's filing as it pertained to them, claiming their contracts with I&M prohibited unilateral changes in rates by I&M, referring to the Supreme Court's decisions in *Mobile-Sierra*.<sup>1</sup>

By order issued August 11, 1972, the Commission accepted I&M's proposed rate increase for filing, suspended its

<sup>1</sup> Indiana Statewide Rural Electric Cooperative, Inc. Fruit Belt Electric Cooperative, Inc. Jay County Rural Electric Membership Corporation, Noble County Rural Electric Membership Corporation, Paulding-Putnam Electric Cooperative, Inc., United Rural Electric Corporation, Wayne County Rural Electric Membership Corporation, and Whitley County Rural Electric Membership Corporation.

<sup>2</sup> United Gas Pipeline Co., v. Mobile Gas Service Corp., 350 U.S. 332 (1956); F.P.C. v. Sierra-Pacific Power Co., 350 U.S. 348 (1956).

effectiveness for five months, and established hearing procedures thereon. The Commission also denied the motions to reject, holding that the parties' agreements with I&M did not constitute fixed-rate contracts within the definition of *Mobile-Sierra*. The Commission, by order of October 6, 1972, denied the motions for rehearing filed by the three parties.

Richmond, Anderson and the Cooperatives each petitioned the Court of Appeals for the District of Columbia Circuit for review of the Commission's orders denying the motions to reject I&M's filing and the order denying rehearing. In *Richmond Power and Light Company v. F.P.C.*,<sup>3</sup> the Court held that I&M's contracts with Richmond and Anderson precluded I&M from filing a unilateral rate increase under section 205 and remanded those cases to the Commission with directions to reject I&M's filings for Richmond and Anderson.

The Commission, subsequent to a Supreme Court refusal to review the Richmond decision, filed with the Court of Appeals a motion requesting a remand to the Commission of the record of the Cooperatives' appeal so that we might review the Cooperative's contracts in light of the Richmond decision. Upon a remand, opportunity for all parties to file briefs, and a reconsideration of the subject contracts, we held that I&M's June 13, 1972 rate increase filing with respect to the Cooperatives was contractually impermissible under section 205 of the Federal Power Act. We therefore rejected I&M's filing under section 205 of the Act with respect to the Cooperatives and ordered refunds to be made to the Cooperatives of all amounts collected in excess of the rates effective at the time of the June 13, 1972 filing.<sup>4</sup>

Subsequent to our order denying rehearing of our June 3, 1974 order<sup>5</sup> I&M petitioned the U.S. Court of Appeals for the D.C. Circuit for review of those orders. That appeal is still pending.

On April 10, 1975, the Cooperatives filed a Motion for Enforcement Action with this Commission requesting the Commission to implement its powers under Sections 314, 315 and 316 of the Federal Power Act and enforce its order of June 13, 1974. In support of this motion the Cooperatives point out that I&M did not request of the Court or of the Commission a stay of the Commission's June 3, 1974 order and that the order therefore remained in effect and required I&M to make the appropriate refunds. I&M has not filed a response to the Cooperatives motion and has offered no justification for its failure to comply with this Commission's directive requiring the payment of refunds.

Because no stay of our June 3, 1974 order was obtained our orders in this proceeding remained in full force and effect

<sup>3</sup> 481 F.2d 490 (D.C. Cir. 1973).

<sup>4</sup> Order on Reconsideration, Docket No. E-7740, issued June 3, 1974.

<sup>5</sup> Order Denying Rehearing, Docket No. E-7740, issued August 2, 1974.

and were binding upon I&M. I&M therefore was required to refund to the Cooperatives all monies collected in excess of the rates in effect prior to June 13, 1972. We shall therefore grant the Cooperatives motion to the extent of requiring I&M, within twenty days of the issuance of this order, to refund to the Cooperatives all amounts collected in excess of the rates in effect prior to June 13, 1972. In the event I&M fails to make the required refunds within twenty days of the issuance of this order we shall take such further action as may be necessary under sections 314, 315 and 316 of the Federal Power Act to ensure compliance with this directive.

**The Commission finds.** (1) It is necessary and appropriate in carrying out the provisions of the Federal Power Act to grant the Cooperatives' motion by requiring I&M, within twenty days of the issuance of this order, to refund to the Cooperatives all amounts collected from the Cooperatives pursuant to the rates filed on June 13, 1972 in excess of the rates in effect prior to that date.

(2) In the event I&M fails to make refunds, as hereinafter ordered, within twenty days of the issuance of this order, we shall take such further action as may be necessary under sections 314, 315 and 316 of the Federal Power Act to ensure compliance with our order.

**The Commission orders.** (A) The Motion for Enforcement Action filed by the Cooperatives on April 10, 1975 is granted to the extent of requiring the payment of refunds by I&M.

(B) Within twenty days of the issuance of this order I&M shall refund with interest at 7 percent to the Cooperatives amounts collected pursuant to the June 13, 1972 filing which are in excess of the previously existing rates.

(C) The Secretary shall cause prompt publication of this order in the FEDERAL REGISTER.

By the Commission.

[SEAL] KENNETH F. PLUMB,  
Secretary.

[FR Doc. 75-12885 Filed 5-15-75; 8:45 am]

[Docket No. RP75-96]

#### MICHIGAN-WISCONSIN PIPE LINE CO. Proposed Rate Increase

MAY 8, 1975.

Take notice that on April 30, 1975, Michigan-Wisconsin Pipe Line Company, (MichWis), tendered for filing the following proposed changes in its FPC Gas Tariff:

SECOND REVISED VOLUME NO. 1

Tenth Revised Sheet No. 27F

FIRST REVISED VOLUME NO. 2

Sixth Revised Sheet Nos. 92, 110, 129, and 130

Fifth Revised Sheet Nos. 141, 142, and 171

Third Revised Sheet Nos. 214, and 215

Second Revised Sheet Nos. 231, 232, 297, 315, and 339  
First Revised Sheet Nos. 420, and 421

The proposed changes in rates, which will result in increased charges to jurisdictional customers in the amount of \$65,992,605 per year, are based on the test period ended January 31, 1975 with known and measurable changes through October 31, 1975. MichWis states that the reasons for the proposed increase are the following: a) Increased costs of capital which result in an overall rate of return requirement of 10.75%; b) Increased depreciation rates to obtain a timely recovery of its investment in its natural gas production, storage and transmission facilities and to provide some portion of the additional funds necessary to acquire and attach future additional gas supplies; c) Increased costs associated with the acquisition of gas supplies; d) Reduction in sales; and e) Increased cost of labor, supplies and other expenses of operation.

MichWis requests an effective date of June 1, 1975.

MichWis states that copies of its filing have been mailed to all its jurisdictional customers and all interested state commissions.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's rules of practice and procedure. All such petitions or protests should be filed on or before May 21, 1975. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,  
Secretary.

[Docket No. RP73-108]

#### PANHANDLE EASTERN PIPE LINE CO. Refund of Charges Pursuant to Settlement Agreement

MAY 8, 1975.

Take notice that Panhandle Eastern Pipe Line Company (Panhandle) on November 14, 1974, tendered for filing its Report of Refunds made to its jurisdictional customers on October 15, 1974, pursuant to Article II, Paragraph 3 of its agreement as to rates and related matters, dated July 29, 1974, which was approved by and made a part of the Commission's order issued August 30, 1974.

Panhandle states that each of its jurisdictional customers received a copy of the refund summary and their respective detail computations.

KENNETH F. PLUMB,  
Secretary.

[Docket No. RP74-39-8]

**TEXAS EASTERN TRANSMISSION CORP.  
(NORTH ALABAMA GAS DISTRICT)****Order Modifying Order Granting Extraordinary Relief and Denying Applications for Rehearing**

May 1, 1975.

Our order of February 26, 1975, granted extraordinary relief to the North Alabama Gas District (North Alabama) for the Cherokee, Alabama plant of United States Steel Corporation's Agri-Chemical Division (Ag-Chem) to supply Ag-Chem's continuing feedstock gas requirements and its process gas requirements for eighteen months, subject to certain volume limitations and use conditions. Applications for rehearing which question both our basic findings and the imposition of these special conditions have been filed by Ag-Chem and Algonquin Gas Transmission Corporation (Algonquin). North Alabama has applied for clarification or modification of the conditions attached to the relief grant. After further review of these pleadings and the complex circumstances here, we have determined that our basic conclusions are correct, but that the conditions and limitations should be amended to clarify the format for the provision of relief and the corresponding responsibilities of North Alabama and Ag-Chem.

**I. Basic findings.** At the Cherokee plant, Ag-Chem produces anhydrous ammonia by using natural gas for feedstock and as the process fuel that heats the primary reformer in which a catalytic reaction reforms the feedstock gas. Based on the expanded record after rehearing, we awarded continuing extraordinary relief for feedstock use but limited process relief to an eighteen month period, in which Ag-Chem can eliminate its process gas use by converting the reformer to oil. We concluded that "[t]he available evidence indicates that conversion is feasible." Where the record was incomplete, particularly on the question of economic feasibility, we refused to grant additional relief on the basis of speculation and resolved the conversion question against North Alabama and Ag-Chem, which had the burden of proving that relief was fully justified, and in favor of the other curtailed customers of TETCO, whose entitlements would be reduced further by the grant of full relief (Order at 13-14).

Ag-Chem has applied for rehearing of our finding on conversion feasibility, contending that this conclusion is unsupported by record evidence, based on an improper decisional standard, and the result of an unlawful imposition of the burden of proof upon the petitioner. Ag-Chem argues that the current TETCO curtailment plan, which conforms to our Statement of Policy in Order No. 467-B,<sup>1</sup> was illegally imposed upon TETCO by the Commission, after the previous pro-rata curtailment plan

<sup>1</sup> Utilization and Conservation of Natural Resources—Natural Gas Act, Docket No. R-469, 49 FFC 583 (1973).

had been approved as in the public interest. It therefore follows, according to Ag-Chem, that we have made this one customer suffer the burden of an illegal tariff, by imposing on it the burden of proof in this proceeding. It is suggested that, at most, North Alabama and Ag-Chem should have been allocated only the burden of going forward with the presentation of evidence.

Moreover, we have allegedly applied an improper standard to decide the conversion issue by giving "great weight" to three "non-economic" factors: the general gas shortage, the existing level of curtailment, and the end use priority of the customers to be affected by a grant of relief (Order at 13). The first two factors are assertedly irrelevant, since they provide no basis to distinguish among petitioners. By considering the last factor, Ag-Chem suggests that the Commission has given impermissible weight to Order No. 467-B, a mere "Statement of Policy" which is not supported by any specific evidence in this case. Finally, Ag-Chem contends that the record evidence, when measured by a proper standard of feasibility, proves that conversion is infeasible.

Our finding, that process conversion is feasible, was properly and correctly reasoned from the record evidence and will not be modified. Since the evidentiary record in an extraordinary relief proceeding is often poorly detailed or somewhat inconclusive, it is necessary to establish clearly where the burden of persuasion falls. It would be unreasonable and impractical to place that burden on the supplying pipeline or the Commission staff, rather than on the petitioner, which alone has full access to significant information and originally alleged that relief should be provided because of extraordinary circumstances involving its individual operations. Ag-Chem's specific argument is rejected as an untimely attempt to collaterally attack a previous order. If there was any merit in Ag-Chem's suggestion that the current TETCO curtailment plan is an unlawful tariff amendment, a different result would not be required; the operation of TETCO's curtailment plan was never an issue in this proceeding. North Alabama has argued simply that a certain volume of gas should be delivered to Ag-Chem, without regard to any level of industrial curtailment under any plan; there has been no suggestion that relief is required because Ag-Chem has been injured by the use of an end use curtailment plan in place of a pro-rata plan.

Conversion of the primary reformer will reduce Ag-Chem's gas requirements significantly without reducing its production capacity. The record showed that process conversion can be achieved, but at substantial expense and with some difficulty and a resulting loss of efficiency. In reaching our conclusion that conversion is feasible here, we weighed four material factors: the engineering evidence that conversion is technically possible; the general gas shortage and

the level of curtailment on the TETCO system, which are so severe that relief can be awarded only if there is no other alternative; the Category 2 service priority of the other customers to be affected by a grant of relief, which reflects the fact that those customers cannot use alternate fuels to replace the relief volumes diverted to Ag-Chem; and finally the limited economic evidence, which did not support a finding that the actual costs of conversion are unreasonable, or that the operation of the plant after conversion is economically infeasible.

While the general gas shortage, and the existing level of curtailment, or stated differently, the service priority of the affected customers, are factors which do not distinguish various relief petitions, they are relevant considerations in determining whether relief, which is sufficient to eliminate a particularly onerous conversion burden, can be awarded to one petitioner. Relief might be granted where conversion is not absolutely infeasible, if the supplying pipeline projects only short term, limited curtailments of service, or if the classification of the affected customers reflects their existing ability to use alternate fuels.

Algonquin has applied for rehearing of that portion of the order (footnote 4 at page 9) where we refused to deny or reduce relief on the basis of allegations in Algonquin's pleading that Ag-Chem spurned Algonquin's offer of SNG, apparently due to the high price. We again will not modify this complex decision because of this single unsubstantiated allegation. Furthermore, the revision of the conditions to relief, ordered here, should satisfy Algonquin, if its objections are motivated by a genuine concern that the original conditions removed any incentive to the acquisition by Ag-Chem of high priced intrastate gas or supplemental supplies to replace relief volumes from TETCO.

**II. Limitations and conditions to relief.** North Alabama has sought a nearly complete exemption from curtailment by TETCO. Since its service is classified in the Category 2 service priority, these very substantial relief volumes can be provided only through the creation of a special service priority, between Category 1 and 2, which will continue significantly large daily deliveries to Ag-Chem when TETCO is heavily or completely curtailing service for the highest priority industrial uses and for storage injection that protects peak day residential service. While recognizing the continuing need for fertilizer production, we concluded that an outright relief award in these circumstances would not be consistent with the general public interest and our statutory responsibilities. We were able to justify an award of relief only by carefully limiting deliveries, and by clearly requiring Ag-Chem to shoulder its corresponding responsibilities, including the reduction of its long term relief requirements. Accordingly, our order of

February 26, 1975, set absolute limitations and prohibitions on TETCO's deliveries and Ag-Chem's use of natural gas, when other fuels can be utilized.

After further consideration, we have determined that these conditions should be clarified to emphasize our primary concern, that relief be taken only when absolutely necessary and paid back promptly, and also should be modified to allow Ag-Chem greater flexibility in fulfilling its fuel requirements for full production. The order of February 26, 1975, as revised herein, contains the most generous terms under which we can permit the delivery of extraordinary relief volumes. If North Alabama and Ag-Chem are unwilling to comply with these necessary limitations, then they may simply reject this offer of relief and take their curtailed contractual entitlement from TETCO.

**A. Volumetric limitations.** Previously, we limited North Alabama's daily delivery from TETCO to the minimum, pro-rata volume necessary to meet Ag-Chem's indispensable gas requirements—feedstock gas permanently and process gas for eighteen months. Ag-Chem suggests that a pro-rata limitation is not necessary to protect the public interest. North Alabama argues that this limitation constitutes an abandonment pro tanto without compliance with section 7 of the Natural Gas Act. Since it was never our intent to permanently and absolutely reduce North Alabama's curtailment entitlement, we will adjust ordering paragraph (C) as necessary.

TETCO shall continue to provide its pro-rata share of the total minimum volume of gas needed to fuel Ag-Chem's indispensable requirements. The actual relief volumes, the amount by which North Alabama's ordinary curtailed entitlement under TETCO's effective curtailment plan is lower than the volume actually delivered, will be added to North Alabama's accruing payback obligation. North Alabama will also be permitted to take any excess amounts of gas, by which its curtailed contractual entitlement from TETCO exceeds the pro-rata share of the indispensably required volumes delivered ordinarily by TETCO under this grant. But, these "excess volumes" must be used in a manner consistent with the extraordinary nature of this relief award. Any gas taken from TETCO, which could be feasibly replaced by alternate fuels, must be applied to reduce any outstanding payback obligation and to replace relief from other suppliers, before this gas is actually used to fuel convertible processes.<sup>2</sup>

<sup>2</sup> When relief from TETCO's curtailment was granted, we designed these conditions to track with other possible relief awards, since Ag-Chem's other suppliers were then curtailing deliveries to the Cherokee plant. Ag-Chem and North Alabama have filed petitions for relief from curtailment by Alabama-Tennessee Gas Transmission Company (Alabama-Tennessee) and Tennessee Gas Transmission Company (Tennessee) which are being reviewed. This order should not be interpreted as a prejudgment of those petitions, or as a preliminary statement that further relief is actually necessary or justified on those systems.

These provisions are clearly reasonable; Ag-Chem, through North Alabama, is required merely to subordinate any unnecessary use of the TETCO gas in order to meet its overriding obligations—the prompt payback of relief volumes received previously for indispensable uses and the reduction of all relief takes whenever possible. They are necessary first, to avoid the diversion of gas from similar high priority customers of TETCO to remedy curtailments imposed by Ag-Chem's other suppliers, and also, to prevent the unnecessary use of gas in convertible processes while relief is being taken from other sources and past relief takes have not been paid back. No abandonment of service will result from the imposition of these temporary restrictions, which will be effective only when Ag-Chem's payback obligation has not been discharged.

Finally, the actual figures setting the maximum limitations on TETCO deliveries for indispensable uses will be increased slightly to reflect the different pressure base used on the Alabama-Tennessee system to measure contract volumes. 5,000 Mcf at 14.73 psia, the daily contract volume delivered by Alabama-Tennessee at that pressure base, is equivalent to 4,902 Mcf at 15.05 psia, the measurement pressure base of the Tennessee and TETCO systems. Therefore, the volumetric limitations in ordering paragraph (C) (1) have been recalculated using 21,702 Mcf/d, rather than 21,800 Mcf, as the total contract volume which is the basis for the ratios described in the original order (at 16).

**B. Use Prohibition.** Extraordinary relief was granted upon condition that Ag-Chem agrees to use gas "from any source" only for feedstock, and as process fuel for eighteen months (ordering paragraph (D), subparagraphs (1), (2) and (4), at 18). Ag-Chem contends that imposition of this condition is beyond our statutory authority, "grossly unfair and unduly discriminatory", and violative of the National Environmental Policy Act (NEPA) since an environmental impact statement has not been prepared and considered. North Alabama's application, which makes similar arguments, emphasizes the possible negative effect of these conditions on its financial condition and its ability to serve its other customers. If Ag-Chem violates the terms of the relief grant, TETCO must cease all deliveries to Ag-Chem, through North Alabama—the "innocent bystander". Algonquin, in its motion for clarification or supplemental application for rehearing, expresses its concerns that our order does not clearly require Ag-Chem to minimize its relief takes by developing new sources of gas or supplemental supplies and may actively discourage the acquisition of new supplies of gas.

These conditions were designed to accomplish two things in a simple direct manner. By prohibiting the use of gas from any source, we clearly established both Ag-Chem's paramount obligation to reduce its very large relief requirements through process conversion, and our intent to forestall later petitions for additional process relief, assertedly

based on the public interest in maximum fertilizer production, but actually required because Ag-Chem had not acted diligently to lessen gas consumption. Since any condition requiring prudent or diligent efforts to replace relief volumes, through development of alternate fuel supplies, would be difficult to enforce, we attempted further to assure that one alternate fuel, oil, would have to be used in convertible processes, while we guaranteed sufficient gas for feedstock use where oil cannot be substituted. After further study, these conditions appear to be deficient in two respects. They do not permit the resumption of Ag-Chem's historical use of gas once the present supply emergency is ended. Also, while the original relief grant encourages process conversion to oil, it discourages the acquisition of new supplies to replace the substantial relief volumes guaranteed for feedstock use.

We will apply an absolute prohibition on the use of gas in convertible processes only to actual relief volumes delivered to the Cherokee plant. Ag-Chem will be permitted to use newly acquired volumes of natural gas and supplemental supplies in any manner. However, while relief volumes are taken or an accrued payback obligation remains outstanding, Ag-Chem's current suppliers will reduce their deliveries and thereby eliminate relief or accelerate payback, whenever new supplies are available to Ag-Chem which can be used to fulfill Ag-Chem's indispensable requirements. Certainly, this displacement requirement is reasonable and necessary; it would be grossly inequitable to allow Ag-Chem to burn natural gas, SNG, LNG and propane in its convertible primary reformer or in the converted dryers and boilers, at the same time that relief gas or volumes which could be paid back are taken for feedstock use. Once the need for relief ends and Ag-Chem's payback obligation has been discharged, these necessary restrictions will no longer be effective.

These revised conditions will apply to all new sources of gaseous fuels "available to Ag-Chem", and not merely to those supplies which Ag-Chem receives in fact. We expect and require that Ag-Chem will apply its "best efforts" to develop and acquire new sources of intrastate and interstate gas and supplemental supplies. If it is shown convincingly that Ag-Chem has not acted diligently, upon our own investigation or after a specific complaint, then we will reevaluate this relief grant and take any necessary action. At the same time, our actions here should not be interpreted as an invitation to other parties to relitigate this proceeding, or to employ this Commission as a broker arranging individual sales.

There is no basis for a jurisdictional challenge to this revised relief award, for the one, absolute, use prohibition applies only to actual relief volumes, which are totally within our discretionary control. The other temporary limitations are unusual, but not unfair or discriminatory. These conditions are necessitated by the unusual circumstances here. Substantial volumes of relief gas are to be delivered

specially, under a high priority service category, to a plant where the use of process gas can be eliminated.

A statement on the environmental impact of this order is not required by NEPA. Even if it is assumed that conversion of Ag-Chem's primary reformer will significantly affect the human environment, conversion to oil will be required by market forces and the general fuel supply crisis, and not by our action in conditioning and limiting this award so that the grant of extraordinary relief can be justified here. If North Alabama and Ag-Chem are unwilling to accept conditioned relief, they may reject this offer and continue to receive the normal entitlement under TETCO's interim curtailment plan. Certain temporary limitations have been placed on the delivery of interstate gas to Ag-Chem; but Ag-Chem and North Alabama retain the additional options of acquiring new supplies of gaseous fuel or of adjusting production schedule, so that conversion can be avoided. We intend to comply with the requirements of NEPA "to the fullest extent possible" in directing the preparation of impact statements on the operation of permanent curtailment plans; but we concur in the statement that this requirement of NEPA should not be used as "a weapon for disappointed parties". *State of Louisiana v. F.P.C.*, 503 F.2d 499, 857 (5th Cir. 1974); *Calvert Cliffs Coordinating Committee v. A.E.C.*, 449 F.2d 1109 (D.C. Cir. 1971).

Finally, we shall modify the conditions on relief that protect Category One service and require submission of compliance statements by North Alabama and Ag-Chem. In requiring the cessation of deliveries to Ag-Chem when Category One service is curtailed by TETCO, the condition established in Order No. 716-E, issued April 18, 1974 in Docket No. RP74-39-3, Texas Eastern Transmission Corporation (Carnegie Natural Gas Company) will be applied here. North Alabama shall submit the ordered compliance statements within ninety days or promptly reject the grant; but this requirement is not intended to interfere with any lawful appeal from this order.

The Commission further finds. (A) Sufficient good cause exists to modify our order of February 26, 1975, in this docket, as hereafter ordered.

(B) The assignments of error and grounds for rehearing set forth in the petitions of Ag-Chem, North Alabama, and Algonquin present no facts or legal principles that warrant any changes in the order of February 26, 1975, in this docket, except as hereafter ordered.

The Commission orders. (A) The applications for rehearing filed by Ag-Chem, North Alabama and Algonquin are hereby denied, in part, and granted as hereafter ordered.

(B) Ordering paragraphs (C) and (D) in the order of February 26, 1975, in this docket are hereby amended as follows.

(C) (1) TETCO shall deliver the following daily volumes of gas to North Alabama for delivery to Ag-Chem:

(a) before May 1, 1975, the absolute minimum volume of gas necessary for use by Ag-Chem as feedstock and process fuel so that Ag-Chem can produce the maximum output of ammonia achievable on that day or 14,800 Mcf, whichever volume is smaller; and

(b) from May 1, 1975, through August 31, 1976, the absolute minimum volume of gas necessary for use by Ag-Chem as feedstock and process fuel so that Ag-Chem can produce the maximum output of ammonia achievable on that day or 12,017 Mcf, whichever volume is smaller; and

(c) on and after September 1, 1976, the absolute minimum volume of gas necessary for use by Ag-Chem as feedstock so that Ag-Chem can produce the maximum output of ammonia achievable on that day or 7,211 Mcf, whichever volume is smaller.

(C) (2) On any day when North Alabama's entitlement under TETCO's then effective curtailment plan exceeds the volume to be delivered under ordering paragraph (C) (1), then TETCO shall also deliver the additional volume of gas by which North Alabama's full entitlement exceeds the volume which already will be delivered under ordering paragraph (C) (1), provided that this additional volume will be used in the following manner:

(a) First, paid back to TETCO until all relief volumes taken from TETCO have been paid back; and then

(b) second, delivered to Ag-Chem, only to displace any relief volumes being taken by Ag-Chem on that day from Tennessee through North Alabama and then from Alabama-Tennessee directly; and then

(c) third, delivered to Ag-Chem only to displace volumes to be paid back to Tennessee and then Alabama-Tennessee, until all relief volumes taken from Tennessee and Alabama-Tennessee have been paid back; and then

(d) fourth, delivered to Ag-Chem outright.

(D) Extraordinary relief is granted upon the condition that:

(1) The relief volumes from TETCO—the volume delivered under ordering paragraph (C) (1) less North Alabama's entitlement under TETCO's then effective curtailment plan—shall be taken by North Alabama only if those volumes are used in the following manner:

(a) before September 1, 1976, for feedstock and process use; and

(b) on and after September 1, 1976, for feedstock alone;

(2) On any day, the relief volumes to be provided by Ag-Chem's three current interstate suppliers shall be reduced in pro-rata amounts, first by the volumes of interstate gas and the new volumes of interstate gas other than the existing total contractual entitlement of 21,702 Mcf/d, available for Ag-Chem's use on that day, and second by the BTU equivalent of any SNG, LNG or propane available for Ag-Chem's use on that day;

(3) Until all relief volumes previously taken by Ag-Chem have been paid back,

on any day, the volumes available to North Alabama under ordering paragraphs (C) (1) and (C) (2) shall be reduced first by the volumes of intrastate gas and the new volumes of interstate gas other than the existing total contractual entitlement of 21,702 Mcf/d, available for Ag-Chem's use on that day, and second by the BTU equivalent of any SNG, LNG or propane available for Ag-Chem's use on that day, but only to the extent that these available amounts of intrastate gas, interstate gas and SNG, LNG, or propane have not been used to displace relief volumes under ordering paragraph (D) (2). The amount of this reduction shall be applied to reduce the outstanding payback obligation;

(4) North Alabama shall file quarterly reports with the Commission giving all relevant information concerning Ag-Chem's daily use of gas and alternate fuels, the actual operation of this relief grant, and Ag-Chem's efforts to acquire and use other sources of gas and alternate fuels. The information supplied shall include but is not limited to the following data:

(a) the daily and monthly volumes of gas taken from every intrastate and interstate source by Ag-Chem, and by North Alabama for redelivery to Ag-Chem;

(b) the daily and monthly volumes of relief gas taken from every source by Ag-Chem and by North Alabama for redelivery to Ag-Chem, the total volumes of relief gas which have been paid back to each supplier of relief during that month, and the total outstanding volume of relief gas from each supplier that has been taken but not paid back;

(c) the daily and monthly amounts of interstate gas, intrastate gas, and supplemental supplies (LNG, SNG, or propane) available to Ag-Chem but not taken or used by Ag-Chem on each day;

(d) for each day, the reasons justifying the particular volumes of gas taken from TETCO on that day, under the terms of this order.

(e) a detailed description of all successful and unsuccessful efforts taken by Ag-Chem to convert its operations to alternate fuels, to acquire supplies of natural gas, SNG, LNG, and propane, and to reduce its need for extraordinary relief;

(5) TETCO shall unilaterally discontinue Ag-Chem's relief volumes if and when TETCO's systemwide deliveries under the curtailment plan for Category I end-use are less than the aggregate of TETCO's proportionate share of its customers' Category I requirements, as identified in TETCO's existing end-use data;

(6) Within ninety days after issuance of this order North Alabama shall file with this Commission notarized statements signed by the chief executive officers of North Alabama and Ag-Chem which set forth the conditions and limitations contained in this order and the Chem to abide by the terms of these conditions and limitations, except to the extent that these terms may later be

modified by order of a competent reviewing court.

By the Commission.

[Docket No. RM75-16]

# REVISION OF PROCEDURE FOR THE ISSUANCE OF SECURITIES

## Notice of Public Meeting

May 9, 1975.

Pursuant to § 1.3 of the Commission's rules of practice and procedure (18 C.F.R. § 1.3), notice is hereby given that a public conference shall be convened on May 27 and 28, 1975, at the office of the Federal Power Commission, 825 North Capitol Street, NE., Washington, D.C. 20426 at 10 a.m. This conference is held under authority of the Commission's notice of proposed rulemaking issued in this docket on January 20, 1975, which stated that the "Staff, in its discretion, may grant or deny requests for conference". Of the sixteen (16) comments received in response to the notice of rulemaking, five (5) of the respondents requested that a conference be convened. The Staff has determined that such a conference is an appropriate forum for a discussion of relevant issues relating to the subject of the proposed rulemaking.

At the outset, we note explicitly that it is not the purpose of this conference for participants to engage in debate regarding the proposition of whether or not competitive bidding procedures provide advantages which are superior to those obtainable through negotiated underwritings. Rather, the purpose of this conference will be to discuss the proposed procedures enunciated in Docket No. RM75-16, and in the alternative to discuss any procedures that the participants would suggest which would aid the Commission in fulfilling its statutory responsibilities. All interested parties are requested to be prepared to discuss the issues in accordance with the agenda attached to this notice.

The conference is open to members of the general public who upon recognition by the Chairman of the conference, Daniel C. Lamke of the Commission Staff, may offer comments as to the relevant issues under discussion. This conference on relevant issues relating to RM 75-16 shall be of record. Parties desiring to place written presentations into the record should provide the Staff with at least one original and nine copies of such submission.

KENNETH F. PLUMB,  
Secretary.

### PRELIMINARY AGENDA

#### FEDERAL POWER COMMISSION STAFF CONFERENCE ON RELEVANT ISSUES

Revision of Procedure For The Issuance of Securities, Docket No. RM75-16, To Be Held at Federal Power Commission, 825 North Capitol Street NE., Washington, D.C. 20426, May 27 and 28, 1975

Presiding: Daniel C. Lamke, Office of the  
General Counsel, Federal Power Commission.

Tuesday, May 20, 1975

10 a.m., Opening of conference, Daniel C. Lamke, presiding  
10:15, Procedures for conference announced, Registration for oral presentation  
10:45, General statements \* by interested parties, recognized by conference Chairman

## FEDERAL RESERVE SYSTEM

### CLINTON BANCSHARES, INC.

#### Order Approving Formation of Bank Holding Company

Clinton Bancshares, Inc., Clinton, Oklahoma, has applied for the Board's approval under section 3(a)(1) of the Bank Holding Company Act (12 U.S.C. 1842(a)(1)) of formation of a bank holding company through acquisition of 80 percent or more of the voting shares of First National Bank in Clinton, Clinton, Oklahoma ("Bank").

Notice of the application, affording opportunity for interested persons to submit comments and views, has been given in accordance with section 3(b) of the Act. The time for filing comments and views has expired, and the Board has considered the application and all comments received in light of the factors set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

Applicant is a recently-organized corporation formed for the purpose of becoming a bank holding company through the acquisition of Bank. The proposed transaction involves the transfer of control of Bank from individuals to a corporation owned by the same individuals. Bank holds deposits of approximately \$15.3 million, representing 12.4 percent of the total deposits in commercial banks in the relevant market, and ranks as the second largest of 14 banks operating in the market. Upon acquisition of Bank, Applicant would control less than two-tenths of one percent of total deposits in commercial banks in Oklahoma. Since the transaction is essentially a reorganization of Bank's ownership and Applicant presently has no subsidiaries, it appears that consummation of the proposal would not eliminate significant existing

\* All banking data are as of June 30, 1974.

\* The relevant geographic market is approximated by all of Custer County and the northern half of Washita County in Oklahoma.

or potential competition, or have an adverse effect on other area banks. Therefore, the Board concludes that competitive considerations are consistent with approval of the application.

The financial and managerial resources and future prospects of Applicant, which will depend upon those of Bank, are regarded as satisfactory. Applicant proposes to service the debt it will assume incident to this proposal over a 12 year period primarily through dividends from Bank. In light of Bank's past earnings and its anticipated growth, it appears that the projected earnings of Bank will provide Applicant with the necessary financial flexibility to meet its annual debt servicing requirements while maintaining an adequate capital position for Bank. Thus, considerations relating to banking factors are consistent with approval of the application. Although consummation of the proposal would effect no changes in the services offered by Bank, considerations relating to the convenience and needs of the community to be served are consistent with approval of the application. It is the Board's judgment that the proposed transaction would be consistent with the public interest and that the application should be approved.

On the basis of the record, the application is approved for the reasons summarized above. The transaction shall not be made (a) before the thirtieth calendar day following the effective date of this order or (b) later than three months after the effective date of this order, unless such period is extended for good cause by the Board or by the Federal Reserve Bank of Kansas City pursuant to delegated authority.

By order of the Board of Governors,  
effective May 9, 1975.

[SEAL] GRIFFITH L. GARWOOD,  
Assistant Secretary  
of the Board.

[FR Doc. 75-12898 Filed 5-15-75; 8:45 am]

## FIRST BANCORP, INC.

### Acquisition of Bank

First Bancorp, Inc., Corsicana, Texas, has applied for the Board's approval under section 3(a)(3) of the Bank Holding Company Act (12 U.S.C. 1842(a)(3)) to acquire 100 percent (less directors' qualifying shares) of the voting shares of First National Bank, Kaufman, Texas, a proposed new bank. The factors that are considered in acting on the application are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

The application may be inspected at the office of the Board of Governors or at the Federal Reserve Bank of Dallas. Any person wishing to comment on the application should submit views in writing to the Reserve Bank to be received not later than May 30, 1975.

\* Voting for this action: Chairman Burns and Governors Mitchell, Bucher, and Holland. Absent and not voting: Governors Sheehan, Wallach and Coldwell.

Board of Governors of the Federal Reserve System, May 12, 1975.

[SEAL] ROBERT SMITH, III,  
Assistant Secretary  
of the Board.  
[FR Doc. 75-12893 Filed 5-15-75; 8:45 am]

#### FIRST UNION, INC. Acquisition of Bank

First Union, Incorporated, St. Louis, Missouri, has applied for the Board's approval under section 3(a)(3) of the Bank Holding Company Act (12 U.S.C. 1842(a)(3)) to acquire 90 percent or more of the voting shares of First National Bank of St. Peters, St. Peters, Missouri. The factors that are considered in acting on the application are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

The application may be inspected at the office of the Board of Governors or at the Federal Reserve Bank of St. Louis. Any person wishing to comment on the application should submit views in writing to the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551, to be received not later than June 10, 1975.

Board of Governors of the Federal Reserve System, May 9, 1975.

#### FOB, CORP.

##### Formation of Bank Holding Company

FOB, Corp., Belleville, Illinois, has applied for the Board's approval under section 3(a)(1) of the Bank Holding Company Act (12 U.S.C. 1842(a)(1)) to become a bank holding company through acquisition of all of the voting shares of First National Bank of Belleville, Belleville, Illinois. The factors that are considered in acting on the application are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

FOB, Corp., Belleville, Illinois has also applied, pursuant to section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and section 225.4(b)(2) of the Board's Regulation Y, for permission to acquire voting shares of Illinois State Trust Company, East St. Louis, Illinois. Notice of the application was published on April 6, 1975 in the Metro-East Journal, a newspaper circulated in East St. Louis, Illinois and on April 7, 1975, in the Belleville News-Democrat, a newspaper circulated in Belleville, Illinois.

Applicant states that the proposed subsidiary would engage in the activities of: performing or carrying on any one or more of the functions or activities that may be performed or carried on by a trust company, including activities of a fiduciary, agency or custodial nature, including the administration of Decedent's Estates, Trusts under Wills, Trusts under Agreements, Agencies, Escrow Agencies,

Guardianships, Conservatorships, Stock Transfer Services, Paying Agent Services, Investment Services and all other activities incidental thereto. Such activities have been specified by the Board in section 225.4(a) of Regulation Y as permissible for bank holding companies, subject to Board approval of individual proposals in accordance with the procedures of section 225.4(b).

Interested persons may express their views on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question should be accompanied by a statement summarizing the evidence the person requesting the hearing proposes to submit or to elicit at the hearing and a statement of the reasons why this matter should not be resolved without a hearing.

The application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank of Chicago.

Any views or requests for hearing should be submitted in writing and received by the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551, not later than June 9, 1975.

Board of Governors of the Federal Reserve System, May 8, 1975.

[SEAL] ROBERT SMITH, III,  
Assistant Secretary  
of the Board.

[FR Doc. 75-12899 Filed 5-15-75; 8:45 am]

#### MICHIGAN NATIONAL CORPORATION Acquisition of Bank

Michigan National Corporation, Bloomfield Hills, Michigan, has applied for the Board's approval under section 3(a)(3) of the Bank Holding Company Act (12 U.S.C. 1842(a)(3)) to acquire 100 percent of the voting shares (less director's qualifying shares) of Michigan National Bank-Grand Traverse, Traverse City, Michigan, a proposed new bank. The factors that are considered in acting on the application are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

The application may be inspected at the office of the Board of Governors or at the Federal Reserve Bank of Chicago. Any person wishing to comment on the application should submit views in writing to the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551, to be received not later than June 9, 1975.

Board of Governors of the Federal Reserve System, May 8, 1975.

[SEAL] ROBERT SMITH, III,  
Assistant Secretary  
of the Board.

[FR Doc. 75-12900 Filed 5-15-75; 8:45 am]

#### PADGETT AGENCY, INC.

##### Formation of Bank Holding Company

Padgett Agency, Inc., Greenleaf, Kansas, has applied for the Board's approval under section 3(a)(1) of the Bank Holding Company Act (12 U.S.C. 1842(a)(1)) to become a bank holding company through acquisition of 91.67 percent of the voting shares of Citizens National Bank, Greenleaf, Kansas. The factors that are considered in acting on the application are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

Padgett Agency, Inc., Greenleaf, Kansas, has also applied, pursuant to section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.4(b)(2) of the Board's Regulation Y, for permission to retain voting shares of Padgett Insurance Agency, Greenleaf, Kansas. Notice of the application was published on May 1, 1975 in The Greenleaf Sentinel, a newspaper circulated in Washington County, Kansas.

Applicant states that the proposed subsidiary would engage in the activities of a general insurance agency operating in a community with a population of less than 5,000 people. Such activities have been specified by the Board in section 225.4(a) of Regulation Y as permissible for bank holding companies, subject to Board approval of individual proposals in accordance with the procedures of section 225.4(b).

Interested persons may express their views on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question should be accompanied by a statement summarizing the evidence the person requesting the hearing proposes to submit or to elicit at the hearing and a statement of the reasons why this matter should not be resolved without a hearing.

The application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank of Kansas City.

Any views or requests for hearing should be submitted in writing and received by the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551, not later than May 30, 1975.

Board of Governors of the Federal Reserve System, May 9, 1975.

[SEAL] ROBERT SMITH, III,  
Assistant Secretary  
of the Board.

[FR Doc. 75-12901 Filed 5-15-75; 8:45 am]

#### WESTLAND BANKS, INC.

##### Order Approving Acquisition of Bank

Westland Banks, Inc., Lakewood, Colorado, a bank holding company within the

meaning of the Bank Holding Company Act, has applied for the Board's approval under section 3(a)(3) to acquire 100 percent of the voting shares (less directors' qualifying shares) of Castle Rock National Bank, Castle Rock, Colorado, a proposed new bank.

Notice of the application, affording opportunity for interested persons to submit comments and views, has been given in accordance with section 3(b) of the Act. The time for filing comments and views has expired, and the Board has considered the application and all comments received in light of the factors set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

Applicant, the ninth largest banking organization in Colorado, controls six banks with aggregate deposits of about \$73.3 million, representing approximately 1.1 percent of the total deposits in commercial banks in the State of Colorado.<sup>1</sup> Since Bank is a proposed new bank, consummation of the proposed acquisition would not immediately increase Applicant's share of commercial bank deposits in the State and therefore would not immediately result in an increase in the concentration of banking resources in Colorado.

Bank is to be located in Castle Rock, a long established community thirty miles south of the central business district of Denver. Applicant has no current interests in the Castle Rock market area.<sup>2</sup> Since Bank is a new bank, consummation of the proposal would not eliminate any existing competition. Nor does it appear that the transaction would have adverse effects on the development of competition in the future. Accordingly, competitive considerations are regarded by the Board as being consistent with approval of the application.

The financial and managerial resources and future prospects of Applicant and its subsidiaries are regarded as generally satisfactory. Bank, as a proposed new bank, has no financial or operating history; however, its prospects as a subsidiary of Applicant appear favorable. These considerations relating to the banking factors are consistent with approval of the application.

The addition of a new banking alternative to the Castle Rock area should provide greater banking convenience for the residents of the area. Therefore, considerations relating to the convenience and needs of the community to be served lend weight toward approval of the application. It is the Board's judgment that the proposed acquisition would be in the public interest and that the application should be approved.

On the basis of the record, the application is approved for the reasons summarized above. The transaction shall not

<sup>1</sup> All banking data are as of June 30, 1974, and reflect bank holding company formations and acquisitions approved through November 30, 1974.

<sup>2</sup> The Castle Rock market area is defined as Douglas County and the western portion of Elbert County.

be made (a) before the thirtieth calendar day following the effective date of this Order or (b) later than three months after that date, and (c) Castle Rock National Bank, Castle Rock, Colorado, shall be opened for business not later than six months after the effective date of this Order. Each of the periods described in (b) and (c) may be extended for good cause by the Board or by the Federal Reserve Bank of Kansas City pursuant to delegated authority.

By order of the Board of Governors, effective May 7, 1975.

[SEAL] GRIFFITH L. GARWOOD,  
Assistant Secretary  
of the Board.

[FR Doc. 75-12902 Filed 5-15-75; 8:45 am]

#### WESTLAND BANKS, INC.

##### Order Approving Acquisition of Bank

Westland Banks, Inc., Lakewood, Colorado, a bank holding company within the meaning of the Bank Holding Company Act, has applied for the Board's approval under section 3(a)(3) of the Act (12 U.S.C. 1842(a)(3)) to acquire 100 percent of the voting shares (less directors' qualifying shares) of Gunbarrel National Bank, Boulder, Colorado, a proposed new bank.

Notice of the application, affording opportunity for interested persons to submit comments and views, has been given in accordance with section 3(b) of the Act. The time for filing comments and views has expired, and the Board has considered the application and all comments received, including those submitted on behalf of Bank of Boulder, Boulder, Colorado ("Protestant"), in light of the factors set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

Applicant, the ninth largest banking organization in Colorado, controls six banks with aggregate deposits of about \$73.3 million, representing approximately 1.1 percent of the total deposits in commercial banks in the State of Colorado.<sup>1</sup> Since Bank is a proposed new bank, consummation of the proposed acquisition would not immediately increase Applicant's share of commercial bank deposits in the State.

Bank is to be located in Gunbarrel, a suburban area three miles northeast of Boulder, Colorado.<sup>2</sup> Applicant is the eighth largest banking organization in the Boulder banking market (the relevant market), with two subsidiary banks controlling about 2.4 percent of the total market deposits.<sup>3</sup> Since Bank is a new

<sup>1</sup> Voting for this action: Chairman Burns and Governors Mitchell, Sheehan, Bucher, Holland, and Wallich. Absent and not voting: Governor Coldwell.

<sup>2</sup> All banking data are as of June 30, 1974, and reflect bank holding company formations and acquisitions approved through November 30, 1974.

<sup>3</sup> The Comptroller of the Currency has granted preliminary charter approval for Bank.

bank, consummation of the proposal would not eliminate any existing competition. Nor does it appear that the transaction would have adverse effects on the development of competition in the future. Accordingly, competitive considerations are regarded by the Board as being consistent with approval of the application.

The financial and managerial resources and future prospects of Applicant and its subsidiaries are regarded as generally satisfactory. Bank, as a proposed new bank, has no financial or operating history; however, its future prospects as a subsidiary of Applicant appear favorable. These considerations relating to the banking factors are consistent with approval of the application.

In its consideration of the subject application, the Board has considered the comments submitted on behalf of Protestant, a bank located 3.8 miles from the proposed site of Bank. Protestant, the ninth largest bank in the market, contends generally that the economy of the area to be served by Bank will not support an additional bank and, since the proposed service area of Bank is substantially similar to that served by Protestant, the establishment of Bank would have an adverse impact on Protestant. The Board is of the view that the record, including the submissions by Protestant, does not warrant denial of the application.

The Boulder market area has been one of the fastest growing areas in the State, as reflected in a population growth of about 78 percent during the past decade. Moreover, based on projections, it is reasonable to conclude that the area's population growth will continue to surpass the rate of growth for the State as a whole. While the level of economic activity in the area may have slowed recently, the Board is of the view that the population and the prospects for growth in the area are favorable and indicate that the market could support an additional banking alternative. Furthermore, although the introduction of a new bank into the market may moderate Protestant's rate of growth, the Board is unable to conclude that the establishment of Bank by Applicant, which does not occupy a significant position in the market, would have an adverse impact on Protestant's overall prospects.

On the other hand, it appears the proposal would result in benefits to the convenience and needs of the community. At the present time, there are no banks in the city of Gunbarrel, and the area to be served by Bank contains approximately 100 businesses. This proposal would result in an additional and a more convenient source of full banking services to the businesses and residents of the area. Accordingly, the Board concludes that convenience and needs considerations lend weight toward approval

<sup>3</sup> The Boulder market area is defined as Boulder County excluding the Bloomfield area and including the Erie area in the southwestern corner of Weld County.

#### FEDERAL TRADE COMMISSION

##### LINE OF BUSINESS REPORTING PROGRAM

##### Confidentiality Rules and Procedures for the 1974 Reporting Year

Notice is hereby given that the Federal Trade Commission has approved and adopted certain rules and procedures hereinafter set forth prescribing the confidential handling and use of reports to be filed by companies pursuant to an Order to File Special Report under

\*Voting for this action: Chairman Burns and Governors Mitchell, Sheehan, Bucher, Holland, and Wallach. Absent and not voting: Governor Coldwell.

the Line of Business Program. The rules and procedures shall apply to reports relating to the 1974 reporting year. They do not apply to reports relating to the 1973 reporting year the confidentiality of which are governed by the Rules and Procedures for the Use of Confidential Individual Company Data Collected Under the FTC's Line of Business Report Program issued in connection with the Commission's Resolution Requiring Annual Line of Business Reports from Corporations, dated August 2, 1974, and published in the Federal Register on August 27, 1974 (39 FR 30970).

**Definitions:** For purposes of these Rules and Procedures, the following definitions apply:

"LB Report" means a report filed by a company pursuant to an Order to File Special Report under the Line of Business (LB) Program.

"Reporting Company" means a company ordered to file an LB Report.

**Confidentiality of LB Reports With Respect to Persons Outside the Commission:** Pub. L. 93-563, which provides Federal Trade Commission appropriations for the fiscal year 1975, states in part that:

No part of these funds may be used to pay the salary of any employee, including Commissioners, of the Federal Trade Commission who—

(3) permits anyone other than sworn officers and employees of the Federal Trade Commission to examine the line-of-business reports from individual firms.

The Commission interprets this provision as prohibiting disclosure of LB Reports to any person outside the Commission including Congress, parties in court proceedings, governmental agencies and members of the public so long as the provision remains in substantially similar provision in effect. Accordingly, during the period this provision or a substantially similar provision in subsequent appropriations acts for the Federal Trade Commission remains in effect, LB Reports will not be disclosed to any person outside the Commission except pursuant to a superseding act of Congress; or pursuant to an order of a court but only after a motion by the Commission to quash and for a protective order have been disposed of by the court. In the event that the Commission receives a subpoena for an LB Report, it will promptly notify the Reporting Company.

Under section 10 of the Federal Trade Commission Act, any officer or employee of the Commission who shall make public any information obtained by the Commission, without its authority, unless directed by a court, shall be deemed guilty of a misdemeanor and upon conviction thereof, may be punished by a fine not exceeding five thousand dollars (\$5,000) or by imprisonment not exceeding one year, or by fine and imprisonment, in the discretion of the court.

**Confidentiality of LB Reports Within the Commission:** Access to and use of LB Reports within the Commission shall be restricted as hereinafter set forth, and

persons authorized to have access thereto and use thereof shall not release any LB Report, or in any way provide access thereto, to anyone not authorized to have access. LB Reports shall be used to compile statistical and other economic reports authorized by the Commission. The latter reports may be utilized in connection with any Commission investigation or proceeding for carrying out specific law enforcement responsibilities of the Commission. However, they shall not be compiled in such a way that LB data furnished by a particular Reporting Company can be identified. LB Reports shall not be made available to any person within the Commission for use in connection with any Commission investigation or proceeding for carrying out specific law enforcement responsibilities of the Commission. However, this restriction shall not limit the authority of the Commission to require by subpoena or other compulsory process the production of any information or data from any source outside the Commission for use in connection with an investigation or proceeding for carrying out specific law enforcement responsibilities of the Commission.

Except as hereinafter provided, access to and use of LB Reports within the Commission shall be restricted to the Division of Financial Statistics, Bureau of Economics; the Statistical Reports Unit of the Economic Research and Services Section, Bureau of Economics; and the Division of Management as hereinafter set forth.

The Division of Financial Statistics plans, develops and prepares for publication statistical and other economic reports such as the Quarterly Financial Report and the Annual Line of Business Report. The Division shall have access to and use of LB Reports for planning, developing and preparing such statistical and economic reports. Procedures sufficient to assure that LB data furnished by a particular Reporting Company cannot be identified shall be developed and implemented by that Division in connection with each statistical or other economic report to be published which is derived from LB data. With respect to each such report, the Assistant Director for Financial Statistics shall certify to the Director, Bureau of Economics, that he has reviewed and approved the procedures applied thereto.

The Statistical Reports Unit of the Economic Research and Services Section, Bureau of Economics, plans, develops and prepares for publication reports such as merger statistical reports, annual statistics on aggregate concentration and other statistical and economic reports authorized by the Commission. The Unit shall have access to and use of LB Reports for planning, developing or preparing such statistical and economic reports. Publication of any report which is derived from LB data shall be conditioned upon a determination by the Assistant Director for Financial Statistics that the procedures applied therein are sufficient to assure that

LB data furnished by a particular Reporting Company cannot be identified, and certification of his determination to the Director, Bureau of Economics.

The Division of Management shall have access to LB Reports but only during and for the purpose of electronic processing of information and data contained in LB Reports. The Division may employ the services of an outside computer facility for purposes of computer processing of LB data subject to the restriction that no one other than authorized employees of the Federal Trade Commission may examine the LB Reports from individual Reporting Companies.

Employees of the Division of Financial Statistics and the Statistical Reports Unit of the Economic Research and Services Section, while assigned to either of these units, shall not participate in any Commission investigation or proceeding for carrying out specific law enforcement responsibilities of the Commission. Any employee who transfers into or out of either of these units shall be formally notified in writing that he is subject to these Rules and Procedures and to section 10 of the Federal Trade Commission Act.

The Director, Bureau of Economics, shall not have access to LB Reports. He shall, however, have supervisory responsibility and authority with respect to the Division of Financial Statistics and the Statistical Reports Unit of the Economic Research and Services Section. Such responsibility and authority shall include approving any reports prepared by them, making recommendations with respect to the preparation of such reports, and exercising any other supervisory control not requiring access to LB Reports.

Upon notification to the General Counsel by the Assistant Director for Financial Statistics that a Reporting Company has failed adequately to comply with an Order to File Special Report under the LB Program, the following additional Commission officers and employees shall have access to such parts of that company's LB Report required to evaluate the noncompliance and to advise and represent the Commission with respect to any proceeding initiated because of a refusal or failure of the Reporting Company to file an adequate LB Report: the General Counsel and his staff and the Commissioners and their assistants.

**Security of LB Reports:** All Commission members and employees authorized to have access to and use of LB Reports as hereinbefore provided shall, while in possession of any such material, be personally responsible for ensuring that unauthorized personnel do not obtain access to such material and for observing the following procedures:

1. All LB Reports and reproductions of LB data from individual Reporting Companies (such as tabulations, punch cards, tapes or printouts, etc.) shall be conspicuously marked "Confidential".

2. All rooms containing LB Reports and reproductions of LB data from individual Reporting Companies shall be locked except when occupied.

3. All LB Reports and reproductions of LB data from individual Reporting Companies shall be stored in locked drawers, files or cabinets except when being used.

4. All LB Reports and reproductions of LB data from individual Reporting Companies shall be returned to the Division of Financial Statistics immediately after any authorized use of such material is no longer required.

**Limitations:** The Rules and Procedures set forth above shall not apply to:

(1) disclosure to a court of an LB Report of a Reporting Company in connection with a proceeding initiated because of a refusal or failure of that company to file an adequate LB Report;

(2) the identity of a Reporting Company;

(3) information or data furnished by a Reporting Company in a context other than an LB Report (e.g., a motion to quash or other motion challenging an Order to File Special Report under the LB program); such information or data shall be treated as confidential pursuant to §§ 4.10-4.11 of the Commission's procedures and rules of practice only upon request with a showing of justification therefor, and a determination by the Commission, with due regard to statutory restrictions, the Commission's procedures and rules of practice and the public interest, that such information or data should not be made public;

(4) information or data which (a) are in the public domain, (b) enter the public domain from a source other than the Commission or its employees, (c) were in the Commission's possession prior to transmission to the Commission in an LB Report, or (d) are supplied to the Commission or its employees by a third party lawfully in possession thereof; or

(5) information or data which are supplied to the Commission in response to a compulsory process order other than an Order to File Special Report under the LB Program. By direction of the Commission.

Dated: May 13, 1975.

[SEAL] CHARLES A. TOBIN,  
Secretary.

#### LINE OF BUSINESS REPORTING PROGRAM

##### Proposed LB Reporting Form and Related Materials for Use in Collection of 1974 Data

Notice was published in the FEDERAL REGISTER on April 16, 1975 (40 FR 17081) and April 18, 1975 (40 FR 17348) that the Federal Trade Commission will hold a public hearing on May 20, 1975, for the purpose of receiving oral comments on its proposed FTC Form LB to be used for the collection of line of business data for the 1974 reporting year. Interested persons were directed to notify the Commission not later than May 9, 1975, if they wished to present oral comments. The hearing will commence at 9:30 a.m. It will be held in Room 532 at the

FTC building, 6th and Pennsylvania Streets NW., Washington, D.C. Room 432 will be used as an overflow area, if needed.

The transcript of the hearing and any written comments on the proposed Form LB and related materials will be available for examination by interested persons at the Division of Legal and Public Records, Room 130, Federal Trade Commission, Washington, D.C.

Issued: May 13, 1975.

[SEAL] CHARLES A. TOBIN,  
Secretary.

#### GENERAL ACCOUNTING OFFICE FEDERAL TRADE COMMISSION

##### Regulatory Reports Review Proposal

The following request for clearance of a report intended for use in collecting information from the public was received by the Regulatory Reports Review Staff, GAO, on May 9, 1975. See 44 U.S.C. 3512 (c) & (d). The purpose of publishing this notice in the Federal Register is to inform the public of such receipt.

The notice includes the title of the request received; the name of the agency sponsoring the proposed collection of information; the agency form number, if applicable; and the frequency with which the information is proposed to be collected.

Written comments on the proposed FTC form are invited from all interested persons, organizations, public interest groups, and affected businesses. Because of the limited amount of time GAO has to review the proposed form, comments (in triplicate) must be received on or before June 3, 1975, and should be addressed to Mr. Monte Canfield, Jr., Director, Office of Special Programs, United States General Accounting Office, 425 I Street, NW., Washington, D.C. 20548.

Further information may be obtained from the Regulatory Reports Review Officer, 202-376-5425.

FEDERAL TRADE COMMISSION

Request for review and clearance of an extension (no change) of the Federal Trade Commission's "Pre-Merger Notification Program". The special report form provides for compulsory Pre-Notification and filing of Special Reports whenever a company acquires a manufacturing company with sales or assets of \$10 million or more and the combined sales or assets exceed \$250 million, or when a company acquires a nonmanufacturing company with assets of \$10 million or more and the combined assets exceed \$250 million. Special Report forms are sent to all potential acquiring companies and are mandatory pursuant to FTC Act Section 6(b). The estimated respondent burden is 50 hours per response.

NORMAN F. HEYL,  
Regulatory Reports Review Officer.

# NUCLEAR REGULATORY COMMISSION Regulatory Reports Review Proposal

The following request for clearance of a report intended for use in collecting information from the public was received by the Regulatory Reports Review Staff, GAO, on May 12, 1975. See 44 U.S.C. 3512 (c) & (d). The purpose of publishing this notice in the *FEDERAL REGISTER* is to inform the public of such receipt.

The notice includes the title of the request received; the name of the agency sponsoring the proposed collection of information; the agency form number, if applicable; and the frequency with which the information is proposed to be collected.

Written comments on the proposed NRC form are invited from all interested persons, organizations, public interest groups, and affected businesses. Because of the limited amount of time GAO has to review the proposed form, comments (in triplicate) must be received on or before June 3, 1975, and should be addressed to Mr. Monte Canfield, Jr., Director, Office of Special Programs, United States General Accounting Office, 425 I Street, NW., Washington, D.C. 20548.

Further information may be obtained from the Regulatory Reports Review Officer, 202-376-5425.

## NUCLEAR REGULATORY COMMISSION

Request for clearance of a voluntary single-time survey of NRC and Agreement State medical licensees who are authorized to use nuclear pacemakers, and a number of physicians who are experts in the field of cardiac pacing but who are not users of nuclear pacemakers, to gather information regarding the need for, the choice of, long-lived nuclear and nonnuclear powered cardiac pacemakers. The potential respondents are approximately 200 medical institutions and physicians, and respondent burden is estimated at one hour per respondent.

NORMAN F. HEYL,  
Regulatory Reports  
Review Officer.

[FR Doc.75-12929 Filed 5-15-75; 8:45 am]

# NATIONAL CAPITAL PLANNING COMMISSION FREEDOM OF INFORMATION ACT Regulations

At its meeting on May 1, 1975, the National Capital Planning Commission adopted the following regulations:

**I. Introduction.** The following regulations implement the Freedom of Information Act, as amended, 5 U.S.C. 552 (hereinafter the "Act"), and provide procedures by which information may be obtained from the National Capital Planning Commission (hereinafter the "Commission"). Official records made available pursuant to the Act shall be furnished to members of the public as prescribed herein.

**II. Organization.** The Commission is the central planning agency for the Fed-

eral Government in the National Capital. The Commission is composed of (1) ex-officio, the Secretary of the Interior, the Secretary of Defense, the Administrator of the General Services Administration, the Mayor of the District of Columbia, the Chairman of the Council of the District of Columbia, and the Chairman of the Committees on the District of Columbia of the Senate and the House of Representatives, or their alternates, and (2) five citizens, three of whom are appointed by the President, and two of whom are appointed by the Mayor of the District of Columbia.

The Commission is assisted by a staff headed by an Executive Director. The staff is organized functionally as follows:

- (1) Current Planning and Programming
- (2) Long Range Planning and Regional Affairs
- (3) Legal Services/Commission Secretariat
- (4) Administrative Services
- (5) Public Affairs

**III. Public access to information. A. General policy.** It is the Commission's general policy to facilitate the broadest possible availability and dissemination of information to the public. The Commission's staff is available to assist the public in obtaining information formally by using the procedures herein or informally by discussions with the staff. The Commission's staff may, therefore, continue to furnish informally to the public information which, prior to the amendments to the Act contained in Pub. L. 93-502, enacted November 21, 1974, was customarily furnished in the regular performance of their duties, provided the staff do so in a manner not inconsistent with these regulations. In addition, to the extent permitted by other laws, the Commission will make available records which it is authorized to withhold under the Act when it determines that such disclosure is in the public interest.

**B. Established place of obtaining information.** Information may be obtained only from the Commission's offices, which are located at 1325 G Street, NW., Washington, D.C. 20576. Its official hours are 8:30 a.m. to 5 p.m., Monday through Friday, excluding legal holidays.

**C. Information sources within the commission.** Requests for Commission publications offered for sale or informal requests for general information on the Commission should be directed to the Office of Public Affairs. All formal requests for agency records pursuant to the Act must be directed to the Commission Secretary. Any request directed initially to the wrong information source will be correctly routed by the Commission's staff and the requesting party will be so notified. The ten-day time period within which the Commission is required to determine whether to comply with a request shall not begin to run until the request reaches, or with the exercise of due diligence should have reached, the appropriate information source.

**D. Information routinely available.** The following types of information shall

be routinely available (subject to the fee schedule, *infra*) for public dissemination without recourse to the Commission's formal information request procedures unless such information falls within one of the exemptions to agency disclosure listed in 5 U.S.C. 552(b):

1. Correspondence between the Commission and the public;
2. Executive Director's Recommendations;
3. Committee Reports;
4. Commission Memorandums of Actions; and
5. Maps.

Requests for information, other than maps, shall be directed to the Commission Secretary; map requests shall be directed to the Office of Public Affairs.

**E. Formal requests for information.** All formal requests for information pursuant to the Act shall be made in writing to the Commission Secretary. To expedite internal handling of such requests, the words "Freedom of Information Request" shall appear on the face of the envelope bearing such request. The request shall state that the request is made pursuant to the Freedom of Information Act; shall reasonably describe the information sought, including the date the Commission received or produced the requested information, if known; shall state, pursuant to the fee schedule set forth *infra*, the maximum fee the party making the request would be willing to pay for the duplication of the requested records without further approval; and shall, if possible, provide a telephone number at which the requesting party can be contacted to facilitate handling of the request.

**F. Commission response to formal requests.** The Commission Secretary, upon request for information made in compliance with these regulations, shall determine within ten days (excluding Saturdays, Sundays, and legal holidays) after the receipt of any such request whether to comply with such request and shall immediately notify the person making such request of such determination and the reasons therefor and of the right of such person to appeal to the head of the agency any adverse determination. In unusual circumstances as specified *infra*, the ten-day time limit may be extended by written notice to the person making the request setting forth the reasons for such extension and the date on which a determination is expected to be dispatched. No such notice shall specify a date that would result in an extension for more than ten working days. As used in this paragraph, "unusual circumstances" means, but only to the extent reasonably necessary to the proper processing of the particular request:

1. the need to search for and collect the requested records from establishments that are separate from the Commission's offices;
2. the need to search for, collect, and appropriately examine a voluminous amount of separate and distinct records which are demanded in a single request; or

3. the need for consultation, which shall be conducted with all practicable speed, with another agency having a substantial interest in the determination of the request or among two or more components of the agency having substantial subject matter interest therein.

**G. Determination to grant request.** If the Commission Secretary makes a determination to grant a request in whole or in part, the person making such request will be so notified in writing. The notice shall also include a description of the information to be made available, a statement of the time when and the place where such information may be inspected or, alternatively, the procedure for duplication and delivery (by mail or other means) of the information to the requesting party and a statement of the total fees chargeable to the requesting person pursuant to the fee schedule *infra*.

**H. Determination to deny request—appeal procedure.** If the Commission Secretary makes a determination to deny, in whole or in part, a request for information, he shall so notify the party making the request in writing. Any appeal of such determination shall be made in writing to the Chairman of the Commission and shall include a brief statement of the legal, factual, or other basis for the party's objection to the initial decision. The Chairman shall, within twenty days (excluding Saturdays, Sundays, and legal holidays) of the receipt of any such appeal determine whether to grant or deny the appeal and shall, immediately upon making his decision, give written notice of the decision to the party, including a brief statement of the reasons therefor.

**I. Waiver.** Whenever a waiver of any of the procedures set forth herein would further the purpose of the Act by causing the public disclosure of nonconfidential information within the time period required by the Act, the Commission Secretary may, in the context of individual requests for information, waive any of the procedural requirements herein.

**J. Schedule of fees.** The fees the Commission may charge for the production of information pursuant to the Act is as follows:

1. Publications offered for sale—as marked.
2. Commission reports—\$0.15/page.
3. Committee reports—\$0.15/page.
4. Commission Memorandums of Actions—\$0.15/page.
5. Transcripts of Commission meetings and Committee meetings—\$0.15/page.
6. Other records—\$0.15/page.
7. Maps—microfilm printout—\$0.50/each ozalid maps—\$0.20/linear foot.

The Commission keeps on file a limited quantity of back copies of Executive Director's Recommendations, Committee Reports, and Commission Memorandums of Actions. The Commission will first attempt to fill specific requests for these documents from its supply of back copies and until the supply is exhausted, the Commission will provide the documents at no charge. Once the supply is exhausted, the requested document will be provided in accord with the fee schedule.

Fees will be waived when less than \$5.00 or when it is in the public interest to do so. Such a waiver will be in the public interest, for example, when in the determination of the Commission the request will not impose an undue burden or expense upon it and the request is (1) from another Government organization, Federal, State or local; (2) for the purpose of obtaining information primarily for the benefit of the general public rather than for the primary benefit of the requester, as will be the case with certain requests from news media and from organizations engaged in a non-profit activity designed for public safety, health, welfare, or education; (3) from employees and former employees seeking information from their own personnel records; (4) from or on behalf of the defending party in connection with a proceeding against such party by the Federal Government; and (5) from a low-income person and the fee would impose a financial hardship.

**K. Prior approval or advanced deposit of fees.** 1. Where the fees anticipated to result from a request are substantially greater than the amount estimated in the written request, the persons requesting the information shall be immediately notified of the estimated fees and his approval of such fees requested. Such person shall also be afforded the opportunity to revise his or her request to reduce the fees but satisfy his or her needs for information.

2. The Commission Secretary may require that the person requesting information make an advance deposit of the estimated fees.

3. The dispatch of any such request for an estimated fee approval or advance deposit shall suspend, until a reply is received by the Commission Secretary, the period pursuant to 5 U.S.C. 552 and paragraph F *supra* within which the Commission Secretary must respond to a written request for information.

**L. Payment of fees.** Fees charged a person for the production of information must be paid in full prior to release of the information. In the event that the person is in arrears or previous requests to the Commission for information, no information will be provided for any subsequent requests until the arrears have been paid in full. Payment of fees shall be made by a personal check, postal money order or bank draft on a bank in the United States, made payable to the order of the Treasurer of the United States.

DANIEL H. SHEAR,  
Secretary.

May 12, 1975.

# NUCLEAR REGULATORY COMMISSION

[Docket No. 50-213]

## CONNECTICUT YANKEE ATOMIC POWER CO.

### Proposed Issuance of Amendment to Facility Operating License

The Nuclear Regulatory Commission (the Commission) is considering issuance

of an amendment to Facility Operating License No. DPR-61 issued to Connecticut Yankee Atomic Power Company (the licensee), for operation of the Haddam Neck Plant located in Middlesex County, Connecticut.

The amendment would revise the provisions of the Technical Specifications related to safety limits—reactor core, limiting linear heat generation rate, and power distribution monitoring and control to account for Cycle VI fuel reload and operation in accordance with the licensee's application dated May 12, 1975.

Prior to issuance of the proposed license amendment, the Commission will have made the findings required by the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations.

By June 16, 1975, the licensee may file a request for a hearing and any person whose interest may be affected by this proceeding may file a request for a hearing in the form of a petition for leave to intervene with respect to the issuance of the amendment to the subject facility operating license. Petitions for leave to intervene must be filed under oath or affirmation in accordance with the provisions of § 2.714 of 10 CFR Part 2 of the Commission's regulations. A petition for leave to intervene must set forth the interest of the petitioner in the proceeding, how that interest may be affected by the results of the proceeding, and the petitioner's contentions with respect to the proposed licensing action. Such petitions must be filed in accordance with the provisions of this *FEDERAL REGISTER* notice and § 2.714, and must be filed with the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Docketing and Service Section, by the above date. A copy of the petition and/or request for a hearing should be sent to the Executive Legal Director, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555 and to C. Duane Blinn, Esquire, Day, Berry & Howard, Counselors at Law, One Constitution Plaza, Hartford, Connecticut 06103, the attorney for the licensee.

A petition for leave to intervene must be accompanied by a supporting affidavit which identifies the specific aspect or aspects of the proceeding as to which intervention is desired and specifies with particularity the facts on which the petitioner relies as to both his interest and his contentions with regard to each aspect on which intervention is requested. Petitions stating contentions relating only to matters outside the Commission's jurisdiction will be denied.

All petitions will be acted upon by the Commission or licensing board, designated by the Commission or by the Chairman of the Atomic Safety and Board Panel. Timely petitions will be considered to determine whether a hearing should be noticed or another appropriate order issued regarding the disposition of the petitions.

In the event that a hearing is held and a person is permitted to intervene, he becomes a party to the proceeding and has a right to participate fully in the

conduct of the hearing. For example, he may present evidence and examine and cross-examine witnesses.

For further details with respect to this action, see the application for amendment dated May 12, 1975, which is available for public inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, D.C. and at the Russell Library, 119 Broad Street, Middletown, Connecticut. The license amendment and the Safety Evaluation, when issued, may be inspected at the above locations and a copy may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Reactor Licensing.

Dated at Bethesda, Maryland, this 14th day of May, 1975.

For the Nuclear Regulatory Commission.

ROBERT A. PURPLE,  
Chief, Operating Reactors  
Branch #1, Division of Reactor Licensing.

[FR Doc.75-13128 Filed 5-15-75;9:43 am]

[License No. 20-02573-043]

#### GENERAL ELECTRIC CO.

##### Issuance of Byproduct Material License

Please take notice that the Nuclear Regulatory Commission (NRC) has, pursuant to § 32.26 of 10 CFR 32, issued License No. 20-02573-04E to General Electric Company, Housewares Business Division, Homer Avenue, Ashland, Massachusetts, which authorizes the distribution of Models 8201 and 8202 fire detectors to persons exempt from requirements for a license pursuant to 10 CFR 30.20.

1. The devices are designed to detect incipient fires by responding to the products of combustion produced by thermal decomposition of building materials or contents prior to the appearance of visible smoke, flame, or appreciable heat. The sensitive element of each device is an ionization chamber in which air flowing into the chamber is made conductive by alpha particles emitted by americium-241.

2. The byproduct material incorporated in the measure chamber and reference chamber of each device is americium-241 in the oxide form contained in foils manufactured by Nuclear Radiation Developments (Model A-001) or by Amersham/Searle (Model AMM 1001). The nominal total activity contained in a unit is 3.0 microcuries.

3. Each exempt unit will have a label identifying the manufacturer (General Electric Company) and the byproduct material (americium-241) contained in the unit and recommending that the unit be returned to General Electric Company for repair or disposal.

A copy of the license and the license application containing additional information are available for public inspection at the Commission's Public Document Room at 1717 H Street, NW., Washington, D.C.

Dated at Bethesda, Maryland, May 9, 1975.

For the Nuclear Regulatory Commission.

BERNARD SINGER,  
Chief, Materials Branch, Division of Materials and Fuel, Cycle Facility Licensing.

[FR Doc.75-12937 Filed 5-15-75;8:45 am]

#### WISCONSIN PUBLIC SERVICES CORP. ET AL.

[Docket No. 50-305]

##### Proposed Issuance of Amendment to Facility Operating License

Wisconsin Public Services Corporation, Wisconsin Power and Light Company, Madison Gas and Electric Company.

The Nuclear Regulatory Commission (the Commission) is considering the issuance of an amendment to Provisional Operating License No. DPR-43 issued to Wisconsin Public Services Corporation (the licensee) for operation of the Kewaunee Nuclear Power Plant (the facility), located in Kewaunee County, Wisconsin.

In accordance with the licensee's application for a license amendment dated April 1, 1975, the amendment would modify operating limits in the Technical Specifications based upon an evaluation of ECCS performance calculated in accordance with an acceptable evaluation model that conforms to the requirements of the Commission's regulations in 10 CFR 50.46. The amendment would modify various limits established in accordance with the Commission's Interim Acceptance Criteria, and would, with respect to the Kewaunee Nuclear Power Plant, terminate the further restrictions imposed by the Commission's December 27, 1974 Order for Modification of License, and would impose instead, limitations established in accordance with the Commission's Acceptance Criteria for Emergency Core Cooling System for Light Water Nuclear Power Reactors, 10 CFR 50.46.

Prior to issuance of the proposed license amendment, the Commission will have made the findings required by the Act and the Commission's regulations.

By June 16, 1975, the licensee may file a request for a hearing and any person whose interest may be affected by this proceeding may file a request for a hearing in the form of a petition for leave to intervene with respect to the issuance of the amendment to the subject facility operating license. Petitions for leave to intervene must be filed under oath or affirmation in accordance with the provisions of § 2.714 of 10 CFR Part 2 of the Commission's regulations. A petition for leave to intervene must set forth the interest of the petitioner in the proceeding, how that interest may be affected by the results of the proceeding, and the petitioner's contentions with respect to the proposed licensing action. Such petitions must be filed in accordance with the provisions of this Federal Register Notice

and § 2.714, and must be filed with the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Docketing and Service Section by the above date. A copy of the petition and/or request for a hearing should be sent to the Chief Hearing Counsel, Office of the Executive Legal Director, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555 and to Steven E. Keane, Esquire, Foley, Sammond & Lardner, 735 North Water Street, Milwaukee, Wisconsin 53202, the attorney for the licensee.

A petition for leave to intervene must be accompanied by a supporting affidavit which identifies the specific aspect or aspects of the proceeding as to which intervention is desired and specifies with particularity the facts on which the petitioner relies as to both his interest and his contentions with regard to each aspect on which intervention is requested. Petitions stating contentions relating only to matters outside the Commission's jurisdiction will be denied.

All petitions will be acted upon by the Commission or licensing board designated by the Commission or by the Chairman of the Atomic Safety and Licensing Board Panel. Timely petitions will be considered to determine whether a hearing should be noticed or another appropriate order issued regarding the disposition of the petitions.

In the event that a hearing is held and a person is permitted to intervene, he becomes a party to the proceeding and has a right to participate fully in the conduct of the hearing. For example, he may present evidence and examine and cross-examine witnesses.

For further details with respect to this action, see (1) the application for amendment dated April 1, 1975, and (2) the Commission's Order for Modification of License and the documents referred to in the Order dated December 27, 1974 (published in the FEDERAL REGISTER on January 9, 1975 (40 FR 1781)), which are available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, D.C., and at the Kewaunee Public Library, 314 Milwaukee Street, Kewaunee, Wisconsin 54216. As they become available, the Commission's related Safety Evaluation and license amendment and any attachments may be inspected at the above locations. A copy of the license amendment and attachments and the Safety Evaluation, when available, may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Reactor Licensing.

Dated at Bethesda, Maryland, this 12th day of May, 1975.

For the Nuclear Regulatory Commission.

ROBERT A. PURPLE,  
Chief, Operating Reactors  
Branch #1, Division of Reactor Licensing.

#### OFFICE OF MANAGEMENT AND BUDGET

##### CLEARANCE OF REPORTS

###### List of Requests

The following is a list of requests for clearance of reports intended for use in collecting information from the public received by the Office of Management and Budget on May 13, 1975 (44 U.S.C. 3509). The purpose of publishing this list in the FEDERAL REGISTER is to inform the public.

The list includes the title of each request received; the name of the agency sponsoring the proposed collection of information; the agency form number(s), if applicable; the frequency with which the information is proposed to be collected; the name of the reviewer or reviewing division within OMB, and an indication of who will be the respondents to the proposed collection.

Requests for extension which appear to raise no significant issues are to be approved after brief notice thru this release.

Further information about the items on this daily list may be obtained from the Clearance Office, Office of Management and Budget, Washington, D.C. 20503, (202-395-4529), or from the reviewer listed.

#### SECURITIES AND EXCHANGE COMMISSION

[Release 34-11410]

#### DETROIT, CINCINNATI AND BOSTON STOCK EXCHANGES

##### Amended Special Offering Plans Declared Effective

The Securities and Exchange Commission has announced that it has declared effective amended Special Offering Plans filed by the Detroit ("DSE"), Boston ("BSE") and Cincinnati ("CSE") Stock Exchanges pursuant to the provisions of rule 10b-2(d) (17 CFR 240.10b-2(d)) under the Securities Exchange Act of 1934.

The Special Offering Plans of the DSE, BSE, CSE provide for the sale of the block of a listed security on those exchanges at a fixed price under certain conditions when the exchange cannot absorb the block within a reasonable time and at a reasonable price or prices. The Plans contain certain anti-manipulative controls and require members, member firms and member corporations to make certain disclosures concerning the offering to persons whose orders are solicited.

The amendments to these Special Offering Plans were proposed to conform them to the requirements of the Securities Exchange Act rule 19b-3. Under rule 19b-3, national securities exchanges may not after May 1, 1975, adopt or retain any rule that requires, or otherwise, directly or indirectly, require, their members, or any person associated with their members, to charge any person any fixed rate of commission (other than commissions for floor brokerage for members) for transactions effected on, or effected by the use of the facilities of, exchanges.

The text of the Commission's action follows:

The Securities and Exchange Commission acting pursuant to the Securities Exchange Act of 1934, particularly Sections 10 (b) and 23(a) thereof and Rule 10b-2(d) (17 CFR 240.10b-2(d)) thereunder, deeming

it necessary for the exercise of the functions vested in it, and having due regard for the public interest and for the protection of investors, hereby declares effective the Special Offering Plan of the Detroit Stock Exchange, as amended by amendments filed on April 25, 1975, the Special Offering Plan of the Boston Stock Exchange, as amended by amendments filed on April 2, 1975, and the Special Offering Plan of the Cincinnati Stock Exchange, as amended by amendments filed on April 9, 1975, on the condition that if at any time it appears to the Commission to be necessary or appropriate in the public interest or for the protection of investors so to do, the Commission may suspend or terminate the effectiveness of any of or all such Special Offering Plans by sending at least 10 days written notice to the particular exchange or exchanges involved. The Commission finds that notice and public procedure pursuant to Sections 4(a) and 4(b) of the Administrative Procedure Act are unnecessary since the amendments will conform those plans to the requirements of Securities Exchange Act Rule 19b-3 which was adopted by the Commission after notice and public procedure (See Securities Exchange Act Release No. 11203 (January 23, 1975)). The Commission further finds that Rule 10b-2(d) (17 CFR 240.10b-2(d)) and the action taken hereunder have the effect of relieving restriction and granting exemption and that, therefore, this action may be and is hereby declared effective on May 1, 1975 pursuant to Section 4(c) of the Administrative Procedure Act.

Effective May 1, 1975.

By the Commission.

[SEAL] SHIRLEY E. HOLLIS,  
Assistant Secretary.

[FR Doc.75-12921 Filed 5-15-75;8:45 am]

[File No. 500-1]

#### CONTINENTAL VENDING MACHINE CORPORATION

##### Suspension of Trading

MAY 9, 1975.

It appearing to the Securities and Exchange Commission that the summary suspension of trading in the common stock of Continental Vending Machine Corporation being traded otherwise than on a national securities exchange is required in the public interest and for the protection of investors;

Therefore, pursuant to section 15(c) (5) of the Securities Exchange Act of 1934, trading in such securities otherwise than on a national securities exchange is suspended, for the period from May 10, 1975 through May 19, 1975.

By the Commission.

MAY 9, 1975.

Notice is hereby given that General Public Utilities Corporation ("GPU"), a

registered holding company, and its wholly-owned subsidiary company, GPU Service Corporation ("Service Company"), 80 Pine Street, New York, New York 10005, have filed post-effective amendments to the application-declaration in this proceeding pursuant to sections 6(a), 7, 9(a), 10, 12, 13 and rules 86 through 91, inclusive, promulgated thereunder as being applicable to the proposed transaction. All interested persons are referred to the application-declaration, as now amended, which is summarized below, for a complete statement of the proposed transaction.

By order dated April 29, 1971 (H.C.A.R. No. 17112), the Commission authorized the organization of, and conduct of business by, Service Company. The Commission's Order also authorized GPU to acquire for cash long-term unsecured notes of Service Company not exceeding \$5,000,000 aggregate principal amount at any one time outstanding. Each such note would mature 40 years from the date of issuance of the first note, would be prepayable without premium or penalty by Service Company at any time and would bear interest at a rate equal to the prime rate for short-term commercial borrowings generally in effect, from time to time, in New York City, plus not more than 20 percent thereof, such interest rate to be adjusted to conform with changes in the prime rate as of the first business day following the date of announcement of any such change. It was decided that Service Company would at all times maintain its aggregate capital, including the principal amount of notes outstanding, at an amount approximately equal to the sum of two months' operating expenses, plus the cost of its property, less applicable reserves, prepayments and petty cash working funds. At the date hereof, the aggregate outstanding amount of Service Company's unsecured notes so acquired by GPU is \$4,995,683.40.

GPU and Service Company now propose to increase to \$6,000,000 from \$5,000,000 the maximum aggregate principal amount of Service Company's unsecured notes which may be acquired by GPU. All such notes representing borrowings in excess of \$5,000,000, however, will be notes of a maturity not exceeding 2 years from the date of issuance and will bear interest at a rate equal to the actual cost of short-term borrowings by GPU, taking into consideration compensating balance requirements for such short-term borrowings by GPU. Service Company will continue to maintain its aggregate capital, including the principal amount of all notes outstanding, at all times equal to the sum of approximately two months' operating expenses, plus the cost of its property (to the extent not financed from borrowings from others), less applicable reserves, prepayments and petty cash working funds. The additional proceeds will be used to continue to finance Service Company's operations consistent with the above-mentioned formula.

The fees and expenses to be incurred by GPU or Service Company in connection with the proposed transaction are estimated at \$5,000, including legal fees of \$2,500. It is stated that no state commission and no federal commission, other than this Commission, has jurisdiction over the proposed transaction.

Notice is further given that any interested person may, not later than June 2, 1975, request in writing that a hearing be held on such matter, stating the nature of his interest, the reasons for such request, and the issues of fact or law raised by said post-effective amendments to the application-declaration which he desires to controvert; or he may request that he be notified if the Commission should order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request should be served personally or by mail (air mail if the person being served is located more than 500 miles from the point of mailing) upon the applicants-declarants at the above-stated addresses, and proof of service (by affidavit or, in case of an attorney at law, by certificate) should be filed with the request. At any time after said date, the application-declaration, as now amended or as it may be further amended, may be granted and permitted to become effective as provided in rule 23 of the general rules and regulations promulgated under the Act, or the Commission may grant exemption from such rules as provided in rules 20 (a) and 100 thereof or take such other action as it may deem appropriate. Persons who request a hearing or advice as to whether a hearing is ordered will receive any notices and orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Corporate Regulation, pursuant to delegated authority.

[SEAL] SHIRLEY E. HOLLIS,  
Assistant Secretary.

#### UNITED STATES RAILWAY ASSOCIATION

##### USE OF RAILROAD PROPERTIES FOR OTHER PUBLIC PURPOSES

##### Invitation for Comments

The United States Railway Association ("Association") is preparing, in accordance with the Regional Rail Reorganization Act of 1973 ("Act"), a Final System Plan to reorganize railroads in the northeastern and midwestern regions of the United States. The Final System Plan will designate what disposition will be made of the properties of the railroads defined in the Act as "Railroads in Reorganization" (now, principally, the Penn Central, Erie Lackawanna, Lehigh Valley, Reading, Central of New Jersey, Ann Arbor, and the Lehigh and Hudson River Railroads). Among the provisions of the Act dealing with the designations which must be made is section 206 (c)(1)(E) which provides:

(c) Designations.—The Final System Plan shall designate—

(1) which rail properties of railroads in reorganization in the region or of railroads leased, operated, or contracted by any railroad in reorganization in the region—

(E) if not otherwise required to be operated by the Corporation, a government entity, or a responsible person, are suitable for

use for other public purposes including highways, other forms of transportation, conservation, energy transmission, education or health care facilities, or recreation. In carrying out this subparagraph, the Association shall solicit the views and recommendations of the Secretary, the Secretary of the Interior, the Administrator of the Environmental Protection Agency and other agencies of the Federal Government and of the States and political subdivisions thereof within the region, and the general public.

As required by that provision of the Act, the Association has solicited and is continuing to solicit the views of appropriate Federal, State and local governmental officials and agencies, as to other suitable public purposes for which specific properties of the railroads in reorganization may be used.

By this notice, the Association is soliciting the views of the general public on this subject. If you wish to present views on suitable other public purposes for which some property of a railroad in reorganization may be used, you should address your communication to the Office of Economic and Environmental Studies, United States Railway Association, 2100 Second Street SW., Washington, D.C. 20595. Some of the properties which may be available for such other uses were identified in Appendix K to the Association's Preliminary System Plan and Supplemental Preliminary System Plan, published in the FEDERAL REGISTER on March 4, 1975 (40 FR 9719, et seq.) and on May 15, 1975 (40 FR 21401).

To be considered in connection with the Association's Final System Plan, your comment must be received by June 23, 1975.

Dated: Washington, D.C., May 13, 1975.

EDWARD G. JORDAN,  
President.

United States Railway Association.

#### DEPARTMENT OF LABOR

##### Occupational Safety and Health Administration

#### STANDARDS ADVISORY COMMITTEE ON COKE OVEN EMISSIONS

##### Change in Starting Time for Meeting

The May 20-21-22 meetings of the Standards Advisory Committee on Coke Oven Emissions, announced in the FEDERAL REGISTER on Monday, April 14, 1975 (40 FR 16735) will begin at 8 a.m. each day instead of the times originally announced. It is anticipated that the Committee will work evening sessions also and that the meeting will be conducted on May 23-24 if the Committee determines it necessary in order to complete its recommendations.

The schedule change was agreed to by the Committee members at a public meeting on May 13, 1975, in order to provide adequate time for it to complete its deliberations.

The meeting will be held in the South Scott Room of the Gramercy Inn, 1616

Rhode Island Avenue NW., Washington, D.C. This location was announced in the FEDERAL REGISTER on Tuesday, April 29, 1975 (40 FR 18623).

In all other respects, the details of the April 14, 1975 notice of meeting remain the same. Any questions may be addressed to:

Ms. Jeanne Ferrone  
Committee Management Office  
Occupational Safety and Health Administration  
U.S. Department of Labor  
1726 M Street, NW., Room 200  
Washington, D.C. 20210  
Phone: (202) 961-2248, 2487

This FEDERAL REGISTER notice does not meet the 15 day deadline because it was only determined at the May 13 meeting that this meeting would be necessary in order that the Committee complete its activities in the prescribed time frame. Signed at Washington, D.C. this 14th day of May 1975.

JOHN STENDER,  
Assistant Secretary of Labor.

#### INTERSTATE COMMERCE COMMISSION

[Ex Parte No. 277 (Sub-No. 1)]

#### ADEQUACY OF INTERCITY RAIL PASSENGER SERVICE

MAY 13, 1975.

At a General Session of the INTERSTATE COMMERCE COMMISSION, held at its office in Washington, D.C., on the 9th day of May 1975.

It appearing, That in November 1973, the Amtrak Improvement Act of 1973 (Pub. L. 93-146) was enacted which, pursuant to section 14 of the Act, amended section 801 of the Rail Passenger Service Act of 1970 to read, in part, as follows:

(a) The Commission shall promulgate, within 60 days from the date of enactment of the Amtrak Improvement Act of 1973, and from time to time shall revise, such regulations as it considers as necessary to provide adequate service, equipment, tracks, and other facilities for quality intercity rail passenger service.

And it further appearing, That one of the purposes of this amendment was to remove the word "safe" from section 801, which previously provided as here pertinent; as follows:

The Commission is authorized to prescribe such regulations as it considers necessary to provide safe and adequate service, equipment, and facilities for intercity rail passenger service.

And it further appearing, That pursuant to the enactment of the Rail Passenger Service Act of 1970 that this Commission promulgated certain rules including 49 C.F.R. § 1124.27, which provides as follows:

The regulation in chapter II of this title, parts 225, 228, 230-234, and 236, prescribed by the Federal Railroad Administration, Department of Transportation, under rail safety statutes, are hereby adopted, con-

firmed, and continued in effect until modification or superseded by appropriate authority as to intercity rail passenger service. (Note: this regulation was formerly cited as 49 CFR 1124.1.)

And it further appearing, That good Commission in light of the Amtrak Improvement Act of 1973 has tentatively concluded that 49 CFR § 1124.27 should be repealed:

And if further appearing, That good cause exists for making the proposed repeal effective in less than 30 days from the date of its publication in the FEDERAL REGISTER:

It is ordered, That verified statements of fact, briefs and statements of position respecting the proposed repeal described above are hereby invited to be submitted on or before May 27, 1975, by any interested person whether or not such person is already a party to this proceeding.

It is further ordered, That any party requesting oral hearing shall set forth with specificity the need therefor and the evidence to be adduced.

And it is further ordered, That a copy of this order be served upon all parties, each public utility commission or board or similar regulatory body of each state and the Secretary of the Department of Transportation; that a copy be posted in the Office of the Secretary of this Commission and in each field office; and that a copy of this order be delivered to the Director, Division of Federal Register, for publication in the FEDERAL REGISTER.

By the Commission.

[SEAL] JOSEPH M. HARRINGTON,  
Acting Secretary.

[Notice No. 767]

#### ASSIGNMENT OF HEARINGS

MAY 13, 1975.

Cases assigned for hearing, postponement, cancellation or oral argument appear below and will be published only once. This list contains prospective assignments only and does not include cases previously assigned hearing dates. The hearings will be on the issues as presently reflected in the Official Docket of the Commission. An attempt will be made to publish notices of cancellation of hearings as promptly as possible, but interested parties should take appropriate steps to insure that they are notified of cancellation or postponements of hearings in which they are interested.

MC 119988 Sub-74, Great Western Trucking Co., Inc., now assigned June 9, 1975, at Dallas, Texas is cancelled and the application dismissed.

MC 76032 Sub-286, Navajo Freight Lines, Inc., now assigned July 21, 1975, at Carson City, Nevada is cancelled and the application is dismissed.

[SEAL] JOSEPH M. HARRINGTON,  
Acting Secretary.

# IRREGULAR-ROUTE MOTOR COMMON CARRIERS OF PROPERTY

## Elimination of Gateway Applications

MAY 12, 1975.

The following applications to eliminate gateways for the purpose of reducing highway congestion, alleviating air and noise pollution, minimizing safety hazards, and conserving fuel have been filed with the Interstate Commerce Commission under the Commission's Gateway Elimination Rules (49 CFR 1065(d)(2)), and notice thereof to all interested persons is hereby given as provided in such rules.

Carriers having a genuine interest in an application may file an original and three copies of verified statements in opposition with the Interstate Commerce Commission within 30 days from the date of publication. (This procedure is outlined in the Commission's report and order in Gateway Elimination, 119 M.C.C. 530.) A copy of the verified statement in opposition must also be served upon applicant or its named representative. The verified statement should contain all the evidence upon which protestant relies in the application proceeding including a detailed statement of protestant's interest in the proposal. No rebuttal statements will be accepted.

No. MC 102567 (Sub-No. 175G) (Correction), filed June 3, 1974, published in the FEDERAL REGISTER issue of March 20, 1975, and partially republished, as corrected, this issue. Applicant: MCNAIR TRANSPORT, INC., 4295 Meadow Lane, P.O. Drawer 5357, Bossier City, La. 71010. Applicant's representative: Tom Wright, 2040 North Loop West, Houston, Tex. 77018.

NOTE.—The purposes of this correction are (A) to correct (3)(c) to read: *Petroleum products* (except liquefied petroleum gases) as defined in Appendix XIII to the report in *Descriptions in Motor Carrier Certificates*, 61 M.C.C. 209, in bulk, in tank vehicles, from Destrehan, La., to points in Arkansas. The purpose of this filing is to eliminate first a gateway in Southwestern Arkansas within 150 miles of Henderson, Tex. and second, a gateway in that part of Louisiana bounded by a line beginning at the junction of the Arkansas-Louisiana state line and the Louisiana-Texas state line and extending south along the Louisiana-Texas state line to junction U.S. Highway 84, thence east along U.S. Highway 84 to junction U.S. Highway 167, thence north along U.S. Highway 167 to the Arkansas-Louisiana state line, thence west along the Arkansas-Louisiana state line to the point of beginning including points on the specified boundary line.

(B) To correct (3)(d) to read: From Lake Charles and Destrehan, La., to points in Missouri within 200 miles of Conway, Ark., except points on or west of Missouri Highway 5. The purpose of this filing is to eliminate first, a gateway in Southwestern Arkansas within 150 miles of Henderson, Tex., second, a gateway in any point in Louisiana bounded by a line beginning at the junction of the Arkansas-Louisiana state line and the Louisiana-Texas state line, and extending south along the Louisiana-Texas state line to junction U.S. Highway 84 to junction U.S. Highway 167, thence north along U.S. Highway 167 to the Arkansas-Louisiana state line,

## NOTICES

thence west along the Arkansas-Louisiana state line to the point of beginning including points on the specified boundary lines, which point is also within 150 miles of Henderson, Tex., and third, the site of the pipeline terminal of the Oklahoma-Mississippi River Products Line, Inc., at or near Conway, Ark. (C) to correct (5)(a) to read: *Such petroleum products* as are dry chemicals, in bulk, in tank vehicles, from Henderson, Tex. and points in Texas within 150 miles of Henderson, Tex., to points in Alabama, Arkansas, Georgia, Louisiana, Mississippi, Oklahoma, and Tennessee. The purpose of this filing is to eliminate a gateway at Baton Rouge, La. The rest of the notice remains as originally published.

No. MC 113843 (Sub-No. 203G) (Correction), filed June 4, 1974, published in the FEDERAL REGISTER issue of April 16, 1975, and republished, as corrected this issue. Applicant: REFRIGERATED FOOD EXPRESS, INC., 316 Summer Street, Boston, Mass. 02210. Applicant's representative: William J. Boyd, Suite 222, 600 Enterprise Drive, Oak Brook, Ill. 60521. Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: (1) *Frozen fish*, (a) from Rockland and Portland, Maine, to points in Iowa, Kentucky, Nebraska, and Ohio. The purpose of this filing is to eliminate the gateway of Galea, Kent County, Md. (b) from Portland, Rockland and Boothbay Harbor, Maine, to points in Missouri and Tennessee. The purpose of this filing is to eliminate the gateway of Detroit, Mich. (2) *Frozen fruits, frozen vegetables and frozen vegetable products*, (a) from Houlton, Caribou, and Corinna, Maine, to Chicago, Ill., Green Bay, and Milwaukee, Wis. and points in Indiana, Michigan, New Jersey, Ohio, and Pennsylvania. The purpose of this filing is to eliminate the gateway of Syracuse, N.Y. (b) from Houlton, Caribou, and Corinna, Maine, to points in Missouri, Tennessee, and Wisconsin. The purpose of this filing is to eliminate the gateways of Syracuse, N.Y. and Detroit, Mich.

(c) From Houlton, Caribou, and Corinna, Maine, to points in Arkansas, Colorado, Kansas, Minnesota, Nebraska, and Oklahoma. The purpose of this filing is to eliminate the gateway of Dundee, N.Y. (d) from Houlton, Caribou, and Corinna, Maine, to points in Michigan (except Detroit). The purpose of this filing is to eliminate the gateway of Pittsburgh, Pa. (e) from Houlton, Caribou, and Corinna, Maine, to Springfield, Ill., Louisville, Ky., St. Louis, Mo., Sioux City and Davenport, Iowa, Grand Forks, N. Dak., Sioux Falls, S. Dak., and Virginia. The purpose of this filing is to eliminate the gateway of Dundee, N.Y. (f) from Houlton, Caribou, and Corinna, Maine, to points in Delaware, Maryland, Kentucky, and West Virginia. The purpose of this filing is to eliminate the gateways of Buffalo or Brockport, N.Y. (g) from Houlton, Caribou, and Corinna, Maine, to points in Delaware, Maryland, Kentucky, West Virginia, Ohio, Indiana, Illinois, Missouri, Michigan, Maryland, New Jersey, Virginia, and the District of Columbia. The purpose of this filing is to eliminate the gateway of Elmira, N.Y.

(h) from Houlton, Caribou, and Corinna, Maine, to points in Colorado, Iowa, Minnesota, Nebraska, and Wisconsin. The purpose of this filing is to eliminate the gateways of Brockport, Morton or Le Roy, N.Y. (3) *frozen fruits, frozen vegetables*, from Houlton, Caribou, and Corinna, Maine, to Williamsburg and Norfolk, Va., Springfield, Ill., Louisville, Ky., Kenosha, Wis., Kansas City and Vinita Park, Mo. The purpose of this filing is to eliminate the gateway of Dundee, N.Y. (4) *frozen fruits*, (a) from Houlton, Caribou, and Corinna, Maine, to points in Arkansas, Colorado, Iowa, Kansas, Kentucky, Minnesota, Missouri, Nebraska, Oklahoma, Texas, and Wisconsin. The purpose of this filing is to eliminate the gateways of Geneva, Westfield, or Penn Yan, N.Y.

(b) From Houlton, Caribou, and Corinna, Maine, to points in Arkansas, Colorado, Iowa, Kansas, Minnesota, Nebraska, Oklahoma, Texas, and Wisconsin. The purpose of this filing is to eliminate the gateway of Elmira, N.Y. (c) from Houlton, Caribou, and Corinna, Maine, to points in Iowa, Kentucky (except Louisville), Missouri (except Kansas City and Vinita Park), Texas, and Wisconsin. The purpose of this filing is to eliminate the gateway of Dundee, N.Y. (5) *frozen vegetables and frozen vegetable products*, from Caribou, Maine to points in Illinois, Indiana, Iowa, Michigan, Nebraska, Ohio, West Virginia, and Wisconsin. The purpose of this filing is to eliminate the gateway of Pocomoke City, Md. (6) *frozen potatoes and potato products*, (a) from Presque Isle, Easton and Portland, Maine, to points in Tennessee and Wisconsin. The purpose of this filing is to eliminate the gateway of Detroit, Mich. (b) from Presque Isle, Easton, and Portland, Maine, to points in New York within 75 miles of and including Rochester. The purpose of this filing is to eliminate the gateway of Athens, Pa. (c) from Presque Isle, Easton, and Portland, Maine, to Cattaraugus, Chautauque, and Erie Counties, N.Y. The purpose of this filing is to eliminate the gateway of Buffalo, N.Y.

(d) From Presque Isle, Easton and Portland, Maine, to points in Arkansas, Colorado, Kansas, Minnesota, Nebraska and Oklahoma. The purpose of this filing is to eliminate the gateways of Athens, Pa. and Dundee, N.Y. (e) from Presque Isle, Easton, and Portland, Maine, to Springfield, Ill., Louisville, Ky., St. Louis, Mo., Grand Forks, N. Dak., Sioux Falls, S. Dak., and Virginia (except Hampton and Richmond, Va.). The purpose of this filing is to eliminate the gateways of Athens, Pa. and Dundee, N.Y. (f) from Presque Isle, Easton, and Portland, Maine, to the District of Columbia, Delaware, Maryland, Kentucky, West Virginia, Virginia, New Jersey, New York, Pennsylvania (points east of the Susquehanna River). The purpose of this filing is to eliminate the gateways of Athens, Pa. and Elmira, N.Y. (g) from Presque Isle, Easton, and Portland, Maine, to points in Colorado, Minnesota, and Nebraska. The purpose of this filing is to

eliminate the gateways of Athens, Pa. and Brockport, Morton, or Le Roy, N.Y.

NOTE.—The purpose of this republication is to state that MC 113843 (Sub-No. 203G), was incorrectly published in the Federal Register of April 16, 1975 and to state the correct MC 113843 (Sub-No. 203G).

The following letter-notices of proposals to eliminate gateways for the purpose of reducing highway congestion, alleviating air and noise pollution, minimizing safety hazards, and conserving fuel have been filed with the Interstate Commerce Commission under the Commission's Gateway Elimination Rules (49 CFR 1065), and notice thereof to all interested persons is hereby given as provided in such rules.

An original and two copies of protests against the proposed elimination of any gateway herein described may be filed with the Interstate Commerce Commission on or before May 26, 1975. A copy must also be served upon applicant or its representative. Protests against the elimination of a gateway will not operate to stay commencement of the proposed operation.

Successfully filed letter-notices of the same carrier under these rules will be numbered consecutively for convenience in identification. Protests, if any, must refer to such letter-notices by number.

No. MC 50069 (Sub-No. E8), filed May 15, 1974. Applicant: REFINERS TRANSPORT & TERMINAL CORPORATION, 445 Earlwood Avenue, Oregon, Ohio 43616. Applicant's representative: Jack A. Gollan (same as above). Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: (1) *Liquid chemicals*, from Peoria, Ill., to points in Connecticut, Delaware, Maine, Massachusetts, Maryland, New Jersey, New York, Pennsylvania, Rhode Island, Vermont, Virginia, and District of Columbia; and (2) *Liquid petroleum chemicals*, from Peoria, Ill., to points in West Virginia. The purpose of this filing is to eliminate the gateways of Carpentersville, Ill., in (1) above, and Ashland, Ky., in (2) above.

No. MC 50069 (Sub-No. E9), filed May 15, 1974. Applicant: REFINERS TRANSPORT & TERMINAL CORPORATION, 445 Earlwood Avenue, Oregon, Ohio 43616. Applicant's representative: Jack A. Gollan (same as above). Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Liquid petroleum chemicals*, from Terre Haute, Ind., to points in West Virginia and those points in New York west of a line beginning at Deposit, N.Y., and extending along New York Highway 8 to Utica, N.Y., thence along New York Highway 49 to Rome, N.Y., thence along New York Highway 69 to Camden, N.Y., thence along New York Highway 13 to Port Ontario, N.Y., and those points in Pennsylvania, north and west of a line beginning at the Ohio-Pennsylvania State line and extending along U.S. Highway 22 to Blairsville, Pa., thence due north to the New York-Penn-

## NOTICES

sylvania State line. The purpose of this filing is to eliminate the gateways of Titusville, Pa., Ashland, Kentucky, Lebanon, Columbus, and Warren, Ohio.

No. MC 50069 (Sub-No. E12), filed May 15, 1974. Applicant: REFINERS TRANSFER & TERMINAL CORPORATION, 445 Earlwood Avenue, Oregon, Ohio 43616. Applicant's representative: Jack A. Gollan (same as above). Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Liquid acids* (except nitric acid, anhydrous ammonia, and carbon dioxide), from Cairo, Ohio, and points within five miles thereof to points in Missouri, and those points in Illinois south of U.S. Highway 136, restricted against the transportation of acetone, ethyl acetate, alcohol, vodka, gin, proprietary antifreeze preparations, and chlorine chloride. The purpose of this filing is to eliminate the gateway of Terre Haute, Ind.

No. MC 52793 (Sub-No. E2), filed June 4, 1974. Applicant: BEKINS VAN LINES, INC., P.O. Box 109, LaGrange, Ill. 60525. Applicant's representative: Robert McClure (same as above). Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Household goods*, as defined by the Commission: (1) from points in Washington, Idaho, Montana, and Utah, on the one hand, and, on the other, points in Alabama, Arizona, Arkansas, California, Colorado, Connecticut, Delaware, Florida, Georgia, Illinois, Indiana, Kansas, Kentucky, Louisiana, Maryland, Massachusetts, Michigan, Minnesota, Mississippi, Missouri, Nevada, New Jersey, New York, New Mexico, North Carolina, North Dakota, Ohio, Oklahoma, Oregon, Pennsylvania, Rhode Island, South Carolina, South Dakota, Tennessee, Texas, Virginia, West Virginia, Wisconsin, Wyoming, Nebraska (except points within 50 miles of Sioux City, Iowa (except points within 50 miles of Omaha, Neb.)), the District of Columbia, and Idaho (except points within 50 miles of Spokane, Wash.); (2) from points in South Dakota on the one hand, and, on the other, points in Montana. The purpose of this filing is to eliminate the gateways of: in (1), Oregon, Nevada, Arizona, Colorado, Wyoming, and North Dakota; and in (2) Wyoming and North Dakota.

No. MC 52861 (Sub-No. E24), filed May 22, 1974. Applicant: WILLS TRUCKING, INC., 2535 Center Street, Cleveland, Ohio 44113. Applicant's representative: Paul F. Beery (same as above). Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Ferro alloys*, in bulk, in dump vehicles, between those points in Pennsylvania and West Virginia which are within 50 miles of Weirton, W. Va., on the one hand, and, on the other, points in Michigan within 40 miles of Monroe, Mich. The purpose of this filing is to eliminate the gateway of points in Ohio.

No. MC 52861 (Sub-No. E29), filed May 22, 1974. Applicant: WILLS TRUCKING, INC., 2535 Center Street, Cleveland, Ohio 44113. Applicant's representative: Paul F. Beery (same as above). Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Scrap metal*, in dump vehicles, between points in Michigan and Ohio (except Canton and points in Cuyahoga, Geauga, Lorain, and Portage Counties), on the one hand, and, on the other, those points in Pennsylvania and West Virginia within 50 miles of Weirton, W. Va. The purpose of this filing is to eliminate the gateways of points in Ohio within 50 miles of Weirton, W. Va., and points in West Virginia.

No. MC 52861 (Sub-No. E30), filed January 31, 1975. Applicant: WILLS TRUCKING, INC., 2535 Center St., Cleveland, Ohio 44113. Applicant's representative: Paul F. Beery, 8 East Broad St., Columbus, Ohio 43215. Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Ferro alloys*, in bulk, in dump vehicles, from points in Michigan within 40 miles of Monroe, Mich., to points in New York, Michigan, and Pennsylvania, except those points in Pennsylvania south of a line beginning at the Pennsylvania-Ohio State line and extending along Interstate Highway 80 to junction Interstate Highway 79 and west of a line beginning at junction Interstate Highway 79 and Interstate Highway 80 and extending along Interstate Highway 79 to junction Interstate Highway 76, thence along Interstate Highway 76 to junction Pennsylvania Highway 281, thence along Pennsylvania Highway 281 to the Pennsylvania-West Virginia State line, with no transportation for compensation on return except as otherwise authorized. The purpose of this filing is to eliminate the gateways of Toledo and Ashtabula, Ohio.

No. MC 64373 (Sub-No. E6), filed January 14, 1975. Applicant: CLARKSON BROS., INC., P.O. Box 25, Cowpens, S.C. 29330. Applicant's representative: Paul F. Sullivan Suite 711, 15th & New York Ave., NW., Washington, D.C. 20005. The purpose of this filing is to eliminate the gateway of Marion County, W. Va.

No. MC 64808 (Sub-No. E71), filed June 4, 1974. Applicant: W. S. THOMAS TRANSFER, INC., P.O. Box 507, Fairmont, W. Va. 26554. Applicant's representative: William J. Lavelle, 2310 Grant Bldg., Pittsburgh, Pa. 15219. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Household goods*, as defined by the Commission, between points in that part of Ohio on and east of a line beginning at the Ohio-Indiana State line and extending along U.S. Highway 219 to junction U.S. Highway 22, thence along U.S. Highway 22 to junction Interstate Highway 81, thence along Interstate Highway 81 to junction U.S. Highway 22, thence along U.S. Highway 22 to junction Interstate Highway 81, thence

line beginning at Lake Erie-Ohio shore and extending along Ohio Highway 45 to the West Virginia-Ohio State line, on the one hand, and, on the other, points in that part of West Virginia on and east of a line beginning at the Ohio-Kentucky State line and extending along Interstate Highway 64 to junction U.S. Highway 119, thence along U.S. Highway 119 to junction U.S. Highway 19, thence along U.S. Highway 19 to the Pennsylvania-West Virginia State line. The purpose of this filing is to eliminate the gateway of Marion County, W. Va.

No. MC 64808 (Sub-No. E72), filed June 4, 1974. Applicant: W. S. THOMAS TRANSFER, INC., P.O. Box 507, Fairmont, W. Va. 26554. Applicant's representative: William J. Lavelle, 2310 Grant Bldg., Pittsburgh, Pa. 15219. Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Household goods*, as defined by the Commission, between points in that part of Ohio on and north of a line beginning at the Ohio-West Virginia State line and extending along Ohio Highway 144 to junction Ohio Highway 7, thence along Ohio Highway 7 to junction U.S. Highway 50, thence along U.S. Highway 50 to junction Ohio Highway 56, thence along Ohio Highway 56 to junction U.S. Highway 22, thence along U.S. Highway 22 to junction U.S. Highway 35, thence along U.S. Highway 35 to junction Ohio Highway 49, thence along Ohio Highway 49 to junction Ohio Highway 26, thence along Ohio Highway 26 to the Ohio-Indiana State line, on the one hand, and, on the other, points in that part of West Virginia on and east of a line beginning at the Virginia-West Virginia State line and extending along Ohio Highway 39 to junction Ohio Highway 20, thence along Ohio Highway 20 to junction Ohio Highway 15, thence along Ohio Highway 15 to junction U.S. Highway 219, thence along U.S. Highway 219 to junction U.S. Highway 33, thence along U.S. Highway 33 to the West Virginia-Virginia State line. The purpose of this filing is to eliminate the gateway of Marion County, W. Va.

No. MC 64808 (Sub-No. E73), filed June 4, 1974. Applicant: W. S. THOMAS TRANSFER, INC., P.O. Box 697, Fairmont, W. Va. 26554. Applicant's representative: William J. Lavelle, 2310 Grant Bldg., Pittsburgh, Pa. 15219. Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Household goods*, as defined by the Commission, between points in Ohio, on the one hand, and, on the other, points in that part of West Virginia on and east of a line beginning at the West Virginia-Virginia State line and extending along U.S. Highway 250 to Fairmont, W. Va., thence along U.S. Highway 19 to the West Virginia-Pennsylvania State line. The purpose of this filing is to eliminate the gateway of Marion County, W. Va.

No. MC-65781 (Sub-No. E22), filed January 14, 1975. Applicant: DAWN MOVING & STORAGE, INC., 1000 First

Nat'l Bank Bldg., Minneapolis, Minn. 55402. Applicant's representative: Andrew Clark (same as above). Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Household goods*, as defined by the Commission; (1) between points in that part of Illinois on and north of a line beginning at the Illinois-Indiana State line, thence along Interstate Highway 80 to junction Illinois Highway 88, thence along Illinois Highway 88 to junction U.S. Highway 30, thence along U.S. Highway 30 to the Illinois-Iowa State line, on the one hand, and, on the other, points in Alabama (any point in Wisconsin)\*; (2) between points in Iowa, on the one hand, and, on the other, points in Virginia (Chicago, Ill.)\*; (3) between points in Wisconsin, on the one hand, and, on the other, points in Virginia (Chicago, Ill.)\*; (4) between points in Wisconsin, on the one hand, and, on the other, points in Alabama (Chicago, Ill.)\*; (5) between points in Wisconsin, on the one hand, and, on the other, points in Georgia (Chicago, Ill.)\*; (6) between points in Wisconsin, on the one hand, and, on the other, points in Kentucky (Chicago, Ill.)\*; (7) between points in Illinois on and north of Interstate Highway 80, on the one hand, and, on the other, points in Virginia (points in Wisconsin)\*; and (8) between points in Illinois north of Interstate Highway 80, on the one hand, and, on the other, points in Georgia (points in Wisconsin)\*. The purpose of this filing is to eliminate the gateways indicated by asterisks above.

No. MC 107002 (Sub-No. E14), filed May 12, 1974. Applicant: MILLER TRANSPORTERS, INC., P.O. Box 1123, Jackson, Miss. 39205. Applicant's representative: H. D. Miller, Jr. (same as above). Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Anhydrous ammonia*, in bulk, in tank vehicles, from El Dorado, Ark., to points in Florida. The purpose of this filing is to eliminate the gateway of Mississippi and Mobile, Ala.

No. MC 107002 (Sub-No. E24), filed May 12, 1974. Applicant: MILLER TRANSPORTERS, INC., P.O. Box 1123, Jackson, Miss. 39205. Applicant's representative: H. D. Miller, Jr. (same as above). Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Anhydrous ammonia*, in bulk, in tank vehicles, from El Dorado, Ark., to points in Kentucky. The purpose of this filing is to eliminate the gateway of Barfield, Ark., and points within 10 miles thereof.

No. MC 107002 (Sub-No. E25), filed May 12, 1974. Applicant: MILLER TRANSPORTERS, INC., P.O. Box 1123, Jackson, Miss. 39205. Applicant's representative: H. D. Miller, Jr. (same as above). Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Anhydrous ammonia*, in bulk, in tank vehicles,

from El Dorado, Ark., to points in Michigan. The purpose of this filing is to eliminate the gateway of Barfield, Ark., and points within 10 miles thereof.

No. MC 107002 (Sub-No. E26), filed May 12, 1974. Applicant: MILLER TRANSPORTERS, INC., P.O. Box 1123, Jackson, Miss. 39205. Applicant's representative: H. D. Miller, Jr. (same as above). Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Anhydrous ammonia*, in bulk, in tank vehicles, from El Dorado, Ark., to points in Indiana. The purpose of this filing is to eliminate the gateway of Barfield, Ark., and points within 10 miles thereof.

No. MC 107002 (Sub-No. E27), filed May 12, 1974. Applicant: MILLER TRANSPORTERS, INC., P.O. Box 1123, Jackson, Miss. 39205. Applicant's representative: H. D. Miller, Jr. (same as above). Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Petroleum and petroleum products*, in bulk, in tank vehicles, from Cordova, Ala., to points in Louisiana. The purpose of this filing is to eliminate the gateway of Lumberton, Miss.

No. MC 107002 (Sub-No. E28), filed May 12, 1974. Applicant: MILLER TRANSPORTERS, INC., P.O. Box 1123, Jackson, Miss. 39205. Applicant's representative: H. D. Miller, Jr. (same as above). Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Liquid chemicals*, in bulk, in tank vehicles (except fertilizer and fertilizer ingredients), from Jackson, Miss., to points in North Carolina. The purpose of this filing is to eliminate the gateway of Fox, Ala.

No. MC 107002 (Sub-No. E29), filed May 12, 1974. Applicant: MILLER TRANSPORTERS, INC., P.O. Box 1123, Jackson, Miss. 39205. Applicant's representative: H. D. Miller, Jr. (same as above). Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Chemicals*, in bulk, in tank vehicles (except fertilizer and fertilizer ingredients), from Jackson, Miss., to points in Florida. The purpose of this filing is to eliminate the gateway of Mobile, Ala.

No. MC 107002 (Sub-No. E30), filed May 12, 1974. Applicant: MILLER TRANSPORTERS, INC., P.O. Box 1123, Jackson, Miss. 39205. Applicant's representative: H. D. Miller, Jr. (same as above). Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Liquid chemicals*, in bulk, in tank vehicles (except fertilizer and fertilizer ingredients), from Jackson, Miss., to points in South Carolina. The purpose of this filing is to eliminate the gateway of Fox, Ala.

No. MC 107002 (Sub-No. E31), filed May 12, 1974. Applicant: MILLER TRANSPORTERS, INC., P.O. Box 1123, Jackson, Miss. 39205. Applicant's representative: H. D. Miller, Jr. (same as

above). Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Liquid chemicals*, in bulk, in tank vehicles (except fertilizer, fertilizer ingredients, and liquefied petroleum gases), from Jackson, Miss., to points in West Virginia. The purpose of this filing is to eliminate the gateway of the plant site of Monsanto Chemical Company in Anniston, Ala.

No. MC 107002 (Sub-No. E32), filed May 12, 1974. Applicant: MILLER TRANSPORTERS, INC., P.O. Box 1123, Jackson, Miss. 39205. Applicant's representative: H. D. Miller, Jr. (same as above). Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Anhydrous ammonia*, in bulk, in tank vehicles, from El Dorado, Ark., to points in Iowa on, north, and east of a line beginning at the Missouri-Iowa State line and extending along Iowa Highway 5 to junction Interstate Highway 35, thence along Interstate Highway 35 to junction Iowa Highway 141, thence along Iowa Highway 141 to junction Iowa Highway 144, thence along Iowa Highway 144 to junction U.S. Highway 30, thence along U.S. Highway 30 to junction U.S. Highway 71, thence along U.S. Highway 71 to junction Iowa Highway 7, thence along Iowa Highway 7 to junction U.S. Highway 59, thence along U.S. Highway 59 to the Iowa-Minnesota State line. The purpose of this filing is to eliminate the gateway of Barfield, Ark., and points within 10 miles thereof.

No. MC 107002 (Sub-No. E33), filed May 12, 1974. Applicant: MILLER TRANSPORTERS, INC., P.O. Box 1123, Jackson, Miss. 39205. Applicant's representative: H. D. Miller, Jr. (same as above). Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Anhydrous ammonia*, in bulk, in tank vehicles, from El Dorado, Ark., to points in North Carolina. The purpose of this filing is to eliminate the gateway of Tuscaloosa, Ala.

No. MC 107002 (Sub-No. E34), filed May 12, 1974. Applicant: MILLER TRANSPORTERS, INC., P.O. Box 1123, Jackson, Miss. 39205. Applicant's representative: H. D. Miller, Jr. (same as above). Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Anhydrous ammonia*, in bulk, in tank vehicles, from El Dorado, Ark., to points in Georgia. The purpose of this filing is to eliminate the gateway of Tuscaloosa, Ala.

No. MC 107002 (Sub-No. E35), filed May 12, 1974. Applicant: MILLER TRANSPORTERS, INC., P.O. Box 1123, Jackson, Miss. 39205. Applicant's representative: H. D. Miller, Jr. (same as above). Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Anhydrous ammonia*, in bulk, in tank vehicles, from El Dorado, Ark., to points in South Carolina. The purpose of this filing is to eliminate the gateway of Tuscaloosa, Ala.

No. MC 107002 (Sub-No. E36), filed May 12, 1974. Applicant: MILLER TRANSPORTERS, INC., P.O. Box 1123, Jackson, Miss. 39205. Applicant's representative: H. D. Miller, Jr. (same as above). Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Anhydrous ammonia*, in bulk, in tank vehicles, from El Dorado, Ark., to points in Wisconsin. The purpose of this filing is to eliminate the gateway of Barfield, Ark., and points within 10 miles thereof.

No. MC 107002 (Sub-No. E37), filed May 12, 1974. Applicant: MILLER TRANSPORTERS, INC., P.O. Box 1123, Jackson, Miss. 39205. Applicant's representative: H. D. Miller, Jr. (same as above). Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Anhydrous ammonia*, in bulk, in tank vehicles, from El Dorado, Ark., to points in Illinois. The purpose of this filing is to eliminate the gateway of Barfield, Ark., and points within 10 miles thereof.

No. MC 107515 (Sub-No. E556), filed January 27, 1975. Applicant: REFRIGERATED TRANSPORT CO., INC., P.O. Box 308, Forest Park, Ga. 33050. Applicant's representative: R. M. Tittlebaum, Suite 375, 3379 Peachtree Rd. NE., Atlanta, Ga. 30326. Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting:

(A) (1) *Frozen edible meats, meat products, and meat by-products*, from Pekin, Ill., the plant site of Swift & Co., at Rochelle, Ill., the plant site of Agar Packing Co., at Momence, Ill., the plant site of Wilson & Co., at Monmouth, Ill., the plant site of Armour & Co., at Sterling, Ill., the plant site of Geo. A. Hormel at Bureau, Ill., the plant site of Oscar Mayer at Beardstown, Ill., and the plant site of Aurora Packing Co., at North Aurora, Ill.; (2) *Frozen dairy products*, from the plant site of Swift & Co., at Rochelle, Ill.; and (3) *Frozen foods* (except frozen fruits, frozen berries, and frozen vegetables) from Quincy, Ill., to points in that portion of California on, south, or west of a line beginning at Morro Bay and extending along California Highway 41 to junction U.S. Highway 101, thence along U.S. Highway 101 to junction California Highway 58, thence along California Highway 58 to junction U.S. Highway 395, thence along U.S. Highway 395 to junction Interstate Highway 15, thence along Interstate Highway 15 to junction Interstate Highway 5, thence along Interstate Highway 5 to the United States-Mexico International Boundary line. (B) (1) The commodities described in (A) (1) (except Quincy and Beardstown) to points in that part of Arizona, on, south, or west of a line beginning at Nogales and extending along U.S. Highway 89 to junction Interstate Highway 40, thence along Interstate Highway 40 to the Arizona-California State line; (2) *Frozen dairy products*, from the origin specified in (A) (2) to the destinations in (B) (1)

above; and (3) The commodities described in (A) (1) from Pekin, Ill., and the plant sites of Swift & Co., at Rochelle, Ill., Agar Packing Co., at Momence, Ill., Armour & Co., at Sterling, Ill., Geo. A. Hormel at Bureau, Ill., and North Aurora Packing Co., at North Auburn, Ill., to Las Vegas, Nev., and points in California on, south, or west of a line beginning at the California-Nevada State line and extending along Interstate Highway 15 to junction California Highway 58, thence along California Highway 58 to junction Interstate Highway 5, thence along Interstate Highway 5 to junction Interstate Highway 80, thence along Interstate Highway 80 to San Francisco. The purpose of this filing is to eliminate the gateway of Union City, Tenn.

No. MC 107515 (Sub-No. E609), filed May 29, 1974. Applicant: REFRIGERATED TRANSPORT CO., INC., P.O. Box 308, Forest Park, Ga. 33050. Applicant's representative: Bruce E. Mitchell, Suite 375, 3379 Peachtree Rd. NE., Atlanta, Ga. 30326. Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Fresh and cured meats and dairy products*, as described in the Appendix to the report in *Modification of Permits—Packing-house Products*, 48 MCC 628; (1) between points in Louisiana, and Mississippi, on the one hand, and, on the other, points in North Carolina and South Carolina; and (2) between points in Alabama, on the one hand, and, on the other, points in South Carolina and points in that part of North Carolina on and east of U.S. Highway 23. The purpose of this filing is to eliminate the gateway of Atlanta, Ga., or Montezuma, Ga.

No. MC 107515 (Sub-No. E610), filed January 27, 1975. Applicant: REFRIGERATED TRANSPORT CO., INC., P.O. Box 308, Forest Park, Ga. 33050. Applicant's representative: R. M. Tittlebaum, Suite 375, 3379 Peachtree Rd. NE., Atlanta, Ga. 30326. Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Frozen foods*, in vehicles equipped with mechanical refrigeration, from points in Lake and Du Page Counties, Ill., to points in that portion of New Mexico on or south of a line beginning at the Texas-New Mexico State line and extending along U.S. Highway 66 to junction New Mexico Highway 129, thence along New Mexico Highway 129 to junction New Mexico Highway 104, thence along New Mexico Highway 104, to junction New Mexico Highway 3, thence along New Mexico Highway 3 to junction New Mexico Highway 75, thence along New Mexico Highway 75 to junction New Mexico Highway 76, thence along New Mexico Highway 76 to junction New Mexico Highway 4, thence along New Mexico Highway 4 to junction New Mexico Highway 126, thence along New Mexico Highway 126 to junction New Mexico Highway 44, thence along New Mexico Highway 44 to junction New Mexico Highway 57, thence along New Mexico Highway 57 to

junction U.S. Highway 66, thence along U.S. Highway 66 to the Arizona-New Mexico State line. The purpose of this filing is to eliminate the gateway of Dyersburg, Tenn.

No. MC 107515 (Sub-No. E611), filed January 27, 1975. Applicant: REFRIGERATED TRANSPORT CO., INC., P.O. Box 308, Forest Park, Ga. 33050. Applicant's representative: Bruce E. Mitchell, Suite 375, 3379 Peachtree Rd. NE., Atlanta, Ga. 30326. Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Frozen foods*; (1) from points in California on and south of a line beginning at the California-Nevada State line and extending along U.S. Highway 6 to junction California Highway 120, thence along California Highway 120 to junction Interstate Highway 205, thence along Interstate Highway 205 to junction Interstate Highway 580, thence along Interstate Highway 580 to junction Interstate Highway 80, thence along Interstate Highway 80 to San Francisco, to points in Illinois on, south, and east of a line beginning at the Illinois-Missouri State line and extending along Illinois Highway 150 to junction Illinois Highway 154, thence along Illinois Highway 154 to junction U.S. Highway 51, thence along U.S. Highway 51 to junction U.S. Highway 50, thence along U.S. Highway 50 to junction Interstate Highway 57, thence along Interstate Highway 57 to junction Interstate Highway 74, thence along Interstate Highway 74 to the Illinois-Indiana State line; (2) from points in California in and south of Monterey, San Benito, Fresno, Tulare, Kern, and San Bernardino Counties, Calif., to points in Cook and Will Counties, Ill., and those points in Illinois on and south and east of U.S. Highway 66, and St. Louis, Mo., and Detroit, Mich.; and (3) from Los Angeles, Calif., to points in Lake, Cook, Kane, Will, DuPage Counties, Ill., Aurora, Ill., and points in Illinois on, east, and south of a line beginning at the Illinois-Missouri State line, and St. Louis, Mo., Illinois Highway 31 to junction U.S. Highway 30, thence along U.S. Highway 30 to junction U.S. Highway 66, thence along U.S. Highway 66 to the Illinois-Missouri State line, and St. Louis, Mo., and Detroit, Mich. The purpose of this filing is to eliminate the gateway of Florence, Ala.

No. MC 113855 (Sub-No. E15), filed May 30, 1974. Applicant: INTERNATIONAL TRANSPORT, INC., 2450 Marion Rd. SE., Rochester, Minn. 55901. Applicant's representative: Michael E. Miller, 520 First Nat'l Bank Bldg., Fargo, N. Dak. 58102. Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Loaders, conveyors, screens, grizzlies and when moving in combination loads on the same vehicle from the same consignor or consignors of the above-specified commodities, attachments, accessories, and parts of or for the above-specified equipment and machinery*; (a) from Waukesha and Milwaukee Counties, Wis.,

to points in Nevada and Arizona; (b) from points in Illinois bounded by an area south of a line beginning at the Iowa-Illinois State line at or near Moline, Ill., and extending along U.S. Highway 6 to Joliet, Ill., and thence along U.S. Highway 30 to the Illinois-Indiana State line near Chicago Heights, Ill., and on and north of U.S. Highway 36 to points in Nevada; (c) from points in Illinois bounded by an area south of a line beginning at the Iowa-Illinois State line at or near Moline, Ill., and extending along U.S. Highway 6 to Joliet, Ill., and thence along U.S. Highway 30 to the Illinois-Indiana State line near Chicago Heights, Ill., and on and north of Illinois Highway 17 to points in Arizona; and (d) from points in Illinois bounded by an area on and north of Illinois Highway 39 and on and south of Illinois Highway 17, to points in Arizona on and west of U.S. Highway 89. The purpose of this filing is to eliminate the gateway of Sioux Falls, S. Dak.

No. MC 113855 (Sub-No. E16), filed May 30, 1974. Applicant: INTERNATIONAL TRANSPORT, INC., 2450 Marion Rd. SE., Rochester, Minn. 55901. Applicant's representative: Michael E. Miller, 520 First Nat'l Bank Bldg., Fargo, N. Dak. 58102. Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: (1) *Road construction machinery and equipment*; (2) *New construction, road-building, earth-moving, excavating, loading, maintenance, logging, and mining machinery and equipment tractors* (not including truck-tractors), and *pipelayers* and, when moving in combination loads on the same vehicle from the same consignor or consignors of the above-specified commodities, *generators, internal combustion engines, and generators and engines combined* (except aircraft and missile engines), and *attachments, accessories, and parts of or for the above-specified equipment and machinery*, the transportation of which, because of their size or weight, require the use of special equipment, and related machinery, parts, and related contractors' materials and supplies when their transportation is incidental to the transportation by said carrier of commodities which by reason of size or weight require special equipment; and (3) *Self-propelled articles* described in (2) above, not requiring special equipment for their transportation, each weighing 15,000 pounds or more and related machinery, tools, parts, and supplies moving in connection therewith, from points in Waukesha and Milwaukee Counties, Wis., points in Madison County, Ill., and points in that part of Illinois bounded by an area south of a line beginning at the Iowa-Illinois State line at or near Moline, Ill., and extending along U.S. Highway 6 to Joliet, Ill., thence along U.S. Highway 3 to the Illinois-Indiana State line near Chicago Heights, Ill., and on and north of U.S. Highway 36 to points in California, restricted against any service to pipelines, pipeline rights-of-way, pump stations, or pipeline construction

projects along such rights-of-way other than in California. The purpose of this filing is to eliminate the gateways of Beresford, S. Dak., or Sioux Falls, S. Dak., or Dell Rapids, S. Dak., or Hawarden, S. Dak.

No. MC 113855 (Sub-No. E17), filed May 30, 1974. Applicant: INTERNATIONAL TRANSPORT, INC., 2450 Marion Rd. SE., Rochester, Minn. 55901. Applicant's representative: Michael E. Miller, 520 First Nat'l Bank Bldg., Fargo, N. Dak. 58102. Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Power land cleaning and land clearing machinery and equipment and attachments therefor*, from Pomona, Calif., to points in North Carolina on and east of U.S. Highway 321. The purpose of this filing is to eliminate the gateway of Minneapolis, Minn.

No. MC 113855 (Sub-No. E18), filed May 30, 1974. Applicant: INTERNATIONAL TRANSPORT, INC., 2450 Marion Rd. SE., Rochester, Minn. 55901. Applicant's representative: Michael E. Miller, 520 First Nat'l Bank Bldg., Fargo, N. Dak. 58102. Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Rollers, compactors, asphalt pavers, loading and grading equipment and truck hitches for asphalt pavers*, from points in Milwaukee and Waukesha Counties, Wis., to points in California in and north of Santa Cruz, Santa Clara, Stanislaus, Calaveras and Alpine Counties, restricted against any service to pipelines, pipeline rights-of-way, pump stations, or pipeline construction projects along such right-of-way other than in California. The purpose of this filing is to eliminate the gateway of Salem, Ore.

No. MC 113855 (Sub-No. E22), filed May 30, 1974. Applicant: INTERNATIONAL TRANSPORT, INC., 2450 Marion Rd. SE., Rochester, Minn. 55901. Applicant's representative: Michael E. Miller, 520 First Nat'l Bank Bldg., Fargo, N. Dak. 58102. Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: (1) *Tractors*; (2) *Agricultural earth-moving, excavating, loading and maintenance machinery and equipment*, and, when moving in combination loads on the same vehicle from the same consignor or consignors of the above-specified commodities; (3) *Attachments and parts, of or for the above-specified equipment and machinery*; from Milwaukee and Waukesha Counties, Wis., to points in Nevada. The purpose of this filing is to eliminate the gateway of Gwinner, N. Dak.

No. MC 113855 (Sub-No. E48), filed May 30, 1974. Applicant: INTERNATIONAL TRANSPORT, INC., 2450 Marion Rd. SE., Rochester, Minn. 55901. Applicant's representative: Michael E. Miller, 520 First Nat'l Bank Bldg., Fargo, N. Dak. 58102. Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting:

*Agricultural augers, front end loaders, lift trucks, and, when moving in combination loads on the same vehicle from the same consignor or consignors of the above-specified commodities, attachments and parts of or for the above-specified equipment and machinery*; (a) from points in that part of Illinois south of a line beginning at the Iowa-Illinois State line at or near Moline, Ill., and extending along U.S. Highway 6 to Joliet, Ill., and thence along U.S. Highway 30 to the Illinois-Indiana State line near Chicago Heights, Ill., and on and north of U.S. Highway 36 to points in California located north of the counties of San Luis Obispo, Kern, and San Bernardino; (b) from points in Milwaukee and Waukesha Counties, Wis., to points in Iowa-Illinois (except Imperial County and points in Riverside and San Bernardino Counties, Calif., east of U.S. Highway 395), restricted against any service to pipelines, pipeline rights-of-way, pump stations, or pipeline construction projects along such right-of-way other than in California. The purpose of this filing is to eliminate the gateways of Sioux Falls, S. Dak., and Sparks, Nev.

No. MC 113855 (Sub-No. E49), filed May 30, 1974. Applicant: INTERNATIONAL TRANSPORT, INC., 2450 Marion Rd. SE., Rochester, Minn. 55901. Applicant's representative: Michael E. Miller, 520 First Nat'l Bank Bldg., Fargo, N. Dak. 58102. Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Loaders, conveyors, screens, grizzlies, and attachments, accessories, and parts which are road construction materials, supplies, or equipment, from points in Minnesota north of a line beginning at East Grand Forks, Minn., and extending along U.S. Highway 2 to junction U.S. Highway 71, thence along U.S. Highway 71 to the United States-Canada International Boundary line near International Falls, Minn., including the points named and points on the indicated portions of the highways specified, to points in California (except points in Imperial County, and points in Riverside and San Bernardino Counties east of U.S. Highway 395). The purpose of this filing is to eliminate the gateways of Sparks, Nev., and Sioux Falls, S. Dak.*

No. MC 113855 (Sub-No. E50), filed May 30, 1974. Applicant: INTERNATIONAL TRANSPORT, INC., 2450 Marion Rd. SE., Rochester, Minn. 55901. Applicant's representative: Michael E. Miller, 520 First Nat'l Bank Bldg., Fargo, N. Dak. 58102. Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: (1) *Tractors, front end loaders, lift trucks, self-propelled agricultural machinery, agricultural hoisting equipment*; (2) *Attachments for the commodities specified in (1) above; and (3) parts of the commodities specified in (1) and (2) above when moving in mixed loads with any of said commodities, from Schofield, Wis., and the facilities of Drott Manufacturing Corporation, at King and Harrison, Wis., to points in New Mexico. The*

purpose of this filing is to eliminate the gateway of Fargo or Gwinner, N. Dak.

No. MC 113855 (Sub-No. E52), filed May 30, 1974. Applicant: INTERNATIONAL TRANSPORT, INC., 2450 Marion Rd. SE., Rochester, Minn. 55901. Applicant's representative: Michael E. Miller, 520 First Nat'l Bank Bldg., Fargo, N. Dak. 58102. Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Asbestos cement pipe, conduit and couplings with accessories necessary for the installation thereof, from Riverside, Calif., to points in Nebraska on and north of a line beginning at the Nebraska-Iowa State line and extending along Nebraska Highway 92 to junction Nebraska Highway 2, thence along Nebraska Highway 2 to the Nebraska-South Dakota State line, to Iowa, Minnesota, and Wisconsin. The purpose of this filing is to eliminate the gateway of Big Horn County, Wyo.*

No. MC 113855 (Sub-No. E55), filed May 30, 1974. Applicant: INTERNATIONAL TRANSPORT, INC., 2450 Marion Rd. SE., Rochester, Minn. 55901. Applicant's representative: Michael E. Miller, 520 First Nat'l Bank Bldg., Fargo, N. Dak. 58102. Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: (1) *Commodities, the transportation of which, because of their size or weight, require the use of special equipment, and related machinery, parts, and related contractors' materials and supplies when their transportation is incidental to the transportation by said carrier of commodities which by reason of size or weight require special equipment; and (2) Self-propelled articles, each weighing 15,000 pounds or more, and related machinery, tools, parts, and supplies moving in connection therewith (restricted to commodities transported on trailers)*; (a) between points in Minnesota on and west of a line beginning at the United States-Canada International Boundary line on U.S. Highway 59 north of Lancaster, Minn., thence along U.S. Highway 59 to Detroit Lake, Minn., thence along U.S. Highway 10 to junction U.S. Highway 71, thence along U.S. Highway 71 to the Iowa-Minnesota State line, on the one hand, and, on the other, points in Illinois (except points in Jo Daviess, Stephenson, Winnebago, Boone, McHenry, and Lake Counties); (b) between points in Minnesota on and east of a line beginning at the United States-Canada International Boundary line on U.S. Highway 59 north of Lancaster, Minn., thence along U.S. Highway 59 to Detroit Lake, Minn., thence along U.S. Highway 10 to junction U.S. Highway 71, thence along U.S. Highway 71 to the Iowa-Minnesota State line, and on and west of a line beginning at the United States-Canada International Boundary line at or near Bandette, Minn., thence along Minnesota Highway 72 to junction U.S. Highway 71, thence along U.S. Highway 71 to junction U.S. Highway 2, thence along U.S. Highway 2 to junction U.S. Highway

371, thence along U.S. Highway 371 to junction U.S. Highway 10, thence along U.S. Highway 10 to St. Cloud, Minn., thence along Minnesota Highway 15 to the Minnesota-Iowa State line, on the one hand, and, on the other, points in Illinois on and south of U.S. Highway 6; and (c) between points in Koochiching County, Minn., on the one hand, and, on the other, points in Illinois on and west of a line beginning at the Illinois-Missouri State line at or near Quincy, Ill., thence along Illinois Highway 104 to junction Illinois Highway 29, thence along Illinois Highway 29 to junction U.S. Highway 51, thence along U.S. Highway 51 to junction U.S. Highway 460, thence along U.S. Highway 460 to the Illinois-Indiana State line. The purpose of this filing is to eliminate the gateway of points in Minnesota within 50 miles of Sioux Falls, S. Dak.

No. MC 113855 (Sub-No. E59), filed May 30, 1974. Applicant: INTERNATIONAL TRANSPORT, INC., 2450 Marion Rd. SE., Rochester, Minn. 55901. Applicant's representative: Michael E. Miller, 520 First Nat'l Bank Bldg., Fargo, N. Dak. 58102. Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: (1) *Commodities, the transportation of which, because of their size or weight, require the use of special equipment, and related machinery, parts, and related contractors' materials and supplies when their transportation is incidental to the transportation by said carrier of commodities which by reason of size or weight require special equipment, and (2) Self-propelled articles, each weighing 15,000 pounds or more and related machinery, tools, parts, and supplies moving in connection therewith (restricted to commodities transported on trailers)*; (a) between points in Kansas on and west of U.S. Highway 281, on the one hand, and, on the other, points in Iowa on and north of a line beginning at the Iowa-Nebraska State line at the junction of the state line and Iowa Highway 175, thence along Iowa Highway 175 to junction Iowa Highway 141 to junction Interstate Highway 35, thence along Interstate Highway 35 to junction Interstate Highway 80, thence along Interstate Highway 80 to junction Iowa Highway 38, thence along Iowa Highway 38 to the Iowa-Illinois State line; (b) between points in Kansas within an area east of U.S. Highway 281 and on and west of U.S. Highway 77, on the one hand, and, on the other, points in Iowa on and north of U.S. Highway 20; and (c) between points in Kansas east of U.S. Highway 77, on the one hand, and, on the other, points in Iowa on, north, and west of a line beginning at the junction of the Iowa-Nebraska State line and U.S. Highway 20, thence along U.S. Highway 20 to junction U.S. Highway 59, thence along U.S. Highway 59 to the Iowa-Minnesota State line. The purpose of this filing is to eliminate the gateway of South Dakota.

No. MC 113855 (Sub-No. E147), filed May 30, 1974. Applicant: INTERNATIONAL TRANSPORT, INC., 2450 Mar-

ion Rd. SE., Rochester, Minn. 55901. Applicant's representative: Michael E. Miller, 502 First Nat'l Bank Bldg., Fargo, N. Dak. 58102. Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: (1) *Trailers, agricultural implements and parts, and farm machinery* and parts, the transportation of which, because of their size or weight, require the use of special equipment, and related machinery parts when their transportation is incidental to the transportation by said carrier of commodities which by reason of size or weight require special equipment, and (2) *self-propelled articles* described in (1) above, not requiring special equipment for their transportation, each weighing 15,000 pounds or more and related parts moving in connection therewith (restricted to commodities transported on trailers), from Ottumwa, Iowa, Chicago, East Moline, Rock Island, and Springfield, Ill., to points in Minnesota on and west of a line beginning at the Minnesota-Iowa State line extending along Interstate Highway 35 to the junction of U.S. Highway 73, thence along U.S. Highway 73 to junction U.S. Highway 53, thence along U.S. Highway 53 to the International Falls, Minn., and that part of North Dakota south of a line beginning at the Montana-North Dakota State line and extending along U.S. Highway 2 to Lakota, N. Dak., thence along North Dakota Highway 1 to the United States-Canada Boundary line, not including points on the indicated portions of the highways specified other than Minot, N. Dak. The purpose of this filing is to eliminate the gateways of Alden, Minn., and points within 10 miles of Alden.

No. MC 113855 (Sub-No. E151), filed May 30, 1974. Applicant: INTERNATIONAL TRANSPORT, INC., 2450 Marion Rd. SE., Rochester, Minn. 55901. Applicant's representative: Michael E. Miller, 502 First Nat'l Bank Bldg., Fargo, N. Dak. 58102. Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: (1) *Hay balers and parts*, and (2) *agricultural stump cutting, trench back-filling, and tree-moving equipment* and parts for such commodities, from Madras, Oreg., to points in Louisiana, Mississippi, Alabama, Georgia, Florida, South Carolina, North Carolina, Tennessee, Kentucky, Virginia, West Virginia, Maryland, Delaware, New Jersey, Pennsylvania, Washington, District of Columbia, Connecticut, Massachusetts, Rhode Island, New York, Vermont, New Hampshire, Maine, and Michigan. The purpose of this filing is to eliminate the gateway of Pella, Iowa.

No. MC 113855 Sub-No. E154), filed May 30, 1974. Applicant: INTERNATIONAL TRANSPORT, INC., 2450 Marion Rd. SE., Rochester, Minn., 55901. Applicant's representative: Michael E. Miller, 502 First Nat'l Bank Bldg., Fargo, N. Dak. 58102. Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: (A)

Commodities which, because of size or weight, require the use of special equipment or special handling (except boats and iron and steel articles), and related machinery parts and related contractor's equipment, materials, and supplies when their transportation is incidental to the transportation of commodities which, because of size or weight, require the use of special equipment, and (B) *Self-propelled articles*, each weighing 15,000 pounds or more, and related machinery, tools, parts, and supplies moving in connection therewith (restricted to commodities which are transported in trailers); (1) between points in Iowa on and west of U.S. Highway 77, on the one hand, and, on the other, points in New Jersey and Delaware; and (2) between points in Iowa on and west of U.S. Highway 59, on the one hand, and, on the other, points in Washington, D.C. The purpose of this filing is to eliminate the gateways of points in South Dakota and points in Pennsylvania on and east of a line beginning at the Maryland-Pennsylvania State line and extending along unnumbered highway (formerly portion U.S. Highway 15) to junction Business U.S. Highway 15 near Fairplay, Pa., thence along Business U.S. Highway 15 through Gettysburg, Pa., to junction U.S. Highway 15, thence along U.S. Highway 15 to junction unnumbered highway (formerly portion U.S. Highway 15), thence along unnumbered highway through Clear Spring, Pa., to junction U.S. Highway 15, thence along U.S. Highway 15 to the Pennsylvania-New York State line (except points in Berks, Bucks, Chester, Delaware, Montgomery, and Philadelphia Counties, Pa.), and points in Pennsylvania on and east of the above-described line in Adams, York, Cumberland, Perry, Dauphin, Lebanon, and Lancaster Counties, Pa., and points in Pennsylvania on and east of U.S. Highway 15 and north of the East Branch of the Susquehanna River in Tioga, Bradford, Lycoming, Sullivan, Union, Snyder, Northumberland, Montour, and Columbia Counties, Pa.).

No. MC 114019 (Sub-No. E358) (Correction), filed May 16, 1974, published in the FEDERAL REGISTER March 6, 1975. Applicant: MIDWEST EMERY FREIGHT SYSTEM, INC., 7000 S. Pulaski Rd., Chicago, Ill. 60629. Applicant's representative: Arthur J. Sibik (same as above). Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *General commodities* (except those of unusual value, household goods as defined by the Commission, Classes A and B explosives, livestock, commodities in bulk, and commodities requiring special equipment), from Sparrows Point and Baltimore, Md.; New York, N.Y., and points within 30 miles thereof; points in those parts of New Jersey, Delaware, and Maryland, which are located within 30 miles of Philadelphia, Pa.; points in that part of New York on and west of a line beginning at Lake Ontario and extending along U.S. Highway 15 to junction New York Highway 245, thence along New

York Highway 245 to junction New York Highway 36, thence along New York Highway 36 to junction New York Highway 21, thence along New York Highway 21 to junction New York Highway 17, thence along New York Highway 17 to the New York-Pennsylvania State line; points in Pennsylvania and those in West Virginia in, north, and east of Wetzel, Harrison, Upshur, Randolph, and Pocahontas Counties, to points in that part of Indiana on and north of a line beginning at the Indiana-Illinois State line and extending along U.S. Highway 24 to junction Indiana Highway 3, thence along Indiana Highway 3 to the Indiana-Michigan State line. The purpose of this filing is to eliminate the gateway of Akron, Ohio. The purpose of this correction is to correct the territorial description.

No. MC 114273 (Sub-No. E7), filed June 4, 1974. Applicant: CEDAR RAPIDS STEEL TRANSPORTATION, INC., P.O. Box 68, Cedar Rapids, Iowa 52406. Applicant's representative: Gene R. Prohushki (same as above). Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Farm implements and machinery*, except those requiring special equipment, from Jonesville, Wis., to points in Iowa on and bounded by a line beginning at Nora Springs, Iowa, and extending along U.S. Highway 18 to junction Iowa un-numbered highway at Charles City, Iowa, thence along Iowa un-numbered highway to junction Iowa Highway 188, thence along Iowa Highway 188 to junction Iowa Highway 3, thence along Iowa Highway 3 to junction Iowa un-numbered highway, thence along Iowa un-numbered highway to junction U.S. Highway 20, thence along U.S. Highway 20 to junction U.S. Highway 218, thence along U.S. Highway 218 to junction Iowa Highway 2, thence along Iowa Highway 2 to the Iowa-Illinois State line, thence along the Iowa-Illinois State line to the Iowa-Missouri State line, thence along the Iowa-Missouri State line to junction Iowa Highway 202, thence along Iowa Highway 202 to junction Iowa Highway 2, thence along Iowa Highway 2 to junction Iowa Highway 5, thence along Iowa Highway 5 to junction Iowa un-numbered highway at Moravia, Iowa, thence along Iowa un-numbered highway to junction Iowa Highway 68, thence along Iowa Highway 68 to junction U.S. Highway 34, thence along U.S. Highway 34 to junction Iowa Highway 14, thence along Iowa Highway 14 to junction Iowa un-numbered highway, thence along un-numbered highway to junction Iowa Highway 206, thence along Iowa Highway 206 to junction U.S. Highway 65, thence along U.S. Highway 65 to junction U.S. Highway 69, thence along U.S. Highway 69 to junction U.S. Highway 20, thence along U.S. Highway 20 to junction Iowa un-numbered highway to Dows, Iowa, thence along Iowa un-numbered highway to junction Iowa un-numbered highway, thence north on Iowa

un-numbered highway to junction Iowa un-numbered highway and Iowa Highway 263, thence along Iowa Highway 263 to junction Iowa un-numbered highway at Latimer, Iowa, thence along Iowa un-numbered highway to junction U.S. Highway 65, thence along U.S. Highway 65 to junction Iowa un-numbered highway, thence east and north on Iowa un-numbered highway through Rockwell, Cartersville, and Rockford, Iowa, thence north on Iowa un-numbered highway and U.S. Highway 18, thence west on U.S. Highway 18 to Nora Springs, Iowa. The purpose of this filing is to eliminate the gateway of Cedar Rapids, Iowa.

No. MC 114273 (Sub-No. E9), filed June 4, 1974. Applicant: CEDAR RAPIDS STEEL TRANSPORTATION, INC., P.O. Box 68, Cedar Rapids, Iowa 52406. Applicant's representative: Gene R. Prohushki (same as above). Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Twine and iron and steel products* (except commodities in bulk and those requiring special equipment), from Chicago, Ill., to points in that part of Iowa in and on a line beginning at the Iowa-Minnesota State line and extending along U.S. Highway 52 to junction Iowa Highway 150, thence along Iowa Highway 150 to junction Iowa Highway 101, thence along Iowa Highway 101 to junction Iowa Highway 363, thence along Iowa Highway 363 to junction Iowa un-numbered highway at Urbana, Iowa, thence along Iowa un-numbered highway thru Shellsburg and Palo, Iowa, to junction Iowa Highway 94, thence along Iowa Highway 94 to junction U.S. Highway 218, thence along U.S. Highway 218 to junction Iowa Highway 1, thence along Iowa Highway 1 to junction Iowa Highway 92, thence along Iowa Highway 92 to junction U.S. Highway 218, thence along U.S. Highway 218 to junction U.S. Highway 34, thence along U.S. Highway 34 to junction Iowa Highway 1, thence along Iowa Highway 1 to junction Iowa Highway 2, thence along Iowa Highway 2 to junction Iowa un-numbered highway, thence along Iowa un-numbered highway through Mt. Sterling, Iowa, to the Iowa-Missouri State line, and thence from the Missouri-Iowa State line along Iowa Highway 202 to junction Iowa Highway 2, thence along Iowa Highway 2 to junction Iowa Highway 5, thence along Iowa Highway 5 to junction Iowa un-numbered highway at Moravia, Iowa, thence along Iowa un-numbered highway thru Iconium and Melrose, Iowa, to junction Iowa Highway 68, thence along Iowa Highway 68 to junction U.S. Highway 34, thence along U.S. Highway 34 to junction Iowa Highway 14.

Thence along Iowa Highway 14 to junction Iowa un-numbered highway, thence along Iowa un-numbered highway to junction Iowa Highway 206, thence along Iowa Highway 206 to junction U.S. Highway 65, thence along U.S. Highway 65 to junction U.S. Highway 69, thence along U.S. Highway 69 to Des Moines, Iowa, thence along U.S. Highway 69 to junction U.S. Highway 20, thence

along U.S. Highway 20 to Williams, Iowa, thence along U.S. Highway 20 to junction Iowa un-numbered highway, thence along Iowa un-numbered highway to Dows, Iowa, thence along Iowa un-numbered highway to junction Iowa un-numbered highway, thence along Iowa un-numbered highway to junction Iowa Highway 263, thence along Iowa Highway 263 to junction Iowa un-numbered highway at Latimer, Iowa, thence along Iowa un-numbered highway to junction Iowa un-numbered highway, thence along Iowa un-numbered highway thru Chapin, Iowa, to junction U.S. Highway 65, thence along U.S. Highway 65 to junction Iowa un-numbered highway, thence along Iowa un-numbered highway thru Rockwell, Cartersville, and Rockford, Iowa, thence along Iowa un-numbered highway and junction U.S. Highway 28, thence along U.S. Highway 18 to Nora Springs, Iowa, thence along U.S. Highway 18 to junction Iowa un-numbered highway, thence along Iowa un-numbered highway to junction Iowa Highway 218 at Osage, Iowa, thence along U.S. Highway 218 to junction Iowa Highway 9, thence along Iowa Highway 9 to New Haven, Iowa, thence along Iowa Highway 9 to junction U.S. Highway 63, thence along U.S. Highway 63 to junction Iowa Highway 157, thence along Iowa Highway 157 to junction Iowa un-numbered highway at Limes Springs, Iowa, thence along Iowa un-numbered highway to the Iowa-Minnesota State line. The purpose of this filing is to eliminate the gateway of Cedar Rapids, Iowa.

No. MC 114273 (Sub-No. E10), filed June 4, 1974. Applicant: CEDAR RAPIDS STEEL TRANSPORTATION, INC., P.O. Box 68, Cedar Rapids, Iowa 52406. Applicant's representative: Gene R. Prokusk (same as above). Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Machinery, machinery parts, and binder twine* (except commodities in bulk, and those requiring special equipment) from Rock Island, Ill., to points in that part of Iowa in and on a line beginning at the Iowa-Minnesota State line extending along Iowa Highway 26 to junction Iowa un-numbered Highway, thence along Iowa un-numbered highway through Elon, Rossville, and Volney to junction U.S. Highway 52, thence along U.S. Highway 52 to junction Iowa Highway 13, thence along Iowa Highway 13 to junction U.S. Highway 151, thence along U.S. Highway 151 to junction Iowa Highway 149, thence along Iowa Highway 149 to junction Iowa Highway 201, thence along Iowa Highway 201 to junction Iowa un-numbered highway at Watkins, thence along Iowa un-numbered highway to West Amana, thence along Iowa un-numbered highway to Blairs-town, thence along Iowa un-numbered highway to junction Iowa Highway 212, thence along Iowa Highway 212 to junction Iowa un-numbered highway, thence along Iowa un-numbered highway through Chelsea and Haven to junction U.S. Highway 63.

Thence along U.S. Highway 63 to junction U.S. Highway 30, thence along U.S. Highway 30 to junction Iowa Highway 14, thence along Iowa Highway 14 to junction U.S. Highway 6, thence along U.S. Highway 6 to junction Iowa Highway 117, thence along Iowa Highway 117 to junction Iowa Highway 163, thence along Iowa Highway 163 to junction Iowa Highway 316, thence along Iowa Highway 316 to junction Iowa un-numbered highway, thence along Iowa un-numbered highway through Hartford and Palmyra to junction Iowa Highway 92, thence along Iowa Highway 92 to junction U.S. Highway 65/69, thence along U.S. Highway 65/69 to junction U.S. Highway 69 at Des Moines, thence along U.S. Highway 69 to junction U.S. Highway 20, thence along U.S. Highway 20 to junction Iowa un-numbered highway, thence along Iowa un-numbered highway to Dows, thence along Iowa un-numbered highway to junction Iowa Highway 263, thence along Iowa Highway 263 to junction Iowa un-numbered highway at Latimer, thence along Iowa un-numbered highway to junction Iowa un-numbered highway through Chapin to junction U.S. Highway 65, thence along U.S. Highway 65 through Sheffield to junction Iowa un-numbered highway, thence along Iowa un-numbered highway through Rockwell, Cartersville, and Rockford to junction U.S. Highway 18 at Nora Springs, thence along U.S. Highway 18 to junction Iowa un-numbered highway, thence along Iowa un-numbered highway to junction U.S. Highway 218 at Osage, thence along U.S. Highway 218 to junction Iowa Highway 9, thence along Iowa Highway 9 to junction U.S. Highway 63, thence along U.S. Highway 63 to junction Iowa Highway 157, thence along Iowa Highway 157 to junction Iowa un-numbered highway at Lime Springs, thence along Iowa un-numbered highway to the Minnesota-Iowa State line, thence along the Iowa-Minnesota State line to the point of beginning. The purpose of this filing is to eliminate the gateway of Cedar Rapids, Iowa.

No. MC 114273 (Sub-No. E11), filed June 4, 1974. Applicant: CEDAR RAPIDS STEEL TRANSPORTATION, INC., P.O. Box 68, Cedar Rapids, Iowa 52406. Applicant's representative: Gene R. Prohushki (same as above). Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Machinery, machinery parts and binder twine* (except commodities in bulk, and those requiring special equipment), from Sandwich, Ill., to points in that part of Iowa in and on a line beginning at the Iowa-Minnesota State line extending along Iowa Highway 76 to junction Iowa un-numbered highway at Rossville, Iowa, thence along Iowa un-numbered highway to junction U.S. Highway 52 at Minona, Iowa, thence along U.S. Highway 52 to junction Iowa Highway 13, thence along Iowa Highway 13 to junction U.S.

Highway 30, thence along U.S. Highway 30 to junction Iowa Highway 1, thence along Iowa Highway 1 to junction Iowa Highway 92, thence along Iowa Highway 92 to junction U.S. Highway 65-69, thence along U.S. Highway 65-69 to junction U.S. Highway 69, thence along U.S. Highway 69 to junction U.S. Highway 20, thence along U.S. Highway 20 to junction Iowa unnumbered highway, thence along Iowa unnumbered highway to Dows, Iowa, thence along unnumbered highway to junction Iowa unnumbered highway, thence along Iowa unnumbered highway to junction Iowa Highway 263 at Coulter, Iowa, thence along Iowa Highway 263 to junction Iowa unnumbered highway, thence along unnumbered highway through Chapin, Iowa, to junction U.S. Highway 65, thence along U.S. Highway 65 to junction Iowa unnumbered highway, thence along unnumbered highway through Rockwell, Cartersville, and Rockford, Iowa, to junction U.S. Highway 18, thence along U.S. Highway 18 to Nora Springs, Iowa, thence along U.S. Highway 18 to junction Iowa unnumbered highway, thence along Iowa unnumbered highway to junction U.S. Highway 218 at Osage, Iowa, thence along U.S. Highway 218 to junction Iowa Highway 9, thence along Iowa Highway 9 to junction U.S. Highway 63, thence along U.S. Highway 63 to junction Iowa Highway 157, thence along Iowa Highway 157 to junction Iowa unnumbered highway at Lime Springs, Iowa, thence along unnumbered highway to the Iowa-Minnesota State line, thence along the Minnesota-Iowa State line to point of beginning. The purpose of this filing is to eliminate the gateway of Cedar Rapids, Iowa.

No. MC 114273 (Sub-No. E12), filed June 4, 1974. Applicant: CEDAR RAPIDS STEEL TRANSPORTATION, INC., P.O. Box 68, Cedar Rapids, Iowa 52406. Applicant's representative: Gene R. Prohnski (same as above). Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Machinery, machinery parts, and binder twine* (except commodities in bulk, and those requiring special equipment), from Chicago, Ill., to points in that part of Iowa in and on a line beginning at the Iowa-Minnesota State line extending along U.S. Highway 52 to junction Iowa Highway 150, thence along Iowa Highway 150 to junction Iowa Highway 101, thence along Iowa Highway 101 to junction Iowa Highway 363, thence along Iowa Highway 363 to junction Iowa unnumbered highway at Urbana, thence along Iowa unnumbered highway to junction Iowa Highway 94, thence along Iowa Highway 94 to junction U.S. Highway 218, thence along U.S. Highway 218 to junction Iowa Highway 1, thence along Iowa Highway 1 to junction Iowa Highway 92, thence along Iowa Highway 92 to junction U.S. Highway 218, thence along U.S. Highway 218 to junction U.S. Highway 34, thence along U.S. Highway 34 to junction Iowa Highway

1, thence along Iowa Highway 1 to junction Iowa Highway 2, thence along Iowa Highway 2 to junction Iowa unnumbered highway, thence along Iowa unnumbered highway through Mt. Sterling, to the Iowa-Missouri State line, thence along the Iowa-Missouri State line to junction Iowa Highway 202, thence along Iowa Highway 202 to junction Iowa Highway 2, thence along Iowa Highway 2 to junction Iowa Highway 5, thence along Iowa Highway 5 to junction Iowa unnumbered highway at Moravia, thence along Iowa unnumbered highway through Iconium and Melrose, to junction Iowa Highway 68, thence along Iowa Highway 68 to junction U.S. Highway 34, thence along U.S. Highway 34 to junction Iowa Highway 14, thence along Iowa Highway 14 to junction Iowa unnumbered highway, thence along Iowa unnumbered highway to junction Iowa Highway 206, thence along Iowa Highway 206 to junction U.S. Highway 65.

Thence along U.S. Highway 65 to junction U.S. Highway 69, thence along U.S. Highway 65/69 to Des Moines, thence along U.S. Highway 69 to junction U.S. Highway 20, thence along U.S. Highway 20 to junction Iowa unnumbered highway, thence north along Iowa unnumbered highway to Dows, thence along Iowa unnumbered highway to junction Iowa unnumbered highway, thence along Iowa unnumbered highway to junction Iowa Highway 263 at Coulter, thence along Iowa Highway 263 to junction Iowa unnumbered highway at Latimer, thence along Iowa unnumbered highway to junction Iowa unnumbered highway, thence along Iowa unnumbered highway through Chapin to junction U.S. Highway 65, thence along U.S. Highway 65 to junction Iowa unnumbered highway, thence along Iowa unnumbered highway to junction U.S. Highway 18, thence along U.S. Highway 18 to junction Iowa unnumbered highway, thence north on Iowa unnumbered highway to junction U.S. Highway 218 at Osage, thence along U.S. Highway 218 to junction Iowa Highway 9, thence along Iowa Highway 9 to junction U.S. Highway 63, thence along U.S. Highway 63 to junction Iowa Highway 157, thence along Iowa Highway 157 to junction Iowa unnumbered highway at Lime Springs, Iowa, thence along unnumbered highway to the Iowa-Minnesota State line, thence along the Iowa-Minnesota State line to point of beginning. The purpose of this filing is to eliminate the gateway of Cedar Rapids, Iowa.

No. MC 115331 (Sub-No. E28), filed June 3, 1974. Applicant: TRUCK TRANSPORT, INC., 230 St. Clair Ave., E. St. Louis, Ill. 62201. Applicant's representative: E. Stephen Heisley, 666 Eleventh St. NW., Washington, D.C. 20001. Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Chemicals*, in containers, from points in Georgia to Minnesota, Nebraska, Iowa, Wisconsin, points in Missouri beginning at the Missouri-Illinois State line, thence

on and north of U.S. Highway 24 to junction Missouri Highway 6, thence along Missouri Highway 6 to junction U.S. Highway 65, thence along U.S. Highway 65 to junction U.S. Highway 136, thence along U.S. Highway 136 to the Missouri-Nebraska State line, and points in Illinois beginning at the Illinois-Indiana State line which lie on and north of Illinois Highway 17, thence along Illinois Highway 17 to junction U.S. Highway 66, thence along U.S. Highway 66 to junction Illinois Highway 9, thence along Illinois Highway 9 to the Illinois-Iowa State line, points in Upper Michigan on and west of Michigan Highway 35 and U.S. Highway 41 to Marinette, Mich. The purpose of this filing is to eliminate the gateway of El Paso, Ill.

No. MC 115331 (Sub-No. E29), filed June 3, 1974. Applicant: TRUCK TRANSPORT, INC., 230 St. Clair Ave., E. St. Louis, Ill. 62201. Applicant's representative: E. Stephen Heisley, 666 Eleventh St. NW., Washington, D.C. 20001. Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Chemicals*, in containers, from points in Florida to Nebraska, Iowa, Minnesota, Wisconsin, points in Michigan (except points east of U.S. Highway 27 to junction Michigan Highway 78, thence along Michigan Highway 78 to junction Michigan Highway 21, thence along Michigan Highway 21 to junction Interstate Highway 75, thence along Interstate Highway 75 to Bay City, Mich., points in Indiana on and west of U.S. Highway 31 and on and north of Indiana Highway 14, points in Missouri beginning at the Missouri-Illinois State line on and north of U.S. Highway 24 to junction Missouri Highway 6, thence along Missouri Highway 6 to junction U.S. Highway 65, thence along U.S. Highway 65 to junction U.S. Highway 136, thence along U.S. Highway 136 to the Missouri-Nebraska State line and points in Illinois beginning at the Illinois-Indiana State line, thence on and north of Interstate Highway 74 to junction Illinois Highway 47, thence along Illinois Highway 47 to junction U.S. Highway 36, thence along U.S. Highway 36 to the Illinois-Missouri State line. The purpose of this filing is to eliminate the gateway of El Paso, Ill.

No. MC 115331 (Sub-No. E37), filed June 3, 1974. Applicant: TRUCK TRANSPORT, INC., 230 Saint Clair Ave., East St. Louis, Ill. 62201. Applicant's representative: E. Stephen Heisley, 666 Eleventh St. NW., Washington, D.C. 20001. Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Chemicals*, in containers, from all points in Iowa to points in Kentucky on and east of U.S. Highway 41. The purpose of this filing is to eliminate the gateway of El Paso, Ky.

No. MC 115840 (Sub-No. E50), filed December 30, 1974. Applicant: COLONIAL FAST FREIGHT, INC., P.O. Box 10327, Birmingham, Ala. 35202. Applicant's representative: Roger M. Shaner

(same as above). Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Such farm implements* included in iron and steel articles, from Poplarville, Miss., to that portion of Alabama on, north and east of U.S. Highway 20 beginning at the Alabama-Georgia State line and extending along the junction of U.S. Highway 431, thence along U.S. Highway 431 to the Alabama-Tennessee State line, and that portion of Georgia on and north of U.S. Highway 78 beginning at the Georgia-Alabama State line, thence along U.S. Highway 78 to the intersection of U.S. Highway 20, thence along U.S. Highway 20 and also to Atlanta and Augusta, Ga. The purpose of this filing is to eliminate the gateway of Anniston, Ala.

No. MC 115841 (Sub-No. E98), filed June 4, 1974. Applicant: COLONIAL REFRIGERATED TRANSPORTATION INCORPORATED, P.O. Box 10327, Birmingham, Ala. 35202. Applicant's representative: E. Stephen Heisley, 666 Eleventh St. NW., Washington, D.C. 20001. Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Fresh meats*, and *cooked or cured meats*, in vehicles equipped with mechanical refrigeration, from Chattanooga, Tenn., to points in Maine, New Hampshire, and Vermont. The purpose of this filing is to eliminate the gateway of Nashville, Tenn.

No. MC 115841 (Sub-No. E99), filed June 4, 1974. Applicant: COLONIAL REFRIGERATED TRANSPORTATION INCORPORATED, P.O. Box 10327, Birmingham, Ala. 35202. Applicant's representative: E. Stephen Heisley, 666 Eleventh St. NW., Washington, D.C. 20001. Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Meats, meat products, and meat by-products*, as described in Sections A and C of Appendix I to the report in *Descriptions in Motor Carrier Certificates*, 61 M.C.C. 209 and 766 (except frozen commodities and commodities in bulk, in tank vehicles), in vehicles equipped with mechanical refrigeration, from Chattanooga, Tenn., to points in Missouri. The purpose of this filing is to eliminate the gateway of Nashville, Tenn.

No. MC 115841 (Sub-No. E100), filed June 4, 1974. Applicant: COLONIAL REFRIGERATED TRANSPORTATION INCORPORATED, P.O. Box 10327, Birmingham, Ala. 35202. Applicant's representative: E. Stephen Heisley, 666 Eleventh St. NW., Washington, D.C. 20001. Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Meats, meat products, and meat by-products*, unfrozen (except commodities in bulk, in tank vehicles), as described in Section A of Appendix I to the report in *Descriptions in Motor Carrier Certificates*, 61 M.C.C. 209 and 766, in vehicles equipped with mechanical refrigeration, from Chattanooga, Tenn., to points in

Wisconsin and Minnesota. The purpose of this filing is to eliminate the gateway of Nashville, Tenn.

No. MC 115841 (Sub-No. E118), filed June 4, 1974. Applicant: COLONIAL REFRIGERATED TRANSPORTATION INCORPORATED, P.O. Box 10327, Birmingham, Ala. 35202. Applicant's representative: E. Stephen Heisley, 666 Eleventh St. NW., Washington, D.C. 20001. Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Meats, meat products, and meat by-products*, as described in Section A of Appendix I to the report in *Descriptions in Motor Carrier Certificates*, 61 M.C.C. 209 and 766, from Bristol, Va., to points in Connecticut, Illinois, Indiana, Kentucky, Michigan, Ohio, and Rhode Island. The purpose of this filing is to eliminate the gateway of Bristol, Tenn.

No. MC 116273 (Sub-No. E8) (Correction), filed May 22, 1974, published in the FEDERAL REGISTER July 17, 1974. Applicant: D & L TRANSPORT, INC., 3800 South Laramie Avenue, Cicero, Ill. 60650. Applicant's representative: William R. Lavery (same as above). Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Coal tar and coal tar products* (except coal tar chemicals), in bulk, in tank or hopper-type vehicles, from Joliet, Ill., to points in Minnesota. Restriction: The operations authorized herein are restricted to the transportation of traffic having a prior movement by rail. The purpose of this filing is to eliminate the gateway of Flexi Flo Terminal of Penn Central Transportation Company at Hammond, Ind. The purpose of this correction is to include the restriction.

No. MC 116273 (Sub-No. E41) (Correction), filed May 24, 1974, published in the FEDERAL REGISTER July 22, 1974. Applicant: D & L TRANSPORT, INC., 3800 S. Laramie Ave., Cicero, Ill. 60650. Applicant's representative: William R. Lavery (same as above). Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Liquid chemicals*, in bulk, in tank vehicles, from the Flexi-Flo Terminals of Penn Central Transportation Company at Hammond, Ind., to points in Kentucky, that part of Ohio south and east of U.S. Highway 24 and Tennessee (except Kingsport), restricted to the transportation of traffic having a prior movement by rail. The purpose of this filing is to eliminate the gateway of the plant site of Diversified Chemicals and Propellants Co., at Frankfort, Ill. The purpose of this correction is to correct the territorial descriptions.

No. MC 116273 (Sub-No. E98), filed May 25, 1974. Applicant: D & L TRANSPORT, INC., 5700 Industrial Highway, Gary, Ind. 46404. Applicant's representative: William R. Lavery (same as above). Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Plastic pellets*, in bulk, in tank or hopper-type vehicles, having a prior movement by rail, from

points in the Lower Peninsula of Michigan on, south, and west of a line beginning at Manistee, Mich., and extending along Michigan Highway 55 to junction Michigan Highway 76, thence along Michigan Highway 76 to junction U.S. Highway 23, thence along U.S. Highway 23 to junction Michigan Highway 25 to Unionville, thence along unnumbered county highway to junction Michigan Highway 53, thence along Michigan Highway 53 to junction Michigan Highway 59, thence along Michigan Highway 59 to the west bank of Lake St. Clair, and thence along the west bank of Lake St. Clair to the Detroit River and Lake Erie to the Michigan-Ohio State line, to points in California, Colorado, Idaho, Oregon, Texas, Utah, Washington, and that part of Tennessee on and west of a line beginning at Hazel, Tenn., and extending along U.S. Highway 641 to junction Tennessee Highway 69, thence along Tennessee Highway 69 to the Tennessee-Michigan State line, restricted to the transportation of shipments having a prior movement by rail. The purpose of this filing is to eliminate the gateways of the Flexi Flo Terminal of Penn Central Transportation Co., at Hammond, Ind., and Marseilles, Ill.

No. MC 116273 (Sub-No. E125), filed May 22, 1974. Applicant: D&L TRANSPORT, INC., 3800 S. Laramie Ave., Cicero, Ill. 60650. Applicant's representative: William R. Lavery (same as above). Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Hydrogen gas*, in bulk, in tank vehicles, from Middletown, Ohio, to points in Iowa, Minnesota, Nebraska, South Dakota, points in Missouri on, north, and west of a line beginning at Hannibal, Mo., and extending along U.S. Highway 24 to junction U.S. Highway 63, thence along U.S. Highway 63 to junction Interstate Highway 70, thence along Interstate Highway 70 to the Missouri-Kansas State line, and points in Kansas (except points in Montgomery, Labette, Cherokee, and Bourbon Counties). The purpose of this filing is to eliminate the gateway of Niota, Ill.

No. MC 116273 (Sub-No. E130), filed May 22, 1974. Applicant: D&L TRANSPORT, INC., 3800 S. Laramie Ave., Cicero, Ill. 60650. Applicant's representative: William R. Lavery (same as above). Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Liquid chemicals* (except liquefied petroleum gas, liquid fertilizer and cryogenic liquids), in bulk, in tank vehicles, from Janesville, Wis., to points in Kansas and Missouri. The purpose of this filing is to eliminate the gateway of the plant site of the Apple River Chemical Co., at or near Niota, Ill.

No. MC 116915 (Sub-No. E5), filed May 28, 1974. Applicant: ECK MILLER TRANSPORTATION CORP., 1125 Sweeney St., Owensboro, Ky. 42301. Applicant's representative: William P. Sullivan, 1819 H St. NW., Washington, D.C. 20006. Authority sought to operate as a common carrier, by motor vehicle, over

irregular routes, transporting: *Oil well and mine machinery, pipe, and supplies* (1) between Williamson and Beckley, W. Va., and points in West Virginia north of Mingo, Wyoming, Raleigh, Summers, and Monroe Counties, on the one hand, and, on the other, points in Mississippi, those in Kentucky in and west of Hancock, Ohio, Muhlenberg, and Todd Counties, and those in Tennessee on and west of Interstate Highway 65, (2) between points in West Virginia on and south of a line beginning at Paynesville and extending along West Virginia Highway 83 to Yukon, thence along West Virginia Highway 16 to Beckley, thence along U.S. Highway 19 to Summersville, thence along West Virginia Highway 39 to the West Virginia-Virginia State line, on the one hand, and, on the other, points in Illinois on and south of Interstate Highway 74 (except Danville) and points in Indiana on, south and west of a line beginning at Terre Haute and extending along Indiana Highway 46 to Bloomington, thence along Indiana Highway 37 to the Indiana-Kentucky State line, and (3) between points in West Virginia on and north of the line described in (2) above, on the one hand, and, on the other, points in Illinois on and south of U.S. Highway 50 and points in Indiana on and south of U.S. Highway 150 extending west to junction U.S. Highway 50 and U.S. Highway to the Indiana-Illinois State line. The purpose of this filing is to eliminate the gateways of points within 35 miles of Owensboro, Ky.

No. MC 116915 (Sub-No. E16), filed May 28, 1974. Applicant: ECK MILLER TRANSPORTATION CORPORATION, Owensboro, Ky. Applicant's representative: William P. Sullivan, Federal Bar Building West, 1819 H St. NW., Washington, D.C. 20006. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Aluminum and aluminum products* (other than motor vehicles), which require the use of special equipment by reason of size or weight from points in Tennessee on and east of a line beginning at the Alabama-Tennessee State line and extending along Tennessee Highway 13 to junction Tennessee Highway 49, thence along Tennessee Highway 49 to the Tennessee-Kentucky State line to points in Iowa. The purpose of this filing is to eliminate the gateway of Hancock County, Ky.

No. MC 117344 (Sub-No. E116), filed May 19, 1974. Applicant: THE MAXWELL CO., 10380 Evendale Drive, Cincinnati, Ohio 45215. Applicant's representative: Stiversen & Alden, P.O. Box 5241, Columbus, Ohio 43212. [Notice No. 288]

#### MOTOR CARRIER BOARD TRANSFER PROCEEDINGS

MAY 16, 1975.

Synopses of orders entered by the Motor Carrier Board of the Commission pursuant to sections 212(b), 206(a), 211, 312(b), and 410(g) of the Interstate Commerce Act, and rules and regulations prescribed thereunder (49 CFR Part 1132), appear below:

Each application (except as otherwise specifically noted) filed after March 27, 1972, contains a statement by applicants that there will be no significant effect on the quality of the human environment resulting from approval of the application. As provided in the Commission's special rules of practice any interested person may file a petition seeking reconsideration of the following numbered proceedings on or before June 5, 1975. Pursuant to section 17(8) of the Interstate Commerce Act, the filing of such a petition will postpone the effective date of the order in that proceeding pending its disposition. The matters relied upon by petitioners must be specified in their petitions with particularity.

No. MC-FC-75798. By order of May 8, 1975 the Motor Carrier Board approved the transfer to James S. Manlowe, San Diego, Calif., of Certificate of Registration No. MC 65185 (Sub-No. 2), issued by the Commission May 23, 1969, to A. W. Reid Draying Company, a corporation, San Francisco, Calif., evidencing the authority to perform a transportation service in interstate or foreign commerce corresponding in scope to the intrastate authority in Certificate of Public Convenience and Necessity issued July 2, 1968, by Decision No. 74345, by the Public Utilities Commission of the State of California. Martin J. Rosen, Esq., 140 Montgomery Street, San Francisco, Calif. 94104

# **MOTOR CARRIER TEMPORARY AUTHORITY APPLICATIONS**

[Notice No. 54]

MAY 9, 1975.

The following are notices of filing of application, except as otherwise specifically noted, each applicant states that there will be no significant effect on the quality of the human environment resulting from approval of its application, for temporary authority under section 210(a) of the Interstate Commerce Act provided for under the new rules of Ex Parte No. MC-67, (49 CFR 1131) published in the FEDERAL REGISTER, issue of April 27, 1965, effective July 1, 1965. These rules provide that protests to the granting of an application must be filed with the field official named in the FEDERAL REGISTER publication, within 15 calendar days after the date of notice of the filing of the application is published in the Federal Register. One copy of such protests must be served on the applicant, or its authorized representative, if any, and the protests must certify that such service has been made. The protests must be specific as to the service which such protestant can and will offer, and must consist of a signed original and six (6) copies.

A copy of the application is on file, and can be examined at the Office of the Secretary, Interstate Commerce Commission, Washington, D.C., and also in field office to which protests are to be transmitted.

DEPARTMENT OF HEALTH,  
EDUCATION, AND WELFARE

## Public Health Service

## [42 CFR Parts 51, 51c]

PROJECT GRANTS FOR HEALTH  
SERVICES DEVELOPMENT

## Notice of Proposed Rulemaking

Notice is hereby given that the Assistant Secretary for Health of the Department of Health, Education, and Welfare, with the approval of the Secretary of Health, Education, and Welfare, proposes to issue a new Part 51c of Title 42, Code of Federal Regulations, entitled "Project Grants for Health Services Development", and to revoke Subpart E of Part 51 of Title 42, Code of Federal Regulations, entitled "Grants for Family Health Center Projects".

The purpose of the new Part 51c is to establish regulations governing grants made for health services development projects under section 314(e) of the Public Health Service Act (42 U.S.C. 246(e)). Subpart A of the proposed Part 51c sets forth general administration and management requirements applicable to all grants under section 314(e). Subpart B contains specific program requirements applicable to grants for community health services projects. Part 51, Subpart E, which is applicable to grants awarded under section 314(e), would be revoked and its provisions reorganized, recodified and revised in Part 51c, as follows: Subpart A of such Part 51c would apply to such grants with respect to administrative and management requirements, and the specific program requirements applicable to family health center projects would be set forth in Subpart C of the new Part 51c.

Interested persons are invited to submit written comments, suggestions, or objections to the Bureau of Community Health Services, Parklawn Building, 5600 Fishers Lane, Rockville, Maryland, 20852, on or before June 16, 1975.

Comments received will be available for public inspection at Room 7-05 during regular business hours.

It is therefore proposed to revoke Subpart E of 42 CFR Part 51 and to issue a new Part 51c Title 42, as set forth below.

Dated: April 21, 1975.

THEODORE COOPER,  
Acting Assistant Secretary  
for Health.

Approved: May 10, 1975.

STEPHEN KURZMAN,  
Acting Secretary.

1. Subpart E of 42 CFR Part 51 is revoked.

2. Title 42, CFR, is amended by the addition of a new Part 51c, to read as follows:

PART 51c—PROJECT GRANTS FOR  
HEALTH SERVICES DEVELOPMENT

## Subpart A—General Provisions

- Sec.  
51c.101 Applicability.  
51c.102 General policy.  
51c.103 Definitions.  
51c.104 Eligibility.  
51c.105 Application.  
51c.106 Accord with State health planning.  
51c.107 Grant awards.  
51c.108 Grant payments.  
51c.109 Nondiscrimination.  
51c.110 Confidentiality.  
51c.111 Inventions or discoveries.  
51c.112 Publications and copyright.  
51c.113 Grantee accountability.  
51c.114 Applicability of 45 CFR Part 74.

Subpart B—Grants for Community Health  
Service Projects

- 51c.201 Applicability.  
51c.202 Project elements.  
51c.203 Governing board or advisory committee.  
51c.204 Grant evaluation and award.  
51c.205 Use of project funds.

Subpart C—Grants for Family Health Center  
Projects

- 51c.301 Applicability.  
51c.302 Definitions.  
51c.303 Project elements.  
51c.304 Governing board or advisory committee.  
51c.305 Grant evaluation and award.  
51c.306 Use of project funds.

Authority: Secs. 215, 314(e) of the Public Health Service Act (42 U.S.C. 216, 246(e)).

## Subpart A—General Provisions

## § 51c.101 Applicability.

The regulations of this subpart are applicable to all project grants authorized by section 314(e) of the Public Health Service Act (42 U.S.C. 246(e)).

## § 51c.102 General policy.

(a) Section 314(e) of the Public Health Service Act authorizes project grants for health services development to cover part of the cost of:

(1) Providing services (including related training) to meet health needs of limited geographic scope or of specialized regional or national significance; or

(2) Developing and supporting, for an initial period, new programs of health services (including related training). Such projects must be designed to improve health services systems and the delivery of health services and may include programs to improve existing methods of delivery.

## § 51c.103 Definitions.

As used in this part:

(a) "Act" means the Public Health Service Act.

(b) "State" means one of the 50 States, the District of Columbia, Puerto Rico, Guam, the Virgin Islands, American Samoa, or the Trust Territory of the Pacific Islands.

(c) "Nonprofit," as applied to any private agency, institution, or organization, means one which is a corporation or association, or is owned and operated by one or more corporations or associations,

no part of the net earnings of which inures, or may lawfully inure, to the benefit of any private shareholder or individual.

(d) "Secretary" means the Secretary of Health, Education, and Welfare and any other officer or employee of the Department of Health, Education, and Welfare to whom the authority involved has been delegated.

## § 51c.104 Eligibility.

(a) **Eligible applicants.** Any public or private nonprofit agency, institution, or organization is eligible to apply for a grant under this part.

(b) **Eligible projects.** Grants may be made by the Secretary under section 314 (e) of the Act to cover part of the cost of:

(1) Providing services (including related training) to meet health needs of limited geographic scope or of specialized regional or national significance; or

(2) Developing and supporting for an initial period new programs of health services (including related training).

## § 51c.105 Application.

(a) An application for a grant under this part shall be submitted to the Secretary at such time and in such form and manner as the Secretary may prescribe.

(b) The application shall contain a budget and narrative plan of the manner in which the applicant intends to conduct the project and carry out the requirements of this part. The application must describe the project in sufficient detail to identify clearly the nature, need, specific objectives, plan, and methods of the project.

(c) The application must indicate (1) that the requirements of Part I of Office of Management and Budget Circular No. A-96 have been satisfied, and (2) that a reasonable opportunity of not less than 60 days for review of the application has been provided (setting forth the date of submission) to the appropriate areawide health planning or health systems agency or agencies, or if there is no such agency in the area, then to such other public or nonprofit private agency or organization (if any) which is identified by the State health planning agency as performing similar functions.

(d) The application must be executed by an individual authorized to act for the applicant and to assume on behalf of the applicant the obligations imposed by the statute, the applicable regulations of this part, and any additional conditions of the grant.

## § 51c.106 Accord with State health planning.

A grant may be made under this part only if the Secretary determines that the services to be assisted under such grant will be provided in accordance with such State plan for comprehensive health services as has been developed pursuant to section 314(a), or Title XV of the Act, as applicable, for the State or States in which such services will be provided.

## § 51c.107 Grant Awards.

(a) The amount of any award under this part will be determined by the Secretary on the basis of his estimate of the sum necessary for a designated portion of direct project costs plus an additional amount for indirect costs, if any, which will be calculated by the Secretary either:

(1) On the basis of the estimate of the actual indirect costs reasonably related to the project; or

(2) On the basis of a percentage of all, or a portion of, the estimated direct costs of the project when there are reasonable assurances that the use of such percentage will not exceed the approximate actual indirect costs. Such award may include an estimated provisional amount for indirect costs or for designated direct costs (such as fringe benefit rates) subject to upward (within the limits of available funds) as well as downward adjustments to actual costs when the amount properly expended by the grantee for provisional items has been determined by the Secretary: *Provided, however,* That no grant shall be made for an amount equal to the total cost as found necessary by the Secretary for the carrying out of the project.

(i) In determining the percentage of project costs to be borne by the grantee, factors which the Secretary will take into consideration will include the following:

(A) The ability of the grantee to finance its share of project costs from non-Federal sources;

(B) The need in the area served by the project for the services to be provided; and

(C) The extent to which the project will provide services in an innovative manner which the Secretary desires to stimulate in the interest of developing more effective health service delivery systems on a regional or national basis.

(ii) At any time after approval of an application under this subpart, the Secretary may retroactively agree to a percentage of project costs to be borne by the grantee lower than that determined pursuant to paragraph (a) (2) (i) of this section where he finds that changed circumstances justify a smaller contribution.

(iii) In determining the grantee's share of project costs, costs borne by Federal grant funds, or costs used to match other Federal grants, may not be included except as otherwise provided by law.

(b) All grant awards shall be in writing, and shall set forth the amount of funds granted and the period for which support is recommended.

(c) Neither the approval of any project nor any grant award shall commit or obligate the United States in any way to make any additional, supplemental, continuation, or other award with respect to any approved project or portion thereof. For continuation support, grantees must make separate application.

## § 51c.108 Grant payments.

The Secretary shall from time to time make payments to a grantee of all or a portion of any grant award, either in advance or by way of reimbursement for expenses incurred or to be incurred to the extent he determines such payments necessary to promote prompt initiation and advancement of the approved project. Such payments may include reimbursement to a grantee for health services rendered on a prepaid capitation basis.

## § 51c.109 Nondiscrimination.

(a) Attention is called to the requirements of Title VI of the Civil Rights Act of 1964 (78 Stat. 252, 42 U.S.C. et seq.) and in particular section 601 of such Act which provides that no person in the United States shall on the grounds of race, color, or national origin be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance. A regulation implementing such Title VI, which applies to grants made under this part, has been issued by the Secretary of Health, Education, and Welfare with the approval of the President (45 CFR Part 80). In addition no person shall, on the grounds of sex or creed (unless otherwise medically indicated), be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity so receiving Federal financial assistance on the grounds of age, sex, creed, or marital status.

(b) Attention is called to the requirements of section 504 of the Rehabilitation Act of 1973, as amended, which provides that no otherwise qualified handicapped individual in the United States shall, solely by reason of his handicap, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance.

## § 51c.110 Confidentiality.

All information as to personal facts and circumstances obtained by the project staff about recipients of services shall be held confidential, and shall not be divulged without the individual's consent except as may be required by law or as may be necessary to provide service to the individual. Information may be disclosed in summary, statistical, or other form which does not identify particular individuals.

## § 51c.111 Inventions or discoveries.

A grant award under this part is subject to the regulations of the Department of Health, Education, and Welfare as set forth in 45 CFR Parts 6 and 8, as amended. Such regulations shall apply to any activity for which grant funds are in fact used whether within the scope of the project as approved or otherwise. Appropriate measures shall be taken by the grantee and by the Secretary to assure that no contracts, assignments, or

other arrangements inconsistent with the grant obligation are continued or entered into and that all personnel involved in the supported activity are aware of and comply with such obligations. Laboratory notes, related technical data, and information pertaining to inventions and discoveries shall be maintained for such periods, and filed with or otherwise made available to the Secretary or those he may designate at such times and in such manner as he may determine necessary to carry out such Department regulations.

## § 51c.112 Publications and copyright.

Except as may otherwise be provided under the terms and conditions of the award, the grantee may copyright without prior approval any publications, films, or similar materials developed or resulting from a project supported by a grant under this part, subject, however, to a royalty-free, nonexclusive, and irrevocable license or right in the Government to reproduce, translate, publish, use, disseminate, and dispose of such materials and to authorize others to do so.

## § 51c.113 Grantee accountability.

(a) **Accounting for grant award payments.** All payments made by the Secretary shall be recorded by the grantee in accounting records separate from the records of all other funds, including funds derived from other grant awards. With respect to each approved project, the grantee shall account for the sum total of all amounts paid as well as matching funds and in-kind contributions by presenting or otherwise making available evidence satisfactory to the Secretary of expenditures for direct and indirect costs meeting the requirements of this part: *Provided, however,* That when the amount awarded for indirect costs was based on a predetermined fixed percentage of estimated direct costs, the amount allowed for indirect costs shall be computed on the basis of such predetermined fixed-percentage rates applied to the total, or a selected element thereof, of the reimbursable direct costs incurred.

(b) **Accounting for interest earned on grant funds.** Pursuant to section 203 of the Intergovernmental Cooperation Act of 1968 (42 U.S.C. 4213), a State will not be held accountable for interest earned on grant funds, pending their disbursement for grant purposes. A State, as defined in section 102 of the Intergovernmental Cooperation Act, means any one of the several States, the District of Columbia, Puerto Rico, any territory or possession of the United States, or any agency or instrumentality of a State, but does not include the governments of the political subdivisions of the State. All grantees other than a State, as so defined, must return all interest earned on grant funds to the Federal Government.

(c) **Grant closeout.** (1) *Date of final accounting.* A grantee shall render, with respect to each approved project, a full account, as provided herein, as of the date of the termination of grant support. The Secretary may require other special and periodic accounting.

(2) *Final settlement.* There shall be payable to the Federal Government as final settlement with respect to each approved project the total sum of:

(i) Any amount not accounted for pursuant to paragraph (a) of this section;

(ii) Any credits for earned interest pursuant to paragraph (b) of this section; and

(iii) Any other amounts due pursuant to Subparts F, M, and O of 45 CFR Part 74.

Such total sum shall constitute a debt owed by the grantee to the Federal Government and shall be recovered from the grantee or its successors or assignees by setoff or other action as provided by law.

#### § 51c.114 Applicability of 45 CFR Part 74.

The provisions of 45 CFR Part 74, establishing uniform administrative requirements and cost principles, shall apply to all grants under this part to States and local governments as those terms are defined in Subpart A of that Part 74. The relevant provisions of the following subparts of Part 74 shall also apply to grants to all other grantee organizations under this part:

#### 45 CFR PART 74

- Subpart A General.
- B Cash depositories.
- C Bonding and insurance.
- D Retention and custodial requirements for records.
- F Grant-related income.
- G Matching and cost sharing.
- K Grant payment requirements.
- L Budget revision procedures.
- M Grant closeout, suspension, and termination.
- O Property.
- Q Cost principles.

#### Subpart B—Grants for Community Health Service Projects

##### § 51c.201 Applicability.

The regulations of this subpart, in addition to the regulations of subpart A of this part, are applicable to grants awarded pursuant to section 314(e) of the Act for projects providing to a target population health services sufficient to meet a significant portion of the need for such services by such target population.

##### § 51c.202 Project elements.

An approvable project under this subpart must:

(a) Provide for an orderly sequence of planning, implementation, and evaluation procedures with regard to the developmental and operational phases of this project which will be (or have been) accomplished using, whenever feasible, specific dates.

(b) Provide services within a health services scarcity area. As used in this section, health services scarcity area means a defined geographic area selected on the basis of the Indicators of Health Services Scarcity set forth in Appendix A of this subpart, showing

(1) That there is a shortage in the number of health or health-related personnel in such area; or

(2) That health facilities in such area are inaccessible or ineffectively utilized by reason of geographic, monetary, administrative or cultural barriers.

(c) Provide for delivery, or arrange for the delivery, to a significant percentage of the population of the health service scarcity area served by the project, of services which shall include those set forth in paragraph (a) and may include those set forth in paragraph (b) of Appendix B of this subpart.

(d) Provide for operation of the project in a manner calculated to preserve human dignity and to maximize acceptability and effective utilization of services.

(e) Except as provided in § 51c.203(c), establish a governing board or advisory council which satisfies the applicable requirement of 51c.203.

(f) Provide for the coordination of project activities with the activities of other federally funded health services delivery projects and programs serving the same population.

(g) Establish basic data, cost accounting, and reporting or monitoring systems which will be compatible with applicable Federally established national reporting requirements for health service delivery projects.

(h) Provide for implementation of a system for maintaining health services records.

(i) Provide for internal and external review of the quality of care.

(j) Provide the means for evaluating progress toward the achievement of the specific objectives of the project.

(k) Provide standards and qualifications for personnel (including the project director) and standards for facilities utilized in the performance of the project.

(l) Provide for the utilization, to the maximum extent feasible, of other Federal, State, local, and private resources available for support of the project, prior to use of project funds under this subpart.

(m) Provide for the delivery of services in accordance with such plans as have been developed by the appropriate State agency pursuant to section 314(a) or Title XV of the Act, as applicable.

(n) Provide a plan for short- and long-term training programs for project personnel and for defined career ladders for both professional and nonprofessional employees of the project.

(o) Provide assurance satisfactory to the Secretary that no person shall be denied service by reason of his inability to pay therefor: *Provided, however,* That a charge for the provision of services will be made to the extent that a third party (including a Government agency) is authorized or is under a legal obligation to pay such charge: *And further provided,* That where the cost of care and services furnished by or through the project is to be reimbursed to the project under Title XIX of the Social Security Act, the appli-

cant will make reasonable efforts to obtain a written agreement with the Title XIX agency.

(p) Subject to the provisions of paragraph (o) of this section, provide for charges to be made for services rendered pursuant to the project in accordance with a schedule submitted as part of the project. Such schedule may provide for services to be rendered on a prepaid capitation basis. In those cases in which the project will provide services by contract or other similar arrangement with the actual providers of services, a plan shall be provided establishing rates and methods of payment (including payment on a prepaid capitation basis) for medical care. Such payment must be made pursuant to agreements with a schedule of rates and payment procedures maintained by the grantee. The grantee must be prepared to substantiate that such rates are reasonable and necessary.

#### § 51c.203 Governing board or advisory council.

(a) *Governing board.* Except as provided in paragraph (b) or (c) of this section, a governing board shall be established by an applicant as follows:

(1) *Size.* The board shall consist of at least 9 but not more than 25 members.

(2) *Composition.* (i) No less than one-third of the members of the board shall be individuals who are or will be served by the project.

(ii) No more than one-third of the members of the board shall be individuals who derive more than 10 percent of their annual income from the health care industry.

(iii) The remaining members of the board shall be representatives of the community in which the project service area is located and shall be selected for their expertise in community affairs, local government, finance and banking, legal affairs, trade unions, other commercial and industrial concerns, or social service agencies within the community.

(3) *Selection of members.* The method of selection of all members of the governing board shall be prescribed in the bylaws or other internal governing rules of the grantee organization. Such bylaws or other rules must specify a process by which those individuals who are selected as users of project services are broadly representative of the population to be served by the project. The bylaws or other rules are subject to approval by the Secretary.

(4) *Functions and responsibilities.* (i) The governing board shall have full legal authority for the establishment of policy in the conduct of the project.

(ii) The governing board shall hold regularly scheduled meetings, for which minutes shall be kept.

(iii) The governing board shall have specific responsibility for:

(A) Appointment and dismissal of a project director or chief executive officer of the project;

(B) Establishing personnel policies and procedures including selection and dismissal procedures, salary and benefit

scales, employee grievance procedures, and equal opportunity practices;

(C) Adopting financial management practices including a system to assure accountability for project resources, approval of annual project budget, resource allocation for project priorities, eligibility for services including criteria for partial payment schedules, and long-range financial planning;

(D) Evaluating project activities including service utilization patterns, productivity of the project, patient satisfaction, and development of a process for hearing and resolving patient grievances; and

(E) Assuring that the project is operated in compliance with applicable Federal, State, and local laws and regulations.

(b) *Advisory council.* The Secretary may, for good cause shown, make a grant award to an organization which does not meet the requirements of paragraph (a), if such agency or organization establishes an advisory council to the governing board or other policy-making body of the grantee organization, which meets the following requirements:

(1) *Size.* The advisory council shall consist of at least 9 but not more than 25 members.

(2) *Composition.* The members of the advisory council shall be selected solely from those individuals who are or will be served by the project;

(3) *Selection of members.* The method of selection of all members of the advisory council shall be prescribed in the bylaws or other internal governing rules of the grantee organization. Such bylaws or other rules must assure that a broad representation of the population to be served by the project are selected as members of the advisory council. The bylaws or other rules are subject to approval by the Secretary.

(4) *Functions and responsibilities.* (A) The advisory council shall meet with the policy-making body of the grantee organization at least twice during each 12-month period for the purpose of advising the policy-making body on the exercise of its responsibility in carrying out the project. Minutes of such meetings shall be kept, copies of which shall be included with the application for a continuation grant.

(B) The advisory council is specifically charged with responsibility for developing and implementing a patient grievance procedure and commenting on the operation of that procedure as a part of a continuation application.

(C) The Secretary may, for good cause shown, allow a grantee a period of time for compliance with the requirements of paragraph (a) or (b) of this section, as follows:

(1) *Continuation grants.* A grantee under a continuation grant may be given a reasonable period of time, not to exceed 1 year from the effective date of these regulations, to establish a governing board or advisory council meeting the requirements of paragraph (a) or (b) of this section.

(2) *Inconsistent State or local laws.* In addition, in the case of a grantee

which is a State or local government agency and which has demonstrated to the satisfaction of the Secretary that it is unable, under State or local law, to establish either a governing board or an advisory council pursuant to paragraph (a) or (b) of this section, the Secretary may allow such grantee a reasonable period of time to take the appropriate steps to have such legal disability removed: *Provided,* That, such grantee, in the interim, must establish alternate procedures, approved by the Secretary, to assure maximum participation in the development, implementation, and evaluation of the project by the population to be served consistent with the concept of a governing board or advisory council as set forth in paragraph (a) or (b) of this section.

#### § 51c.204 Grant evaluation and award.

Within the limits of funds determined by the Secretary to be available for such purpose, the Secretary may award grants under this subpart to cover part of the cost of projects to those applicants whose projects will, in his judgment, best promote the purposes of section 314(e) of the Act and the regulations in the subpart, taking into account:

(a) The degree to which the proposed project satisfactorily provides for the elements set forth in § 51c.202;

(b) The needs of the population to be served for the services to be provided;

(c) The capability of the project to provide quality health care services;

(d) The potential of the project for the development of new and effective methods for health services delivery and financing;

(e) The soundness of the fiscal plan for assuring effective utilization of grant funds and maximizing third-party reimbursement;

(f) The administrative and management capability of the applicant;

(g) The relative distribution of applications with respect to the following factors:

(1) The urban-rural area to be served;

(2) The nature of the organization applying, e.g., university, public health department, community corporation, etc.;

(3) The organizational structure for delivery of services; and

(4) The stage of development of the project; and

(h) The number of registrants/users and the level of utilization of services in previous operational periods, if any.

#### § 51c.205 Use of project funds.

(a) Any funds granted pursuant to this subpart, as well as other funds to be used in performance of the approved project, shall be expended solely for carrying out the approved project in accordance with section 314(e) of the Act, the regulations of this part, the terms and conditions of the award, and the applicable cost principles prescribed by Subpart O of 45 CFR Part 74.

(b) Project funds under this subpart may be used for, but need not be limited to, the following:

- (1) Developmental activities;
- (2) Administrative core components;

(3) Training to meet management needs of the project, including the training of the governing board or advisory council;

(4) To reimburse members of any governing board or advisory council for reasonable expenses actually incurred by reason of their participation in such board or council activities; and

(5) To reimburse any governing board or advisory council members for wages lost by reason of participation in the activities of such board or council if the member is from a family with a family income below \$10,000, or if the member is a single person with an income below \$7,000.

(c) Prior approval by the Secretary of revision of the budget and project plan is required whenever there is to be a significant change in the scope or nature of project activities.

#### Appendix A—Indicators of Health Service Scarcity

The listed indicators should be obtained for the defined geographic area being considered as well as contiguous areas. All of the indicators should be considered in relation to the population of the area. Future needs should be considered based on the ratio of anticipated resources to projected population.

(a) Quantitative lack of health and related services:

(1) Ratio of primary care physicians to population (i.e., physicians in general practice, internal medicine, general surgery, and pediatrics).

(2) Ratio of physicians in specialty practices to population.

(3) Ratio of dentists in general practice to population.

(4) Ratio of dentists in specialty practices to population.

(5) Ratio of allied medical personnel to physicians.

(6) Ratio of allied dental personnel to dentists.

(7) Ratio of nurses to hospital beds.

(8) Ratios of other paramedical personnel to hospital beds or population, as appropriate.

(9) Number of inpatient facilities by bed size and type of services offered. (Include hospitals—general and special, extended care facilities, nursing homes, personal care homes, etc.)

(10) Number of outpatient facilities by type of services offered. (Include hospital and health department clinic services, home health clinic services, home health services, emergency services, etc.)

(11) Health status indicators such as: Infant, maternal, and overall mortality rates, accident rates, disease incidence and prevalence, oral health indicators; disability rates, immunization status, work absences, and school absences may provide insight into general health status and indicate need for specific services; specific acute disease incidence and prevalence may indicate need for preventive and environmental services; suicide rates, drug abuse, crime, and alcoholism may further indicate need for mental health services.

(b) Inaccessibility of health and related services:

V

## PROPOSED RULES

(1) Distance, time, and transportation costs to reach health care personnel and facilities.

(2) Hours service is available in relation to hours population is available.

(3) Income level of area.

(4) Existing modes of financing health care (i.e., restrictions, etc.).

(c) Ineffective utilization of health and related services:

(1) Number of patients and patient visits by service for inpatient and outpatient facilities.

(2) Charges and source of payment by service for inpatient and outpatient facilities.

(3) Waiting time for health care.

(d) Prior designation of the area as a medically underserved or as a scarcity area in other federally supported health programs, e.g., Community Mental Health Centers, Hospital and Medical Facilities, National Health Service Corps, or Office of Economic Opportunity.

## Appendix B—Benefits

(a) **Basic benefits.** Community health service projects must develop a basic benefit package (or packages) which will meet the health care needs of the subscribers and serve as the basis for staffing and/or contracting for services. The benefit package must contain a basic level of benefits which includes:

(1) Physician services—including consultant and referral services.

(2) Outpatient hospital services.

(3) Diagnostic laboratory and diagnostic and therapeutic radiologic services.

(4) Emergency medical services.

(5) Ambulance services.

(6) Preventive health services, including family planning, well child care, and maternity care and services.

(7) Home health care, limited to 100 visits per year.

(8) Medical supplies and devices.

(9) Outpatient drugs and biologicals.

(10) Inpatient hospital services must be provided by those projects that are networks up to 120 days in acute general hospitals per contract year, including physician services.

(b) **Supplemental benefits.** The following supplemental benefits may be provided with project funds where sufficient funds are available, consistent with the grantee's ability to adequately provide such services, and as approved in the grant award:

(1) Inpatient hospital services, not to exceed 120 days.

(2) Preventive and restorative dental services for individuals under the age of 13.

(3) Developmental vision care services, routine eye and vision examinations, and eyeglasses for individuals under the age of 13.

(4) Hearing aids and examinations for individuals under the age of 13.

(5) Mental health services on an outpatient basis, not to exceed 30 visits.

(6) Mental health services on an inpatient basis, not to exceed 30 days per year.

(7) Environmental health services, as may be appropriate for particular centers.

(8) Transportation services, as required for adequate patient care.

(9) Allied health services.

(10) Public health services (including nutrition education and social services).

(11) Health education services.

(12) Rehabilitative services (including physical therapy) and long-term physical medicine.

(13) Extended care facility services.

(14) Services which promote and facilitate optimal use of the basic health services (including services of outreach workers).

## Subpart C—Grants for Family Health Center Projects

## § 51c.301 Applicability.

The regulations of this subpart, in addition to the regulations of subpart A of this part, are applicable to the award of grants under section 314(e) of the Act for family health center projects to develop and provide, on a prepaid capitation basis, programs which are:

(a) Designed to deliver or arrange for the delivery of health maintenance and treatment services to enrolled populations in health service scarcity areas; and

(b) Designed to identify and suggest solutions to the problems of providing such health services to such populations.

## § 51c.302 Definitions.

As used in this subpart:

(a) "Health service scarcity area" or "scarcity area" means a defined geographic area in which the Secretary determines, on the basis of the indicators set forth in Appendix A of this subpart,

(1) That there is a shortage in the number of health or health related personnel in such area, or

(2) That health facilities in such areas are inaccessible or ineffectively utilized by reason of geographic, monetary, administrative, or cultural barriers.

(b) "Enrollee" means a person belonging to one of the three groups described in Appendix C of this subpart, and who under a contract or agreement with a family health center project is entitled to receive the basic and, where applicable, the supplemental benefits for a fixed periodic payment.

(c) "Non-enrollee" means a person who, without a contract or agreement with the family health center project, receives health services for which the center is reimbursed on a fee-for-service basis while the center is attempting to secure prepaid capitation contracts.

(d) "Basic" and "supplemental" benefits mean the health benefits and other such health services which are set forth in paragraphs (a) and (b), respectively, of Appendix B of this subpart, to which an enrollee is entitled.

(e) "Supplemental" means a person who, without a contract or agreement with the family health center project, receives health services for which the center is reimbursed on a fee-for-service basis while the center is attempting to secure prepaid capitation contracts.

## § 51c.303 Project elements.

An appropriate project under this subpart must provide for:

(a) An orderly sequence of planning, implementation, and evaluation procedures with regard to the developmental and operational phases of the project which will be (or have been) accomplished using, whenever feasible, specific dates.

(b) Services which shall include those set forth in paragraph (a) and may include those set forth in paragraph (b) of Appendix B of this subpart.

(c) The means of delivering or developing the capacity to deliver the basic and supplemental benefits to its enrollees within a designated scarcity area.

(d) A marketing and enrollment plan, including market analysis, marketing strategy, and enrollment growth projections.

(e) A plan for the financial management of the project for a 3 year period that includes revenue and expense statements.

(f) A plan that provides for the progress of the project toward funding on a capitation basis.

(g) The financing of the basic and supplemental benefits on a prepaid capitation basis to enrollees and/or on a fee-for-service basis to non-enrollees while the project is attempting to secure prepaid capitation contracts.

(h) A plan to provide for internal and external review of the quality of care.

(i) A plan to develop written agreements for the provision of those basic and supplemental benefits to which enrollees are entitled but which cannot be provided directly by the project.

(j) A plan for complying with State regulatory requirements.

(k) Operation of the project in a manner calculated to preserve human dignity and to maximize acceptability and effective utilization of services.

(l) Community participation in the form of contributions of cash or services, loans of full- or part-time staff, equipment, space, materials, or facilities, or other similar contributions.

(m) A governing board or advisory council in accordance with § 51c.304.

(n) Coordination of project activities with the activities of other Federally funded health services delivery projects and programs serving the same population.

(o) A management information system, including cost accounting, utilization, and enrollment subsystems, which will provide the necessary data to adequately manage the project and to meet Federal reporting requirements.

(p) The implementation of a system for maintaining health services records.

(q) A management plan for implementing the specific objectives and for evaluating progress toward the achievement of the specific objectives of the project.

(r) Standards and qualifications for personnel (including the project director) and standards for facilities utilized in the performance of the project.

(s) Delivery of services in accordance with such plans as have been developed by the appropriate State agency pursuant to section 314(a) or Title XV of the Act, as applicable.

(t) Cost sharing for Group III enrollees, in conformity with the cost-sharing provisions of Appendix D of this subpart.

## § 51c.304 Governing board or advisory council.

(a) **Governing board.** Except as provided in paragraph (b) or (c) of this section, a governing board shall be established by an applicant as follows:

(1) **Size.** The board shall consist of at least 9 but not more than 25 members.

(2) **Composition.** (i) No less than one-third of the members of the Board shall be individuals who are or will be served by the project.

(ii) No more than one-third of the members of the board shall be individuals who derive more than 10 percent of their annual income from the health care industry.

(iii) The remaining members of the board shall be representatives of the community in which the project service area is located and shall be selected for their expertise in community affairs, local government, finance and banking, legal affairs, trade unions, other commercial and industrial concerns, or social service agencies within the community.

(3) **Selection of members.** The method of selection of all members of the governing board shall be prescribed in the bylaws or other internal governing rules of the grantee organization. Such bylaws or other rules must specify a process by which those individuals who are selected as users of project services are broadly representative of the population to be served by the project. The bylaws or other rules are subject to approval by the Secretary.

(4) **Functions and responsibilities.** (i) The governing board shall have full legal authority for the establishment of policy in the conduct of the project.

(ii) The governing board shall hold regularly scheduled meetings, for which minutes shall be kept.

(iii) The governing board shall have specific responsibility for:

(A) Appointment and dismissal of a project director or chief executive officer of the project;

(B) Establishing personnel policies and procedures including selection and dismissal procedures, salary and benefits scales, employee grievance procedures, and equal opportunity practices;

(C) Adopting health care policies including scope and availability of services, location and hours of services, and quality-of-care audit procedures;

(D) Adopting financial management practices including a system to assure accountability for project resources, approval of annual project budget, resource allocation for project priorities, eligibility for services including criteria for partial-payment schedules, and long-range financial planning;

(E) Evaluating project activities including service utilization patterns, productivity of the project, patient satisfaction, and development of a process for hearing and resolving patient grievances; and

## PROPOSED RULES

(F) Assuring that the project is operated in compliance with applicable Federal, State, and local laws and regulations.

(b) **Advisory council.** The Secretary may, for good cause shown, make a grant award to an organization which does not meet the requirements of paragraph (a), if such agency or organization establishes an advisory council to the governing board or other policy-making body of the grantee organization, which meets the following requirements:

(1) **Size.** The advisory council shall consist of at least 9 but not more than 25 members.

(2) **Composition.** The members of the advisory council shall be selected solely from those individuals who are or will be served by the project;

(3) **Selection of members.** The method of selection of all members of the advisory council shall be prescribed in the bylaws or other internal governing rules of the grantee organization. Such bylaws or other rules must specify a process by which those individuals who are selected as users of project services are broadly representative of the population to be served by the project. The bylaws or other rules are subject to approval by the Secretary.

(4) **Functions and responsibilities.** (A) The advisory council shall meet with the policy-making body of the grantee organization at least twice during each 12-month period for the purpose of advising the policy-making body on the exercise of its responsibility in carrying out the project. Minutes of such meetings shall be kept, copies of which shall be included with the application for a continuation grant.

(B) The advisory council is specifically charged with responsibility for developing and implementing a patient grievance procedure and commenting on the operation of that procedure as a part of a continuation grant.

(C) The Secretary may, for good cause shown, allow a grantee a period of time for compliance with the requirements of paragraph (a) or (b) of this section, as follows:

(1) **Continuation grants.** A grantee under a continuation grant may be given a reasonable period of time, not to exceed 1 year from the effective date of these regulations, to establish a governing board or advisory council meeting the requirements of paragraph (a) or (b) of this section.

(2) **Inconsistent State or local laws.**

In addition, in the case of a grantee which is a State or local governmental agency and which has demonstrated to the satisfaction of the Secretary that it is unable, under State or local law, to establish either a governing board or an advisory council pursuant to paragraph (a) or (b) of this section, the Secretary may allow such grantee a reasonable period of time to take the appropriate steps to have such legal disability removed: *Provided*, That, such grantee, in the interim, must establish alternate procedures, approved by the Secretary, to assure maximum participation in the development, implementation, and evaluation of the project by the population to be served consistent with the concept of a governing board or advisory council as set forth in paragraph (a) or (b) of this section.

§ 51c.305 Grant evaluation and award.

Within the limits of funds determined by the Secretary to be available for such purpose, the Secretary may award grants under this subpart to cover part of the cost of projects to those applicants whose projects will, in his judgment, best promote the purposes of section 314(e) of the Act and the regulations in this subpart, taking into account:

(a) The degree to which the proposed project satisfactorily provides for the elements set forth in § 51c.303;

(b) The needs of the population to be served for the services to be provided;

(c) The capability of the project to provide quality health care services;

(d) The potential of the project for the development of new and effective methods for health services delivery and financing;

(e) The soundness of the fiscal plan for assuring effective utilization of grant funds and for maximizing third-party reimbursement.

(f) The administrative and management capability of the applicant;

(g) The relative distribution of applications with respect to the following factors:

(1) The urban-rural area to be served;

(2) The nature of the organization applying, e.g., university, public health department, community corporation, etc.;

(3) The organizational structure for delivery of services; and

(4) The stage of development of the project; and

(h) The number of enrollees and level of utilization of services in previous operational periods, if any.

## § 51c.306 Use of project funds.

(a) Any funds granted pursuant to this subpart, as well as other funds to be used in performance of the approved project, may be expended solely for carrying out the approved project in accordance with section 314(e) of the Act, the regulations of this part, the terms, and conditions of the award, and the applicable cost principles set forth in 45 CFR Part 74, Subpart Q.

(b) Project funds under this subpart may be used for the following:

(1) Developmental activities.

(2) Administrative core components.

(3) Training to meet management needs of the project, including training members of the governing board or advisory council.

(4) To provide or make arrangements for approved services to Group III enrollees.

(5) Supplementation of the benefits of Group I enrollees who meet income eligibility requirements in Appendix C of this subpart to make those benefits comparable to the benefits available to Group III enrollees.

## PROPOSED RULES

(6) Cost of delivering basic benefits to non-enrollees. *Provided, That:*

(i) Reasonable effort is made to collect charges under a billing and collection system, and

(ii) That such funds do not exceed the difference between total reported unit costs for the services actually provided and the sum of charges actually collected.

(7) To reimburse members of any governing board or advisory council for reasonable expenses actually incurred by reason of their participation in such board or council activities; and

(8) With respect to such members whose income is within the limits of Group III enrollees as set forth in Appendix C of this subpart, to reimburse members of any governing board or advisory council for wages lost by reason of participation in such board or council activities.

(9) To develop and maintain a reserve fund to be used in offsetting underestimates of funding needs and for complying with requirements of State law for prepaid health care services.

(10) To purchase reinsurance or lines of credit to protect the financial solvency of the project.

(11) To purchase insurance for medical emergency and out-of-area coverage.

(c) Project funds under this subpart may not be used for the following:

(1) The annual premium and "per visit" charge as set forth in Appendix D of this subpart.

(2) Capitation payments for Group II enrollees.

(d) Prior approval by the Secretary of revisions of the budget and project plan is required whenever there is to be a significant change in the scope or nature of project activities.

#### Appendix A—Indicators of Health Service Scarcity

The listed indicators should be obtained for the defined geographic area being considered as well as contiguous areas. All of the indicators should be considered in relation to the population of the area. Future needs should be considered based on the ratio of anticipated resources to projected population.

(a) Quantitative lack of health and related services:

(1) Ratio of primary care physicians to population (i.e., physicians in general practice, internal medicine, general surgery, and pediatrics).

(2) Ratio of physicians in specialty practices to population.

(3) Ratio of dentists in general practice to population.

(4) Ratio of dentists in specialty practices to population.

(5) Ratio of allied medical personnel to physicians.

(6) Ratio of allied dental personnel to dentists.

(7) Ratio of nurses to hospital beds.

(8) Ratios of other paramedical personnel to hospital beds or population, as appropriate.

(9) Number of inpatient facilities by bed size and type of services offered. (Include hospitals—general and special, extended care facilities, nursing homes, personal care homes, etc.)

(10) Number of outpatient facilities by type of services offered. (Include hospital and health department clinic services, home health clinic services, home, health services, emergency services, etc.)

(11) Health status indicators such as: Infant, maternal, and overall mortality rates, accident rates, disease incidence and prevalence, oral health indicators; disability rates, immunization status, work absences, and school absences may provide insight into general health status and indicate need for specific services; specific acute disease incidence and prevalence may indicate need for preventive and environmental services; suicide rates, drug abuse, crime, and alcoholism may further indicate need for mental health services.

(b) Inaccessibility of health and related services:

(1) Distance, time, and transportation costs to reach health care personnel and facilities.

(2) Hours service is available in relation to hours population is available.

(3) Income level of area.

(4) Existing modes of financing health care (i.e., restrictions, etc.)

(c) Ineffective utilization of health and related services:

(1) Number of patients and patient visits by service for inpatient and outpatient facilities.

(2) Charges and source of payment by service for inpatient and outpatient facilities.

(3) Waiting time for health care.

(d) Prior designation of the area as a medically underserved or as a scarcity area in other federally supported health programs, e.g., Community Mental Health Centers, Hospital and Medical Facilities, National Health Service Corps, or Office of Economic Opportunity.

#### Appendix B—Family Health Center Benefits

(a) *Basic benefits.* Family health centers must develop a basic benefit package (or packages) which will meet the health care needs of the subscribers, serve as the basis for staffing and/or contracting for services, and allow for the development of competitive premiums and capitation. The Group III benefit package must contain a basic level of benefits which includes:

(1) Physician services—including consultant and referral services.

(2) Outpatient hospital services.

(3) Diagnostic laboratory and diagnostic and therapeutic radiologic services.

(4) Emergency medical services.

(5) Ambulance services.

(6) Medically necessary out-of-area coverage (under the prepaid capitation arrangement).

(7) Preventive health services, including family planning, well-child care, and maternity care and services.

(8) Home health care, limited to 100 visits per year.

(9) Medical supplies and devices.

(10) Outpatient drugs and biologicals.

(b) *Supplemental benefits.* The following supplemental benefits may be provided with project funds where sufficient funds are available, consistent with the grantee's ability to adequately provide such services, and as approved in the grant award:

(1) Inpatient hospital services, not to exceed 120 days.

(2) Preventive and restorative dental services for individuals under the age of 13.

(3) Developmental vision care services, routine eye and vision examinations, and eyeglasses for individuals under the age of 13.

(4) Hearing aids and examinations for individuals under the age of 13.

(5) Mental health services on an outpatient basis, not to exceed 30 visits.

(6) Mental health services on an inpatient basis, not to exceed 30 days per year.

(7) Environmental health services, as may be appropriate for particular centers.

(8) Transportation services, as required for adequate patient care.

(9) Allied health services.

(10) Public health services (including nutrition education) and social services.

(11) Health education services.

(12) Rehabilitative services (including physical therapy) and long-term physical medicine.

(13) Extended care facility services.

(14) Services which promote and facilitate optimal use of the basic health services (including services of outreach workers).

#### Appendix C—Eligibility

*Group I. Families, individuals, or groups of individuals who are eligible for third-party payments for health care.* Such coverage may be from public or private health plans. This includes Medicaid, Medicare, union health plans, and other similar health insurance plans.

*Group II. Any individual, family, or group of individuals who can pay for services from personal resources.*

*Group III. Individuals and families whose incomes do not exceed the following individual and family income limits:*

Classes	Individual	Family
A	0 to \$1,749	0 to \$2,499
B	\$1,750 to \$3,499	\$2,500 to \$4,999
C	\$3,500 to \$5,249	\$5,000 to \$7,499
D	\$5,250 to \$6,999	\$7,500 to \$9,999

(a) "Individual" means a person living alone or with a family who receives services or enrolls in a family health center.

(b) "Family" means two or more individuals who are living in a place of residence maintained by one or more of them as his or their own home, who are temporary or permanent residents of the United States. An individual who is temporarily absent from the place of residence described above, for the purpose of

engaging in or seeking employment or self-employment (including military service) shall nevertheless be considered to be living in the place of residence.

(c) "Child" means an individual who is under the age of 18, or under the age of 22 and a student regularly attending a school, college, or university, or a course of vocational or technical training, designed to prepare him for gainful employment.

(d) "Income" means and shall be calculated as follows:

(1) Both earned and unearned income: (i) Remuneration of services performed as an employee or net earnings from self-employment; (ii) unearned income means all other income including support and maintenance furnished in cash or otherwise, including family assistance benefits; State supplementary payments; payments received as annuity, pension, retirement, or disability benefit, including veteran's or workmen's compensation; old age survivors and disability insurance; railroad retirement; unemployment benefits; support or alimony payments; rents, dividends, interest and royalties; regularly recurring payments which are intended to replace earned income, whether for a temporary or indefinite period of time; gifts, prizes, awards, inheritances; and proceeds from any life insurance policy which exceeds the amount expended by family members for expenses of the insured individual's last illness or burial not to exceed \$1,500.

(2) Exclusion from income. The following items shall be excluded from calculations in determining the income of a family:

(i) The earned income of each child in the family who is a student regularly attending a school, college, or university, or a course of vocational or technical training designed to prepare him for gainful employment;

(ii) (a) The total unearned income of all members of a family in a calendar quarter which is received too infrequently or irregularly to be included, up

## PROPOSED RULES

21635

to a limit of \$60 per quarter; and calendar quarter which is received too infrequently or irregularly to be included up to a limit of \$30 per quarter;

(iii) An amount of earned income of a member of the family equal to the cost incurred by a family member for child care deemed necessary to securing or continuing in manpower training, vocational rehabilitation, employment, or self-employment;

(iv) Food stamps or any other assistance which is based on need and provided in a form other than cash by a public or private agency;

(v) (a) Any incentive allowance from the Department of Labor to individual members of the family participating in manpower training (up to \$30 per month per individual);

(b) Any incentive allowance (not to exceed \$30 per month per individual) from the Department of Labor or the Department of Health, Education, and Welfare to individual members of the family who are unemployed and unable to work solely because of an illness or incapacity and who are receiving vocational rehabilitation services from the appropriate State agency administering or supervising the administration of the approved State plan for vocational rehabilitation services approved under the Vocational Rehabilitation Act.

(c) Allowances paid by a State or political subdivision to a member of a family participating in a Federal income main-

tenance program (not to exceed \$30 per month);

(vi) Any portion of any grant, scholarship, or fellowship received for use in paying the cost of tuition and fees at any educational (including technical or vocational education) institution;

(vii) Home produce raised by a member of the family for consumption by the household;

(viii) One-third of any payments received for the support of children who are family members, or alimony paid to family members; and

(ix) Any amounts received for the foster care of a child who is not a member of the family but who is living in the same home as the family and was placed in such home by a public or nonprofit child-placement or child-care agency.

Notwithstanding any other provision, the total amount which may be excluded under the preceding items (i), (ii), and (iii) in determining the income of any family for any year, shall not exceed the lesser of—

(1) \$2,000 plus \$200 for each member of the family in excess of four, or

(2) \$3,000 or a proportionately smaller amount for a shorter period.

#### Appendix D—Cost Sharing

(a) *Premiums.* The premiums for individual and family enrollment in a family health center shall be prepaid for stated periods and shall be determined in accordance with the following schedule:

Income class	Annual individual income	Annual family income	Percent of premium to be paid by individual and family	Premium not to exceed percent of income
A	0 to \$1,749	0 to \$2,499	0	0
B	\$1,750 to \$3,499	\$2,500 to \$4,999	10	2
C	\$3,500 to \$5,249	\$5,000 to \$7,499	25	3
D	\$5,250 to \$6,999	\$7,500 to \$9,999	50	5

(b) *Per Visit Charge.* A per-visit charge may be made to reduce overutilization; it should not, however, be so large

as to raise a barrier to receiving necessary services.

OLD OIL ALLOCATION PROGRAM  
Entitlement Notice for March 1975**

In accordance with the provisions of 10 CFR 211.67 relating to FEA's old oil allocation program, the monthly notice specified in § 211.67(i) is hereby published. This notice corrects certain errors made by FEA in its initially released calculations of entitlement issuances for March 1975.

Based on reports submitted to FEA by refiners as to crude oil receipts and crude oil runs to stills for March 1975 and an application of the entitlement adjustment for small refiners provided in 10 CFR 211.67(e), the adjusted national old oil supply ratio for March 1975 is calculated to be .358938.

The issuance of entitlements for the month of March 1975 to refiners and to one other firm (pursuant to a Decision and Order issued by FEA's Office of Exceptions and Appeals) is set forth in the Appendix to this notice. The Appendix lists the name of each refiner and other firm to which entitlements have been issued, the number of entitlements issued to each such refiner or other firm, and the number of barrels of old oil included in each refiner's adjusted crude oil receipts.

Pursuant to 10 CFR 211.67(i) (4), FEA hereby fixes the price at which entitlements shall be sold and purchased for the month of March 1975 at \$7.31, which is the exact differential as reported for the month of March between the weighted average costs to refiners of old oil and of new, released, stripper well and imported crude oil.

In accordance with 10 CFR 211.67(b), each refiner that has been issued fewer entitlements for the month of March

1975 than the number of barrels of old oil included in its adjusted crude oil receipts is required to purchase a number of entitlements for the month of March 1975 equal to the difference between the number of barrels of old oil included in those receipts and the number of entitlements issued to and retained by that refiner. Refiners which have been issued a number of entitlements for the month of March 1975 in excess of the number of barrels of old oil included in their adjusted crude oil receipts for March 1975 and other firms issued entitlements shall sell such entitlements to refiners required to purchase entitlements. In addition, certain refiners are required to purchase or sell entitlements to effect corrections for prior reporting errors pursuant to 10 CFR 211.67(i) (5).

Adjustments to entitlement issuances for March 1975 due to corrections for prior reporting errors have been calculated by adjusting each affected firm's March volumes accordingly (taking only the increased entitlement price into account). FEA is in the process of determining whether further corrective adjustments to refine the initial volumetric corrective adjustments are appropriate.

The listing contained in the Appendix specifies a negative volume of old oil receipts as to certain refiners due to corrective adjustments. The total number of entitlements issued to each of those refiners under the listing includes the number specified in the "issued" column, as well as a number of entitlements equal to the number of barrels of old oil shown as the negative volume.

The listing of refiners' old oil receipts contained in the Appendix reflects any adjustments made by FEA pursuant to § 211.67(h).

The listing of entitlements issuances contained in the Appendix also reflects

relief granted in Decisions and Orders issued by FEA's Office of Exceptions and Appeals. The following refiners are not shown in the listing due to their having been exempted from the entitlement purchase requirements of the program under exception decisions: Famariss, Good Hope, Husky, Oil Shale, Powerline, Thagard and Young. The aggregate volume of old oil receipts for these firms for March 1975 was 3,108,435 barrels, which was not taken into account for purposes of making the calculations in the listing.

The total number of entitlements required to be purchased and sold under this notice is 13,924,886.

Payment for entitlements required to be purchased under 10 CFR 211.67(b) for March 1975 must be made by May 31, 1975. On or prior to June 10, 1975, each firm which is required to purchase or sell entitlements for the month of March shall file with FEA the monthly transaction report specified in 10 CFR 211.66(i) certifying its purchases and sales of entitlements for the month of March. FEA will mail monthly transaction report forms for the month of March to reporting firms in May 1975. FEA requests that firms which have been unable to locate other firms for required entitlement transactions by May 31, 1975 contact FEA at 202-634-7610 to expedite consummation of these transactions. For firms that have failed to consummate required entitlement transactions on or prior to May 31, 1975, FEA may direct sales and purchases of entitlements pursuant to the provisions of 10 CFR 211.67(j).

Issued in Washington, D.C., May 14, 1975.

ROBERT E. MONTGOMERY, JR.,  
General Counsel  
Federal Energy Administration.

# Special Message to Congress on Budget Rescission and Deferral

*To the Congress of the United States*

I herewith report one new proposed rescission and one new deferral as required by the Congressional Budget and Impoundment Control Act of 1974. In addition, I am transmitting one supplementary report which revises a deferral report made to the Congress in a previous special message. The details of the rescission and deferral reports are attached.

The proposed rescission would affect two programs of the Community Services Administration that duplicate several programs currently operating at Federal, State and local levels. The two deferrals are routine in nature and do not affect program levels in either case.

I urge the Congress to act promptly on this rescission and other rescission proposals now pending.

*Gerald R. Ford*

THE WHITE HOUSE,  
May 8, 1975.

Rescission Proposal No.: R75-87

PROPOSED RESCISSION OF BUDGET AUTHORITY  
Report Pursuant to Sec. 1012 of P.L. 93-344

Agency - Community Services Administration	New budget authority (P.L. 94-7)	\$28,000,000
Appropriation Title & Symbol	Other budgetary resources	---
Economic Opportunity Program Executive 1975 - 8150500 (Emergency Food and Medical Services and Youth Recreation and Sports Programs)	Total Budgetary Resources	28,000,000
	Amount proposed for rescission	28,000,000

Justification

A rescission of Continuing Resolution authority under Section 1012 of the Impoundment Control Act of 1974 (P.L. 93-344) is proposed for the \$25.0 million Emergency Food and Medical Services (EFMS) program and the \$3.0 million Youth Recreation and Sports program. These categorical programs duplicate other, more comprehensive programs that provide aid to the same recipients.

The EFMS program overlaps the nutrition responsibility of other agencies, particularly the Department of Agriculture's Food Stamp and Child Nutrition programs, which provide greater resources for nutritionally needy Americans than does EFMS. Moreover, these programs are a more equitable means of providing assistance against national needs standards for entitlement than is this program in which benefits are provided to only some areas through the more fortuitous project grant system. The Federal Disaster Assistance Administration, by law, coordinates all Federal efforts in emergency situations and can call on all the resources of the Federal Government to aid the needy. In addition, vast State, local, and private resources (such as the Red Cross and other volunteer agencies) are available to assist those in need as a result of natural disasters.

Similarly, compared with the Youth Recreation and Sports program, a wide variety of programs exists to aid youth, with particular emphasis on summer activities. Prominent among them are the Comprehensive Employment Training Act (CETA) programs of the Department of Labor. A \$412.7 million augmentation of the Summer Youth Employment Program under this authority has been endorsed by the Administration. In addition, the summer feeding programs of the Department of Agriculture benefit 1.4 million children, as compared with the 43,000 youths enrolled in this program in which some nutrition assistance is provided.

Estimated Effects

EFMS activities are advance funded so that the effects of a rescission of FY 1975 budget authority would not be felt until FY 1976. Under this rescission, actual feeding and medical services activities can be provided in entirety by the more comprehensive authorities discussed above.

The Director of the Community Services Administration (formerly the Office of Economic Opportunity) has, in previous years, delegated to the Secretary of the Department of Health, Education, and Welfare (DHEW) the authority to administer the Youth Recreation and Sports program. This rescission proposal will discontinue contracts made by HEW with members of the National Collegiate Athletic Association (NCAA) involving the recreation program.

There will be 43,000 summer youth sports opportunities of varying quality and intensity which will not be provided. However, there will be no appreciable diminution of recreation opportunities for youth, as there exist numerous local programs capable of alternatively providing such opportunities. Substantial Federal resources on a much greater scale are available such as the CETA program (which includes the use of work opportunities to provide other youth recreation opportunities) and the summer feeding programs of the Department of Agriculture. In addition, there will be little impact on direct benefits to youth since 70% of this program is composed of staff, overhead, and operating expenses.

Finally, the expansion of nutrition and youth employment opportunities on an equitable basis through the Food Stamp, Child Nutrition, and Comprehensive Employment and Training Act programs, provide for far more substantial benefit increases than the decreases involved in not funding this small categorical program.

Total FY 1975 Outlays	Dollars in Millions
FY 1976 Budget (current estimate).....	\$22.4
Without Rescission.....	22.4
With Rescission.....	22.4
(Effect of action on FY 1976 outlays .....	-28.0)

Community Services Administration

Appropriations provided for the Emergency Food and Medical Services program and the Summer Youth Recreation program under the Economic Opportunity Act of 1964, as amended, for fiscal year 1975 in Public Law 93-324, as amended, are rescinded in the amount of \$28,000,000.

V 4 0 - 9 6

M A Y 1 6 7 5

Deferral No.: D75-161DEFERRAL OF BUDGET AUTHORITY  
Report Pursuant to Sec. 1013 of P.L. 93-344

Agency Fund Appropriated to the President	New budget authority (P.L. 94-11 )	\$ 300,000,000
Bureau	Other budgetary resources	
Appropriation Title & Symbol	Total Budgetary Resources	300,000,000
Foreign Military Credit Sales, 1975	Amount to be deferred part of year	71,930,000
115 1082	Amount to be deferred for entire year	

JUSTIFICATION

These funds have been placed in "Reserve for Contingencies" under the Anti-Deficiency Act to ensure fund availability at the end of the fiscal year. This is of particular importance in this account since the entire amount of available funds is normally obligated in the last quarter. The funds will be released prior to June 30, 1975 upon approval of specific credit sales programs by the Departments of State, Defense, and Treasury. Coordination among these Departments on each case will ensure that approved programs are consistent with the foreign, national security, and economic policies of the United States.

ESTIMATED EFFECT

This deferral will have no programmatic or budgetary impact and is not designed to be restrictive in nature. Funds are simply released on a loan by loan basis contingent on approval of the three Departments listed above.

Total FY 1975 Outlays	Dollars in Millions
1976 Budget (February transmittal).....	\$400.0
Without deferral (current estimate).....	382.0
With deferral (current estimate).....	382.0
(Effect of action on 1976 outlays.....)	( -0- )

D75-98A

Supplemental Report

Report Pursuant to Sec. 1014(c) of P.L. 93-344

This supplementary message revises deferral No. D75-98 which was transmitted to Congress on November 26, 1974, (House Document No. 93-398):

As a result of the deobligation in FY 1975 of prior year contracts, the Maritime Administration's Ship construction appropriation will show a larger deferral of FY 1975 funds than had been previously reported. No adjustments in the FY 1975 or FY 1976 programs are involved. The recovered funds are simply being carried forward into FY 1976 where they reduce the appropriation required to fund the previously planned program. An amendment to the 1976 budget will reduce the appropriation requested for this account.

Deferral No.: D75-98A

DEFERRAL OF BUDGET AUTHORITY  
Report Pursuant to Sec. 1013 of P.L. 93-344

Agency Department of Commerce	New budget authority (P.L. 93-433 )	\$ 275,000,000
Bureau Maritime Administration	Other budgetary resources	17,003,836
Appropriation Title & Symbol	Total Budgetary Resources	292,003,836
Ship Construction 13X1708	Amount to be deferred part of year	---
	Amount to be deferred for entire year	\$ 55,750,000*

Justification:

A deferral of \$5,750,000 is for fiscal policy reasons pursuant to P.L. 93-344 as reported to Congress by the President's message of November 26, 1974.

The additional deferral of \$50,000,000 is comprised of two items:\*

- ° Expiration on March 31, 1975, of contract with Pierce Tanker Corporation for payment of construction-differential subsidy (CDS) for the construction of one 225,000 DWT tanker. Expiration of contract is based on failure of Pierce Tanker Corporation to fulfill contractual conditions relating to certain financial requirements .... \$36,630,730
- ° Termination of all contract work and payments by Maritime Subsidy Board on March 5, 1975, toward the construction of three 89,700 DWT tankers for Hawaiian International Shipping Corporation. Termination based on notice to the Board on February 27, 1975, by Todd Shipyards Corporation of default by Hawaiian International to make contract payments. Amount is based on CDS contract price (\$39,457,431), less payments to date (\$780,219), less assessment of shipyard progress through March 7 ..... \$13,369,270

Construction-differential subsidy contracts in excess of those planned for Fiscal Year 1975 would be necessary to expend the funds made available by these contract terminations. The Maritime Administration does not anticipate receiving such additional contracts.

Estimated Effects:\*

The requested deferral is related to anticipated recovery of prior obligations. Since these obligations were made in Fiscal Year 1974, deferral of the recovered funds will not reduce the

planned Fiscal Year 1975 program.

Total 1975 Outlays	Dollars in Millions
1976 Budget (February transmittal).....	\$282.8
Without deferral (current estimate) ....	\$260.0
With deferral (revised estimate) .....	\$256.0
(Effect of action on 1976 outlays .....	\$ -1.8)

DEPARTMENT OF LABOR  
Employment Standards Administration  
MINIMUM WAGES FOR FEDERAL AND  
FEDERALLY ASSISTED CONSTRUCTION  
General Wage Determination Decisions

General Wage Determination Decisions of the Secretary of Labor specify, in accordance with applicable law and on the basis of information available to the Department of Labor from its study of local wage conditions and from other sources, the basic hourly wage rates and fringe benefit payments which are determined to be prevailing for the described classes of laborers and mechanics employed in construction activity of the character and in the localities specified therein.

The determinations in these decisions of such prevailing rates and fringe benefits have been made by authority of the Secretary of Labor pursuant to the provisions of the Davis-Bacon Act of March 3, 1931, as amended (46 Stat. 1494, as amended, 40 U.S.C. 276a) and of other Federal statutes referred to in 29 CFR 1.1 (including the statutes listed at 36 FR 306 following Secretary of Labor's Order No. 24-70) containing provisions for the payment of wages which are dependent upon determinations by the Secretary of Labor under the Davis-Bacon Act; and pursuant to the provisions of Part 1 of Subtitle A of Title 29 of Code of Federal Regulations, Procedure for Predetermination of Wage Rates, (37 FR 21138) and of Secretary of Labor's Orders 12-71 and 15-71 (36 FR 8755, 8756). The prevailing rates and fringe benefits determined in these decisions shall, in accordance with the provisions of the foregoing statutes, constitute the minimum wages payable on Federal and Federally assisted construction projects to laborers and mechanics of the specified classes engaged on contract work of the character and in the localities described therein.

Good cause is hereby found for not utilizing notice and public procedure thereon prior to the issuance of these determinations as prescribed in 5 U.S.C. 553 and not providing for delay in effective date as prescribed in that section, because the necessity to issue construction industry wage determination frequently and in large volume causes procedures to be impractical and contrary to the public interest.

General Wage Determination Decisions are effective from their date of publication in the FEDERAL REGISTER

without limitation as to time and are to be used in accordance with the provisions of 29 CFR, Parts 1 and 5. Accordingly, the applicable decision together with any modifications issued subsequent to its publication date shall be made a part of every contract for performance of the described work within the geographic area indicated as required by an applicable Federal prevailing wage law and 29 CFR, Part 5. The wage rates contained therein shall be the minimum paid under such contract by contractors and subcontractors on the work.

MODIFICATIONS AND SUPERSEDES DECISION  
TO GENERAL WAGE DETERMINATION  
DECISIONS

Modifications and Supersedes Decisions to General Wage Determination Decisions are based upon information obtained concerning changes in prevailing hourly wage rates and fringe benefit payments since the decisions were issued.

The determinations of prevailing rates and fringe benefits made in the Modifications and Supersedes Decisions have been made by authority of the Secretary of Labor pursuant to the provisions of the Davis-Bacon Act of March 3, 1931, as amended (46 Stat. 1494, as amended, 40 U.S.C. 276a) and of other Federal statutes referred to in 29 CFR 1.1 (including the statutes listed at 36 FR 306 following Secretary of Labor's Order No. 24-70) containing provisions for the payment of wages which are dependent upon determination by the Secretary of Labor under the Davis-Bacon Act; and pursuant to the provisions of Part 1 of Subtitle A of Title 29 of Code of Federal Regulations, Procedure for Predetermination of Wage Rates (37 FR 21138) and of Secretary of Labor's Orders 13-71 and 15-71 (36 FR 8755, 8756). The prevailing rates and fringe benefits determined in foregoing General Wage Determination Decisions, as hereby modified, and/or superseded shall, in accordance with the provisions of the foregoing statutes, constitute the minimum wages payable on Federal and Federally assisted construction projects to laborers and mechanics of the specified classes engaged in contract work of the character and in the localities described therein.

Modifications and Supersedes Decisions are effective from their date of publication in the FEDERAL REGISTER without limitation as to time and are to be used in accordance with the provisions of 29 CFR, Parts 1 and 5.

Any person, organization, or governmental agency having an interest in the

wages determined as prevailing is encouraged to submit wage rate information for consideration by the Department. Further information and self-explanatory forms for the purpose of submitting this data may be obtained by writing to the U.S. Department of Labor, Employment Standards Administration, Office of Special Wage Standards, Division of Wage Determinations, Washington, D.C. 20210. The cause for not utilizing the rule-making procedures prescribed in 5 U.S.C. 553 has been set forth in the original General Wage Determination Decision.

Winchendon (only Tile Setters)

TERRAZZO WORKERS' HELPERS

TILE SETTERS' HELPERS

PAID HOLIDAYS:

A-New Year's Day; B-Memorial Day; C-Independence Day; D-Labor Day;

E-Thanksgiving Day; F-Christmas Day

FOOTNOTES:

a. \$3.30 per man per week

b. Employer contributes 4% of basic hourly rate for 5 years or more of service or 2% of basic hourly rate for 6 months to 5 years of service as Vacation Pay Credit.

c. 6 Paid Holidays: A through F.

d. 9 Paid Holidays: A through F, Washington's Birthday, Good Friday and Christmas Eve, provided the employee has worked at least 45 full days during the 120 calendar days immediately prior to the holiday and the regular scheduled work days immediately preceding and following the holiday.

e. 7 Paid Holidays: A through F and Bunker Hill Day, provided the employee has worked 10 days prior to the listed holidays.

Station wagons, panel trucks and pick-up trucks  
Two axle equipment; helpers on low bed when assigned at the discretion of the employer, warehousemen, forklift operators, three axle equipment and tiremen  
Four and five axle equipment  
Specialized earth moving equipment under 35 tons other than conventional type trucks, low bed, vachaul, mechanics, paving restoration equipment, Specialized earth moving equipment over 35 tons  
Trailers for earth moving equipment, (double hookup)

PAID HOLIDAYS:

A-New Year's Day; B-Memorial Day; C-Independence Day; D-Labor Day;

E-Thanksgiving Day; F-Christmas Day.

FOOTNOTES:

a. One half day's pay each month in which an employee has worked 15 days provided he has been employed for 4 months.

b. Holidays: A through F, Washington's Birthday, Columbus Day, Veteran's Day, and Veterans' Day, provided an employee works two days of the calendar week in which the holiday falls.

DECISION NO. TX75-4086

ZONE 5 - Atascosa, Bandera, Bexar, Comal, Dimmit, Edwards, Frio, Guadalupe, Kendall, Kerr, Kinney, LaSalle, Maverick, McMullen, Medina, Real, Uvalde, Val Verde, Wilson & Zavala Counties

DESCRIPTION OF WORK: Heavy (excluding tunnels & dams) and Highway Construction and Paving & Utilities Incidental to General Building Construction. This wage determination does not apply to any residential construction (single family homes and garden type apartments up to and including 4 stories).

ZONE 6 - Brooks, Cameron, Duval, Hidalgo, Jim Hogg, Kinney, Starr, Webb, Wilbarger & Zapata Counties

DESCRIPTION OF WORK: Heavy (excluding tunnels & dams) and Highway Construction, Incidental Shore Work and Paving & Utilities Incidental to General Building Construction. This wage determination does not apply to any residential construction (single family homes and garden type apartments up to and including 4 stories).

ZONE 7 - Aransas, Bee, Calhoun, DeWitt, Goliad, Jackson, Jim Wells, Karnes, Kleberg, Lavaca, Live Oak, Nueces, Refugio, San Antonio & Victoria Counties

DESCRIPTION OF WORK: Heavy (excluding tunnels & dams) and Highway Construction, Incidental Shore Work and Paving & Utilities Incidental to General Building Construction. This wage determination does not apply to any residential construction (single family homes and garden type apartments up to and including 4 stories).

ZONE 8 - Austin, Bastrop, Blanco, Burnet, Caldwell, Colorado, Fayette, Gillespie, Gonzales, Hays, Lee, Llano, Mason, Travis & Williamson Counties

DESCRIPTION OF WORK: Heavy (excluding tunnels & dams) and Highway Construction and Paving & Utilities Incidental to General Building Construction. This wage determination does not apply to any residential construction (single family homes and garden type apartments up to and including 4 stories).

ZONE 9 - Bell, Bexar, Comal, Coryell, Falls, Freestone, Hamilton, Hill, Lampasas, Limestone, McLennan & Navarro Counties

DESCRIPTION OF WORK: Heavy (excluding tunnels & dams) and Highway Construction and Paving & Utilities Incidental to General Building Construction. This wage determination does not apply to any residential construction (single family homes and garden type apartments up to and including 4 stories).

\*Not to be used for Paving & Utilities Incidental to General Building Construction in Bell & Coryell Counties

DECISION NO. TX75-4086

ZONE 10 - Cooke, Denton, Hood, Jack, Johnson, Palo Pinto, Parker, Somervell, Tarrant & Wise Counties

DESCRIPTION OF WORK: Heavy (excluding tunnels, dams & work performed on the site of water or sewage treatment facilities) and Highway Construction and Paving & Utilities Incidental to General Building Construction. This wage determination does not apply to any residential construction (single family homes and garden type apartments up to and including 4 stories).

\*Not to be used for Utilities Incidental to General Building Construction in Tarrant County

ZONE 11 - Collin, Dallas, Ellis, Grayson & McAllen Counties

DESCRIPTION OF WORK: Heavy (excluding tunnels, dams & work performed on the site of water or sewage treatment facilities) and Highway Construction and Paving & Utilities Incidental to General Building Construction. This wage determination does not apply to any residential construction (single family homes and garden type apartments up to and including 4 stories).

ZONE 12 - Bowie, Camp, Cass, Delta, Fannin, Franklin, Gregg, Harrison, Hopkins, Hunt, Kaufman, Lamar, Marion, Morris, Pecos, Red River, Rock, Smith, Titus, Upshur, Van Zandt & Wood Counties

DESCRIPTION OF WORK: Heavy (excluding tunnels & dams) and Highway Construction and Paving & Utilities Incidental to General Building Construction. This wage determination does not apply to any residential construction (single family homes and garden type apartments up to and including 4 stories).

ZONE 13 - Anderson, Angelina, Cherokee, Henderson, Houston, Jasper, Macgregor, Newton, Pecos, Polk, Sabine, San Augustine, San Jacinto, Shelby, Trinity & Tyler Counties

DESCRIPTION OF WORK: Heavy (excluding tunnels & dams) and Highway Construction and Paving & Utilities Incidental to General Building Construction. This wage determination does not apply to any residential construction (single family homes and garden type apartments up to and including 4 stories).

FEDERAL REGISTER, VOL. 40, NO. 96—FRIDAY, MAY 16, 1975

DECISION NO. TX75-4086

ZONE 14 - Brazos, Burtleson, Grimes, Leon, Madison, Milam, Robertson, Walker & Washington Counties

DESCRIPTION OF WORK: Heavy (excluding tunnels & dams and Highway Construction and Paving & Utilities Incidental to General Building Construction. This wage determination does not apply to any residential construction (single family homes and garden type apartments up to and including 4 stories).

ZONE 15 - Brazoria, Fort Bend, Galveston\*, Harris, Matagorda, Montgomery, Waller & Wharton Counties

DESCRIPTION OF WORK: Heavy (excluding tunnels & dams) and Highway Construction, Incidental Shore Work and Paving & Utilities Incidental to General Building Construction. This wage determination does not apply to any residential construction (single family homes & garden type apartments up to and including 4 stories).

\*Not to be used for Paving & Utilities Incidental to General Building Construction on Galveston Island and work performed on the site of water or sewage treatment facilities in Galveston County

ZONE 16 - Chambers, Hardin, Jefferson\*, Liberty & Orange\* Counties

DESCRIPTION OF WORK: Heavy (excluding tunnels & dams) and Highway Construction, Incidental Shore Work and Paving & Utilities Incidental to General Building Construction. This wage determination does not apply to any residential construction (single family homes & garden type apartments up to and including 4 stories).

\*Not to be used for Heavy Construction, Incidental Shore Work and Paving & Utilities Incidental to General Building Construction in Jefferson & Orange Counties

POWER EQUIPMENT OPERATORS (Cont'd)  
Building, Tunnel and Sewer Construction

DECISION NO. W175-2066	POWER EQUIPMENT OPERATORS Building, Tunnel and Sewer Construction	Principals' Payments			
		Basic Hourly Rate	Hourly Rate	Per Hour	Per Hour
Group 1		\$8.77	.55	.55	.05
Group 2		8.63	.55	.55	.05
Group 3		8.52	.55	.55	.05
Group 4		8.32	.55	.55	.05
Group 5		8.22	.55	.55	.05
Group 6		8.12	.55	.55	.05
Group 7		8.02	.55	.55	.05
Group 8		7.92	.55	.55	.05
Group 9		7.82	.55	.55	.05
Group 10		7.72	.55	.55	.05
Group 11		7.62	.55	.55	.05
Group 12		7.52	.55	.55	.05

Group 1: Cranes, Shovels, Draglines, Backhoes, Clamshells, Derrick, Caisson  
Rigs, Pile Driver, Skid Rigs, Dredge Operator and Traveling Cranes (bridge  
type)

Group 2: Concrete Paver (over 27E), Concrete Spreader and Distributor

Group 3: Material Hoist, Stack Hoist, Tractor or truck mounted Hydraulic  
Backhoe, Tractor or truck mounted Hydraulic Crane, (5 tons or under), Man-  
hoist, Tractor (over 40 h.p.), Endloader (over 40 h.p.) Forklift (25' and  
over), Motor Patrol, Scraper Operator, Sideboom, Straddle Carrier, Mechanic  
and Welder, Bituminous Plant and Paver Operator, Roller (over 5 tons) Rotary  
Drill Operator and Blaster, Trencher (wheel type or chain type having over  
8-inch bucket)

Group 4: Concrete and Grout Pumps, Backfiller, Concrete Auto Breaker (large),  
Concrete Finishing Machines (road type)

[FR Doc.75-12663 Filed 5-15-75; 8:45 am]

FEDERAL REGISTER, VOL. 40, NO. 96—FRIDAY, MAY 16, 1975

NOTICES

Group 5: Roller (rubber tire)

Group 6: Concrete Batch Hopper, Concrete Conveyor Systems, Concrete Mixers  
(125 or over) Screw type Pumps, and Cypsum Pumps, Tractor, Bulldozer, End-  
loader (under 40 h.p.), Pumps, (well points), Trencher (chain type having  
8-inch and under), Industrial Locomotives

Group 7: Roller (under 5 tons) and Fireman (Pile Drivers and Derricks)

Group 8: Hoists (automatic, forklift - 12' to 25'), Tampers - Compactors  
(riding type), Assistant Engineer, "A" Frames and Winch Trucks, Concrete  
Auto Breaker, Hydrammer (small), Brooms and Sweepers, Hoist (tuggers),  
Stump Chipper (large boats - tug, safety, work, barges and launch)

Group 9: Shouldering Machine Operator, Screed Operator, Pave or Industrial  
Tractor, mounted equipment, Post Hole Digger, Stone Crushers and Screening  
Plants

Group 10: Fireman - Asphalt Plants

Group 11: Generators over 150 KW, Air Compressors over 300 cu. ft., and Pumps  
over 3", Augers (vertical and horizontal)

Group 12: Combination Small Equipment Operator: air, electric, Hydraulic Jacks  
(slip form); Compactors (under 300 CFM); Welding Machines; Heaters (mechanical)  
Prestress Machines; Bobcats; Generators (under 150 KW); Pumps (3" and under);  
Winches (small electric); Oilier and Greaser; Boiler Operators (temporary heat),  
Rotary Drill Helper; Conveyor; Forklift (12' and under)

## PART I

### HIGHLIGHTS OF THIS ISSUE

This listing does not affect the legal status of any document published in this issue. Detailed table of contents appears inside.

**BUSINESS AND INDUSTRIAL LOANS—USDA/FmHA** issues guidelines for implementing guaranteed loans for taxable issues; effective 5-19-75..... 21700

**VETERAN BENEFITS—VA** issues regulations on apportionment of pension and compensation rates; effective 1-1-74 and 5-1-75..... 21724

**VETERANS' COST-OF-INSTRUCTION PROGRAM—HEW/OE** extends closing date for submission and receipt of applications; closing date 5-30-75..... 21756

**CONDOMINIUM LOANS—VA** proposes policies and procedures; comments by 6-18-75..... 21794

**FINANCIAL ASSISTANCE PROGRAMS—HEW/SRS** proposes quality control guidelines; comments by 6-18-75..... 21737

**BUSINESS AND INDUSTRIAL LOANS—USDA/FmHA** announces current interest rates for insured loans; effective 5-19-75..... 21745

(Continued inside)

#### PART II:

**MEDICAL DEVICES—HEW/FDA** adopts interim classification procedures..... 21847

#### PART III:

**PROCUREMENT—Interior** incorporates revisions of uniform relocation assistance and real property acquisition guidelines; effective 5-19-75..... 21853

#### PART IV:

**AIRWORTHINESS REVIEW PROGRAM—DOT/FAA** updates and improves standards for powerplant installations of aircraft, and type certification of aircraft engines and propellers; comments by 8-18-75..... 21875

#### PART V:

**MARITIME RADIO SERVICES—FCC** annex to a previously published document on auto alarm receiver tolerances..... 21877

#### PART VI:

**BUDGET RESCISSIONS AND DEFERRALS—OMB** issues Cumulative Report of FY 1975..... 21886

## reminders

(The items in this list were editorially compiled as an aid to FEDERAL REGISTER users. Inclusion or exclusion from this list has no legal significance. Since this list is intended as a reminder, it does not include effective dates that occur within 14 days of publication.)

### Rules Going Into Effect Today

FCC—FM broadcast stations, table of assignments: Idaho.. 16667; 4-14-75  
FM broadcast stations, table of assignments: Cabool, Mo.. 17026; 4-16-75  
Interior/NPS—Public nudity, prohibited; Cape Cod National Seashore, Mass. 19197; 5-2-75

### Daily List of Public Laws

NOTE: No acts approved by the President were received by the Office of the Federal Register for inclusion in today's LIST OF PUBLIC LAWS.

**ATTENTION:** Questions, corrections, or requests for information regarding the contents of this issue only may be made by dialing 202-523-5286. For information on obtaining extra copies, please call 202-523-5240. To obtain advance information from recorded highlights of selected documents to appear in the next issue, dial 202-523-5022.

federal register

Area Code 202 Phone 523-5240

Published daily, Monday through Friday (no publication on Saturdays, Sundays, or on official Federal holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The FEDERAL REGISTER provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest.

The FEDERAL REGISTER will be furnished by mail to subscribers, free of postage, for \$5.00 per month or \$45 per year, payable in advance. The charge for individual copies is 75 cents for each issue, or 75 cents for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the FEDERAL REGISTER.

FEDERAL REGISTER, VOL. 40, NO. 97—MONDAY, MAY 19, 1975

## HIGHLIGHTS—Continued

**FOREIGN INVESTMENT**—Commerce/Bureau of Economic Analysis changes reporting requirements of certain enterprises; effective 1-1-75. 21705

### SECURITIES—

SEC requires fidelity bonding of broker-dealers who are not members of a national securities association; effective 9-1-75. 21717

SEC clarifies "private offering" requirements; effective 5-19-75. 21709

**AIR POLLUTION CONTROLS**—EPA issues technical amendments for new motor vehicles and new motor vehicle engines; effective 5-19-75. 21730

**PLASTICS AND SYNTHETICS**—EPA proposes effluent limitations and guidelines for existing and new sources, and for performance and pretreatment standards; comments by 6-18-75. 21731

**INFORMATION AND RECORDS**—USDA/FmHA revises regulations on availability of materials; effective 5-19-75. 21696

### MEETINGS—

DOD/Air: USAF Scientific Advisory Board (2 documents), 6-2, 6-3, and 6-9-75. 21744

HEW/FDA: Advisory Committees (22), June 1975. 21745

### CRC: State Advisory Committees:

Connecticut (3 documents), 6-5, 6-11, and 6-12-75. 21768

Florida (2 documents), 6-19-75. 21768

Massachusetts, 6-9-75. 21768

Michigan, 6-13-75. 21769

New York, 6-11-75. 21769

EPA: Working Group on Implementation of 1972 Amendments to the Federal Water Pollution Control Act (Committee of Ten), 6-4-75. 21770

FCC: Land Mobile Working Group, 6-4-75. 21771

GSA: Archives Advisory Council, 6-6-75. 21790

National Science Foundation:

Advisory Panel for Sociology, 6-5 and 6-6-75. 21791

Advisory Panel for Regulatory Biology, 6-5 and 6-6-75. 21791

NRC: Advisory Committee on Reactor Safeguards:

Working Group on Hypothetical Core Disruptive Accident, 6-3-75. 21793

SEC: SEC Report Coordinating Group (Advisory), 6-2-75. 21758

Labor/OSHA:

Construction Safety and Health Advisory Committee, 6-3 and 6-4-75. 21799

Standards Advisory Committee on Hazardous Materials Labeling, 5-29 and 5-30-75. 21799

POSTPONED MEETINGS—

FCC: 1979 WARC Conference Working Groups, 5-13-75. 21771

# CONTENTS

**Proposed Rules**  
Water pollution; effluent guidelines for certain point source categories:  
Plastics and synthetics manufacturing 21740

**Notices**  
Marine sanitation devices; New Hampshire 21769  
Meetings:  
Water Pollution Control Act; Working Group on Implementation of 1972 amendments 21770

## FARMERS HOME ADMINISTRATION

**Rules**  
Business and industrial loans; taxable bond issues 21700  
Freedom of information 21696

**Notices**  
Business and industrial loans; insured loan interest rates 21745

## FEDERAL AVIATION ADMINISTRATION

**Rules**  
Air taxis; Part 121 equipment requirements 21704  
Airworthiness directives:  
Grumman 21704

**Proposed Rules**  
Airworthiness Review Program; powerplant proposals 21865  
Special air traffic rules:  
Valparaiso, Fla.; correction 21740  
Transition areas (2 documents) 21740

## FEDERAL COMMUNICATIONS COMMISSION

**Rules**  
Aviation services; airdrome control stations 21732  
FM broadcast stations; table of assignments:  
Pennsylvania 21732  
Maritime services, land and shipboard:  
Auto alarm receiver tolerances; correction 21877

Public safety radio services; tone and impulse signalling 21733

**Proposed Rules**  
FM broadcast stations; table of assignments:  
California 21742  
Florida 21742  
Pennsylvania and West Virginia 21741

**Notices**  
Common carrier services, specialized; domestic public point-to-point microwave radio service 21770  
Meetings:  
Land Mobile Working Group 21771  
1979 WARC Conference Working Group; postponement 21771

**Hearings, etc.:**  
AT&T 21770  
Pioneer Broadcasting Co. 21771  
White Mountain Broadcasting Co. 21772  
Zitter, Robert M. and Hillary E., and Dan Communications, Inc. 21772

## FEDERAL MARITIME COMMISSION

**Notices**  
Freight forwarder licenses:  
Gotham Shipping Co., Inc. 21774  
P&O, Inc. 21774  
Agreements filed, etc.:  
Equipment Interchange Agreement 21774  
Pacific Coast Australian Tariff Bureau 21774

## FEDERAL POWER COMMISSION

**Notices**  
Hearings, etc.:  
Arizona Public Service Co. 21775  
Belco Petroleum Corp. 21775  
Boston Edison Co. and Cambridge Electric Light Co. 21775  
California Co., The 21775  
Carolina Power and Light Co. 21776  
Central Florida Gas Corp. and Florida Gas Transmission Co. 21776  
Cincinnati Gas and Electric Co. 21776  
Cities Service Gas Co. 21776  
Columbia Gas Transmission Corp. 21776

Connecticut Light and Power Co. 21776  
Davis, C. Crady, et al. 21776  
El Paso Natural Gas Co. (3 documents) 21777

Georgia Power Co. 21777  
Grand Valley Transmission Co. 21777  
Hawley, John B., Jr., Trust No. 1 21778  
Kansas-Nebraska Natural Gas Co., Inc. 21778  
Krennerman Oil and Gas Co. 21779  
Michigan Wisconsin Pipe Line Co. 21779

Mississippi Power and Light Co. 21780  
Mississippi River Transmission Corp. (2 documents) 21780  
Mountain Power Co. 21780  
National Fuel Gas Supply Corp. (9 documents) 21781

Northwest Pipeline Corp. 21781  
Pacific Gas and Electric Co. (2 documents) 21782  
South Carolina Electric and Gas Co. (2 documents) 21783

Southern Natural Gas Co. 21784  
Southside Electric Cooperative 21785  
South Texas Natural Gas Gathering Co. 21785

Southwest Gas Corp. 21785  
Tampa Electric Co. 21786  
Texas Eastern Transmission Corp. (2 documents) 21788, 21788

Texas Gas Transmission Corp. 21788  
Transcontinental Gas Pipeline Corp. 21788  
Transwestern Pipeline Co. 21789

Virginia Electric and Power Co. 21790

## FEDERAL TRADE COMMISSION

**Rules**  
Nonadjudicative procedures; investigations; effect of motion to quash on obligation to make return 21708  
Service of documents by parties other than the Commission 21708

## FISCAL SERVICE

### Notices

Surety companies on Federal bonds:  
Rural Mutual Insurance Co. 21744  
Mercantile and General Reinsurance Company of America 21744

## FOOD AND DRUG ADMINISTRATION

**Rules**  
Food identity standards:  
Market testing, temporary permits for 21721  
Sirups, table 21723

### Proposed Rules

Food identity standards:  
Sweeteners, nutritive; glucose sirup and dried glucose sirup 21738

### Notices

Human drugs:  
Hydroflumethiazide syrup; withdrawal of approval 21755  
Thiazides; certain; opportunity for hearing 21751

Medical devices; classification procedures 21847

Meetings:  
Advisory committees, certain 21745

## FOREST SERVICE

### Notices

Environmental statements:  
Siskiyou, Siuslaw and Umpqua National Forests 21745

## GENERAL SERVICES ADMINISTRATION

### Notices

Meetings:  
Archives Advisory Council 21790

## HEALTH, EDUCATION, AND WELFARE DEPARTMENT

See Education Office; Food and Drug Administration; Social and Rehabilitation Service.

## IMMIGRATION AND NATURALIZATION SERVICE

### Rules

Documentary requirements; immigrants; waivers 21700

## INTERIOR DEPARTMENT

See also Land Management Bureau.

### Rules

Procurement; uniform relocation assistance and real property acquisition guidelines 21853

## INTERNATIONAL TRADE COMMISSION

### Notices

Import investigations:  
Birch plywood doorskins 21791

## INTERSTATE COMMERCE COMMISSION

### Notices

Hearing assignments 21802

### Motor carriers:

Irregular route property carriers; gateway elimination 21806

Temporary authority applications 21804

Transfer proceedings 21803

Preliminary system plan; U.S. Railway Association; hearing on Erie-Lackawanna Supplement 21803

# CONTENTS

## JUSTICE DEPARTMENT

See Immigration and Naturalization Service.

## rules and regulations

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510. The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

Title 7—Agriculture  
CHAPTER III—ANIMAL AND PLANT  
HEALTH INSPECTION SERVICE, DE-  
PARTMENT OF AGRICULTURE  
PART 301—DOMESTIC QUARANTINE  
NOTICES

Subpart—Whitefringed Beetle  
TERMINATION OF QUARANTINE AND  
REGULATIONS

The Whitefringed Beetle Quarantine and regulations, 7 CFR 301.72, 301.72-1 through 301.72-10, are hereby terminated effective June 30, 1975. However, such provisions shall be deemed to continue in full force and effect for the purpose of sustaining any action or other proceeding with respect to any right that accrued, liability that was incurred, or violation that occurred prior to said date.

After a public hearing held in 1973, it was decided to continue the Whitefringed Beetle Quarantine and regulations thereunder (39 FR 21037). However, as a result of further evaluations by this Department, it has been determined that despite the quarantine and other available regulatory measures which the Department utilized, the whitefringed beetle has spread to much of its ecological limits and will continue to slowly spread in the United States. Accordingly, it has been determined that the Whitefringed Beetle Quarantine and regulations are no longer effective and necessary to prevent the spread of the Whitefringed Beetle. In view of this information, it has been decided to terminate the quarantine and regulations.

Although the Federal regulatory program is being terminated, funds are being retained for detection surveys on the periphery of the infested areas for the benefit of those States interested in whitefringed beetle distribution.

This action relieves restrictions and it does not appear that further public participation in rulemaking procedures concerning this action would make additional relevant information available to the Department. Therefore, under the administrative procedure provisions in 5 U.S.C. 553, it is found upon good cause that such public participation with respect to this action is impracticable, and unnecessary, and contrary to the public interest, and this action may be made effective less than 30 days after publication hereof in the FEDERAL REGISTER.

(Secs. 8 and 9, 37 Stat. 318, as amended, sec. 106, 71 Stat. 33; 7 U.S.C. 161, 162, 160ee; 37 FR 28464, 28477; 38 FR 19141)

Effective date. The termination of the Whitefringed Beetle Quarantine and

regulations thereunder shall become effective June 30, 1975.

Done at Washington, D.C., this 13th day of May 1975.

JAMES O. LEE, Jr.,  
Acting Deputy Administrator,  
Plant Protection and Quarantine Programs.

CHAPTER IX—AGRICULTURAL MARKET-  
ING SERVICE (MARKETING AGREE-  
MENTS AND ORDERS; FRUITS, VEGE-  
TABLES, NUTS), DEPARTMENT OF  
AGRICULTURE

[Nectarine Reg. 6]

PART 916—NECTARINES GROWN IN  
CALIFORNIA

Minimum Grade and Size Requirements

This regulation for California Nectarine shipments sets a minimum grade of U.S. No. 1, except that it provides an additional tolerance for individual fruit of all varieties not well formed but not badly misshapen, and an additional tolerance for the Sun Free and Golden Grand varieties affected by fairly smooth or smooth russetting. It also prescribes minimum sizes for 46 named varieties. These regulatory requirements are necessary to promote orderly marketing and provide consumers with an ample supply of acceptable-quality fruit.

Findings. (1) Pursuant to the amended marketing agreement and Order No. 916 (7 CFR Part 916), regulating the handling of nectarines grown in the State of California, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601-674), and upon the basis of the recommendations of the Nectarine Administrative Committee, established under the aforesaid marketing agreement and order, and upon other information, it is hereby found that the regulation of shipments of nectarines, as hereinafter set forth, will tend to effectuate the declared policy of the act.

(2) The minimum grade and size requirements specified herein reflect the Department's appraisal of the need for regulation of shipments of California nectarines during the period May 20 through July 11, 1975, based on the available supply and current and prospective market demand conditions. Available data indicate that during the 1975 season fresh shipments of California nectarines will total about 9,225,000 packages. The minimum grade and size requirements specified for California neo-

tarines are prescribed during the present stage of the development of the crop to guard against the shipment of lower quality and smaller-size fruit, which tends to weaken the market for such fruit.

(3) It is hereby further found that it is impracticable, unnecessary, and contrary to the public interest to give preliminary notice, engage in public rule-making procedure, and postpone the effective date of this regulation until 30 days after publication thereof in the FEDERAL REGISTER (5 U.S.C. 553) in that, as hereinafter set forth, the time intervening between the date when information upon which this regulation is based became available and the time when this regulation must become effective in order to effectuate the declared policy of the act is insufficient; a reasonable time is permitted, under the circumstances, for preparation for such effective time; and good cause exists for making the provisions hereof effective not later than the date hereinafter specified. A reasonable determination as to the supply of, and the demand for, such nectarines, which are currently regulated pursuant to Nectarine Regulation 5 (39 FR 17831, 22940), must await the development of the crop thereof; adequate information thereon was not available to the Nectarine Administrative Committee until the date hereinafter set forth on which an open meeting was held, after giving due notice thereof, to consider the need for, and the extent of, regulation of shipments of such nectarines; interested persons were afforded an opportunity to submit information and views at this meeting; the recommendation and supporting information for regulation during the period specified herein were promptly submitted to the Department after such meeting was held; shipments of the current crop of such nectarines are expected to begin on or about the effective date of this regulation; this regulation should be applicable to all such shipments in order to effectuate the declared policy of the act; the provisions of this regulation are identical with the aforesaid recommendation of the committee; information concerning such provisions and effective time has been disseminated among handlers of such nectarines; and compliance with the provisions of this regulation will not require of handlers any preparation therefor which cannot be completed by the effective time hereof. Such committee meeting was held on May 7, 1975.

Section 916.348 is added to 7 CFR Part 916 as follows:

## § 916.348 Nectarine Regulation 6.

(a) *Order.* (1) During the period May 20, 1975, through July 11, 1975, no handler shall handle any package or container of any variety of nectarines unless such nectarines grade at least U.S. No. 1: *Provided*, That nectarines 2 inches in diameter or smaller, or 4 x 4 size or smaller, shall not have fairly light colored, fairly smooth scars which exceed the aggregate area of a circle  $\frac{1}{8}$  inch in diameter, and nectarines larger than 2 inches in diameter, or larger than 4 x 4 size, shall not have fairly light colored, fairly smooth scars which exceed an aggregate area of a circle  $\frac{1}{2}$  inch in diameter: *Provided further*, That an additional tolerance of 25 percent shall be permitted for fruit that is not well formed but not badly misshapen: *Provided further*, That 25 percent of the surface of each fruit of the Sun Free and Golden Grand varieties may be affected by fairly smooth or smooth russetting.

(2) During the period May 20, 1975, through July 11, 1975, no handler shall handle any package or container of May red variety nectarines unless:

(i) Such nectarines, when packed in molded forms (tray pack) in a No. 22D standard lug box, are of a size that will pack, in accordance with the requirements of a standard pack, not more than 130 nectarines in the lug box;

(ii) Such nectarines, when packed in a standard basket, are of a size not smaller than a size that will pack a 4 x 5 standard pack; or

(iii) Such nectarines, when packed in any container other than the containers packed as specified in subdivisions (i) and (ii) of this subparagraph (2), measure not less than 1 $\frac{1}{4}$  inches in diameter as measured by a rigid ring: *Provided*, That not more than 10 percent, by count, of the nectarines in any container may fail to meet such diameter requirement.

(3) During the period May 20, 1975, through July 11, 1975, no handler shall handle any package or container of Armking, Crimson Gold, Mayfair, or Zee Gold variety nectarines unless:

(i) Such nectarines, when packed in molded forms (tray pack) in a No. 22D standard lug box, are of a size that will pack, in accordance with the requirements of a standard pack, not more than 112 nectarines in the lug box;

(ii) Such nectarines, when packed in a standard basket, are of a size not smaller than a size that will pack a 3 x 4 x 5 standard pack; or

(iii) Such nectarines, when packed in any container other than the containers packed as specified in subdivisions (i) and (ii) of this subparagraph (3), measure not less than 1 $\frac{1}{8}$  inches in diameter as measured by a rigid ring: *Provided*, That not more than 10 percent, by count, of the nectarines in any container may fail to meet such diameter requirement.

(4) During the period May 20, 1975, through July 11, 1975, no handler shall handle any package or container of June Belle, June Grand, May Grand, Red June, Spring Grand, or Sunbright variety nectarines unless:

(i) Such nectarines, when packed in molded forms (tray pack) in a No. 22D standard lug box, are of a size that will pack, in accordance with the requirements of a standard pack, not more than 108 nectarines in the lug box;

(ii) Such nectarines, when packed in a standard basket, are of a size not smaller than a size that will pack a 4 x 4 standard pack; or

(iii) Such nectarines, when packed in any container other than the containers packed as specified in subdivisions (i) and (ii) of this subparagraph (4), measure not less than 2 inches in diameter as measured by a rigid ring: *Provided*, That not more than 10 percent, by count, of the nectarines in any container may fail to meet such diameter requirement.

(5) During the period May 20, 1975, through July 11, 1975, no handler shall handle any package or container of Early Sun Grand, Grandandy, Independence, Moon Grand, Star Grand I, Star Grand II, Sun Flame, Summer Grand, Sun Grand, Rose, or Kent Grand variety nectarines unless:

(i) Such nectarines, when packed in molded forms (tray pack) in a No. 22D standard lug box, are of a size that will pack, in accordance with the requirements of a standard pack, not more than 96 nectarines in the lug box; or

(ii) Such nectarines, when packed in any container other than in molded forms in a No. 22D standard lug box, measure not less than 2 $\frac{1}{4}$  inches in diameter as measured by a rigid ring: *Provided*, That not more than 10 percent, by count, of the nectarines in any container may fail to meet such diameter requirement.

(6) During the period May 20, 1975, through July 11, 1975, no handler shall handle any package or container of Autumn Grand, Clinton-Strawberry, Fantasia, Flamekist, Flavortop, Gold King, Grandell, Grand Prize, Harry Grand, Hi-Red, Late Le Grand, Le Grand, Niagara Grand, Red Grand, Regal Grand, Richard's Grand, Royal Grand, September Grand, Sun Free, or Fairlane, Grand Giant, Red Free, Bob Grand, or Tom Grand variety nectarines unless:

(i) Such nectarines, when packed in molded forms (tray pack) in a No. 22D standard lug box, are of a size that will pack, in accordance with the requirements of a standard pack, not more than 88 nectarines in the lug box; or

(ii) Such nectarines, when packed in any container other than in molded forms in a No. 22D standard lug box, measure not less than 2 $\frac{1}{4}$  inches in diameter as measured by a rigid ring: *Provided*, That not more than 10 percent, by count, of the nectarines in any container may fail to meet such diameter requirement.

(7) Nectarine Regulation 5 (39 FR 17831, 22940) is hereby terminated as of the effective date hereof.

(8) When used herein, "diameter," "U.S. No. 1," and "standard pack" shall have the same meaning as set forth in the United States Standards for Grades of Nectarines (7 CFR 51.3145-51.3160); the terms "standard basket" and "No.

22D standard lug box" shall have the same meanings as set forth in § 1387.11 of the "Regulations of the California Department of Food and Agriculture"; and all other terms shall have the same meaning as when used in the marketing agreement and order.

(Secs. 1-19, 48 Stat. 31, as amended; 7 U.S.C. 601-674)

Dated, May 14, 1975, to become effective May 20, 1975.

CHARLES R. BRADER,  
Deputy Director, Fruit and  
Vegetable Division, Agricultural  
Marketing Service.

[FR Doc. 75-13181 Filed 5-16-75; 8:45 am]

[Peach Reg. 6]

## PART 917—FRESH PEARS, PLUMS, AND PEACHES GROWN IN CALIFORNIA

## Regulation by Grades and Sizes

This regulation requires that all California peaches, entering interstate commerce, grade at least U.S. No. 1. It also establishes minimum sizes for certain specified varieties and a minimum size for all other varieties. This action is necessary to assure that the peaches shipped will be of suitable quality and size in the interest of consumers and producers. The regulation is the same as that which regulates intrastate shipments of California peaches.

*Findings.* (1) Pursuant to the amended marketing agreement, and Order No. 917 (7 CFR Part 917), regulating the handling of fresh pears, plums, and peaches grown in the State of California, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601-674), and upon the basis of the recommendations of the Peach Commodity Committee, established under the aforesaid amended marketing agreement and order, and upon other available information, it is hereby found that the limitation of shipments of peaches, as hereinafter provided, will tend to effectuate the declared policy of the act.

(2) This regulation is based upon an appraisal of the current and prospective market conditions for California peaches. The committee estimates that 9,870,000 packages of peaches will be available for shipment in the 1975 season compared with actual shipment of 9,586,000 packages last season. Peach production in the nine Southern States is forecast at 23 percent more than last year. Industry reports indicate that 1975 shipments of fresh California plums will be down over 19 percent from last year at 8,061,000 packages. Likewise, fresh California nectarine shipments during 1975 are estimated at 9,225,000 packages—nearly nine percent less than last year. Nevertheless, the estimated crop of California plums and nectarines will provide strong market competition for California fresh peaches. The grade and size requirements hereinafter set forth are necessary to prevent the handling of California peaches of a lower grade or smaller size than specified herein for such peaches

so as to provide food quality fruit in the interest of producers and consumers pursuant to the declared policy of the act.

(3) It is hereby further found that it is impracticable, unnecessary, and contrary to the public interest to give preliminary notice, engage in public rule-making procedure, and postpone the effective date of this regulation until 30 days after publication thereof in the FEDERAL REGISTER (5 U.S.C. 553) in that, as hereinafter set forth, the time intervening between the date when information upon which this regulation is based became available and the time when this regulation must become effective in order to effectuate the declared policy of the act is insufficient; a reasonable time is permitted, under the circumstances, for preparation for such effective time; and good cause exists for making the provisions hereof effective not later than May 20, 1975. A reasonable determination as to the supply of, and the demand for, such peaches must await the development of the crop thereof, and adequate information thereon was not available to the Peach Commodity Committee until May 7, 1975, on which date an open meeting was held, after giving due notice thereof, to consider the need for, and the extent of, regulation of shipments of such peaches. Interested persons were afforded an opportunity to submit information and views at this meeting; the recommendation and supporting information for regulation during the period specified was promptly submitted to the Department on May 8, 1975; shipments of the current crop of such peaches are currently underway; this regulation should be applicable to all such shipments during the period hereinafter specified in order to effectuate the declared policy of the act; the provisions of this regulation are identical, as to minimum grade and size, with the aforesaid recommendation of the committee; information concerning such provisions and effective time has been disseminated among handlers of such peaches; and compliance with the provisions of this regulation will not require of handlers any preparation therefor which cannot be completed by the effective time hereof.

Section 917.437 is added to 7 CFR Part 917 as follows:

## § 917.437 Peach Regulation 6.

*Order.* (a) During the period May 20, 1975, through July 3, 1975, no handler shall handle:

(1) Any package or container of any variety of peaches unless such peaches meet the requirements of U.S. No. 1 grade.

(2) Any package or container of Arm Gold, Early Amber, Desert Gold, Pat's Pride, Royal April, Royal Gold, Spring Gold, or Springtime variety peaches unless:

(i) Such peaches when packed in molded forms (tray pack) in a No. 22D standard lug box are of a size that will pack, in accordance with the requirements of standard pack, not more than 80 peaches in the box; or

(ii) Such peaches when packed in any container other than a No. 12B standard fruit (peach) box are of a size that will pack, in accordance with the requirements of standard pack, not more than 70 peaches in the box; or

(iii) Such peaches, when packed in any container other than a No. 12B standard fruit (peach) box or molded forms (tray pack) in a No. 22D standard lug box, measure not less than 2 $\frac{1}{4}$  inches in diameter as measured by a rigid ring: *Provided*, That not more than 10 percent, by count, of the peaches in any such container may fail to meet such diameter requirements.

(c) (Reserved)

(d) Peach Regulation 4 (39 FR 17756, 21118) is hereby terminated as of the effective date hereof.

(e) Terms used in the amended marketing agreement and order shall, when used herein, have the same meaning as given to the respective term in said amended marketing agreement and order; "U.S. No. 1" and "standard pack" shall have the same meaning, respectively, as when used in the United States Standards for Peaches (7 CFR 51.1210-1223); "No. 22D standard lug box" and "No. 12B standard fruit (peach) box" shall have the meanings as set forth, respectively, in § 1387.11 of the "Regulations of the California Department of Food and Agriculture;" and "diameter"

(f) Such peaches, when packed in any container other than molded forms (tray pack) in a No. 22D standard lug box, are of a size that will pack, in accordance with the requirements of standard pack, not more than 108 peaches in the box; or

(ii) Such peaches, when packed in any container other than molded forms (tray pack) in a No. 22D standard lug box, measure not less than 2 inches in diameter as measured by a rigid ring: *Provided*, That not more than 10 percent, by count, of the peaches in any such container may fail to meet such diameter requirement.

(3) Any package or container of Springcrest, Early Royal May, or May Lady variety peaches unless:

(i) Such peaches when packed in molded forms (tray pack) in a No. 22D standard lug box are of a size that will pack, in accordance with the requirements of standard pack, not more than 96 peaches in the box; or

(ii) Such peaches, when packed in any container other than molded forms (tray pack) in a No. 22D standard lug box, are of a size that will pack, in accordance with the requirements of standard pack, not more than 96 peaches in the box; or

(iii) Such peaches, when packed in any container other than a No. 12B standard fruit (peach) box are of a size that will pack, in accordance with the requirements of standard pack, not more than 65 peaches in the box; or

(iv) Such peaches, when packed in any container other than a No. 12B standard fruit (peach) box or molded forms (tray pack) in a No. 22D standard lug box, measure not less than 2 $\frac{1}{4}$  inches in diameter as measured by a rigid ring: *Provided*, That not more than 10 percent, by count, of the peaches in any such container may fail to meet such diameter requirement.

(4) Any package or container of Robin, any type of Babcock, Blazing Gold, Bonjour, Cardinal, Dixie, Gold Dust, June Lady, Merrill Gemfree, Royal May, or Early Coronet variety peaches unless:

(i) Such peaches when packed in molded forms (tray pack) in a No. 22D standard lug box are of a size that will pack, in accordance with the requirements of standard pack, not more than 88 peaches in the box;

(ii) Such peaches when packed in a No. 12B standard fruit (peach) box are of a size that will pack, in accordance with the requirements of standard pack, not more than 75 peaches in the box; or

(iii) Such peaches, when packed in any container other than a No. 12B standard fruit (peach) box or molded forms (tray pack) in a No. 22D standard lug box, measure not less than 2 $\frac{1}{4}$  inches in diameter as measured by a rigid ring: *Provided*, That not more than 10 percent, by count, of the peaches in any such container may fail to meet such diameter requirement.

(5) Any package or container of Aurora, Coronet, Indian Red, Merrill Beauty, Merrill Gem, Peterson Elberta, Red Haven, Regina, or Red Top variety peaches unless:

(i) Such peaches when packed in molded forms (tray pack) in a No. 22D standard lug box are of a size that will pack, in accordance with the requirements of standard pack, not more than 80 peaches in the box; or

(ii) Such peaches when packed in a No. 12B standard fruit (peach) box are of a size that will pack, in accordance with the requirements of standard pack, not more than 70 peaches in the box; or

(iii) Such peaches, when packed in any container other than a No. 12B standard fruit (peach) box or molded forms (tray pack) in a No. 22D standard lug box, measure not less than 2 $\frac{1}{4}$  inches in diameter as measured by a rigid ring: *Provided*, That not more than 10 percent, by count, of the peaches in any such container may fail to meet such diameter requirements.

tainer may fail to meet such diameter requirements.

(6) Any package or container of Alamar, Angelus, Belmont, Carnival, Fairtime, Fay Elberta, Fayette, Fiesta, Fortyniner, Franciscan, Halloween, John Gee, Jody Gaye, July Elberta (Early Elberta, Kim Elberta, and Socala), Madera Gem, Mardigras, Merricle, O'Henry, Pacifica, Pageant, Parade, Paradise, Preuss Suncrest, Regular Elberta, Red Globe, Red Lady, Rio Oso Gem, Royal Faye, Royal Hale, Scarlet Lady, Summercrest, Summertime, Suncrest, Toreador, July Lady, or Windsor variety peaches unless:

(i) Such peaches when packed in molded forms (tray pack) in a No. 22D lug box are of a size that will pack, in accordance with the requirements of standard pack, not more than 72 peaches in the box;

(ii) Such peaches when packed in a No. 12B standard fruit (peach) box are of a size that will pack, in accordance with the requirements of standard pack, not more than 65 peaches in the box; or

(iii) Such peaches, when packed in any container other than a No. 12B standard fruit (peach) box or molded forms (tray pack) in a No. 22D standard lug box, measure not less than 2 $\frac{1}{4}$  inches in diameter as measured by a rigid ring: *Provided*, That not more than 10 percent, by count, of the peaches in any such container may fail to meet such diameter requirement.

(b) During the period May 20 through July 3, 1975, no handler shall handle any package or container of any variety of peaches not specifically named in subparagraphs (2), (3), (4), (5), or (6) of paragraph (a) unless:

(1) Such peaches when packed in molded forms (tray pack) in a No. 22D standard lug box are of a size that will pack, in accordance with the requirements of standard pack, not more than 96 peaches in the box; or

(2) Such peaches when packed in any container other than molded forms (tray pack) in a No. 22D standard lug box, measure not less than 2 $\frac{1}{4}$  inches in diameter as measured by a rigid ring: *Provided*, That not more than 10 percent, by count, of the peaches in any such container may fail to meet such diameter requirements.

(c) (Reserved)

(d) Peach Regulation 4 (39 FR 17756, 21118) is hereby terminated as of the effective date hereof.

(e) Terms used in the amended marketing agreement and order shall, when used herein, have the same meaning as given to the respective term in said amended marketing agreement and order; "U.S. No. 1" and "standard pack" shall have the same meaning, respectively, as when used in the United States Standards for Peaches (7 CFR 51.1210-1223); "No. 22D standard lug box" and "No. 12B standard fruit (peach) box" shall have the meanings as set forth, respectively, in § 1387.11 of the "Regulations of the California Department of Food and Agriculture;" and "diameter"

#### CHAPTER XVIII—FARMERS HOME ADMINISTRATION, DEPARTMENT OF AGRICULTURE

##### SUBCHAPTER A—GENERAL REGULATIONS

[FmHA Instruction 104.1]

#### PART 1813—AVAILABILITY OF INFORMATION

Part 1813 of Title 7, Code of Federal Regulations, Chapter XVIII (35 FR 11120; 35 FR 13571) is revised. This revision makes the following changes:

1. Implements the Freedom of Information Act (FOIA) Amendments of 1974, requiring a response to inquiries within 10 working days as to the determination to release or deny requested information. An additional 10 working days may be allowed under specific circumstances.
2. Implements 7 CFR Subtitle A, Part 1, Subpart A, Department of Agriculture regulations pertaining to Official Records.
3. Updates and clarifies Farmers Home Administration (FmHA) interpretations of FOIA exemptions.
4. Provides for the type of information that may be furnished about FmHA borrowers to their other suppliers of credit.
5. Establishes the type of information that the Agency may furnish an FmHA applicant rejected primarily because of a credit report.
6. Provides for the furnishing of materials and records to other Government agencies.

This revision is being published without giving notice of proposed rulemaking since advance notice would delay clarification and understanding of the Freedom of Information Act amendments of 1974 at the State and County Office levels and would, therefore, be contrary to public interest. However, it is the policy of this Department that rules relating to public property, loans, grants, benefits, or contracts shall be published for comment notwithstanding the exemption in 5 U.S.C. 553 with respect to such rules. In accordance with the spirit of that policy, interested parties may submit written comments, suggestions, data, or arguments to the Chief, Directives Management Branch, Farmers Home Administration, United States Department of Agriculture, Room No. 6315 South Building, Washington, D.C. 20250, within 30 days after the publication of this Part. All written submissions made pursuant to this notice will be made available for public inspection at the Office of the Chief, Directives Management Branch, during regular business hours: (8:15 to

4:45). Material thus submitted will be evaluated and acted upon in the same manner as if this document were a proposal. However, this Part as here amended shall remain effective until it is further amended in order to permit the public business to proceed expeditiously.

As revised, Part 1813 will read as follows:

- Sec.  
1813.1 General statement of purpose and policy.  
1813.2 Definitions.  
1813.3 Public inspection and copying.  
1813.4 Indexes.  
1813.5 Requests for records.  
1813.6 Delegation of authority.  
1813.7 Availability of identifiable material.  
1813.8 Determinations and appeals.  
1813.9 Compulsory process.  
1813.10 Fee schedules.

**AUTHORITY:** 7 U.S.C. 1989; 42 U.S.C. 1480; 40 U.S.C. 442; 43 U.S.C. 2942; 5 U.S.C. 301; Sec. 10 of P.L. 93-357, 88 Stat. 392; delegation of authority by the Secretary of Agriculture, 7 CFR 2.70; delegations of authority by Director, OEO, 20 FR 14764, 23 FR 9850.

##### § 1813.1 General statement of purpose and policy.

(a) This Part is issued in accordance with the regulations of the Secretary of Agriculture in Part 1, Subpart A of Subtitle A of this Title (7 CFR 1.1-1.16), implementing the Freedom of Information Act (FOIA) (5 U.S.C. 552) including Appendix A thereto (Fee Schedule). In keeping with the spirit of the FOIA, the policy of FmHA governing access to information contained in the files, documents, and records is one of the fullest responsible disclosures, limited only by the obligations of confidentiality and the administrative necessities recognized by the Act.

(b) The vast majority of requests for material affected by the FOIA will be handled quickly and informally by providing the requester a copy of leaflets or booklets, FmHA regulations, guidelines for the preparation of forms when needed, blank forms, or materials appropriate for public use.

(c) Unless exempted from disclosure pursuant to law, records of the Agency shall be available for inspection and copying in accordance with this Part and upon payment of applicable fees.

(d) This regulation does not supersede any FmHA regulation prohibiting the removal of official records from any FmHA office.

(e) This regulation does not purport to describe or set forth every item of information which may or may not be disclosed.

##### § 1813.2 Definitions.

(a) "Act" refers to the Freedom of Information Act (FOIA), 5 U.S.C. 552.

(b) "Application" applies to the entire application process from the time of initial contact with applicant until the application is withdrawn, rejected, or approved.

(c) "Days" shall not include Saturdays, Sundays and holidays.

(d) "Department" refers to the United States Department of Agriculture.

(e) "Descriptive publications" means FmHA pamphlets, leaflets, flyers, and press, radio, and TV releases developed primarily for public consumption.

(f) "Determination" refers to the decision to release or not to release information requested under this regulation.

(g) "FmHA" refers to the Farmers Home Administration.

(h) "Forms" mean blank copies of FmHA forms and forms of other agencies utilized by FmHA, not including accountability form items such as identification cards and transportation requests.

(i) "FOIO" means Freedom of Information Officer. He is the Chief, Reports Management Branch, Management Information Systems Staff, National Office, Washington, D.C.

(j) "Indexes" mean the Procedure Table of Contents, Forms Reference List, FmHA Bulletin Checklist, and list of pamphlets.

(k) "Information" means staff manual items, forms, descriptive publications, records, and information obtained or produced by officers and employees of FmHA in the course of their official duties as well as all files, documents, records, and other information in the custody or control of any FmHA officer or employee.

(l) "OGC" refers to the Office of the General Counsel.

(m) "Records" mean any documents (including borrower case dockets), papers, and information contained in FmHA files other than staff manual items, forms, descriptive publications, and indexes.

(n) "Staff manual items" mean regulations, guidelines for the preparation of forms, internal Agency notices, and related items.

##### § 1813.3 Public inspection and copying.

(a) Facilities for inspection and copying by the public and for obtaining copies of materials will be provided by: The FOIO in the National Office, the State Director in each State Office, and the County Supervisor in each County Office. Such facilities will usually consist of a table and chairs in a convenient location in the office which can be used without undue interference with normal office procedure.

(b) A person who has requested such materials will be promptly notified that he may inspect and copy such materials, and upon payment of applicable fees, obtain copies thereof, on business days from 9:30 a.m. to 4 p.m. If any of the FmHA materials requested are not located at the office to which the request was made, the request will be forwarded to the office where such materials are available.

##### § 1813.4 Indexes.

The Agency has determined that periodic publication and distribution of indexes is unnecessary and impracticable as permitted by the FOIA but FmHA employees will explain, without charge, to

members of the public how to use any of the indexes and will render reasonable assistance to them in determining from the index the materials in which they are interested.

##### § 1813.5 Requests for records.

(a) To speed processing, requests for information should be made at the appropriate County or State Office, but requests may be mailed to the Chief, Reports Management Branch, Management Information Systems Staff, Farmers Home Administration, Washington, D.C. 20250. Requests for staff manual items, forms and descriptive publications that are readily available at the County Office need not be put in writing. All other requests must be submitted in writing. The phrase "FOIA REQUEST" should be placed in capital letters on the front of the envelope for any written requests. The requester will be given notice of the determination promptly and in writing. When a determination to release has been made, the notice will indicate when the information will be available. Any required fees shall be paid in advance of searches or receipt of service.

(b) All written requests will be date stamped upon their receipt.  
(c) A request shall not be denied on the sole ground that the record has not been properly identified, if the description together with the knowledge Agency personnel have of the contents of their files, enable the record to be located.  
(d) Requests shall be reasonably specific. If they fall within reasonably specific categories but constitute an undue burden, the FmHA official making the determination may contact the requester to discuss the request and reduce it to manageable proportions.

(e) A request relating to a matter in pending litigation must indicate the name of the court and its address.  
(f) Copies of documents or blank forms will be supplied whenever possible. If photocopies must be made, the FmHA employee will maintain control of partially exempt documents being copied to eliminate unauthorized disclosure of material.

(g) If data have been compiled and are available in the form of a record, the data shall be made available as provided herein. If administratively feasible, records may be created for the prescribed fee; however, records are not normally required to be created by compiling selected items from the files, and records are not normally required to be created to provide the requester with such data as ratios, proportions, percentages, per capita, frequency distributions, trends, correlations, comparisons and forecasts.

(h) Copies of a requested record need not be furnished if the record is known to have been published in the FEDERAL REGISTER or is available for purchase from the Superintendent of Documents of the Government Printing Office (GPO). The requester will be advised to submit his order to GPO at the following address: Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402. Such records may be examined if an Agency office has a copy.

(i) If the material requested is the primary concern of another agency, the request will be promptly referred to that agency. If FmHA has no knowledge concerning the requested records, it shall notify the requester of that fact.

(j) Records of specified form or character are required to be destroyed after the lapse of time specified in the Records Disposal Act of 1943, 44 U.S.C. 366-380, and in accordance with FmHA disposal schedules.

##### § 1813.6 Delegation of authority.

Subject to the provisions of § 1813.8, the FOIO, each State Director, and each County Supervisor is authorized to act respectively on the State and County level on behalf of FmHA on all requests for materials and records.

##### § 1813.7 Availability of identifiable material.

(a) **Releasable information.** (1) When providing information from a file, care should be exercised so that nonreleasable information will not be revealed.

(2) The following is illustrative of information which is releasable to the public:

(i) All staff manual items, blank copies of forms, and descriptive publications.

(ii) Names, positions, titles, grades, salaries, and duty stations of FmHA employees. Home addresses and telephone numbers may not be released and names may not be used for solicitation purposes.

(iii) Final FmHA opinions.

(iv) The following loan and grant information:

(A) Names and addresses of recipients of insured, direct, or guaranteed loans, grants, and of private lenders for guaranteed loans.

(B) Names of officers, directors, stockholders, or partners of recipient firms.

(C) The kind and amount of assistance, including amount of any Emergency loan forgiveness.

(D) The purpose of the approved assistance in general terms such as a farm ownership loan, a fish processing factory, a water system, a sewage treatment plant, etc.

(E) The extent of outside participation, if any.

(F) Statistical data such as numbers of loans in an area, totals and summaries.

(G) Information available in public records, or customarily released by the applicant or recipient, or approved in writing for release by the applicant or recipient.

(H) Name, amount, of loan applied for, general loan purpose, and the name of lender for applicants, including guarantee applicants.

(v) Appraisals and inspection reports, subject to the restrictions of paragraph (c) (1) and (2) of this section.

(vi) Copies of pleadings, motions, orders, transcripts of testimony, and documentary evidence introduced in pending or closed litigation once such items are a matter of public record.

(vii) Race or sex of employees, applicants or borrowers, but only in the form of gross statistics, since any such information in FmHA records has been ob-

tained via unverified visual identification for statistical purposes only.

(viii) Any other information not justifiably exempt from disclosure by the FOIA.

(b) **FmHA information that is exempt from public disclosure under the FOIA.**

(1) Although the FOIA gives overriding emphasis to the fact that information in the Executive Branch should be more available, it recognizes that some records cannot be disclosed without violating the right of privacy, impairing the ability of the Government to function, or impairing its programs.

(2) In the remainder of this section, the quoted passages are the text of the law. Explanatory parts are not in quotation marks. Explanatory parts are for general background information only and are not intended to function as a summary of current case law interpreting the exemptions.

(3) Under the Freedom of Information Act, information may be withheld if it is:

(i) "(A) Specifically authorized under criteria established by an Executive Order to be kept secret in the interest of national defense or foreign policy and (B) are in fact properly classified pursuant to such Executive Order." FmHA records in this category are identified by the security classification of Confidential, Secret, and Top Secret. (Exemption No. 1 of the Act.)

(ii) "Related solely to the internal personnel rules and practices of any agency." A guideline for application of the exemption is that an agency cannot bargain effectively for the acquisition of lands or services or the disposition of surplus facilities if its instructions to its negotiators and its offers to prospective buyers or sellers are not kept confidential. Once an action is completed and the reason for confidentiality has passed, the information may be released. An agency must keep secret the circumstances under which it will conduct unannounced inspections or spot audits of supervised transactions. (Exemption No. 2 of the Act.)

(iii) "Specifically exempted from disclosure by statute." This exemption indicates an intention to preserve whatever protection is afforded under other statutes, but is not of particular relevance to FmHA. (Exemption No. 3 of the Act.)

(iv) "Trade secrets and commercial or financial information obtained from any person and privileged or confidential." This exemption covers material which would not customarily be made public by the person from whom it was obtained. It also covers certain information which is given to FmHA in confidence, since a citizen must be able to confide in his Government. This exemption is meant to protect information that is revealed to FmHA under an express or implied promise by FmHA that the information will be kept confidential. It is applied by FmHA primarily to information submitted under loan and grant programs. FmHA interprets "person" to include corporations and other organizations. (Exemption No. 4 of the Act.)

(v) "Interagency or intra-agency memorandums or letters which would not be available by law to a private party in litigation with the agency." This exemption protects internal memorandums and letters, the release of which would inhibit the free exchange of ideas within FmHA. It cannot be used to withhold material merely because it is embarrassing or to withhold purely factual material or final opinions. (Exemption No. 5 of the Act.)

(vi) "Personnel and medical files and similar files, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy." This exemption excludes from disclosure requirements all personnel and medical files, and all private or personal information contained in other files which, if disclosed to the public, would amount to a clearly unwarranted invasion of personal privacy. FmHA interprets "person" to include corporations and other organizations as well as individuals, and "files" to include loan and grant files. (Exemption No. 6 of the Act.)

(vii) "Investigatory records compiled for law enforcement purposes, but only to the extent that the production of such records would (A) interfere with enforcement proceedings, (B) deprive a person of a right to a fair trial or an impartial adjudication, (C) constitute an unwarranted invasion of personal privacy, (D) disclose the identity of a confidential source and, in the case of a record compiled by a criminal law enforcement authority in the course of a criminal investigation, or by an agency conducting a lawful national security intelligence investigation, confidential information furnished only by the confidential source, (E) disclose investigative techniques and procedures, or (F) endanger the life or physical safety of law enforcement personnel." This applies to files compiled in investigations leading to administrative proceedings such as employee sanctions or debarment as well as files compiled for criminal prosecution. Files compiled primarily for other purposes cannot later be classified as law enforcement files. (Exemption No. 7 of the Act.)

(4) The Act contains two other exemptions that are not applicable to FmHA, and this comment: "This section does not authorize withholding of information or limiting the availability of records to the public, except as specifically stated in this section nor shall this section be authorized to withhold information from Congress." Reference is to official requests of Congress or its committees, not to requests from individuals serving in the House or Senate.

(c) **Nonreleasable information.** (1) When any document or file contains both releasable and nonreleasable information, the items which are not to be released will be blocked out and identified according to the nature of the information contained and the applicable exemption number(s) cited. The rest of the document will then be released. Any information withheld only under exemp-

tions No. 4 and/or No. 6 of the Act will be released to any person with the permission of the person whose confidential communication or privacy is being protected. This permission should be obtained in writing.

(2) The following is a list of items which are not available to the public with the applicable FOIA exemption number(s) indicated after each item.

(i) Sensitive internal communications such as preliminary drafts of decisions, informal opinion portions of some reports and the working papers in which policies are formulated or recommended and which, if released, would inhibit the free exchange of ideas within FmHA. (Exemption No. 5 of the Act.)

(ii) Information in the possession of the FmHA, the release of which would constitute an unwarranted invasion of the privacy of a person. This may include the identity of individuals in reports which are otherwise releasable. (Exemption No. 6 of the Act.)

(iii) Lists and case files of persons temporarily suspended under the FmHA debarment regulations, since such suspension is not a final determination and such lists are for internal use only.

(iv) The following loan and grant information:

(A) Confidential information on pending, declined, withdrawn, or cancelled applications for assistance. (Exemptions No. 4 and No. 6 of the Act.)

(B) Why applications were withdrawn or rejected. (Exemptions No. 4 and No. 6 of the Act.)

(C) Confidential, financial, or other information about borrowers obtained from any source except as noted in paragraph (d) of this section. (Exemptions No. 4 and No. 6 of the Act.)

(D) Information concerning losses, delinquencies, and defaults in individual cases. (Exemption No. 6 of the Act.)

(E) Information regarding the character, credit standing and property of applicants, borrowers, or other persons except as under paragraph (e) of this section. (Exemptions No. 4 and No. 6 of the Act.)

(F) Confidential information in case files and borrower case dockets. (Exemption No. 6 of the Act.)

(v) Investigatory files compiled for law enforcement purposes such as files compiled for debarment and personnel action to the extent permitted by Exemption No. 7. (Exemption No. 7 of the Act.)

(vi) Opinions of the Office of the General Counsel (OGC), the Office of Audit (OA), Office of Investigation (OI), or other agencies. Refer the request to the originating agency.

(vii) Lists of names and/or addresses of employees or of persons, organizations of firms for political or commercial solicitation purposes unless authorized by the individual named therein.

(d) **Credit reports.** (1) In accordance with general credit practices, when Agency officials are satisfied that the information is to be used to determine whether credit will be extended to an FmHA borrower, the following informa-

tion may be furnished to lenders: Name of borrower, date and amount of FmHA loan; loan purpose; participating bank, if any; approximate present balance; whether the loan is delinquent; but not the extent of delinquency; whether the experience with the loan has been satisfactory; and nature of collateral, such as land, buildings, equipment, etc.

(2) When an applicant for credit for personal, family, or household purposes is rejected because of a credit report from a credit reporting company, FmHA will release the source of the report to the applicant upon his request under 15 U.S.C. 1681m(a). The Fair Credit Reporting Act. When credit for similar purposes is denied because of information obtained from other sources, upon request FmHA will release the nature of the information to the applicant, but not the source, under 15 U.S.C. 1681m(b).

(3) Persons furnishing a credit reference from outside the Government can be promised confidentiality under Exemption No. 4 as it applies to commercial or financial information obtained from a person and privileged or confidential. The promise of confidentiality must be made in good faith and for good reason.

(e) **Availability of materials and records to other Government agencies.** (1) **Federal agencies.** FmHA desires the fullest cooperation with other Federal agencies. Accordingly, any information that is available to the public and most exempt information which is not confidential is usually available to other agencies. The Federal Reports Act of 1942, 44 U.S.C. 3508, however, requires that confidential information may not be released to other Federal agencies unless the person supplying the information consents or the agency has specific power to collect such information. Such agencies include the Internal Revenue Service, supported by 26 U.S.C. 7602 and the General Accounting Office, supported by 31 U.S.C. 54. FmHA officials will release confidential information to other agencies when necessary for the proper administration of FmHA programs.

(2) **State agencies.** State agencies will be treated in the same manner as the general public.

#### § 1813.8 Determinations and appeals.

(a) **Determinations.** A determination to release or deny must be made within 10 days after receipt of the request, and if the requested data is not enclosed in the reply, the approximate date that compliance will be effected shall be indicated in the reply. Prior to the issuance of a denial under Exemption No. 4 or No. 6, the FmHA official should contact the person whose privacy is at issue and request his written permission to release it, as Exemptions No. 4 and No. 6 are intended to protect individual privacy. If a denial is contemplated, OGC should be consulted. The names and titles or positions of each person responsible for the denial of a request must be set forth as a part of the written denial. This notice of denial shall also notify the requester of the reasons for the denial citing the

applicable exemption(s) under the Act; of the right of the requester to appeal the denial to the Administrator of FmHA whose address is South Building, U.S. Department of Agriculture, Washington, D.C. 20250; that appeal must be made in writing within 45 days after receipt of the denial or, in cases of partial denial, within 45 days after receipt of the information being made available; and that the phrase "FOIA APPEAL" is to be placed in capital letters on the front of the envelope containing the appeal.

(b) **Appeals.** (1) The FmHA Administrator will notify the requester in writing within 30 days after his receipt of the written appeal of the Farmers Home Administration's final determination, and if requested data is not enclosed, the requester shall be informed of the approximate date compliance will be effected. Upon a determination to deny the appeal, the Administrator will send a copy of the records requested, when practical, and of all related correspondence to OGC, Attention, Research and Operations Division. When the volume of records is so large as to make sending a copy of the records requested impractical, the Administrator will enclose an informative summary of those records. In accordance with 7 CFR 1.11(b), FmHA may, in individual cases, except where disclosure is prohibited by Executive Order or statute, or by regulations of other Government agencies, make available records exempt from disclosure that will not adversely affect the national interest or constitute an unwarranted invasion of individual privacy.

(2) The FmHA Administrator's notice of a final denial will include a statement that judicial review is available in accordance with 5 U.S.C. 552(a)(4). The notice of final denial will also inform the requester of the reason(s) for the denial and names and titles or positions of each person responsible for the denial of the appeal.

(c) **Extension of time.** (1) Any extension in the response time for an initial determination or response to an appeal must have the approval of the FOIO. Such an extension may be granted during the denial or appeal stage. Extensions will not exceed a total of 10 days. When an extension has been granted, the requester will be notified immediately in writing.

(2) For extensions of time beyond 10 days, approval of the FOIO and the requester is required in writing.

§ 1813.9 Compulsory process.

(a) When asked for records by a person or his counsel who is a party to litigation with the Government, FmHA personnel should direct the request to OGC.

(b) In any case where a subpoena or other compulsory process requires the production or disclosure of any records, materials, or information acquired by an FmHA employee in the performance of his official duties, or because of his official status, the employee will appear at the time and place required by the subpoena or other compulsory process, and will follow the instructions of the State

Director or Administrator, with the advice and assistance of the OGC, regarding the information that may or may not be disclosed.

(c) When a compulsory process or demand of the type described in paragraph (a) of this section is made upon an FmHA employee by a court or other authority while he is appearing before, or is otherwise in the presence of the court or other authority, the employee shall immediately inform the court or other authority that this section and 7 CFR 1.15(b) prohibits the employee from producing or disclosing information or material demanded without the prior approval of the Administrator; and offer to refer the demand for the prompt consideration of the Administrator. Unless the court or other authority withdraws the demand, the employee, or other appropriate Government official or attorney, shall provide the court or other authority a copy of the regulations prescribed in this paragraph and paragraph (b) of this section, and shall respectfully request the court or other authority to stay the demand pending the receipt of instructions or directions from the Administrator concerning the demand.

(d) If a final denial is contemplated, the matter will be referred by the Administrator to the Secretary of Agriculture for final determination. Unless the Secretary determines that the records, material, or information should be produced, the employee who appears in answer to the demand will respectfully decline to produce or disclose the records, material, or information demanded on the ground that the disclosure is prohibited by this section and by 7 CFR 1.15 (a). The employee shall provide the court or other authority with a copy of the regulation prescribed in this section and shall respectfully request the court or other authority.

(e) No public statements or press releases relating to particular litigation being conducted by the Department of Justice are to be made or issued without prior consent from the OGC.

§ 1813.10 Fee schedules.

(a) **Fee schedule general.** This section adopts the Fee Schedule and procedures prescribed by the Office of Plant and Operations USDA Appendix to 7 CFR Part 1, Subpart A. FmHA requires that fees be collected in full before or at the time the material or record is furnished. Subsection (b) covers fees charged by FmHA but not covered in the Department Fee Schedule.

(b) **Fee charges.** (1) **Searches.** Manual searches (locating, selecting, extracting, compiling) will be charged for at the rate of \$4 per hour for clerical time, and \$9 per hour for supervisory or professional time. Charges will be computed to the nearest quarter hour required for the search. A search may involve both clerical and supervisory or professional time.

(2) **Computer usage.** a minimum fee of \$25 if computer is needed to respond to any request.

(ii) For information which has to be compiled, the charge will include the cost of employee's time and cost of computer runs or other equipment used.

(2) **Authentications (with USDA seal affixed).** \$2 each document copy authenticated (additional to any other charge).

(3) **Certifications.** \$1 each document copy (additional to any other charge). The certification should read: "I certify this is a true copy of the original" (with signature and title affixed). The officials authorized to make this certification are the FOIO, State Directors, and County Supervisors.

(4) **Staff manual items.** \$.05 each sheet.

(5) **Forms (blank copies).** \$.05 each copy. Accountability form items (such as identification cards, transportation requests, and so forth) will not be made available. Public requests for copies of the "FmHA Record Book" will be referred to the GPO in accordance with § 1813.3(e).

(6) **Guide for construction of farm buildings.** \$1 each copy.

(7) **Construction detail (CD) sheet.** \$.20 each sheet.

(8) **Recordation data and face amount secured by mortgage or other documents recorded in the public records by FmHA.** \$1 minimum. \$.50 each document. Name and last known address of borrower, type of instrument, and approximate date of execution should be supplied by the requester.

(9) **Names and addresses of FmHA borrowers.** \$.20 each name and address.

(10) **FmHA office addresses.** \$.20 per address.

(11) **Photocopies, 8-1/2" x 14" or smaller.** \$.10 for the first copy and \$.05 for each additional copy of the same page.

(12) **Photocopies in excess of 8-1/2" x 14".** \$.25 per linear foot.

(c) **Payment of fees.** (1) Fees will be collected to the fullest extent possible in advance or at the time of the transaction. This means that when the material or record is furnished to the requester in person during the visit to the FmHA office, the fee will always be collected before or at the time the material or record is forwarded to the requester.

(2) Fee payments remitted to the FmHA by the requester will be in the form of a check, draft, or money order payable to the United States Treasury. The acceptance of cash in small amounts (\$5 or less) is permissible when the material or record is furnished to the requester in person at the FmHA office.

(3) When the fee is collected, a receipt will be issued to the payer on Form FmHA 104-1, "Public Information Receipt."

(d) **Deficiencies and refunds.** (1) When the amount covered by an advance payment is less than the final total cost of filling a request, the amount of the deficiency, if \$1 or more, will be collected not later than at the time the request is filled. Overpayment of \$1 or

#### SUBCHAPTER D—GUARANTEED LOANS

[FmHA Instructions 449.1 and 449.2]

#### PART 1842—BUSINESS AND INDUSTRIAL LOANS

##### Taxable Bond Issues

On March 25, 1975, there was published in the *FEDERAL REGISTER* (40 FR 13201) a notice of proposed rulemaking amending § 1842.61 of Part 1842, Chapter XVIII, Title 7, Code of Federal Regulations (39 FR 34267), to provide for the guarantee of taxable bonds issued by public bodies, and adding § 1842.62 to provide procedures for guaranteed loans to be made to public bodies in connection with the issuance of any class or series of taxable industrial bonds. Interested persons were given 30 days in which to submit comments, suggestions, or objections regarding the proposed regulations.

No written objections have been received and the proposed regulations are hereby adopted without change and are set forth below.

**Effective date:** This amendment is effective on May 19, 1975.

Dated: May 5, 1975.

FRANK B. ELLIOTT,  
Administrator,  
Farmers Home Administration.

As amended and added, §§ 1842.61 and 1842.62 read as follows:

#### § 1842.61 Insured loans.

Applications from private parties for whom FmHA and such applicants agree that a guaranteed lender is not available, and from public bodies, shall be processed as insured loans in accordance with the applicable provisions of this Chapter and Subpart A of Part 1823 of this Chapter, including the credit elsewhere requirement, except as provided in § 1842.62, which provides for the guarantee of taxable bond issues of public bodies.

(a) **Public bodies.** Except as provided in § 1842.62, loans to public bodies may be used only to finance community facilities for the purpose of developing private business enterprises and when the requested loan is not available under Subpart A of Part 1823 of this Chapter.

(b) **Community facilities.** Community facilities include industrial parks, consisting of land, the necessary access ways to the sites, and utilities, but not improvements erected on such site.

#### § 1842.62 Guaranteed industrial development bond issues.

(a) **Guaranteed loans to public bodies.** Loans to public bodies may be made for the purpose of constructing and equipping industrial plants for lease to private businesses (not including loans for operating such businesses). Applications for such loans shall first be considered on a loan guarantee basis.

(1) Loans made to public bodies may be guaranteed only in connection with the issuance of any class or series of industrial development bonds (as defined in section 103(c)(2) of the Internal Revenue Code of 1954, as amended (IRC)), the interest on which is includable in gross income under the IRC. No part of the loan guaranteed by FmHA may extend to any class or series of industrial development bonds the interest on which is excludable from gross income under section 103(a)(1) of such Code. Prior to the execution of any Contracts of Guarantee, lender shall furnish FmHA evidence regarding interest on the bonds being taxable for Federal income tax purposes. Such evidence may be in the form of an unqualified opinion of a recognized bond counsel or a ruling from the Internal Revenue Service.

(2) If FmHA and the applicant agree that a guaranteed lender is not available, the application may be considered for an insured loan under the provisions of § 1842.61.

#### §§ 1842.63-1842.70 [Reserved]

(7 U.S.C. 1989); delegation of authority by the Sec. of Agr., 7 CFR 2.23; delegation of authority by the Asst. Sec. for Rural Development, 7 CFR 2.70.)

[FR Doc. 75-13037 Filed 5-16-75; 8:45 am]

#### Title 8—Aliens and Nationality

#### CHAPTER I—IMMIGRATION AND NATURALIZATION SERVICE, DEPARTMENT OF JUSTICE

#### PART 211—DOCUMENTARY REQUIREMENTS: IMMIGRANTS; WAIVERS

Pursuant to section 552 of Title 5 of the United States Code (40 Stat. 383) and the authority contained in section 106 of the Immigration and Nationality Act (88 Stat. 173; 8 U.S.C. 1103), an amendment, as set forth herein, is prescribed in Part 211 of Chapter I of Title 8 of the Code of Federal Regulations.

In § 211.1(b)(3) two sentences are being added immediately preceding the existing last sentence thereof, the regulation is being amended to describe an authorized economical alternative to filing two separate applications where a returning resident immigrant has lost his Form I-151 and requires both a waiver of documents and a replacement document. The additional sentences are as follows:

Title 8 CFR is amended by adding two sentences at the end of § 211.1(b)(3) to read as follows:

#### § 211.1 Visa.

(b)(3) . . . . .  
If the returning resident alien is not presenting Form I-151 because he has

lost it, a Form I-90, (application for a replacement Form I-151) in duplicate, may be filed with the district director having jurisdiction over the port of entry who may in his discretion grant or deny without appeal a waiver of the required immigrant visa, reentry permit or Form I-151, by an immigrant alien who is returning to an unrelinquished lawful permanent residence in the United States after a temporary absence abroad not exceeding one year; filing the I-90 will serve not only as an application for replacement but also as an application for waiver of passport and visa without the necessity of a separate filing of Form I-193. An alien who is granted a waiver under this part upon presentation of Form I-90 shall, after admission into the United States, comply with the requirements of § 264.1(c) of this chapter.

Compliance with the provisions of section 553 of Title 5 of the United States Code (40 Stat. 383) as to notice of proposed rulemaking and delayed effective date is unnecessary in this instance as the amendment is to clarify agency procedure.

**Effective date.** The amendment in this order shall become effective on May 19, 1975.

Dated: May 14, 1975.

L. F. CHAPMAN, JR.,  
Commissioner of

Immigration and Naturalization.

[FR Doc. 75-13076 Filed 5-16-75; 8:45 am]

#### Title 12—Banks and Banking

#### CHAPTER I—COMPTROLLER OF THE CURRENCY, DEPARTMENT OF THE TREASURY

#### PART 7—INTERPRETIVE RULINGS

#### Customer-Bank Communication Terminals

##### I. INTRODUCTION

On December 12, 1974, the Comptroller of the Currency issued an interpretive ruling, 12 CFR 7.7491, Customer-Bank Communication Terminals (39 FR 44416, Dec. 24, 1974) stating his opinion that:

(a) It was a part of the banking business authorized to national banks by 12 U.S.C. 26, 27, and 24 Seventh, to communicate through computer terminals with customers of the bank concerning transactions in the customers' accounts; and

(b) Such customer-bank communication terminals, if established off premises, would not constitute "branches" within the meaning of 12 U.S.C. 38(f).

On December 19, 1974, Senator McIntyre, now Chairman of the Subcommittee on Financial Institutions of the Senate Committee on Banking, Housing & Urban Affairs, wrote the Comptroller suggesting several considerations of public policy which the Comptroller might have overlooked in announcing his interpretive ruling, and suggesting that it would have been useful for the Comptroller to convene a public hearing to consider these matters prior to the issuance of the ruling. 120 Cong.

Rec. S.22548 (Dec. 20, 1974). A similar suggestion as to the usefulness of a public hearing was received also in December 1974 from the Independent Bankers Association of America in connection with a petition filed by the IBAA seeking a decision of the Comptroller's interpretation.

After receipt of these suggestions, the Comptroller on January 16, 1975, published notice that a public hearing would be scheduled on April 2, 1975, to consider whether 12 CFR 7.7491, as amended in December 1974, should be further modified or amended. 40 FR 2836. The announced purposes of the hearing were to determine whether equitable considerations indicated further policy statements with regard to the interaction between the Comptroller's ruling and the laws of the various states, and to afford any interested person an opportunity to make his views known to the Comptroller.

Following an unsuccessful attempt by the IBAA to enjoin the holding of the hearing, the hearing was held as scheduled on April 2 and 3, 1975. Thirty-five witnesses appeared including eleven who appeared on behalf of the IBAA. Representatives of the IBAA and at least one other witness advocated complete rescission of the Comptroller's December 12, 1974, ruling, and their arguments, both written and oral, were received.

Based upon the testimony received at the Comptroller's hearing; upon written statements submitted in response to the January 16, 1975, notice of proposed rulemaking; and upon other facts which have come to the Comptroller's attention, both through hearings held on March 14, 1975, before the Senate Subcommittee on Financial Institutions and otherwise, the Comptroller has found no reason to alter his legal conclusions contained in his December 1974 ruling and explained at length in a statement accompanying that ruling. The Comptroller has, however, determined to adopt several modifications in the ruling as set forth below. These modifications reflect the experimental nature of CBCT development, and are designed to allow such developments to continue under appropriate monitoring by the Comptroller's Office.

##### II. DEFINITION OF A BRANCH

Additional testimony and evidence has been presented since the December 1974 ruling confirming the Comptroller's conclusion that a CBCT is not a "branch" within the common understanding of that term. The President-elect of the American Bankers Association, for example, testified in the Comptroller's hearing:

Electronic banking is new only in method of delivering the services, not in the services themselves, or in the fact that they are initiated away from the bank. Many banking services have traditionally been accessible from outside the conventional banking offices—either through mail service or telephone. I would seriously doubt whether any banker anywhere has not utilized such mail and telephone services in conducting the basic business of banking, irrespective of

geographic boundaries. CBCTs would do no more or no less—only faster, safer, more efficiently and with more convenience to the public.

Chairman Bomar of the Federal Home Loan Bank Board testified before the Senate Subcommittee on Financial Institutions, " . . . [I]f they are branches, so are post office boxes, so are grocery stores and department stores . . . ." Deputy Assistant Attorney General Baker of the Antitrust Division similarly told the same Subcommittee: "I don't see these CBCTs being the equivalent of branches. I think they are much more limited facilities." It also came to light during the Comptroller's hearing that as early as 1969 the Attorney General of Kentucky formally had opined: "We do not view the operation of the Electro-Teller Automatic Deposit Machine as being a 'branch bank'." Finally, since the December 1974 ruling, the states of North Dakota, Maryland, Kansas and Nebraska each have passed statutes authorizing the equivalent of CBCTs to be established and used by state banks and declaring that such terminals are not deemed to be branch banks.

One of the witnesses testifying before the Comptroller on behalf of the IBAA was an engineer who had helped to invent one form of so-called automated teller machine. He exhibited a certain amount of natural and understandable pride in these machines and stated that, in his opinion, the consumer banking functions provided by an automated teller are essentially those provided by a traditional manned branch. A state banker also appearing on behalf of the IBAA agreed at the Comptroller's hearing with this conclusion that an automated teller machine was the equivalent of a branch; yet this same state banker on September 19, 1974, testified at a hearing before the Michigan Commissioner of Financial Institutions as follows:

Legal arguments exist that branch banks imply the use and presence of human beings as representatives of the bank having contact with the public. However, the AM is a mechanical device which permits programmed segmented transactions to go to the bank for existing customers. This device, it seems, falls into the same category as the U.S. mail, telegraph, telephone, and other forms of data communication devices which have existed for many years. The ATMs cannot open a new account, cannot initially establish a credit relationship, cannot verify receipt of currency, or cannot respond to the many financial problems and inquiries of the customer. Obviously these functions occur at the normal definition of a branch bank.

In essence we have nothing more than a data-input device coupled with a box of cash whereby certain programmed transactions between the financial institution and its customers can go forward. They should not be described as automated teller machines which imply the human element, but rather a financial communication device.

Since this device is not a teller, it is not a bank, then these machines should not be considered as a branch of a bank.

Similarly, the legislative counsel of the IBAA conceded at the Comptroller's hearing that " . . . there is a distinction between the structure as we now know

it, brick and mortar structure and that kind of market construction, and the problem of a technology that has just arrived on the scene. . . ." Thus the evidence made available to the Comptroller supports the conclusion he announced in December 1974 that a CBCT is not a "branch" within the common understanding of that term.

#### III. THE USE OF CBCTs OWNED BY THIRD PARTIES

When the December 1974 ruling was issued, the type of CBCT most prominent in the Comptroller's mind were so-called "exclusive" or "dedicated" terminals established and owned by a single bank and operated principally for the benefit of its own customers. The December ruling thus was written in terms of national banks establishing and operating such devices.

In the intervening months, additional emphasis has been placed on networks of CBCTs owned by a third party and shared by a number of banks or other financial institutions. Legislation recently has been enacted in Nebraska under which it is expected that a statewide network, sponsored by the Nebraska Bankers Association, will be operational by the end of 1975. Credit Systems, Inc., a membership corporation which is the Master Charge processor for its member banks, recently has announced plans looking toward a shared EFTS network in the five state area of Missouri, Kansas, Illinois, Kentucky and Iowa. The proposed CSI network would have 130 financial convenience centers, which would be so-called automated teller machines available for use of any customer of any bank belonging to the network, and 6,000 point of sales terminals through which vendors of goods and services could be paid by electronic transfer for such goods and services. The system will be available at cost to each of 1,200 banks in the five state area served by CSI, and may be operational as early as July 1, 1976.

The Comptroller's ruling has been modified to make clear that national banks are permitted, in the Comptroller's opinion, to participate in such networks, whether or not the bank itself owns or operates the terminals. It is the Comptroller's opinion that national banks may receive and act upon instructions received from customers through such networks, just as national banks have for many years received and acted upon customers instructions received by mail or telephone. The bank need not necessarily own or operate the communication device itself in order to take advantage of this communication tool, although it may do so if it so chooses.

#### IV. GEOGRAPHIC LIMITATIONS

There has been a great fear expressed, mostly on behalf of smaller banks, that the Comptroller's ruling will permit a few large banks to dominate the banking structure of a state or, indeed, of the entire country. The Comptroller and his staff have received frequent comments from small banks located in various parts of the country that the Comptroller's

ruling would permit a giant bank, such as Bank of America of San Francisco or First National City Bank of New York City, to establish terminals throughout the country and gain a virtual monopoly on the nation's retail banking business.

The Comptroller believes that such fears are unfounded. A CBCT is useful only to a bank which has an existing customer base. Only customers who have a preestablished account at the bank and a card issued by the bank to gain access to that account through a CBCT may use a CBCT. The testimony at the Comptroller's hearing supports the conclusion that a CBCT is not a particularly useful competitive weapon for geographic market penetration. Thus it is unlikely that any national bank, whether big or small, which is interested in profitability would establish these terminals where there was no preexisting customer base, and several banks have so testified.

One witness representing a public interest group suggested at the Comptroller's hearing that, since it was unlikely that CBCTs would proliferate in the manner feared by the small banks, it might be useful for the Comptroller to impose a geographic limitation simply to allay these fears. The Comptroller believes there is much merit to this suggestion.

Much of the public discussion of the Comptroller's ruling has been in terms of big banks versus small banks or state banks versus national banks. It is not the Comptroller's intention to attempt to establish a competitive advantage for any particular group of banks. The Comptroller believes instead that electronic technology has made possible a reliable system by which rudimentary banking services can be delivered with greater locational and time convenience than before; that the limited experience available—such as that of First Federal Savings and Loan Association of Lincoln, Nebraska—with such services shows there is a great public demand for them; that savings and loan associations already are providing such services under regulations of the Federal Home Loan Bank Board (39 FR 23991, June 28, 1974), and that other institutions not normally thought of as financial institutions, such as nationwide retailers, are in an excellent position to begin providing such services; and that the banking industry should be more concerned with attempting to meet this competition from non banks and less fearful about hypothetical possibilities that CBCTs may permit one bank to gain some sort of competitive advantage over another. Even if such considerations were relevant, the Comptroller believes that the electronic transfer of funds through CBCTs will be of most advantage to small banks. Small banks will be offered an economical way to provide meaningful competition to larger banks with established geographically convenient branches. Indeed, networks such as those contemplated in Nebraska and in Missouri and its surrounding states will offer to small bank customers and to large bank customers

exactly the same time and location convenience.

The Comptroller's power to impose regulatory restrictions is not precisely defined in any statute. The courts, however, apparently have upheld reasonable legislative type regulations even in the absence of specific statutory authority. See, e.g., *American Trucking Association v. United States*, 344 U.S. 298 (1953); *National Broadcasting Co. v. United States*, 319 U.S. 190 (1943). The Comptroller is charged with the execution of all laws relating to the national banking system. This broad supervisory power, when coupled with the so-called "housekeeping" statute now found at 5 U.S.C. 301 giving the head of an executive department power to prescribe regulations "for the government of his department" and the "distribution and performance of its business" has been held to authorize the Comptroller to issue rules and regulations. *Cooper v. O'Connor*, 99 F.2d 135, 140 (D.C. Cir.), cert. denied, 305 U.S. 642 (1938); *Altman v. McClintock*, 20 F.2d 226 (D. Wy.), appeal dismissed, 28 F.2d 1007 (1927). See also *Norris v. United States*, 257 U.S. 77 (1921). It recently has been held that the Federal Trade Commission had such rulemaking authority based upon its power to adjudicate on a case by case basis what constitutes an unfair or deceptive trade practice and its power to make rules and regulations for the carrying out of its statutory duties. *National Petroleum Refiners Association v. FTC*, 482 F.2d 872 (D.C. Cir.), cert. denied, 416 U.S. 951 (1973). Under Section 202 of the Financial Institutions Supervisory Act of 1966, 12 U.S.C. 1818(b), the Comptroller is given authority to issue cease and desist orders against a bank which is engaging, has engaged, or is about to engage in an unsafe or unsound practice in conducting the business of the bank. Under the reasoning of *National Petroleum Refiners* and the other cases cited, the Comptroller would seem to have statutory authority to promulgate reasonable regulations for the sound and safe development of the banking system.

No evidence has been presented that the use of CBCTs is inherently unsafe or unsound. One witness appearing at the Comptroller's hearing and strongly supporting the Comptroller's ruling, however, suggested a modification to insure that CBCTs are installed first in a bank's own market area. If, in the opinion of the Comptroller, the bank did not prove its ability to operate CBCTs in its own market place, then it should not be permitted by the Comptroller to expand geographically into other areas. This suggestion has much merit. It will permit each national bank to experiment with CBCTs in the geographic area with which it is most familiar, and to which it has the easiest access should difficulties arise. Such a limitation also would help to allay the fears expressed on behalf of small banks, and thus promote the healthy development of the banking system, both state and national, by focusing the attention away from an un-

productive intra industry dispute and toward the development of techniques to meet competition from other industries and to serve better the banking public.

The Comptroller thus has adopted a 50 mile radius as a rough and easy to apply measure of the natural market base of a banking office. Under the amended ruling issued herewith, no national bank may establish for its exclusive use a CBCT further than 50 miles away from its main office or its branch nearest to the CBCT. This prohibition does not apply, however, to CBCTs which are available on a shared basis at a reasonable cost to one or more financial service institutions located within the trade area of the CBCT.

#### V. CONSUMER PROTECTION

Witnesses at the Comptroller's hearing and others have criticized the Comptroller's December 1974 ruling upon the grounds that it did not provide a full panoply of consumer protections. Representatives of consumer groups have pointed out that an instantaneous electronic funds transfer might eliminate the stop payment privilege which customers enjoy when paying by check. Another witness criticized the Comptroller's ruling because it did not protect against complete system failure due to windstorms, lightning, and accidents disabling the telephone and telegraph lines connecting the CBCTs to the computer. Both of these matters are beyond the Comptroller's province.

The legislative counsel for the Independent Bankers Association suggested that the Comptroller's Office could undertake regulation concerning disclosure of consumer rights so that a customer is informed, for example, of his liability for a lost or stolen debit card or other medium of access to a CBCT, and thus does not unwittingly obligate himself to unknown liabilities when he opens a checking account and receives such a card. Representatives of consumer groups have made similar suggestions. These suggestions are well taken, and the Comptroller advises all national banks to disclose clearly and meaningfully to its customers all rights and liabilities in connection with both authorized and possible unauthorized transactions involving a CBCT. The Comptroller will monitor developments in this area through a requirement that banks notify the Comptroller of their consumer disclosure practices. Similarly banks are being required by the amended ruling to notify the Comptroller what protection is provided against wrongful or accidental disclosure of confidential customer information.

The other fears concerning electronic fund transfers are unwarranted. While no system or machine is perfect, the evidence at the Comptroller's hearing demonstrated undisputedly that electronic funds transfers are more accurate, reliable, and less subject to fraud than transfers using the existing paper-based system. The Comptroller is not now

aware of any operational difficulties or any potential for fraud or other misuse of a CBCT which would warrant elaborate regulatory safeguards.

#### VI. INTERACTION WITH STATE LAW

The Comptroller's December 1974 ruling contained the following limitation: "National banks are urged prior to July 1, 1975, not to establish a CBCT in any state in which state law would prohibit a state chartered bank from establishing a similar facility." The stated purpose of this urging was to give the legislatures of such states an opportunity to consider whether they wished to place their state chartered banks on an equal competitive footing with national banks and with savings and loan associations. As already noted, one of the announced purposes of the Comptroller's rulemaking proceedings was to determine whether equitable considerations warranted further policy statements in this regard.

A representation that there should be further delay in the implementation of the Comptroller's ruling was made on behalf of only one state. The General Counsel of the Kentucky Bankers Association appeared to testify that the Kentucky legislature had not met since the Comptroller's December 1974 ruling was issued, and would not meet before January 1976. He thus urged, on behalf of the Kentucky Bankers Association, that the Comptroller's limitation on the establishment of CBCTs by national banks in Kentucky be continued until after the legislature had met.

A Kentucky statute authorizes the Commissioner of Banking and Securities to authorize by regulation state chartered banks to engage in any banking activity in which national banks may engage, provided that such activities are not "expressly prohibited or limited by the statutes of the Commonwealth." KRS § 287.020. The Comptroller's attention was called to a 1969 opinion of the Kentucky Attorney General interpreting KRS § 287.180, which permits state chartered banks to exercise their banking powers "only at their principal office," as prohibiting a state chartered bank from establishing an automated teller machine. The president of a state chartered bank in Kentucky, however, testified that, notwithstanding this statute and the 1969 Attorney General's opinion, a number of banking transactions routinely were accomplished off premises by state chartered banks in Kentucky. The Comptroller thus is not persuaded that the Commissioner of Banking and Securities could not issue a regulation under KRS § 287.020 authorizing state chartered banks to establish CBCTs. If the Commissioner believed that it was wise to do so. Similarly, the representative of the Kentucky Bankers Association could offer no guidance as to what the association's position would be when the Kentucky legislature met in January 1976, and no indication that, at the end of this legislative session, the statutes of Kentucky might be any different than they now are. In these circumstances the Comptroller does not be-

#### VII. NOTICE

The information required to be submitted to the Comptroller's Office 30 days before the establishment or use of a CBCT has been modified. The information regarding consumer protection already has been noted. Additional information is required about the insurance and security provisions protecting the CBCT and its users. The reporting requirements also are altered in the case of shared CBCTs so that, in most instances, one notice listing all of the banks involved would be sufficient.

No appearance was made on behalf of any particular state official or state bankers association other than Kentucky. The President of the Conference of State Bank Supervisors submitted to the Comptroller a written statement on behalf of the Conference stating in part:

Because the Conference believes that each state should have the right to determine the financial services to be provided by state chartered financial institutions operating within their borders, I wish to take this opportunity to reassert the position of CSBS that the decisions of the respective states as to the legality of off-premises electronic banking facilities are as binding on national banks as on state banks under provisions of the National Bank Act which incorporate state branching law. This conclusion is required by the Congressional policy of competitive equality between state and national banks based on state law as reflected in *First National Bank of Plant City, Florida v. Dickinson*, 396 U.S. 122 (1969). Where a facility of a national bank is "an additional place of business" at which "deposits are received or checks paid or money lent" and where state law forbids state banks from operating comparable facilities *Dickinson* clearly requires a finding of "branchness." State law, of course, is also applicable with respect to the establishment of an electronic banking facility in a state by a bank headquartered in another state.

In order to avoid uncertainty by banks and to maintain a regulatory environment at the state level that will promote efforts to examine the pros and cons of an evolving electronic funds transfer system, the Conference of State Bank Supervisors requests that effective July 1, 1975, your Interpretive Ruling be modified to specifically prohibit national banks from establishing a CBCT in any state in which state law would prohibit a state chartered bank from establishing a similar facility.

The Comptroller respects this position of the CSBS and, as already stated, is aware of the concerns about CBCTs of many of the state-chartered banks supervised by the CSBS members. The Comptroller must disagree, however, with the CSBS contention that CBCTs are branches and thus bound by state law. The Comptroller believes that it would be unwise to defer generally to state law in the absence of a legal requirement to do so because: (a) the National Bank Act is intended to operate without regard to state law, except where Congress specifically has stated otherwise; and (b) the various state laws tend to be vague or difficult to interpret concerning what off-premises activities are permitted to state banks, and a blanket adoption of these vague standards would generate needless controversy as to what actually would be authorized to national banks. Such considerations must be approached on a state-by-state basis, and Kentucky is the only state as to which the Comptroller was asked to undertake such an inquiry.

#### VIII. EXCLUSIONS

The Comptroller's original ruling excluded: (a) devices whose sole function was to verify credit for purposes of cashing a check or approving a credit card transaction; and (b) devices which were a part of a bank's authorized banking premises. An additional exclusion has been added to the amended ruling. The Comptroller does not require notice of, and is not undertaking to regulate, an off-premises terminal which is used solely to accomplish a funds transfer in payment for goods or services received, and through which neither cash is dispensed nor cash or checks left for subsequent deposit.

#### IX. EFFECTIVE DATE

The amended ruling issued herewith will be effective June 1, 1975. Both this ruling and the one issued in December 1974 require 30 days advance notice prior to the establishment or use of a CBCT. The restrictions relating to state law expire on July 1, 1975, as discussed above. This amended ruling is timed to be effective 30 days before the expiration of this restriction, so that any bank previously limiting its activities in accordance with the urging of the December 1974 ruling may give 30 days notice under this amended ruling and commence operations any time after July 1, 1975.

The ruling issued herewith has no expiration date, and no substantial modification is planned within the next eighteen months. Nevertheless the ruling is dealing with experimental developments, and the Comptroller will continue to monitor these developments to determine whether they warrant a change in the Comptroller's policies. In particular the Comptroller intends to review with great care any reports or recommendations of the National Commission on Electronic Funds Transfers, and to consider whether these reports or recommendations should result in modifications to the Comptroller's ruling.

Part 7 of 12 CFR Chapter I is amended by revising § 7.7491 to read as follows:

§ 7.7491 Customer-Bank Communication Terminals.

(a) A national bank may receive and act upon communications from its customers transmitted through electronic devices or machines requesting the withdrawal of funds either from the customer's deposit account or from a previously authorized line of credit, or instructing the bank to receive funds or to

transfer funds for the customer's benefit. The device or machine may be established and operated by the bank, by the customer, or by a third party. In accordance with the customer's request or instruction and subject to verification by the bank, cash or checks may be received and cash may be dispensed at the location of the device or machine. The device or machine may not be staffed by a bank employee, except that the bank for a reasonable period of time may provide an employee to instruct and assist customers in the operation of the device or machine. Any transactions initiated by such a device or machine shall be subject to verification by the bank either by direct wire transmission or otherwise. A bank may provide insurance protection under its bonding program for transactions involving such a device or machine.

(b) (1) If, at the location of a device or machine described in paragraph (a), a customer may leave cash or checks for subsequent deposit or receive cash in connection with a debit to any of his accounts, then such a device or machine may not be established or used by a national bank until 30 days after the bank has sent to the Comptroller's Office and to the appropriate Regional Administrator of National Banks written notice of the proposed establishment or use of such device or machine. The notice shall describe with regard to the device or machine:

- (i) The location;
- (ii) A general description of the area where located (e.g., shopping center, supermarket, department store, etc.) and the manner of installation at that location;
- (iii) The manner of operation, including whether the device is on-line;
- (iv) The kinds of transactions that will be performed;
- (v) Whether the device will be manned, and if so, by whose employee;
- (vi) Whether the device will be shared, and if so, under what terms and with what other institutions and their location;
- (vii) The manufacturer and, if owned, the purchase price or, if leased, the lease payments and the name of the lessor;
- (viii) Consumer protection procedures, including the disclosure of rights and liabilities of consumers and protection against wrongful or accidental disclosure of confidential information;
- (ix) The distance from the nearest banking office and from the nearest similar device of the reporting bank;
- (x) The distance from the nearest banking office and the nearest similar device of another commercial bank, which will not share the facility, and the name of such other bank or banks;
- (xi) Insurance and the security provisions protecting the installation and its users.

(2) Written notice must be given to the Comptroller's office and to the office of the appropriate Regional Administrator of National Banks 30 days before changing any of the operations de-

scribed in a notice previously given pursuant to this paragraph (b).

(3) One or more national banks sharing one or more devices or machines may give a single notice to the Comptroller's office, provided that such notice is given also to the office of each Regional Administrator of National Banks who supervises one or more of the national banks involved, and provided that the notice includes the information listed in paragraph (b) (1) of this section for each shared device or machine. The Comptroller reserves the right to adopt different reporting procedures as warranted by the circumstances of a particular network of devices or machines.

(4) No notice need be given for any device or machine which:

- (i) Is used only to transfer funds for goods or services received, and through which neither cash is dispensed nor cash or checks left for subsequent deposit;
- (ii) Is used solely to verify a customer's credit for purposes of check cashing or of a credit card transaction; or
- (iii) Is a part of a bank's authorized main office or branch.

(c) No device for which notice must be given under paragraph (b) may be established or used by a national bank at a distance greater than 50 miles from the bank's main office or closest branch, whichever is nearer, unless such device or machine is available to be shared at a reasonable cost by one or more local (i.e., within the trade area of the device or machine) financial institutions authorized to receive deposits, such as a commercial bank, a mutual savings bank, a savings and loan association, or a credit union.

(d) A device or machine established and used in accordance with this section at a location other than the main office or a branch office of a national bank does not, in the opinion of the Comptroller, constitute a "branch" within the meaning of 12 U.S.C. 36(f).

(e) To the extent consistent with the antitrust laws and with this section, national banks are permitted, but not required, to share devices or machines established or used in accordance with this section with one or more other financial institutions.

**Effective date.** This section becomes effective June 1, 1975.

Dated: May 8, 1975.

[SEAL] JAMES E. SMITH,  
Comptroller of the Currency.

[FR Doc. 75-13067 Filed 5-16-75; 8:45 am]

#### Title 14—Aeronautics and Space CHAPTER I—FEDERAL AVIATION ADMINISTRATION, DEPARTMENT OF TRANSPORTATION

[Docket No. 75-80-16; Amdt. 39-2210]

#### PART 39—AIRWORTHINESS DIRECTIVES Grumman American Model G-1159

A proposal to amend Part 39 of the Federal Aviation Regulations to include

an airworthiness directive requiring that the nose down electric trim authority be reduced from 8.5 degrees to 4.5 degrees on the Grumman G-1159 airplanes was published in *FEDERAL REGISTER* (40 FR 8568).

Interested persons have been afforded an opportunity to participate in the making of the amendment. Grumman American requested an extension from January 30, 1976, to April 30, 1976 for compliance. This request is granted.

In consideration of the foregoing and pursuant to the authority delegated to me by the Administrator (31 FR 13697) § 39.13 of the Federal Aviation Regulations is amended by adding the following new airworthiness directive:

**GRUMMAN AMERICAN AVIATION CORPORATION.**  
Applies to Grumman G-1159 airplanes, S/N's 1 thru 156 and S/N 775, certificated in all categories.

Compliance required within the next 800 hours' time in service after the effective date of this AD, or before April 30, 1976, whichever occurs first, unless already accomplished.

To prevent unnecessarily high longitudinal stick forces due to an inadvertent excessive increase of nose down electric trim, reduce the elevator trim nose down authority from 8.5 ± 0.5 degrees to 4.5 ± 0.5 degrees in accordance with Grumman Aircraft Service Change 182 or in an equivalent manner approved by the Chief, Engineering and Manufacturing Branch, Southern Region.

This amendment becomes effective May 22, 1975.

(Secs. 313(a), 601, 604, Federal Aviation Act of 1958; 49 U.S.C. 1354(a), 1421, 1429; sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)))

Issued in East Point, Georgia on May 8, 1975.

P. M. SWATEK,  
Director, Southern Region ASO-1.

[FR Doc. 75-19030 Filed 5-16-75; 8:45 am]

[Docket No. 12768; Amdt. No. 135-41]

#### PART 135—AIR TAXI OPERATORS AND COMMERCIAL OPERATORS OF SMALL AIRCRAFT

##### Certain Part 121 Equipment Requirements for Certain Airplanes

The purpose of this amendment to § 135.2 of Part 135 of the Federal Aviation Regulations is to rescind certain Part 121 equipment requirements for Part 135 certificate holders operating turbojet-powered airplanes having maximum certificated takeoff weights over 12,500 pounds but under 27,000 pounds, with passenger-carrying capacities of not more than 12 persons.

Interested persons have been afforded an opportunity to participate in the making of this amendment by a notice of proposed rulemaking (Notice 75-4) issued on February 3, 1975, and published in the *FEDERAL REGISTER* on February 11, 1975 (40 FR 6370). Due consideration has been given to all comments presented in response to the notice. Except for

minor editorial changes, and except as specifically discussed hereinafter, these amendments and the reasons therefor are the same as those in Notice 75-4.

The FAA received four public comments in response to Notice 75-4. The comments generally favored the adoption of the proposed amendment. Several commentators made recommendations that were not within the scope of the notice. Those recommendations will be retained by the FAA for future consideration.

One commentator suggested that since the requirements in §§ 121.313(f), 121.581(a), and 121.587 have not been previously imposed on the specified air taxi operators, the phrase "After May 15, 1975," should be deleted from proposed § 135.2(e) to avoid any possible confusion. The commentator contended that to include the phrase would imply that the requirements had been previously applied, but would not be applicable after May 15, 1975. The FAA agrees and this clarifying change has been made in § 135.2(e), as adopted.

In view of the imminence of the May 15, 1975, compliance date and since this amendment grants relief and imposes no additional burden on any person, I find that good cause exists for making this amendment effective on less than 30 days notice.

(Secs. 313(a), 601, 604, Federal Aviation Act of 1958; 49 U.S.C. 1354(a), 1421, and 1424; sec. 6(c), Department of Transportation Act; 49 U.S.C. 1655(c))

In consideration of the foregoing and for the reasons stated in Notice 75-4, § 135.2 of the Federal Aviation Regulations is amended, effective May 15, 1975, by revising the introductory clause in paragraph (a) and by revising paragraph (e) to read as follows:

**§ 135.2 Air taxi operations with large aircraft.**

(a) Except as provided in paragraph (e) of this section, no person may conduct air taxi operations in large aircraft under an individual exemption and authorization issued by the Civil Aeronautics Board or under the exemption authority of Part 298 of this title, unless that person—

(e) Air taxi operations may be conducted with a turbojet-powered airplane having a maximum certificated takeoff weight of over 12,500 pounds but under 27,000 pounds and a passenger-carrying capacity of not more than 12 persons that does not comply with—

(1) Section 121.313(f). A lockable door between the pilot and passenger compartments; § 121.587—closing and locking the door between the pilot and passenger compartments; and

(2) Section 121.581(a). Forward observer's seat on the flight deck, provided that if the forward observer's seat is not installed, a forward passenger seat with appropriate communications equipment nearby is provided for use by the Administrator while conducting en route inspections. The location and equipment

of the seat, with respect to its suitability for use in conducting en route inspections, is determined by the Administrator.

Issued in Washington, D.C., on May 18, 1975.

JAMES E. DOW,  
Acting Administrator.

[FR Doc. 75-18142 Filed 5-16-75; 8:45 am]

#### Title 15—Commerce and Foreign Trade CHAPTER VIII—BUREAU OF ECONOMIC ANALYSIS, DEPARTMENT OF COMMERCE PART 803—FOREIGN INVESTMENT AND INTERNATIONAL RECEIPTS AND PAYMENTS OF ROYALTIES AND FEES

##### Reporting Requirements

On April 1, 1975, a notice of proposed rulemaking was published in the *FEDERAL REGISTER* (40 FR 14603) changing the reporting requirements of 15 CFR, Part 803, which pertains to certain foreign business enterprises owned by U.S. persons and U.S. business enterprises owned by foreign persons. Interested persons were given until May 1, 1975, to submit written comments, suggestions, or objections. All comments received in response to the proposal supported its adoption.

The amended reporting requirements do not fall within the criteria set forth in the draft Department Administrative Order relating to the Inflationary Impact Statement required by Office of Management and Budget Circular No. A-107.

In consideration of the above and pursuant to the authority contained in Title 22, United States Code, section 786, the proposed reporting requirements are hereby adopted without change effective January 1, 1975, and are set forth below. Part 801 of 15 CFR chapter VIII is amended as follows:

1. Paragraph (b) of § 803.1 is revised to read as follows:

**§ 803.1 Who must report.**

(b) *Foreign business investment in the United States.*—(1) *Basic requirement.* A report is required to be filed with respect to every business enterprise subject to the jurisdiction of the United States in which foreign persons, either as individuals or as affiliates hold a 10 percent or more ownership interest, or which is owned in a manner indicated in paragraph (b) (2) of this section directly or indirectly by a foreign person or persons. Such business enterprises shall include, but not be limited to, corporations, partnerships, investments in real property, leaseholds, estates, trusts, and sole proprietorships or other forms of outright individual ownership.

(2) *Foreign beneficial interest.* If the foreign-owned interest in a United States business enterprise, including commercial real property, is held, exercised, or administered by a United States estate, trust (including irrevocable trusts), nominee, agent, representative, custodian, or other intermediary of the foreign beneficial owners, such intermediary shall be responsible for reporting for the

business enterprise the required information on Form BE-605, BE-606, BE-606B, or BE-606I, or shall instruct the United States business enterprise in question to submit the required information. This does not relieve the United States business enterprise of responsibility for reporting if such business enterprise has knowledge of the direct or indirect foreign-owned interest, but only one report should be filed for each such enterprise. For the purposes of this report, accounts or transactions of a United States business enterprise with a United States estate, trust, nominee, or other intermediary of foreign beneficial owners shall be considered as accounts or transactions with such beneficial owners.

(3) *Insurance companies.* Reports for U.S. branches or subsidiaries of foreign insurance companies are required on Form BE-606I.

(4) *Consolidated reports.* If a reporter held a 10 percent or more ownership interest in other United States enterprises engaged in the same type of business and is required to report, the information requested in the reporting forms may be consolidated for such reporter and enterprises, provided all accounts are fully consolidated. A list of the enterprises included in the consolidations must be provided.

2. In § 803.2(a) (2), the descriptions for Forms BE-605 and BE-606I are revised as follows:

**§ 803.2 Forms to be used and frequency of reports.**

(a) *Each reporter is required to submit reports on the following forms as applicable.* . . .

(2) Foreign direct investments in the United States.

*Form BE-605.* One Form BE-605 is to be filed quarterly for each United States corporation 10 percent or more of whose voting stock is owned directly or indirectly by a foreign person(s) or organization(s) and its United States or foreign affiliates.

*Form BE-606I.* One Form BE-606I is to be filed annually for each United States branch of a foreign insurance firm, or for United States insurance companies 10 percent or more of whose voting stock is held by foreign owners.

3. Paragraphs (a) (1) and (b) (1) of § 803.4 are revised as follows:

**§ 803.4 Exemptions.**

(a) *United States direct investments abroad.*—(1) *Exemption based on value of property.* A reporter whose investment in foreign countries, at any time during the reporting period, exceeds an aggregate value of \$2,000,000 based on the value of holdings of securities, equity in surplus accounts, and intercompany indebtedness or net branch investment in foreign countries, unless otherwise exempt from reporting, is required to report. Value is to be determined by the book value as carried on the books of the foreign organization converted into

United States dollars. Reports for individual foreign subsidiaries, affiliates, or branches (other than banks) which are inactive, or have a book value which at no time during the reporting period exceeds \$25,000, can be omitted with a note to that effect. For foreign branches of banks, reports are required if either (i) the book value exceeds \$25,000 or (ii) the total assets exceed \$2,000,000.

(b) *Foreign direct investment in the United States*—(1) *Exemption based on value*. If the value of a foreign-owned U.S. business organization exceeds \$2,000,000 at any time during the reporting period, the business organization is required to report. Otherwise, the business organization (other than a U.S. branch or agency of a foreign bank) is not required to report. The value is to be determined by the book value of the foreign owner's holdings in the securities, surplus accounts, and liability accounts of the reporter. For banks, reports are required if total assets exceed \$3,000,000.

4. Paragraph (g) of § 903.5 is revised as follows:

§ 903.5 General definitions.

For the purpose of these reports, the following definitions are prescribed:

(g) *Parent*. Parent shall mean any person or affiliated group of persons directly owning 10 percent or more of the voting securities of a corporation or of other ownership equities in other types of organizations. In some cases, there may be more than one parent.

GEORGE JASZI,  
Director,  
Bureau of Economic Analysis.

#### CHAPTER IX—NATIONAL OCEANIC AND ATMOSPHERIC ADMINISTRATION, DEPARTMENT OF COMMERCE

##### PART 924—MONITOR MARINE SANCTUARY

###### Final Regulations

On January 30, 1975, the Secretary of Commerce designated as a marine sanctuary an area of the Atlantic Ocean around and above the submerged wreckage of the Civil War ironclad MONITOR pursuant to the authority of section 302 (a) of the Marine Protection, Research and Sanctuaries Act of 1972 (86 Stat. 1052, 1061, hereafter the Act). The sanctuary area (hereafter the Sanctuary) is about 16.10 miles south-southeast of Cape Hatteras (North Carolina) Light.

Section 302(f) of the Act directs the Secretary to issue necessary and reasonable regulations to control any activities permitted within a designated marine sanctuary. This section also provides that no permit, license, or other authorization issued pursuant to any other authority shall be valid unless the Secretary shall certify that the permitted activity is consistent with the purposes

of Title III of the Act ("Marine Sanctuaries"); and that it can be carried out within the regulations promulgated under section 302(f).

The authority of the Secretary to administer the provisions of the Act has been delegated to the Administrator, National Oceanic and Atmospheric Administration, U.S. Department of Commerce (hereafter the Administrator, 39 FR 10255, March 19, 1974).

On February 5, 1975, the Administrator published in the *Federal Register* interim regulations applicable to the MONITOR Marine Sanctuary (40 FR 5347), and invited comments on these regulations until March 7, 1975. Comments which have been received have suggested six changes in the regulations as follows:

1. That § 924.2, the description of the Sanctuary, be somewhat shortened and revised to read:

The Sanctuary consists of a vertical water column in the Atlantic Ocean one mile in diameter extending from the surface to the seabed, the center of which is at 35°00'23" north latitude and 75°24'32" west longitude.

2. That § 924.3, which prohibits "bottom anchoring" in the Sanctuary, be revised to read:

Anchoring in any manner, stopping, remaining, or drifting without power at any time;

3. That § 924.3(1), which prohibits the "discharging of waste material" into the waters of the Sanctuary, be revised to read:

Discharging waste material into the water in violation of any Federal statute or regulation.

It was stated that this change was felt to be desirable because of the breadth of the original language, and the difficulty of enforcing a prohibition which could be construed to extend to routine operational discharges from vessels—such as bilge, sanitary and galley wastes—which discharges would have no adverse impact on the MONITOR.

4. That § 924.4, which lists penalties for the commission of prohibited acts within the Sanctuary, be revised to read:

Section 303 of the Act authorizes the assessment of a civil penalty of not more than \$50,000 against any citizen of the United States for each violation of any regulation issued pursuant to Title III of the Act, and further authorizes proceedings in rem against any vessel used in violation of the penalty described above. See also 15 CFR 922 (published at 39 FR 23254, 23257, June 27, 1974), for details applicable to any instance of a violation of these regulations.

Essentially this change substitutes "the penalty described above" for "Any such regulations" at the end of the first sentence of the interim regulations; and rephrases the second and third sentences without substantially changing their meaning.

5. That so much of the last part of § 924.5 as provides that "except that, no permit is required for the conduct of any activity immediately necessary in con-

nection with an air or marine casualty" be revised to read:

except that, no permit is required for the conduct of any activity necessary for the protection of life, property or the environment.

The suggested change would appear to add an environmental casualty, such as oil spill, to the air and/or marine casualties already contemplated by the regulation.

6. That § 924.7, having to do with certification procedures, be revised so as to require any Federal agency which, as of the effective date of the regulations, has authorized any prohibited activity in the Sanctuary, be required to notify the Administrator of that fact in writing. The change was from "activity," as stated in the interim regulations, to "prohibited activity." It was stated that the Secretary's concern should be with any prohibited activity, not with an activity not prohibited.

Except as noted below, and for the reasons there set out, the Administrator has decided to accept these suggested changes, and they have been incorporated into the final regulations. With regard to the suggested changes in § 924.4 (paragraph 4, above), it is felt that the substitution of "penalty" for "regulations" somewhat misstates the thought involved, since the violation in question is of the regulations, not of the penalty. Otherwise, the suggested changes do not alter the meaning of the interim language. Therefore, § 924.4 will be retained in its present form. With regard to the suggested change in § 924.5 (paragraph 5, above), it is felt that there must be an immediate and urgent need for the activity if it is to be conducted without a permit. Therefore the words "immediately and urgently" will be added before "necessary." At the same time, it is felt that a permit should be required for any activity to be conducted in a sanctuary pertaining to an air or marine casualty already passed, in regard to which there is no need for immediate entry into the sanctuary, such as in relation to salvage or recovery operations. Therefore § 924.5 (a) (2) has been appropriately modified. Finally, the Administrator felt it desirable to provide for the extension of the various time limits prescribed in § 924.8 for good cause shown. This has been done by the addition of a new paragraph (e).

There having been no other comments, and the Administrator being of the view that no additional changes in the regulations are necessary at this time, there are published herewith final regulations pertaining to the MONITOR Marine Sanctuary to become effective May 19, 1975.

15 CFR Part 924 is revised as follows:

Sec.  
924.1 Authority.  
924.2 Description of the Sanctuary.  
924.3 Activities Prohibited Within the Sanctuary.  
924.4 Penalties for Commission of Prohibited Acts.  
924.5 Permitted Activities.  
924.6 Permit Procedures and Criteria.

Sec.  
924.7 Certification Procedures.  
924.8 Appeals of Administrative Action.

AUTHORITY: Secs. 302(f), 302(g), 303, Marine Protection, Research and Sanctuaries Act of 1972.

#### § 924.1 Authority.

The Sanctuary has been designated by the Secretary of Commerce pursuant to the authority of section 302(a) of the Act. The following regulations are issued pursuant to the authorities of sections 302(f), 302(g) and 303 of the Act.

#### § 924.2 Description of the Sanctuary.

The Sanctuary consists of a vertical water column in the Atlantic Ocean one mile in diameter extending from the surface to the seabed, the center of which is at 35°00'23" north latitude and 75°24'32" west longitude.

#### § 924.3 Activities prohibited within the Sanctuary.

Except as may be permitted by the Administrator, no person subject to the jurisdiction of the United States shall conduct, nor cause to be conducted, any of the following activities in the Sanctuary:

- (a) anchoring in any manner, stopping, remaining, or drifting without power at any time;
- (b) any type of subsurface salvage or recovery operation;
- (c) any type of diving, whether by an individual or by a submersible;
- (d) lowering below the surface of the water any grappling, suction, conveyor, dredging or wrecking device;
- (e) detonation below the surface of the water of any explosive or explosive mechanism;
- (f) seabed drilling or coring;
- (g) lowering, laying, positioning or raising any type of seabed cable or cable-laying device;
- (h) trawling; or
- (i) discharging waste material into the water in violation of any Federal statute or regulation.

#### § 924.4 Penalties for commission of prohibited acts.

Section 303 of the Act authorizes the assessment of a civil penalty of not more than \$50,000 for each violation of any regulation issued pursuant to Title III of the Act, and further authorizes a proceeding in rem against any vessel used in violation of any such regulation. Details are set out in Subpart (D) of Part 922 of this Chapter (39 FR 23254, 23257, June 27, 1974). Subpart (D) is applicable to any instance of a violation of these regulations.

#### § 924.5 Permitted activities.

Any person or entity may conduct in the Sanctuary any activity listed in § 924.3 of this Part if: (a) such activity is either (1) for the purpose of research related to the MONITOR, or (2) pertains to salvage or recovery operations in connection with an air or marine casualty; and (b) such person or entity is in possession of a valid permit issued by the Administrator authorizing the conduct

of such activity; except that, no permit is required for the conduct of any activity immediately and urgently necessary for the protection of life, property or the environment.

#### § 924.6 Permit procedures and criteria.

(a) Any person or entity who wishes to conduct in the Sanctuary an activity for which a permit is authorized by § 924.5 (hereafter a permitted activity) may apply in writing to the Administrator for a permit to conduct such activity citing this section as the basis for the application. Such application should be made to the Administrator, National Oceanic and Atmospheric Administration, U.S. Department of Commerce, Washington, D.C. 20230. Upon receipt of such application, the Administrator shall request, and such person or entity shall supply to the Administrator, such information and in such form as the Administrator may require to enable him to act upon the application.

(b) In considering whether to grant a permit for the conduct of a permitted activity for the purpose of research related to the MONITOR, the Secretary shall evaluate such matters as (1) the general professional and financial responsibility of the applicant; (2) the appropriateness of the research method(s) envisioned to the purpose(s) of the research; (3) the extent to which the conduct of any permitted activity may diminish the value of the MONITOR as a source of historic, cultural, aesthetic and/or maritime information; (4) the end value of the research envisioned; and (5) such other matters as the Administrator deems appropriate.

(c) In considering whether to grant a permit for the conduct of a permitted activity in the Sanctuary in relation to an air or marine casualty, the Administrator shall consider such matters as (1) the fitness of the applicant to do the work envisioned; (2) the necessity of conducting such activity; (3) the appropriateness of any activity envisioned to the purpose of the entry into the Sanctuary; (4) the extent to which the conduct of any such activity may diminish the value of the MONITOR as a source of historic, cultural, aesthetic and/or maritime information; and (5) such other matters as the Administrator deems appropriate.

(d) In considering any application submitted pursuant to this Section, the Administrator may seek and consider the views of any person or entity, within or outside of the Federal Government, as he deems appropriate; except that, he shall seek and consider the views of the Advisory Council on Historic Preservation.

(e) The Administrator may, in his discretion, grant a permit which has been applied for pursuant to this Section, in whole or in part, and subject to such condition(s) as he deems appropriate, except that the Administrator shall attach to any permit granted for research related to the MONITOR the condition that any information and/or artifact(s) obtained in the research shall be made

available to the public. The Administrator may observe any activity permitted by this section; and/or may require the submission of one or more reports of the status or progress of such activity.

(f) A permit granted pursuant to this Section is nontransferable.

(g) The Administrator may amend, suspend or revoke a permit granted pursuant to this section, in whole or in part, temporarily or indefinitely, if, in his view, the permit holder (hereafter the Holder) has acted in violation of the terms of the permit; or the Administrator may do so for other good cause shown. Any such action shall be in writing to the Holder, and shall set forth the reason(s) for the action taken. Any Holder in relation to whom such action has been taken may appeal the action as provided in § 924.8 of this Part.

#### § 924.7 Certification procedures.

Any Federal agency which, as of the effective date of these regulations, already has permitted, licensed or otherwise authorized any prohibited activity in the Sanctuary shall notify the Administrator of this fact in writing. The writing shall include a reasonably detailed description of such activity, the person(s) involved, the beginning and ending dates of such permission, the reason(s) and purpose(s) for same, and a description of the total area affected. The Administrator shall then decide whether the continuation of the permitted activity, in whole or in part, or subject to such condition(s) as he may deem appropriate, is consistent with the purposes of Title III of the Act and can be carried out within these regulations. He shall inform the Federal agency of his decision in these regards, and the reason(s) therefore, in writing. The decision of the Secretary made pursuant to this section shall be final action for the purpose of the Administrative Procedure Act.

#### § 924.8 Appeals of administrative action.

(a) In any instance in which the Administrator, as regards a permit authorized by, or issued pursuant to, this Part: (1) denies a permit; (2) issues a permit embodying less authority than was requested; (3) conditions a permit in a manner unacceptable to the applicant; or (4) amends, suspends, or revokes a permit for a reason other than the violation of regulations issued under this Part, the applicant or the permit holder, as the case may be (hereafter the Appellant), may appeal the Administrator's action to the Secretary. In order to be considered by the Secretary, such appeal shall be in writing, shall state the action(s) appealed and the reason(s) therefore; and shall be submitted within 30 days of the action(s) by the Administrator to which the appeal is directed. The Appellant may request a hearing on the appeal.

(b) Upon receipt of an appeal authorized by this Section, the Secretary may request, and if he does, the Appellant shall provide, such additional information and in such form as the Secretary

may request in order to enable him to act upon the appeal. If the Appellant has not requested a hearing, the Secretary shall decide the appeal upon (1) the basis of the criteria set out in §§ 924.6 (b) or 924.6(c) of this part, as appropriate, (2) information relative to the application on file in NOAA, (3) information provided by the Appellant, and (4) such other considerations as he deems appropriate. He shall notify the Appellant of his decision, and the reason(s) therefore, in writing within 30 days of the date of his receipt of the appeal.

(c) If the Appellant has requested a hearing, the Secretary shall grant an informal hearing before a Hearing Officer designated for that purpose by the Secretary after first giving notice of the time, place, and subject matter of the hearing in the *FEDERAL REGISTER*. Such hearing shall be held no later than 30 days following the Secretary's receipt of the appeal. The Appellant and any interested person may appear personally or by counsel at the hearing, present evidence, cross-examine witnesses, offer argument and file a brief. Within 30 days of the last day of the hearing, the Hearing Officer shall recommend in writing a decision to the Secretary based upon the considerations outlined in paragraph (b) of this section and based upon the record made at the hearing.

(d) The Secretary may adopt the Hearing Officer's recommended decision, in whole or in part, or may reject or modify it. In any event, the Secretary shall notify the Appellant of his decision, and the reason(s) therefore, in writing within 15 days of his receipt of the recommended decision of the Hearing Officer. The Secretary's action, whether without or after a hearing, as the case may be, shall constitute final action for the purposes of the Administrative Procedure Act.

(e) Any time limit prescribed in this Section may be extended by the Secretary for good cause, either upon the Secretary's own motion and upon written notification to an Appellant stating the reason(s) therefore, or upon the written request of an Appellant to the Secretary stating the reason(s) therefore, except that no time limit may be extended more than 30 days.

R. L. CARNAHAN,  
Acting Assistant Administrator  
for Administration.

[FR Doc. 75-13009 Filed 5-16-75; 8:45 am]

#### Title 16—Commercial Practices CHAPTER I—FEDERAL TRADE COMMISSION

##### SUBCHAPTER A—PROCEDURES AND RULES OF PRACTICE

#### PART 2—NONADJUDICATIVE PROCEDURES

##### Subpart A—Investigations

#### EFFECT OF A MOTION TO QUASH ON THE OBLIGATIONS TO MAKE RETURN

The Federal Trade Commission's regulations regarding subpoenas in investi-

gations, orders requiring access and reports are contained in §§ 2.7, 2.11, and 2.12, respectively, of its procedures and rules of practice (16 CFR 2.7, 2.11, 2.12), and provide for the filing of motions to limit or quash investigational subpoenas, orders requiring access, and orders requiring reports or answers to specific questions. In order to clarify the effect of a motion to quash on the obligation to make a return, the Federal Trade Commission announces the amendment of §§ 2.7, 2.11, and 2.12, by the addition of paragraph (c) to read as set forth below.

Because the amendments pertain to matters of procedure and policy, the relevant provisions of the Administrative Procedure Act (5 U.S.C. 553) requiring notice of proposed rulemaking, opportunity for public participation, and delay in effective date are inapplicable.

1. In § 2.7, paragraph (c) is added as follows:

#### § 2.7 Subpoenas in investigations.

(c) The timely filing of a motion to limit or quash any investigational subpoena shall stay the requirement of a return on the portion challenged if the Commission has not ruled upon the motion by the return date. If it rules on or subsequent to the return date and its ruling denies the motion in whole or in part, the Commission shall either specify a new return date or direct that the office which issued the subpoena do so.

2. In §§ 2.11 and 2.12, paragraph (c) is added as follows:

#### § 2.11 Orders requiring access.

(c) The timely filing of any motion to limit or quash such an order shall stay the requirement of compliance if the Commission has not ruled upon the motion by the date of compliance. If it rules on or subsequent to the date required for compliance and its ruling denies the motion in whole or in part, the Commission shall specify a new date of compliance.

#### § 2.12 Reports.

(c) Except as otherwise provided by the Commission, the timely filing of any motion to limit or quash such an order shall stay the requirement of a return on the portion challenged if the Commission has not ruled upon the motion by the return date. If it rules on or subsequent to the return date and its ruling denies the motion in whole or in part, the Commission shall specify a new return date.

These amendments are effective May 19, 1975.

(15 U.S.C. 46, 49; 5 U.S.C. 552)

By direction of the Commission; dated May 6, 1975.

[SEAL] CHARLES A. TOBIN,  
Secretary.

[FR Doc. 75-13013 Filed 5-16-75; 8:45 am]

#### PART 4—MISCELLANEOUS RULES

##### Service of Documents by Parties Other Than the Commission

The Federal Trade Commission's regulations on the services of documents by parties other than the Commission are contained in § 4.4(b) of its procedures and rules of practice (16 CFR 4.4(b)), and provide that service of pleadings and other documents upon complaint counsel is complete upon delivery to the Secretary of the Commission.

Because of the dispersal of the litigation staff in buildings and regional offices removed from headquarters, there is an inevitable time lag before the documents reach complaint counsel. As a consequence, if the documents start the running of time for response or other action by complaint counsel, they frequently have insufficient time to act.

The Commission has concluded that to effectively resolve the problem requires a revision of its rules to place complaint counsel on an equal footing with respondents by establishing date of service as the date delivered to his/her office, rather than to the Office of the Secretary. Service upon respondent's counsel is most frequently achieved by delivery by registered or certified mail to him/her or to his/her office. In the case of complaint counsel, many of whom do not have secretaries who could receive documents in their absence, analogous service would be upon the office of the Assistant Director or Regional Director to whom complaint counsel is responsible in the handling of the case. The delivery must be by the Secretary of the Commission rather than directly by respondent to permit adequate control and record-keeping.

It is contemplated that a return receipt will be date stamped and signed by the receiving office and returned to the Secretary of the Commission who will place the receipt in the official record of the case establishing the date when service was effected.

Accordingly, the Federal Trade Commission announces the amendment of §§ 4.4(a)(1) and 4.4(b) to read as set forth below, and the deletion of § 4.4(a)(3).

Because the amendment pertains to matters of procedure and policy, the relevant provisions of the Administrative Procedure Act (5 U.S.C. 553) requiring notice of proposed rulemaking, opportunity for public participation, and delay in effective date are inapplicable.

In § 4.4, (a)(1) and (b) are revised as follows: (a)(2) is removed, and (a)(3) is renumbered as (a)(2).

#### § 4.4 Service.

(a) By the Commission. (1) Service of subpoenas, orders requiring access, orders requiring the filing of annual or special reports, complaints, initial decisions, and final orders of the Commission may be effected as follows:

(2) . . .

(b) By other parties. Service of documents by parties other than the Commission shall be by delivering copies

thereof as follows: Upon the Commission, by personal delivery or delivery by first-class mail to the Office of the Secretary of the Commission. Documents shall be deemed filed with the Commission when they are received by the Office of the Secretary. Where service of a document imposes time limitations upon Commission counsel for response, the time for such response shall not start running until the document is delivered to the Assistant Bureau Director or Regional Office of complaint counsel by the Office of the Secretary. A receipt, executed on behalf of Commission counsel and returned to the Secretary will establish the date of commencement of the running of time. Service of documents upon any other party shall be by delivery to the party. If the party is an individual or partnership, delivery shall be to such individual or a member of the partnership; if a corporation or unincorporated association, to an officer or agent authorized to accept service of process therefor. Delivery to a party other than the Commission means handing to the individual, partner, officer, or agent; leaving at his office with a person in charge thereof, or, if there is no one in charge or if the office is closed or if he has no office, leaving at his dwelling house or usual place of abode with some person of suitable age and discretion then residing therein; or sending by mail.

These amendments are effective May 19, 1975.

(15 U.S.C. 41, et seq., 5 U.S.C. 552)

By direction of the Commission; dated May 6, 1975.

[SEAL] CHARLES A. TOBIN,  
Secretary.

[FR Doc. 75-13012 Filed 5-16-75; 8:45 am]

#### Title 17—Commodity and Securities Exchanges

##### CHAPTER II—SECURITIES AND EXCHANGE COMMISSION

[Release 33-5585]

#### PART 230—GENERAL RULES AND REG- ULATIONS, SECURITIES ACT OF 1933

##### Private Offerings

The Securities and Exchange Commission announced today that it has adopted several amendments to Rule 146 (17 CFR 230.146), "Transactions by an Issuer Deemed Not To Involve Any Public Offering," which was effective for offerings commencing after June 10, 1974. [39 FR 15261] Rule 146 was designed to provide more objective standards for determining when offers or sales of securities by an issuer would be deemed to be transactions not involving any public offering within the meaning of section 4(2) of the Act and thus would be exempt from the registration provisions of the Act. The Commission believed that a rule creating greater certainty in the application of the section 4(2) exemption is in the public interest for two reasons. First, such a rule should deter reliance on that exemp-

tion for offerings of securities to persons who are unable to fend for themselves in terms of obtaining and evaluating information about the issuer and in certain situations of assuming the risk of investment. These persons need the protections afforded by the registration process. Second, such a rule should reduce uncertainty to the extent feasible and provide more objective standards upon which responsible businessmen may rely in raising capital in a manner that complies with the requirements of the Act.

The amendments adopted by the Commission are intended to clarify, and in some instances to modify, Paragraph (c) of the Rule, "Limitations on Manner of Offering"; Paragraph (e) of the Rule, "Access to or Furnishing of Information" for non-reporting companies; Paragraph (f) of the Rule, "Business Combinations," and Paragraph (g) of the Rule, "Number of Purchasers." The purpose of the amendments is to decrease burdens on issuers in complying with the Rule, consistent with section 4(2) of the Act and the protection of investors. Because Rule 146 has been subject to extensive public comment and the amendments relate to areas that were generally the subject of such comment, and because the amendments will have the effect of making the rule available in more situations, the Commission has determined that publication for comment is not necessary and that the amendments can be adopted effective upon publication in the *FEDERAL REGISTER*.

#### LIMITATIONS ON MANNER OF OFFERING

Paragraph (c) of Rule 146, "Limitations on Manner of Offering," provides that neither the issuer nor any person acting on its behalf shall offer, offer to sell, offer for sale, or sell the securities that are part of the offering made pursuant to the Rule by means of any form of general solicitation or general advertising. Paragraph (c)(3) provides that written communications addressed only to persons who are qualified offerees within the meaning of Paragraph (d)(1) will be deemed not to be a form of general advertising or solicitation if each communication contains an undertaking to provide the information specified by Paragraph (e)(1) on request.

Questions have been raised about the undertaking requirement in Paragraph (c)(3) because it appears to require an undertaking to provide information in all written communications relating to the offering. Upon reconsideration, and in light of the comments received, the Commission has decided to delete the requirement that, in order to be deemed not to be general advertising or solicitation, written communications must contain an undertaking to provide specific information upon request. This requirement was designed to discourage general solicitation which is not permitted under the Rule. However, this provision created an unnecessary burden, e.g., even if an offeree decided not to purchase, the issuer would still be required to send information to him.

Moreover, the Rule provides protections against general solicitation in that it requires that the issuer and any person acting on its behalf have reasonable grounds to believe prior to making an offer that the offeree has the requisite knowledge and experience or can bear the economic risk of the investment. Further, the Rule is not available where there is a scheme or plan to evade the registration provisions of the Act.

Therefore, the Commission is amending Paragraph (c)(3) to delete "and the communication contains an undertaking to provide the information specified by Paragraph (e)(1) on request" and is also amending the Note to Paragraph (e)(3) to delete the reference to the undertaking made pursuant to Paragraph (c)(3).

#### ACCESS TO OR FURNISHING OF INFORMATION

Paragraph (e)(1) of the Rule requires that each offeree either have access to certain information about the issuer or be furnished with such information. The "furnishing" requirement is deemed to be met if the issuer provides certain specified information to the offeree or his offeree representative, depending on whether the issuer is a reporting company under the Exchange Act (Paragraph (e)(1)(ii)(a)) or a non-reporting company (Paragraph (e)(1)(ii)(b)). Paragraph (e)(1)(ii)(b) now requires a non-reporting issuer, in order to meet the "furnishing of information" test, to supply "the information that would be required to be included in a registration statement filed under the Act on the form which the issuer would be entitled to use, provided, however, that if the issuer does not have the audited financial statements required by such form and cannot obtain them without unreasonable effort or expense, such financial statements may be provided on an unaudited basis."

The application of the provisions in Paragraph (e)(1)(ii)(b) has raised certain questions; for example, whether the financial schedules called for by Part II of the registration statement would be required to be furnished and whether the complete financial statements would need to be furnished, either on an audited or unaudited basis. Based on experience to date with the Rule, the benefits of including such information appear to be outweighed by the burdens on issuers in providing it. To give some flexibility, Paragraph (e)(1)(ii)(b), as amended, allows the issuer to omit details or employ condensation if, under the circumstances, the omitted information is not material, and the condensation does not render the statements made misleading. The issuer would have the burden of proof that any such omissions are not material and that the condensations do not render the statements made misleading. The Commission has also amended Paragraph (e)(1)(ii)(b) to provide that Regulation A financial statements may be furnished if audited and unaudited financial statements in the form required

by a registration statement are not available without unreasonable effort or expense and also that the financial schedules required in Part II of a registration statement need not be provided if they have not been prepared. It should be noted in connection with this provision that the Commission does not consider the Regulation A offering circular to be a "registration statement filed under the Act" even if the issuer would be entitled to use Regulation A for its offering.

#### BUSINESS COMBINATIONS

Paragraph (f) relating to business combinations uses the same definition of "business combinations" as that in Rule 145 under the Act, including reclassifications, mergers and consolidations, and acquisitions of assets through shareholder vote. Commentators have noted that an exchange of stock is a common way of effecting a business combination and that it may be preferable for business reasons to use such an exchange. They have noted, however, that although Rule 146 has special provisions for Rule 145 type transactions, it would treat exchanges of stock like non-business combination offerings, thereby imposing a somewhat more restrictive standard on such exchanges.

At the time of adoption of the Rule, the Commission considered whether exchange offers should be included in the definition of "business combination," but decided that in an exchange offer the issuer has a choice of offerees and therefore does not need the special provisions of Paragraph (f). However, the Commission has reconsidered this position and now believes that it is preferable not to distinguish among different types of business combinations when the result is the same, as long as there is adequate protection for investors. Therefore, the Commission is amending Paragraph (f) (1) to expand the definition of "business combination" for the purposes of the Rule to include, in addition to transactions of the type specified in Paragraph (a) of Rule 145, exchanges of stock including the type described in section 368 (a) (1) (B) of the Internal Revenue Code, commonly known as "B reorganizations."

Present Paragraphs (f) (3) and (f) (4) have been amended to reflect the inclusion of exchange offers in the business combination paragraph. In the case of a Rule 145 type transaction, the issuer's belief that the offeree is qualified must exist at the time the plan is submitted to security holders for a vote; in the case of an exchange offer, the belief must exist immediately prior to the sale.

#### NUMBER OF PURCHASERS

Paragraph (g) (1) of the Rule provides that "there shall be no more than thirty-five purchasers" in any offering pursuant to the Rule. This would mean that the issuer, even if it had exercised good faith and reasonable care in determining how many purchasers there were, would lose the Rule if the issuer had sold securities to thirty-five persons and one of the purchasers had deceived the issuer and had in fact purchased the securities

for other accounts. This appears to the Commission to be too stringent. The Commission is therefore amending Paragraph (g) (1) to provide that "the issuer shall have reasonable grounds to believe, and after making reasonable inquiry, shall believe" that there are no more than thirty-five purchasers.

The Commission has also amended the note to Paragraph (g) (2) (1) to clarify its meaning. The note was intended to mean that the issuer has to satisfy all the provisions of the Rule with respect to all purchasers, whether or not they are included in computing the number of purchasers for the purposes of Paragraph (g). The amendments should correct any misunderstanding of the note.

The amendments to Rule 146 are adopted, effective May 19, 1975, pursuant to the Securities Act of 1933, as amended, particularly sections 4(2) and 19(a).

The Commission finds that the amendments to the rule described herein are technical or generally have already been subject to recent public comment, that they generally make the rule less restrictive, and that notice and other rule-making procedures pursuant to the Administrative Procedure Act are not necessary.

By the Commission.

[SEAL] GEORGE A. FITZSIMMONS,  
Secretary.

MAY 7, 1975.

Rule 146 (17 CFR 230.146) is amended by revising the introductory text of (c) and (e) (3), (e) (1) (f) (b), the note following (e) (3), (f) (1), (3), and (4), (g) (1), and the note following (g) (2) to read as follows:

§ 230.146 Transactions by an issuer deemed not to involve any public offering.

(c) *Limitation of Manner of Offering.* Neither the issuer nor any person acting on its behalf shall offer, offer to sell, offer for sale, or sell the securities by means of any form of general solicitation or general advertising, including but not limited to, the following:

(3) Any letter, circular, notice or other written communication, except that if Paragraph (d) (1) of this section is satisfied as to each person to whom the communication is directed, such communication shall be deemed not to be a form of general solicitation or general advertising.

(e) *Access to or Furnishing of Information.* (1) . . .

(b) In the case of all other issuers, the information that would be required to be included in a registration statement filed under the Act on the form which the issuer would be entitled to use, provided, however, that:

(1) the issuer may omit details or employ condensation of information if, un-

der the circumstances, the omitted information is not material or the condensation of information does not render the statements made misleading.

NOTE: The issuer would have the burden of proof to show that, under the circumstances, the omitted information is not material and that any condensation does not render the statements made misleading.

(2) If the issuer does not have the audited financial statements required by such form and cannot obtain them without unreasonable effort or expense, such financial statements may be furnished on an unaudited basis, provided that if such unaudited financial statements are not available and cannot be obtained without unreasonable effort or expense, the financial statements required by Regulation A under the Act may be furnished.

(c) If the financial schedules required by Part II of the registration statement have not been prepared, they need not be furnished.

(3) . . .

NOTE: Information need not be provided and opportunity to obtain additional information need not be continued to be provided to any offeree or offeree representative who, during the course of the transaction, indicates that he is not interested in purchasing the securities offered, or to whom the issuer or any person acting on its behalf has determined not to sell the securities.

(f) *Business Combinations.* (1) The term "business combination" shall mean any transaction of the type specified in Paragraph (a) of Rule 145 under the Act and any transaction involving the acquisition by one issuer, in exchange solely for all or a part of its own or its parent's voting stock, of stock of another issuer if, immediately after the acquisition, the acquiring issuer has control of the other issuer (whether or not it had control before the acquisition).

(3) For purposes of Paragraph (f) only, the issuer and any person acting on its behalf, after making reasonable inquiry shall have reasonable grounds to believe, and shall believe, at the time that any plan for a business combination is submitted to security holders for their approval, or in the case of an exchange, immediately prior to the sale, that each offeree either alone or with his offeree representative(s) has such knowledge and experience in financial and business matters that he is or they are capable of evaluating the merits and risks of the prospective investment.

(4) In addition to information required by Paragraphs (e) and (f) (2), the issuer shall provide, in writing, to each offeree at the time the plan is submitted to security holders, or in the case of an exchange, during the course of the transaction and prior to the sale, information about any terms or arrangements of the proposed transaction relating to any security holder that are not identical to those relating to all other security holders.

(g) *Number of purchasers.* (1) The issuer shall have reasonable grounds to believe, and after making reasonable inquiry, shall believe, that there are no more than thirty-five purchasers of the securities of the issuer from the issuer in any offering pursuant to the Rule.

(2) . . .

NOTE: The issuer has to satisfy all the provisions of the rule with respect to all purchasers whether or not they are included in computing the number of purchasers under Paragraph (g) (2) (1).

[Rel. Nos. 33-5582, IC-8772]

#### PART 231—INTERPRETATIVE RELEASES RELATING TO THE SECURITIES ACT OF 1933 AND GENERAL RULES AND REGULATIONS THEREUNDER

#### PART 271—INTERPRETATIVE RELEASES RELATING TO THE INVESTMENT COMPANY ACT OF 1940 AND GENERAL RULES AND REGULATIONS THEREUNDER

#### Hypothetical Variable Annuity Illustrations

On July 30, 1974, the Securities and Exchange Commission published notice (Securities Act Release No. 5516, Investment Company Act Release No. 8438 published in the FEDERAL REGISTER for August 20, 1974, 39 FR 30051) that it had under consideration an amendment of the Statement of Policy which would permit investment companies issuing variable annuity contracts to employ standardized illustrations based on hypothetical investment results in sales literature and prospectuses. All interested persons were invited to comment on the proposal. The Commission has considered all of the comments and suggestions received and has determined to adopt new paragraph(s) of the Statement of Policy, together with sample tables and charts, in the form set forth in the Appendix of this Release.

The Statement of Policy, which was adopted by the Commission August 11, 1950, and amended January 31, 1955, and November 5, 1957 (15 FR 5469, as amended 20 FR 793, 22 FR 8977), sets forth the respects in which the Commission considers that literature used in connection with the sale of investment company shares may be misleading and violate the standards of the securities acts which, generally speaking, provide that it shall be unlawful to offer or sell securities by means of any untrue statement or omission of a material fact or by any fraudulent or deceitful practice or device.

Illustrations based on hypothetical investment results previously have been prohibited under paragraphs (b) (2) and (c) of the Statement of Policy (as amended November 5, 1957, 22 FR 8977), which provide that "it will be considered materially misleading hereafter for sales literature: 'to represent or imply an assurance that an investor will receive a

stable, continuous, dependable, or liberal return or that he will receive any specified rate or rates of return;' or 'to represent or imply that an investor's capital will increase or that the purchase of investment company shares involves a preservation of original capital and a protection against a loss in value.'

(1) *Reasons for the Proposal.* A variable annuity is a complex investment which combines risk regarding investment returns on a portfolio of equity securities with uncertainty over how long one will live. It may involve the regular investment of specified amounts over many years. It is often a very significant investment because it is designed to furnish income to annuitants at regular intervals over their lifetimes to provide for their retirement.

One of the factors which can significantly affect the value of this investment is the costs and charges which are assessed against the payments made by the intervals over their lifetimes to provide account. These may include deductions from purchase payments, annual charges assessed against the payments made by the contract, non-recurring charges and indirect expenses resulting from the mortality table used. Because of the variety of these charges and deductions, an investor faces a bewildering task in trying to evaluate the total effect of charges on his contract. This task is compounded by the difficulty of attempting to evaluate future costs where costs vary over time and are related to the value of the account which also fluctuates over time.

To develop improved understanding of the effects of charges on investment returns and to facilitate more meaningful and complete comparisons of different variable annuity contracts, the Commission proposed that standardized illustrations based upon hypothetical investment returns of 0%, 4% and 8% be permitted to be included in prospectuses and sales literature of variable annuity separate accounts.

An appreciation of the impact of such costs and charges and of the consequences of early redemption and lapses could help to prevent such practices and to discourage "twisting." Such illustrations, if widely used, could also provide a basis for developing a more rational price structure and introducing more effective price competition in the sale of variable annuity contracts.

(2) *The Illustrations As Proposed.* Under the amendment as proposed, redemption values and annuity payments shown in the tables of permissible illustrations would have been based solely on hypothetical investment returns of 0%, 4% and 8% compounded continu-

ously, after any deductions for insurance company taxes, but before all other charges and deductions. During the accumulation period, redemption values and annuity payments would have been for the 2d, 5th, 10th and 20th years and at no other times.

For the annuity period the illustrations would have included the first monthly annuity payment in dollars at age 65 and subsequent monthly annuity payments at ages 70, 75, 80 and 85 for both male and female lives. It was based upon the final value of the accumulation account and assumed continuation throughout the annuity period of the same hypothetical investment return earned during the accumulation period reduced by the annual asset charge. In addition, a separate table would have shown the corresponding effects of charges for the annuity or payout period as well as the effects of differences in results due to the mortality table used. This is the "group effective return."

Group effective returns are the effective rates of return, after expenses, which would be achieved during the annuity period by a large group of annuitants whose lifespans are assumed to follow a standardized mortality table. By eliminating the effects of individual differences in longevity, group effective returns provide a point of reference for measuring the effects of direct charges on payments as well as any indirect charges or benefits resulting from the use by issuers of different mortality tables.

In addition, the proposal included a chart (Sample Chart C-1) and an accompanying textual explanation designed to illustrate the "basic annuity trade-off"—i.e., an investment in a variable annuity gives up other uses of his principal in exchange for the promise of regular payments of an indefinite amount over the balance of his lifetime. By assuming that hypothetical returns of 0%, 4% and 8% are earned by the separate account, Chart C-1 shows how the rate of return an annuitant receives will vary depending upon his longevity and the annuity payout option he selects.

Along with the standardized illustrations, the amendment as proposed would also have permitted an illustration tailored in certain respects to the circumstances of a particular prospect.

(3) *The Illustrations As Adopted.* The illustrations as adopted are based upon hypothetical investment returns of 0%, 4% and 8%. They retain the use of "effective rates of return" during the accumulation period and "group effective returns" during the annuity period. However, several changes have been made in the format of the presentations. Annually compounded rates have been substituted for continuously compounded rates since many variable annuity contracts express "assumed interest rates" and other contract features in annually compounded terms. Returns after the first year have been added to the illustration of the accumulation period in an attempt to discourage lapses and early redemptions by drawing attention to the severe losses which may result from early redemption.

The illustrations of the annuity period have been revised to combine in a single table the monthly annuity payments which would be received at ages 65, 70, 75, 80 and 85 and the "group effective returns" which would result from hypothetical returns of 0%, 4% and 8%. The requirement that returns for both males and females be shown in the same illustration has been omitted.<sup>1</sup> In addition, the text accompanying the illustrations has been revised in an attempt to make it simpler and to focus more clearly on the unique features of this product.

Since it is designed to accomplish a completely different objective than the illustrations of effective rates of return and group effective returns, Sample Chart C-1 and the accompanying textual explanation have been made optional. However, for those issuers who wish to include Chart C-1, the accompanying text has been revised to reflect the comments received and to focus more directly on the pooling feature of the contract.

The original proposal with respect to tailoring illustrations to fit an individual's circumstances has been substantially revised. Issuers will be permitted to illustrate the different types of contracts they offer, including various payout options and assumed interest rates, but will not be permitted to tailor illustrations to the individual's particular circumstances. These changes were made because the Commission concluded that the use of tailored illustrations would sacrifice some comparability and could be construed as suggesting actual results.

(4) *Requiring Illustrations in Variable Annuity Prospectuses.* Standardized illustrations expressed in terms of both dollars and rates could significantly improve the disclosure of costs and charges involved in the purchase of variable annuities. Therefore, the Commission intends shortly to propose for comment amendments to Forms S-5 and S-6 to require that any prospectus or post-effective amendment filed by a variable annuity separate account after a specified date shall contain hypothetical illustrations which are in accordance with paragraph(s) of the Statement of Policy which it is adopting today.

(5) *Other Questions Considered.* The notice of the proposed amendment (Securities Act Release No. 5516, Investment Company Act Release No. 8438, July 30, 1974, published in the FEDERAL REGISTER for August 20, 1974, 39 FR 30051) also requested public comment regarding illustrations for other investment companies, including mutual funds. The Commission will continue to consider the appropriateness of allowing or requiring illustrations for other investment companies, as well as the form such illustrations might take.

<sup>1</sup> Separate tables may be used for males or females. However, if the illustration appears in a prospectus, the contract should be illustrated for both male and female lives during the annuity period.

The amendment, as adopted, is attached. It shall become effective June 13, 1975. In the interim illustrations which conform to those adopted may be included in variable annuity prospectuses.

By the Commission.

[SEAL] GEORGE A. FITZSIMMONS,  
Secretary.

APRIL 28, 1975.

1. Section 231.3530 (20 FR 791, Jan. 31, 1955) Statement of Policy of the Commission relating to advertising and sales literature used in the sale of investment company shares is amended by adding paragraph (s) as follows:

§ 231.3530. Statement of policy of the Commission relating to advertising and sales literature.

It will be considered materially misleading hereafter for sales literature—

(s) With respect to any variable annuity contract, to use any illustration based on hypothetical investment results which is inaccurate in factual detail or tends to create a false or misleading impression as to any material aspect of the variable annuity contract or the hypothetical nature of the illustration. Illustrations which conform to the "Approved Illustrations," described below, samples of which are set forth in the Appendix, will not be regarded as materially false and misleading in the absence of facts or circumstances which make such illustrations or their use in fact, false and misleading in a particular case.

(1) Approved illustrations should be preceded by a general discussion of how a variable annuity combines the risks of investment with uncertainty as to how long one will live. It should include the following factors which affect the value of the contract:

(i) The investment return of the separate account;

(ii) The various charges and deductions;

(iii) The mortality table on which the contract is based; and

(iv) The taxes paid by the insurance company.

(2) Approved illustrations should include a separately headed brief discussion of the impact of taxes on the results of an investment in a variable annuity including, to the extent applicable:

(i) Insurance company taxes;

(ii) Personal income taxes; and

(iii) State premium taxes.

Such discussion should also set forth the extent, if any, that the illustrations give effect to state premium taxes.

(3) Approved illustrations should contain the following information about the contract which is illustrated, to the extent applicable:

(i) Issue age and sex;

(ii) The amount and the total of the monthly purchase payments, or the amount of the single purchase payment;

(iii) The daily charge at an annual rate against the assets of the separate account and a statement that this

charge does not include deductions for insurance company taxes;

(iv) A statement explaining how the daily charge against the assets of the separate account, used in constructing the illustration, might vary in the future and a reference to relevant prospectus disclosure;

(v) Age at commencement of annuity payments for a deferred annuity;

(vi) The annuity payout option;

(vii) The annuity purchase rate for a deferred annuity or the periodic annuity payment based on the assumed interest rate for an immediate annuity; and

(viii) The assumed interest rate of the contract.

(4) Approved illustrations of the accumulation period of a deferred variable annuity contract should contain the following, in substance:

(i) A statement that after any deductions for insurance company taxes, the illustrations assume that the separate account earns hypothetical investment returns of 0%, 4%, and 8% compounded annually and that the differences between the hypothetical investment returns and the effective returns shown in Sample Table A-1 result from the charges and deductions made during the accumulation period;

(ii) A statement in bold-face type making clear that:

A. The illustrations are not intended to provide an estimate of actual or expected redemption values;

B. Actual redemption values will vary with the actual investment experience which depends, in part, on the investment objectives and policies of the separate account as are set forth in the current prospectus; and

C. No investment result is guaranteed and redemption values or annuity payments could be less than shown under 0%.

(iii) A tabular presentation listing total purchase payments, hypothetical redemption values, and effective rates of return at the end of the 1st, 2d, 5th, 10th, and 20th years based on hypothetical investment returns of 0%, 4% and 8% in that order;

(iv) A statement that the "effective rate of return" is the return realized by an individual who redeems his contract during the accumulation period;

(v) A statement, if appropriate, that the "effective rates of return" during the accumulation period do not take into account the value to the contractholder of the protection against loss of purchase payments or the mortality and expense guarantees, which should be considered when making this type of investment; and

(vi) A statement, if appropriate, that if the contractholder should die during the accumulation period, the company guarantees to return either purchase payments or the redemption value, whichever is greater, at stated ages and/or durations.

(5) Approved illustrations of the annuity payout period of a variable annuity contract should contain the following, in substance:

(i) If the contract is an immediate variable annuity, a statement that after any deductions for insurance company taxes, the illustrations assume the separate account earns hypothetical investment returns of 0%, 4%, and 8% compounded annually, and that the differences between the hypothetical investment returns and the group effective returns shown in Sample Table B-1 result from the charges and deductions made and the mortality table used by the company.

(ii) A statement in bold-face type making clear that:

A. The illustrations are not intended to provide an estimate of actual or expected annuity payments;

B. Actual annuity payments will vary with the actual investment experience which depends, in part, on the investment objectives and policies of the separate account as are set forth in the current prospectus; and

C. No investment result is guaranteed and annuity payments could be less than shown under 0%.

(iii) A tabular presentation listing the first, 80th, 120th, 180th and 240th monthly annuity payments and the group effective return, based on hypothetical investment returns of 0%, 4%, and 8% in that order;

(iv) A statement that the "group effective return" does not indicate the return that any one individual receives; instead it provides a means of measuring charges during the annuity payout period from the point of view of a large group of annuitants whose lifespans are assumed to follow a standardized mortality table. It should also contain a statement that by eliminating the effect of individual differences in longevity, the group effective return provides a point of reference for measuring the effects of direct charges on payments as well as any indirect charges or benefits resulting from the use by issuers of different mortality tables.

(6) Illustrations of the following variable annuity contracts are permitted:

(i) A periodic payment deferred variable annuity, issued at age 45, with purchase payments of \$50 per month over a 20 year accumulation period and with monthly annuity payments commencing at age 65 for a period of 10 years certain and life thereafter;

(ii) An immediate variable annuity issued at age 65 with a purchase price of \$10,000 and monthly annuity payments for a period of 10 years certain and life thereafter.

The illustration should be based in the sex of the prospective annuitant. If it is included in a prospectus, the contract should be illustrated for both male and female lives during the annuity period.

In addition, any other annuity payout option involving variable payments may be illustrated for the contracts described in items (i) and (ii) of this section provided such an illustration accompanies an illustration of a payout option with monthly annuity payments continuing for a period of ten years certain and life thereafter.

(7) The tabular portion of any approved illustration should be limited to that which is prescribed in items (4) (iii) and (5) (iii) of this paragraph (s).

(8) If the approved illustration is not contained in a current prospectus, it should be accompanied or preceded by a current prospectus.

(9) The text, detail and arrangement of an approved illustration should be substantially as shown in Sample Illustrations A and B in the Appendix, whichever is applicable.

(10) An approved illustration of the annuity payout period of a variable annuity contract may also contain a chart expressing as effective rates of return the aggregate annuity payments which would be received by an individual assuming various lifespans. Attached to it should be a discussion which indicates how individual returns depend on:

(i) The hypothetical investment returns of the separate account;

(ii) Longevity; and

(iii) The annuity payout option selected.

A sample chart and a discussion of it are contained in Sample Illustration C. The questions and answers attached to it are merely one form of explaining the material contained in the chart; other forms are also permissible.

(11) For the purpose of this paragraph(s), the following definitions apply:

(i) *Deductions from the Separate Account for Insurance Company Taxes* means any charges against (or possibly credits to) the separate account under the provision for the federal income tax liabilities of the insurance company, including amounts set aside in the separate account as a reserve for taxes or any such tax charges expressed as a constant percentage of assets.

(ii) *The Daily Charge at an Annual Rate Against the Assets of the Separate Account* refers to the average percentage charge, per accumulation unit (or per annuity unit during the annuity period), against the assets of the separate account and/or any underlying fund. This average percentage charge should be based on actual percentage charges which pertain to the contract being illustrated, averaged over the past three years. However, if the formula specifying the charges against the assets of the separate account and/or any underlying fund has changed, the average percentage charge should be determined as if the current formula was in effect over the past three years. The average percentage charge should include the management fee, the mortality and expense risk charge, and any other charges not included in the management fee such as auditing and legal expenses, director's fees, or registration fees. However, it should not include deductions from the separate account for insurance company taxes.

(iii) *Annuity Payout Option* refers to the types of life or non-life variable annuities available under a particular variable annuity contract or under different contracts offered by the same issuer.

(iv) *Annuity Purchase Amount* refers to the final value of the accumulation account for a deferred annuity or the total purchase price of an immediate annuity.

(v) *Annuity Purchase Rate* refers to the amount of the first monthly annuity payment per \$1,000 of the final value of the accumulation account for a deferred variable annuity. If the annuity purchase rate varies with the calendar year of retirement or the calendar year of birth, the annuity purchase rate should be used which would be appropriate assuming that the issue age was attained during the calendar year the illustration is presented.

(vi) *Assumed Interest Rate* refers to the constant net investment return which the separate account would have to earn in order for the annuity payments to remain constant, at the level of the first monthly annuity payment.

(vii) *Hypothetical Investment Returns* of 0%, 4%, and 8% refers to the assumption of three separate constant hypothetical investment returns for the separate account, at rates of 0%, 4%, and 8%, compounded annually, which represent returns after any deductions from the separate account for insurance company taxes but before the daily charge at an annual rate against the assets of the separate account.

(viii) *Hypothetical Redemption Values* refers to the amounts an investor would receive upon redemption of the variable annuity during the accumulation period, assuming a hypothetical investment return of 0%, 4% or 8%.

(ix) *Hypothetical Annuity Payments* refers to the annuity payments which a contract holder would receive assuming a hypothetical investment return of 0%, 4% or 8%.

(x) *Effective Rate of Return Realized by an Individual Over a Specified Number of Years During the Accumulation Period* means the return, expressed in terms of an annually compounded rate, that the purchase payments would have to earn in order to accumulate to an amount equal to the hypothetical redemption value at the end of the specified number of years, assuming no charges or deductions.

(xi) *Group Effective Return* means the return, expressed in terms of an annually compounded rate, that the aggregate annuity purchase amount paid by all the members of the group would have to earn in order to provide the hypothetical annuity payments to each member of the group according to the terms of the contract, assuming the group members live and die according to the 1971 Individual Annuity Mortality Table, which is contained in the "Transactions of the Society of Actuaries" Volume XXIII, pp. 475-550, and assuming no charges or deductions.

(xii) *Aggregate Annuity Payments Which Would be Received by an Individual, Assuming He Dies at a Specified Age, Expressed as an Effective Rate of Return* means the return, in terms of an

annually compounded rate, that the annuity purchase amount paid by the contractholder would have to earn in order to provide him (or his heirs) with the hypothetical annuity payments according to the terms of the contract, assuming he dies at the specified age. This computation assumes the annuity payments represent a return of both principal and investment earnings and should be distinguished from the interest or dividend yield which does not include a return of principal. For a non-life annuity providing variable installments over a fixed number of years, the rate of return realized by an individual contractholder will not be affected by the date of his death since he or his heirs will always receive the variable installment payments over the fixed number of years.

(d) *A Chart Expressing as Effective Rates of Return the Aggregate Annuity Payments Which Would be Received by an Individual, Assuming Various Life-spans* refers to a chart of effective rates of return based on the aggregate annuity payments which an individual would receive, plotted on a continuous basis, for each possible age at death after commencement of the annuity until age 95. For a straight life annuity, rates of return of less than -15% should not be portrayed. For a non-life annuity providing variable installments over a fixed number of years, this chart should be replaced by a table listing the three rates of return realized by an individual over the entire, fixed payout period, based on the three hypothetical investment returns of 0%, 4% and 8%.

#### SAMPLE ILLUSTRATION A

##### A DEFERRED VARIABLE ANNUITY

##### General Description of the Contract

A variable annuity, like an investment in any other security, involves risks. It combines risk regarding the investment return on a portfolio of equity securities with uncertainty as to how long one will live.

A deferred variable annuity, such as the one illustrated below, may encompass 40 years. Therefore, many changes in the securities markets, long-term economic trends, and an individual's health may occur during this period.

Unlike a fixed annuity, a variable annuity cannot guarantee a definite return or any return. Among other things, its value will be affected by:

The investment return of the separate account;

The selling expenses and charges deducted from payments and from the account;

The mortality table on which the contract is based; and

The taxes paid by the insurance company.

Because different charges are assessed throughout the life of the contract in different ways, it is often easier to understand the combined effect over time of all charges on the value of a contract through the use of illustrations which assume various constant rates of growth.

The illustrations shown below assume that after any deductions for insurance company taxes, the variable annuity separate account earns hypothetical investment returns of 0%, 4% and 8% compounded annually. The differences between the hypothetical investment returns and the effective returns shown in Sample Table A-1 result from the charges

and deductions made during the accumulation period. Such illustrations are hypothetical and cannot be used to estimate what any particular payment or return would be under the contract.

**Taxes—State Premium Taxes:** No effect has been given to State premium taxes in the illustration. Such taxes vary from state to state in both amount and point in time assessed. Premium taxes could reduce the number of dollars available for investment in the separate account.

**Insurance Company Taxes:** Investors should be aware that the tax liability of the insurance company which sponsors this contract can have a significant effect on the value of the investment.

**Personal Income Taxes:** In addition, if an investor redeems any part of his account in excess of the amount paid, such excess will be subject to taxation at ordinary income rates.

See the section on Taxation in your prospectus for more details.

**Illustration of the Accumulation or "Pay-in Period"**—The ability to continue to make payments when due will materially affect the value of your account. This illustration portrays a deferred variable annuity issued to a 45 year old man. It assumes purchase payments of \$50 per month or a total of \$12,000 over a 20-year accumulation period. The \$50 monthly purchase payments are subject to various deductions for sales and

<sup>1</sup> Deductions from purchase payments are set forth on pp. -- of the current prospectus.

<sup>2</sup> The daily charge against the assets of the separate account will not exceed 1.00% on an annual basis as provided under the expense guarantee of the contract. See pp. -- of the current prospectus for the details of the expense guarantee. The mortality guarantee covers the guarantee of the annuity purchase rate at retirement.

The accumulation period—effective rates of return (sample table A-1)

Years	Total purchase payments <sup>1</sup>	0-percent hypothetical return		4-percent hypothetical return		8-percent hypothetical return	
		Redemption value	Effective rate of return	Redemption value	Effective rate of return	Redemption value	Effective rate of return
1	\$500	\$500	-21.35	\$540	-18.02	\$551	-14.66
2	1,000	1,051	-12.20	1,085	-8.31	1,140	-4.81
5	3,000	2,589	-5.78	2,952	-1.94	3,184	2.10
10	6,000	5,049	-3.46	6,175	.57	7,598	4.59
20	12,000	9,615	-2.27	14,442	1.28	21,389	8.86

<sup>1</sup> Payment upon death: If a contract holder should die during the accumulation period, the company guarantees to return either total purchase payments or the redemption value of the account, whichever is greater.

**Illustration of the Annuity or "Payout Period"**—The illustration of the annuity or payout period assumes that the final value of the accumulation account is applied at age 65 to purchase a life annuity for a period of 10 years certain and life thereafter.

Under the terms of the contract the first monthly annuity payment would be \$6.44 per \$1,000 of the final value of the accumulation account. This dollar amount is based, in part, on the "assumed interest rate" of the contract which is 3.5%. Subsequent monthly payments will vary depending primarily upon the investment experience of the separate account.

If the investment return of the separate account after expenses and deductions should be equal to the "assumed interest rate" of 3.5%, the subsequent monthly annuity payments would remain constant, at the level of the first monthly annuity payment. If this return exceeds 3.5%, monthly annuity payments would increase; if it were less than 3.5%, they would decrease.

administrative expenses.<sup>1</sup> In addition, the investment return of the separate account is reduced by a daily charge for investment management and mortality and expense risks.<sup>2</sup>

The illustrations for the accumulation period are intended to illustrate only how these various costs and charges reduce hypothetical returns over time. They do not provide any information about the effects of investment risks, the mortality table used or insurance company taxes.

The illustrations are not intended to provide an estimate of actual or expected redemption values.

These will vary with actual investment experience which depends, in part, on the investment objectives and policies of the separate account as are set forth in the current prospectus.

No investment result is guaranteed and redemption values could be less than shown under 0%.

Sample Table A-1 below lists the redemption values at the ends of the 1st, 2d, 5th, 10th, and 20th years, for each of the hypothetical investment returns. Because of the various charges and deductions, an investor who surrenders his contract would not receive the full 0, 4, or 8% hypothetical investment return. Instead, he would receive the "effective rate of return" shown in the table.

Effective rates of return do not take into account the value to the purchaser of

(1) protection against loss of purchase payments if he dies during the accumulation period;

(2) the benefit of expense guarantees; and

(3) annuity purchase rate guarantees

which should be considered when making this type of investment.

returns" contained in Sample Table A-2 below. They do not indicate the market risks or the effect of the insurance company's taxes on the return.<sup>3</sup>

**Group effective returns** are the effective rates of return, after expenses, which would be achieved during the annuity period by a large group of annuitants whose lifespans are assumed to follow a standardized mortality table.

They are not intended to show the return which would be realized by any particular individual during the payout period. That will depend upon his longevity and the payment option he chooses. Actual results for an individual would be different from those realized by a large group.

By eliminating the effects of individual differences in longevity, group effective returns provide a point of reference for measuring the effects of direct charges on payments as well as any indirect charges or benefits resulting from the use by issuers of different mortality tables.

An investor should consider the value of (1) the promise to pay at regular intervals as long as he lives the periodic value of a specified number of annuity units;

(2) the benefit of expense guarantees; and (3) annuity purchase rate guarantees when making this type of investment.

Annuity period—group effective returns (sample table A-2)

Age:	0-percent hypothetical return		4-percent hypothetical return		8-percent hypothetical return	
	Age:	Effective rate	Age:	Effective rate	Age:	Effective rate

#### SAMPLE ILLUSTRATION B

##### AN IMMEDIATE VARIABLE ANNUITY

##### General Description of the Contract

A variable annuity, like an investment in any other security, involves risks. It combines risk regarding the investment return on a portfolio of equity securities with uncertainty as to how long one will live.

The immediate variable annuity illustrated below encompasses a 20 year period. It could involve an even longer period. Therefore, many changes in the securities markets, long-term economic trends, and an individual's health may occur during this period.

Unlike a fixed annuity, a variable annuity cannot guarantee a definite return. Among other things, its value will be affected by:

The investment return of the separate account;

The selling expenses and charges deducted from the payment and from the account;

The mortality table on which the contract is based; and

The taxes paid by the insurance company.

Because different charges are assessed throughout the life of the contract in different ways, it is often easier to understand the combined effect over time of all charges on the value of a contract through the use of illustrations which assume various constant rates of growth.

<sup>1</sup> See p. -- of the prospectus for explanation of how the tax liability of the insurance company related to the investment experience of the separate account can significantly affect annuity payments.

The illustrations shown below assume that after any deductions for insurance company taxes, the variable annuity separate account earns hypothetical investment returns of 0%, 4% and 8% compounded annually. The differences between the hypothetical investment returns and the group effective returns shown in Sample Table B-1 result from the charges and deductions made and the mortality table used by the company. Such illustrations are hypothetical and cannot be used to estimate what any particular payment or return would be under the contract.

The illustrations portray a \$10,000 single payment immediate variable annuity issued to a 65 year old man with annuity payments for a period of 10 years certain and life thereafter. The amount deducted from the purchase payment for sales and administrative expenses would be \$737.50,<sup>1</sup> leaving a net amount invested of \$9,262.50.<sup>2</sup>

Under the terms of the contract, the first monthly annuity payment would be \$61.80. This dollar amount is based, in part, on the "assumed interest rate" of the contract which is 3.5%. Subsequent monthly payments will vary depending primarily upon the investment experience of the separate account.

If the investment return of the separate account after expenses and deductions should be equal to the "assumed interest rate" of 3.5%, the subsequent monthly annuity payments would remain constant at the level of the first monthly annuity payment. If the investment return exceeds 3.5%, monthly annuity payments would increase; if the investment return were less than 3.5%, they would decrease.

**Taxes:** Investors should also be aware that the tax liability of the insurance company which sponsors this contract can have a significant effect on the value of the investment. See the section on Taxation in your prospectus.

**Illustration of the Annuity or "Payout Period"**

Sample Table B-1 below lists the first monthly annuity payment at age 65 and subsequent monthly annuity payments at ages 70, 75, 80, and 85, assuming continuation throughout the annuity payout period of the same hypothetical investment return earned during the accumulation period, reduced by a 1.00% annual asset charge which pays for investment management and expense guarantees.<sup>3</sup>

The illustrations are not intended to provide an estimate of expected future annuity payments.

These will vary with actual investment experience which depends, in part, on the investment objectives and policies of the separate account as are set forth in the current prospectus.

No investment result is guaranteed and annuity payments could be less than shown under 0%.

**Group Effective Returns**—The effects of charges for the annuity or payout period

<sup>1</sup> Deductions from purchase payments are set forth on pp. -- of the current prospectus.

<sup>2</sup> Premium taxes: The \$10,000 is assumed to be the amount remaining after any deductions for State premium taxes. No effect has been given to State premium taxes in the illustration. Such taxes vary from state to state in both amount and point in time assessed. Premium taxes could reduce the number of dollars upon which the initial annuity payment is based. (See pp. -- of the current prospectus for a more detailed illustration of State premium taxes.)

<sup>3</sup> See the current prospectus for an explanation of these guarantees.

and differences in result due to the mortality table used are shown by the "group effective returns" contained in Sample Table B-1 below. They do not indicate the market risks or the effect of the insurance company's taxes on the return.<sup>4</sup>

**Group effective returns** are the rates of return, after expenses, which would be achieved during the annuity period by a large group of annuitants whose lifespans are assumed to follow a standardized mortality table.

They are not intended to show the return which would be realized by any particular individual during the payout period. That will depend upon his longevity and the payment option he chooses. Actual results for an individual would be different from those realized by a large group.

By eliminating the effects of individual differences in longevity, group effective returns provide a point of reference for measuring the effects of direct charges on payments as well as any indirect charges or benefits resulting from the use by issuers of different mortality tables.

An investor should consider the value of (1) the promise to pay at regular intervals as long as he lives the periodic value of a specified number of annuity units;

(2) the benefit of expense guarantees; and (3) annuity purchase rate guarantees when making this type of investment.

Percent group effective returns		-1.3		2.6		6.5

#### SAMPLE ILLUSTRATION C

##### THE BASIC ANNUITY "TRADE-OFF"

An annuity guarantees that payments will be continued at regular intervals for the lifetime of the annuitant. For a fixed annuity the amount of these payments is definite; for a variable annuity the amount of the payments will be indefinite, fluctuating with the value of the separate account.

In making a decision to purchase a variable annuity and to receive such lifetime payments, an investor gives up other uses of his principal (except to the extent that the contract guarantees a minimum number of payments). Anyone contemplating how he will provide for his retirement should understand this trade-off.

Of course, no chart can indicate, in advance, the effective investment return anyone will receive. But by assuming that gross hypothetical returns of 0%, 4% and 8% are earned by the separate account, Chart C-1 shows how the rate of return the individual receives will vary depending upon his longevity and the annuity payout option he selects.

<sup>1</sup> See p. -- of the prospectus for explanation of how the tax liability of the insurance company related to the investment experience of the separate account can significantly affect annuity payments.

Investors should consider the effect of this pooling feature of the contract—that lower returns for shorter lifespans permit higher returns for longer lifespans—when making this type of investment.

(Sample Chart C-1)  
**AGGREGATE ANNUITY PAYMENTS RECEIVED BY AN INDIVIDUAL, ASSUMING VARIOUS LIFESPANS, EXPRESSED AS EFFECTIVE RATES OF RETURN**  
 (Based Upon a \$10,000, Ten Year Certain, Immediate Annuity, for a Male Life, Assuming Hypothetical Investment Returns of 0%, 4% and 8%)

- 36 -

#### SAMPLE EXPLANATION FOR CHART C-1

(1) *How Individual Returns Depend on the Hypothetical Investment Returns of the Separate Account.* How does the return an individual receives for the \$10,000 immediate variable annuity illustrated in Sample Table B-1 vary for different hypothetical investment returns of the separate account?

A. Sample Table B-1 illustrates the amounts of the monthly annuity payments, assuming hypothetical investment returns of the separate account of 0%, 4%, and 8%.

If the annuitant should live to age 85 he would receive aggregate annuity payments totalling \$9,854 for a 0% hypothetical return; \$14,077 for a 4% hypothetical return; and \$20,827 for an 8% hypothetical return.

Chart C-1 shows that if the annuitant lives to age 85 the aggregate annuity payments he receives would represent an effective rate of return of -1.9% for a 0% hypothetical return; 3.76% for a 4% hypothetical investment return; and 7.71% for an 8% hypothetical investment return.

(2) *How Individual Returns Depend on Longevity.* How does the return an individual receives from the \$10,000 immediate variable annuity illustrated in Sample Table B-1 vary depending upon his longevity?

A. For any given hypothetical investment return, the return received by an individual increases the longer he lives because the number of annuity payments he receives is greater. For example, for an 8% hypothetical return, if the annuitant should live 10 years he would receive aggregate annuity payments totalling \$8,738. These payments represent an effective rate of return of -2.45% on the \$10,000 invested.

If he should live to age 90, he would receive aggregate annuity payments totalling \$28,515 for an 8% hypothetical return. These annuity payments represent an effective rate of return of 9.16% on the investment of \$10,000. The higher returns for the longer lifespans and the lower returns for the shorter lifespans reflect the pooling feature of a variable annuity.

(3) *How Individual Returns Depend on Annuity Payout Option Selected.* How is the return an individual receives from the \$10,000 immediate variable annuity illustrated in Sample Table B-1 affected by the fact that the lifetime annuity payments continue for a period of at least 10 years?

A. For a 10 year certain annuity, the annuitant or his heirs will always receive the variable annuity payments for at least 10 years. For example, for an 8% hypothetical return, the annuity payments illustrated in Sample Table B-1 total \$8,738 over the first 10 years. These payments represent a -2.45% effective rate of return on an investment of \$10,000. Chart C-1 shows that the return received by an individual is not less than -2.45% for an 8% hypothetical return, even for lifespans of less than 10 years.

For a straight life annuity, where all annuity payments cease upon the death of the annuitant, the effective rate of return could be less than -2.45% for lifespans of less than 10 years. However, for longer lifespans, the effective rate of return for a straight life annuity would be higher than the return for a 10 year certain annuity.

#### § 271.2086 [Amended]

2. The text of Section 271.2086 is identical with that appearing in Section 231.3530 and is amended accordingly.

[FR Doc. 75-12923 Filed 5-16-75; 8:45 am]

[Rel. No. 34-11388, File No. S7-544]

#### PART 240—GENERAL RULES AND REGULATIONS, SECURITIES EXCHANGE ACT OF 1934

##### Fidelity Bonding Requirements for Non-Members of a National Securities Association

Notice is hereby given that the Commission adopted Rule 15b10-11 under the Securities Exchange Act of 1934 (17 CFR 240.15b10-11), effective September 1, 1975, setting forth mandatory fidelity bonding requirements for registered broker-dealers which are not members of a registered national securities association ("SECO broker-dealers"). Proposed Rule 15b10-11 (17 CFR 240.15b10-11) was originally noticed for public comment in Securities Exchange Act Release No. 11155 on December 26, 1974 and on January 9, 1975 at 40 FR 1719.

As a result of a request made by the Securities Investor Protection Corporation ("SIPC") in mid-1971 that misappropriation of assets of NASD members through employee theft and dishonesty be excluded from the losses covered by SIPC, the NASD Board of Governors in December of that year established a Committee on Bonding Coverage and instructed it to study the present bonding practices of the exchanges with a view to requiring similar coverage for NASD members.

As a result of the NASD Committee's recommendations, the NASD Board of Governors adopted Article III, section 32 (and Appendix "C" thereto) ("Section 32") of the NASD Rules of Fair Practice. The Commission subsequently considered the NASD rule and did not disapprove it on October 24, 1973 subject to certain conditions which later were satisfied. New section 32 became effective early last year. Commission Rule 15b10-11 is designed to impose comparable bonding requirements on SECO broker-dealers. Also, as in the case of Section 32, the Commission Rule provides exemptions for those firms which do not have employees as well as firms which are not required to be members of SIPC. In addition, the Rule would exempt SECO broker-dealers who are also members of certain exchanges which have in

\*The National Association of Securities Dealers, Inc. ("NASD") is the only association so registered.

effect fidelity bonding requirements for their members that are comparable to the requirements of the Rule.\*

#### DESCRIPTION OF RULE

Rule 15b10-11 (17 CFR 240.15b10-11) requires that SECO broker-dealers carry a fidelity bond in the form, amount and type of coverage prescribed by the Rule. The bond is required to contain agreements covering at least the following areas: a "Fidelity" insuring clause to indemnify the insured broker-dealer against loss of property through any dishonest or fraudulent acts of employees (this clause also generally covers losses due to "Fraudulent Trading" by employees); an "On Premises" agreement insuring against losses resulting from common law and statutory crimes such as burglary and theft and including a "Misplacement" clause specifically covering misplacement and "mysterious, unexplainable disappearances" of property of the insured (no matter where located); an "In Transit" clause indemnifying against losses occurring while property is in transit; a "Forgery and Alteration" agreement insuring against loss due to forgery or alteration of various kinds of negotiable instruments (including checks); and a "Securities Loss" clause protecting the insured against losses incurred through forgery and alteration of securities, or written documents relating to securities ownership or conveyance.

In addition, Rule 15b10-11 (17 CFR 240.15b10-11) requires SECO broker-dealers to obtain certain minimum coverages similar to the coverages set forth in the NASD's Section 32. The minimum coverage for any of the insuring agreements described above cannot be less than \$25,000; however, the required coverage for the "Fidelity," "On Premises,"

\*The proposed Rule, as published in Securities Exchange Act Release No. 11155, would have exempted those firms which are presently not subject to the requirements of Rule 15c3-1 of the Act, the "net capital" rule, by virtue of their membership in the following national securities exchanges: the American Stock Exchange, the Boston Stock Exchange, the Midwest Stock Exchange, the New York Stock Exchange, the Pacific Stock Exchange, the PBW Stock Exchange and the Chicago Board Options Exchange, Inc. However, the Commission found it necessary to revise the exemptive provision (paragraph (a)) in view of the fact that Rule 15c3-1 under the Act soon may be amended so as to apply to all registered broker-dealers irrespective of exchange affiliation. (See Securities Exchange Act Release No. 11094, dated November 11, 1974). Accordingly, the Rule has been revised so as to list the registered national securities exchanges which have in effect bonding requirements at least comparable to the requirements of the Rule. This list includes those exchanges presently exempt from the net capital rule since their bonding requirements generally satisfy this test. Revised paragraph (a) of the Rule also enables the Commission to suspend or withdraw the exemption as to members of any of the above exchanges upon ten days written notice to such exchange if the Commission deems such action "necessary or appropriate in the public interest or for the protection of investors."

[T.D. 75-114]

PART 159—LIQUIDATION OF DUTIES  
Dairy Products

Waiver of Countervailing Duties—Dairy Products from France, the United Kingdom, West Germany, Luxembourg, Ireland, the Netherlands, Denmark, Italy and Belgium.

Determination under section 303(d), Tariff Act of 1930, as amended, to waive countervailing duties.

In T.D. 75-113, published concurrently with this determination, it has been determined that bounties or grants within the meaning of section 303 of the Tariff Act of 1930 (19 U.S.C. 1303) are being paid or bestowed, directly or indirectly, upon the manufacture, production, or exportation of dairy products from the European Communities (consisting of France, the United Kingdom, West Germany, Luxembourg, Ireland, the Netherlands, Denmark, Italy and Belgium).

Section 303(d) of the Tariff Act of 1930, as added by the Trade Act of 1974 (P.L. 93-618, January 3, 1975), authorizes the Secretary of the Treasury to waive

the imposition of countervailing duties during the four year period beginning on the date of enactment of the Trade Act of 1974 if he determines that:

(1) adequate steps have been taken to reduce substantially or eliminate during such period the adverse effect of a bounty or grant which he has determined is being paid or bestowed with respect to any article or merchandise;

(2) there is a reasonable prospect that, under section 102 of the Trade Act of 1974, successful trade agreements will be entered into with foreign countries or instrumentalities providing for the reduction or elimination of barriers to or other distortions of international trade; and

(3) the imposition of the additional duty under this section with respect to such article or merchandise would be likely to seriously jeopardize the satisfactory completion of such negotiations.

The European Community has taken action to suspend restitution payments on the following cheeses: Colby and Monterey (EC Code 5120-83); Industrial cheese for processing (EC Codes 5120-11,

5120-15, 5120-21); Emmentaler and Gruyere (EC Code 3800-00). Restitution payments on cheddar cheese (EC Code 4850-00) and on other dairy products, other than cheese, have been suspended since at least July 1974 and continue in a state of suspension. In view of the above, and based upon analysis of all relevant factors and consultation with interested agencies, I have concluded that the steps taken are adequate to reduce substantially the adverse effect of the bounties or grants.

After consulting with appropriate agencies, including the Department of State, the Office of the Special Representative for Trade Negotiations, and the Department of Agriculture, I have concluded (1) that there is a reasonable prospect that, under section 102 of the Trade Act of 1974, successful trade agreements will be entered into with foreign countries or instrumentalities providing for the reduction or elimination of barriers to or other distortions of international trade; and (2) that the imposition of countervailing duties on dairy products from the European Communities would be likely to seriously jeopardize the satisfactory completion of such negotiations.

Accordingly, pursuant to section 303 (d) of the Tariff Act of 1930 (19 U.S.C. 1303(d)), I hereby waive the imposition of countervailing duties as well as the suspension of liquidation ordered in T.D. 75-113 on dairy products from the European Communities.

This determination may be revoked, in whole or in part, at any time and shall be revoked whenever the basis supporting such determination no longer exists. Unless sooner revoked or made subject to a resolution of disapproval passed by either House of the Congress of the United States pursuant to section 303 (d) of the Tariff Act of 1930 (19 U.S.C. 1303(e)), this waiver of countervailing duties will, in any event, by statute cease to have force and effect on January 4, 1979.

On or after the date of publication in the FEDERAL REGISTER of a notice revoking this determination in whole or in part, the date of passage by either House of the Congress of a resolution disapproving this "Waiver of Countervailing Duties", or January 4, 1979, whichever occurs first, countervailing duties will be assessable on dairy products imported directly or indirectly from the European Communities in accordance with T.D. 75-113, published concurrently with this determination.

The table in § 159.47(f) of the Customs regulations (19 CFR 159.47(f)) is amended by inserting after the last entry for France, the United Kingdom, West Germany, Luxembourg, Ireland, the Netherlands, Denmark, Italy, and Belgium under the commodity heading "Dairy Products", the number of this Treasury Decision in the column headed "Treasury Decision", and the words "Imposition of countervailing duties waived" in the column headed "Action".

(R.S. 251, secs. 303, as amended, 624; 46 Stat. 687, 769, 88 Stat. 2051, 2052; 19 U.S.C. 66, 1303, as amended, 1824).

[SEAL] DAVID R. MACDONALD,  
Assistant Secretary of  
the Treasury.

MAY 12, 1975.

[FR Doc. 75-12856 Filed 5-16-75; 8:45 am]

## Title 21—Food and Drugs

## CHAPTER I—FOOD AND DRUG ADMINISTRATION, DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

## SUBCHAPTER B—FOOD AND FOOD PRODUCTS

## PART 10—DEFINITIONS AND STANDARDS FOR FOODS

## Temporary Permits for Market Testing; Amendments

A notice of proposed rulemaking, published in the FEDERAL REGISTER of December 9, 1972 (37 FR 26340), set forth a proposal on the initiative of the Commissioner of Food and Drugs to amend § 10.5 (21 CFR 10.5), relating to temporary permits to vary from a food standard. These amendments would (1) emphasize the purpose for which temporary permits are to be granted, (2) require that a request for an extension of a permit be filed not later than 3 months prior to the expiration date of the permit and be accompanied by a petition to amend the applicable food standard, and (3) provide that, if an extension of a permit is granted, the published notice of the extension will include an invitation to all interested persons to participate in the market test. This order adopts that proposal with certain modifications.

Three responses were received with regard to the proposal:

1. One industry association stated that the additional safeguards incorporated by the proposed amendment are reasonable and in the public interest.

2. Another industry association suggested that permits be granted for 2-year periods on the basis that 1 year is simply not long enough, considering the seasonal nature of many products involved and the inevitable time lag of passing the product through the chain of distribution.

It has been the policy of the Food and Drug Administration to grant temporary permits only when market tests are shown by the applicant to be necessary for the completion or conclusiveness of an otherwise adequate investigation. Thus, on the basis of his laboratory and/or intrastate market tests, an applicant for a temporary permit should have arrived at some definite conclusions as to the suitability of the product change in regard to amending the food standard at the time he requests a permit. The Commissioner is of the opinion that, if the application for the temporary permit is submitted with sufficient lead time where seasonal factors are a concern, and the market test is properly designed and timed to cover the area and period in which the sought after data are available, in most cases it would not require a market test period of 2 years to obtain

the information necessary to support a petition for an amendment to the appropriate food standard. However, in consideration of the comment received and for the reasons set forth in paragraph 3 of this preamble, the Commissioner concludes that a market test period of 15 months is reasonable and accordingly. The Commissioner also concludes that, because of the variety of food products subject to this regulation, the establishment of an inflexible time schedule may under certain circumstances impose an impediment to the gathering of needed data. Therefore, paragraphs (b) and (c) of § 10.5 have been changed to provide that the Commissioner, for good cause shown by the applicant, may provide for a longer test market period.

3. A comment from a food manufacturer agreed that the present regulation requires modification in order to diminish the current potential for unfair competition but questioned whether the means selected will accomplish the objective and raised several questions regarding the proposal. The comment questioned the requirement that an application for extension be accompanied by a petition to amend the standard and that they both be filed 3 months before the expiration date of the permit, on the basis that the need for an extension indicates that adequate data to support a petition are lacking and that the last 3 months of the test period are crucial to the decision of proceeding with an amendment to the standard.

As explained in the preamble to the proposal, very few holders of temporary marketing permits have submitted, prior to the expiration of the market testing period, a petition for a corresponding amendment to the food standard involved. Instead, a number of permit holders have applied for one or more extensions of the time period for market testing without providing any indication of when a petition to amend the standard would be submitted. The Commissioner has concluded that this practice does not conform to the intent of § 10.5, that it is not in the best interest of consumers, and that it presents a potential for unfair competition with respect to other manufacturers who do not hold temporary permits for the same or similar products. For this reason, the Commissioner is establishing a uniform procedure that each permit holder must follow if he plans to ask for an extension of time. The important element of this requirement is that a request for an extension of time must be filed 3 months before the permit expires and that it be accompanied by a petition to amend the standard. The Commissioner recognizes that in some cases the last 3 months of a 1-year market test may be crucial and, accordingly, has amended paragraph (b) of § 10.5 to specify that under normal circumstances the initial test period shall not exceed 15 months instead of the 1-year period proposed. The additional 3 months will provide a full 12-month

market testing period for permit holders to acquire data to support the petition which must accompany the request for an extension of the market testing period. A petition to amend the standard may be submitted at any time and need not be accompanied by a request for an extension of the market testing period.

4. A comment questioned the invitation to all interested parties to participate in an extended market test on the basis that, under current regulations, interested parties can file their own application for a permit to market test the product concurrently with the initial permit holder. The comment asserted that the proposal will not accomplish its principal purpose, i.e., the prevention of unfair competition, arguing that "it makes sense to publish a proposed amendment after tests have established grounds supporting it. Temporary permission to market even very limited quantities should be terminated once the proposal of the petitioner is accepted for publication. We are confident that the interruption in marketing would segregate those who are conducting true tests from those who wish to gain a franchise with consumers before others can legally market the same product. Interruptions in shelf-space authorization and trademark promotion through advertising would assure the Commissioner's success at no cost to the consumer."

In regard to the invitation for other interested persons to participate in an extended market test, it is true that under the present regulation other manufacturers could file their own applications for permits to market test the same food concurrently with the initial permit holder. However, the proposed provision will streamline this procedure in the case where an extension is granted and broaden the base of information available to the Commissioner at the time a ruling is to be made on the proposed amendment. This provision is also intended to minimize the opportunities for permit holders to gain a franchise with consumers before others can legally market the same product. The Commissioner does not agree that temporary permission to market test should always be terminated once the proposal is accepted for publication. However, it is not the intention of the Commissioner to grant every request for an extension of a permit but only those where he concludes that the request includes persuasive reasons for extending the market test period and that the additional information expected to result from such extension would be helpful to him in formulating a final ruling on the proposed amendment. In this regard, the Commissioner wishes to emphasize that if the basis for the request for an extension is one of competitive advantage rather than a clear need for additional market test data, it will be deemed insufficient for the granting of the requested extension.

5. A comment questioned the provision that all applications and related correspondence will be available for public

disclosure after a permit is granted on the basis that product development and the flow of information to the Commissioner will be impeded and, in some cases, it will be competitively preferable to try other means of accomplishing the provisions of the amendment without prior market tests rather than subject the product to public scrutiny prematurely.

In regard to the confidentiality of applications for temporary permits after the permits have been granted, it should be understood that petitions setting forth a proposal in regard to a food standard regulation have always been filed with the Hearing Clerk in a public file. It has been required that these petitions include complete factual information that furnishes reasonable grounds in support of the proposed action so that interested persons may make a knowledgeable comment on the proposal. Similarly, it is the conclusion of the Commissioner that the information submitted in support on an application for a temporary permit, once the permit has been issued and the food can be distributed for sale to the consumer, shall be available for public disclosure except to the extent that these records contain information exempt from disclosure. Prior to a notice in the FEDERAL REGISTER granting a temporary permit, the existence of the application for temporary permit is properly regarded as confidential commercial information since it would disclose the intent of the company to pursue the marketing of a new product. Once such a notice is published, however, the application can no longer be regarded as confidential. Similarly, a request for extension of the permit shall be available for public disclosure if and when it is granted, since granting such an extension permits other manufacturers to begin marketing under the same terms and conditions as the first manufacturer. Paragraph (k) of § 10.5 was added by the final order on public information published in the FEDERAL REGISTER of December 24, 1974 (39 FR 44652) to state this policy.

6. A comment asserted that:

According to the proposal, no extension will be effective until (a) a notice of the extension is published in the FEDERAL REGISTER, (b) competitors are told that they can conduct like tests concurrently, and (c) the proposed amendment to the standard has been published (§ 10.5(i)). This schedule requires a great deal of action by the FDA within a short period of time. The Commissioner will have to analyze incomplete tests results to determine whether reasonable grounds exist in support of the proposed amendment, and despite other demands on his time the Commissioner will have to send it to the FEDERAL REGISTER in time to avoid an interruption in the period of the permit. The rush to meet this schedule seems unnecessarily wasteful when it is remembered that by the time it is published, the petitioner may for good reasons abandon his petition.

The Commissioner agrees that on some occasions it may be necessary to obtain additional data and information to supplement a petition to amend a food

standard before he can conclude that reasonable grounds have been furnished to warrant publishing the proposal. Therefore, the Commissioner has concluded that it is reasonable to amend paragraph (i) to delete the provision that the extension will become effective only after publication of a notice in the FEDERAL REGISTER setting forth a proposal to amend the affected standard. The regulation has been changed to make the extension effective on the date of publication of the notice granting the extension.

7. A comment stated that use of the words "retail unit" in § 10.5(c)(11) gave the impression that market tests by institutional or industrial customers are not permitted.

Although requests for such market tests are rare, the Commissioner advises that it was not intended that the submission of such applications would be prohibited by § 10.5. Therefore, the word "retail" has been deleted from paragraph (c)(11).

Accordingly, the Commissioner concludes, having considered the comments received and other relevant material, that § 10.5 should be amended in paragraphs (a), (b), (c) and (l) and adopted as set forth below.

Therefore, pursuant to the provisions of the Federal Food, Drug, and Cosmetic Act (sections 401, 701(a), 52 Stat. 1046, 1055-1056, as amended by 70 Stat. 919 and 72 Stat. 948 (21 U.S.C. 341, 371(a))) and under authority delegated to him (21 CFR 2.120) § 10.5 is revised to read as follows:

§ 10.5 Temporary permits for interstate shipment of experimental packs of food varying from the requirements of definitions and standards of identity.

(a) The Food and Drug Administration recognizes that before petitions to amend food standards can be submitted, appropriate investigations of potential advances in food technology sometimes require tests in interstate markets of the advantages to and acceptance by consumers of experimental packs of food varying from applicable definitions and standards of identity prescribed under section 401 of the act.

(b) It is the purpose of the Administration to permit such tests when it can be ascertained that the sole purpose of the tests is to obtain data necessary for reasonable grounds in support of a petition to amend food standards, that the tests are necessary to the completion or conclusiveness of an otherwise adequate investigation, and that the interests of consumers are adequately safeguarded; permits for such tests shall normally be for a period not to exceed 15 months. The Commissioner, for good cause shown by the applicant, may provide for a longer test market period. The Administration will therefore refrain from recommending regulatory proceedings under the act on the charge that a food does not conform to an applicable standard, if the person who introduces or causes the introduction of the food into interstate

commerce holds an effective permit from the Commissioner providing specifically for those variations in respect to which the food fails to conform to the applicable definition and standard of identity. The test period will begin on the date the person holding an effective permit from the Commissioner introduces or causes the introduction of the food covered by the permit into interstate commerce but not later than 3 months after notice of the issuance of the permit is published in the FEDERAL REGISTER. The Commissioner shall be notified in writing of the date on which the test period begins as soon as it is determined.

(c) Notice of the granting or revocation of any permit shall be published in the FEDERAL REGISTER.

(1) Name and address of the applicant.

(2) A statement of whether or not the applicant is regularly engaged in producing the food involved.

(3) A reference to the applicable definition and standard of identity (citing applicable section of regulations).

(4) A full description of the proposed variation from the standard.

(5) The basis upon which the food so varying is believed to be wholesome and nondeleterious.

(6) The amount of any new ingredient to be added; the amount of any ingredient, required by the standard, to be eliminated; any change of concentration not contemplated by the standard; or any change in name that would more appropriately describe the new product under test. If such new ingredient is not a commonly known food ingredient, a description of its properties and basis for concluding that it is not a deleterious substance.

(7) The purpose of effecting the variation.

(8) A statement of how the variation is of potential advantage to consumers. The statement shall include the reasons why the applicant does not consider the data obtained in any prior investigations which may have been conducted sufficient to support a petition to amend the standard.

(9) The proposed label (or an accurate draft) to be used on the food to be marketed. The label shall conform in all respects to the general requirements of the act and shall provide a means whereby the consumer can distinguish between the food being tested and such food complying with the standard.

(10) The period during which the applicant desires to introduce such food into interstate commerce, with a statement of the reasons supporting the need for such period. If a period longer than 15 months is requested, a detailed explanation of why a 15-month period is inadequate shall be provided.

(11) The probable amount of such food that will be distributed. The amount distributed should be limited to the smallest number of units reasonably required for a bona fide market test. Justification for the amount requested shall be included.

(12) The areas of distribution.

(13) The address at which such food will be manufactured.

(14) A statement of whether or not such food has been or is to be distributed in the State in which it was manufactured.

(15) If it has not been or is not to be so distributed, a statement showing why.

(16) If it has been or is to be so distributed, a statement of why it is deemed necessary to distribute such food in other States.

(d) The Commissioner may require the applicant to furnish samples of the food varying from the standard and to furnish such additional information as may be deemed necessary for action on the application.

(e) If the Commissioner concludes that the variation may be advantageous to consumers and will not result in failure of the food to conform to any provision of the act except section 403(g), a permit shall be issued to the applicant for interstate shipment of such food. The terms and conditions of the permit shall be those set forth in the application with such modifications, restrictions, or qualifications as the Commissioner may deem necessary and state in the permit.

(f) The terms and conditions of the permit may be modified at the discretion of the Commissioner or upon application of the permittee during the effective period of the permit.

(g) The Commissioner may revoke a permit for cause, which shall include but not be limited to the following:

(1) That the permittee has introduced a food into interstate commerce contrary to the terms and conditions of the permit.

(2) That the application for a permit contains an untrue statement of a material fact.

(3) That the need therefor no longer exists.

(h) During the period within which any permit is effective, it shall be deemed to be included within the terms of any guaranty or undertaking otherwise effective pursuant to the provisions of section 303(c) of the act.

(i) If an application is made for an extension of the permit, it shall be accompanied by a description of experiments conducted under the permit, tentative conclusions reached, and reasons why further experimental shipments are considered necessary. The application for an extension shall be filed not later than 3 months prior to the expiration date of the permit and shall be accompanied by a petition to amend the affected food standard. If the Commissioner concludes that it will be in the interest of consumers to issue an extension of the time period for the market test, a notice will be published in the FEDERAL REGISTER stating that fact. The notice will include an invitation to all interested persons to participate in the market test under the same conditions that applied to the initial permit holder, including labeling and the amount to be distributed, except that the designated

area of distribution shall not apply. The extended market test period shall not begin prior to the publication of a notice in the FEDERAL REGISTER granting the extension and shall terminate either on the effective date of an affirmative order ruling on the proposal or 30 days after a negative order ruling on the proposal, whichever the case may be. Any interested person who accepts the invitation to participate in the extended market test shall notify the Commissioner in writing of that fact, the amount to be distributed, and the area of distribution; and along with such notification, he shall submit the labeling under which the food is to be distributed.

(j) Notice of the granting or revocation of any permit shall be published in the FEDERAL REGISTER.

(k) All applications for a temporary permit, applications for an extension of a temporary permit, and related records are available for public disclosure when the notice of a permit or extension thereof is published in the FEDERAL REGISTER. Such disclosure shall be in accordance with the rules established in Part 4 of this chapter.

Effective date. The amendment to § 10.5 shall become effective on June 18, 1975.

(Secs. 401, 701(a), 52 Stat. 1046, 1055-1056, as amended by 70 Stat. 919, 72 Stat. 948 (21 U.S.C. 341, 371(a)))

Dated: May 13, 1975.

SAM D. FINE,  
Associate Commissioner  
for Compliance.

[FR Doc. 75-13025 Filed 5-16-75; 8:45 am]

#### PART 30—TABLE SIRUPS

Standards of Identity; Confirmation of Effective Date of Order

In an order published in the FEDERAL REGISTER of June 14, 1974 (39 FR 20879), the Commissioner of Food and Drugs established definitions and standards of identity for the foods: table sirup, maple sirup, cane sirup, and sorghum sirup. The action was intended to protect the consumer from economic abuse in the formulation and labeling of these foods. The standards are to become effective on July 1, 1975.

No objections to the order or requests for a hearing were received; however, four letters, each containing one or more comments, were received; a summary of the comments and the Commissioner's responses are as follows:

1. One comment said that the time allowed for compliance is not sufficient to use present stocks of labels and requested that the rule allow for the labels on hand on January 1, 1975 to be used for 6 months or until the present supply is exhausted, whichever is sooner.

A notice extending the effective date for compliance with this regulation from January 1, 1975 to July 1, 1975 was published in the FEDERAL REGISTER of November 14, 1974 (39 FR 40184).

2. A comment recommended that margarine as well as butter be listed as an optional ingredient in table sirup (21 CFR 30.1).

It is the present policy to list optional ingredients in this standard by class wherever practicable instead of by name. Margarine is considered to fall in the class of "edible fats and oils" which are permitted by 21 CFR 30.1(b)(3) as optional ingredients and, accordingly, is not listed by name. The ingredient "butter" is mentioned by name because there are specific provisions in the standard for a product to be labeled as "buttered sirup," but such is not the case for margarine or other fats and oils. Since there is no food commonly marketed as "margarined sirup," the Commissioner does not believe it is necessary to single out margarine as an optional ingredient.

3. One comment said that the name "cane sirup," as established by 21 CFR 30.3(c) is not entirely descriptive in some parts of the country and recommend that "sugar cane sirup" be permitted as an alternative name. The comment added that such sirup is made entirely at the mill from sugar cane or that it may be made at a processing establishment by using granulated sugar.

The Commissioner concludes that "sugar cane sirup" is satisfactory as an alternative name for "cane sirup" and is appropriately amending § 30.3(c) of the regulation. However, sirup made from granulated sugar, as described in the comment, would not comply with § 30.3 and could not be labeled as "cane sirup" or "sugar cane sirup." For the food to be so labeled, § 30.3 requires, among other requirements, that the food be derived by concentration and heat treatment of the juice of sugar cane or by solution in water of sugar cane concentrate made from such juice. Sirup made from granulated sugar may be labeled in accordance with the provisions of the standard for table sirup (§ 30.1) if the sirup meets all of the requirements of that standard.

4. A comment recommended that a statement be placed in § 30.4 to the effect that the word "pure" cannot be used on the label unless no optional ingredients are present in sorghum sirup.

It has been the general policy of the Food and Drug Administration for many years to discourage use of the word "pure" on the labels for food products because common use of the word has different meanings to different people. The Commissioner does not consider it appropriate to incorporate such a requirement in the standards for individual foods.

5. A comment recommended that, unless evidence shows that the addition of chemical preservatives serves a useful purpose in the interest of the consumer, § 30.4(b)(2) permitting the use of chemical preservatives as optional ingredients in sorghum sirup should be stricken.

Inasmuch as microbial growth can take place when condensate, due to frequent transferring of the food in and

## RULES AND REGULATIONS

out of the refrigerator, accumulates on the surface of sorghum sirup, the Commissioner concludes that the use of chemical preservatives in such food can serve a useful purpose.

6. A comment from a trade association asked if chocolate sirup was taken into consideration in establishing §§ 30.1 through 30.4.

Sections 30.1 through 30.4 were established as definitions and standards of identity for the pancake and waffle types of sirups. They were not intended to define chocolate sirups for such uses as ice cream toppings and beverages. Such chocolate sirups are considered as non-standardized foods. Any person who believes that a separate identity standard for chocolate sirup should be promulgated may file a petition proposing such a standard.

A number of comments on the original proposal of October 2, 1970 (35 FR 15403), requested that the source of ingredients be declared on the label so as to inform those persons who may have allergic or hypersensitivity reactions to specific ingredients. In response to those comments, the preamble to the order of June 14, 1974 stated that the significance of source labeling of ingredients was being reviewed at the request of the Commissioner by the Life Sciences Research Office (LSRO), Federation of American Societies for Experimental Biology (FASEB), Bethesda, Maryland. The Commissioner indicated that if data in support of a requirement to declare the source of ingredients become available he will propose to amend the standard. The study by LSRO has been completed and a copy of the report has been placed on public display in the office of the Hearing Clerk, Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20852. A single copy of this report may be obtained upon request to the Associate Director for Nutrition and Consumer Services, Bureau of Foods, Food and Drug Administration, 200 C St. SW., Washington, DC 20204.

The Commissioner has reviewed the report by the LSRO and finds that it is appropriate to give further consideration to the matter of requiring labeling that identifies the source of nutritive sweeteners.

The Commissioner is aware of the fact that source labeling for table sirups is of interest to those individuals who desire to avoid certain nutritive sweeteners in their diet. However, any requirement for declaring nutritive sweeteners by source as well as by common or usual name should also apply to other foods which contain nutritive sweeteners. For that reason, and also because the October 2, 1970 original proposal for table sirups did not include a requirement for source labeling, the Commissioner believes that it would be inappropriate to make such a substantive change in the standards for table sirups at this time. When a position regarding source labeling can be developed separately on broad and scientifically documented basis, the Commissioner will issue a FEDERAL REGISTER notice of such position.

Therefore, pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (secs. 401, 701, 52 Stat. 1048, 1055-1056, as amended by 70 Stat. 919 and 72 Stat. 948 (21 U.S.C. 341, 371)) and under authority delegated to the Commissioner (21 CFR 2.120):

1. Notice is given that no objections were filed to the order of June 14, 1974, and the effective date for full compliance with the regulations will be July 1, 1975.

§ 30.3 Cane sirup; identity; label standard of optional ingredients. [Amended]

2. Effective July 1, 1975, § 30.3 is amended in paragraph (c) by adding to the first sentence the phrase "or 'sugar cane sirup'" immediately after the words "sugar cane."

Dated: May 12, 1975.

SAM D. FINE,  
Associate Commissioner  
for Compliance.

### Title 38—Pensions, Bonuses, and Veterans' Relief

#### CHAPTER I—VETERANS ADMINISTRATION

##### PART 3—ADJUDICATION

#### Subpart A—Pension, Compensation and Dependency and Indemnity Compensation

##### PENSION AND COMPENSATION RATES

On page 12294 of the FEDERAL REGISTER of March 18, 1975, there was published a notice of proposed regularity development to amend §§ 3.452, 3.454, 3.458, 3.459 and 3.460 which relate to apportionment of benefits. Interested persons were given 30 days in which to submit comments, suggestions, or objections regarding the proposed regulations.

One written comment was received. The comment was favorable but suggested an additional change to § 3.454. The suggested change is being considered for inclusion in a subsequent change to the regulations. It was not considered practical to delay issuance of the current changes. The proposed regulations are hereby adopted without change and are set forth below.

**Effective date.** Sections 3.452(c) and 3.454 (b) and (c) are effective January 1, 1974; § 3.459(b) is effective May 1, 1974; and §§ 3.454(a), 3.458, 3.459(a) and 3.460 are effective May 12, 1975.

Approved: May 12, 1975.

By direction of the Administrator.

ODELL W. VAUGHN,  
Deputy Administrator.

1. In § 3.452, paragraphs (c) (3) and (d) are revised to read as follows:

§ 3.452 Veterans benefits apportionable.

Veterans benefits may be apportioned:

(c) . . . .

(3) Where a married veteran is receiving pension at the rate provided by 38

U.S.C. 521(b) and pension is reduced under the provisions of § 3.551(c), because of hospitalization by the Veterans Administration, all or any part of the pension at the rates payable under 38 U.S.C. 521(c) or (c) and (e) in excess of \$50 monthly may be paid to the veteran's estranged wife or husband as provided in § 3.454(b) if it is affirmatively shown that hardship exists. (38 U.S.C. 3203(a).)

(d) Where additional compensation is payable on behalf of a parent and the veteran or his or her guardian neglects or refuses to contribute such an amount to the support of the parent the additional compensation will be paid to the parent upon receipt of a claim.

2. Section 3.454 is revised to read as follows:

§ 3.454 Veterans disability pension.

Apportionment of pension for a veteran based on service in the Mexican border period, World War I or later war period will be as follows:

(a) Where a veteran with wife, husband, or child is incompetent and without legal fiduciary and is maintained in an institution by the United States or any political subdivision thereof, \$10 monthly will be paid as an institutional award to the Director of a Veterans Administration hospital or chief officer of a non-Veterans Administration institution for the use of the veteran, and the balance will be paid to the dependent or dependents. If the veteran has no wife, husband, or child but has a dependent parent apportionment will be in accordance with § 3.451.

(b) Where the pension of any married veteran who is receiving pension under 38 U.S.C. 521(b) is reduced to \$50 under the provisions of § 3.551(c), an apportionment may be made to the estranged wife or husband upon an affirmative showing of hardship. The amount of the apportionment generally will be the difference between \$50 and the rate payable if pension were being paid under 38 U.S.C. 521(c). If the additional rate of \$49 per month is payable under § 3.351 (d) it may be added to the apportionment. (38 U.S.C. 3203(a).)

(c) Where pension for an incompetent veteran is subject both to reduction under § 3.551(c), and to discontinuance under § 3.557(b) because of hospitalization by the U.S. Government or any political subdivision, the rate authorized for a parent or parents will not exceed \$50 monthly. (38 U.S.C. 3203 (a), (b).)

3. In § 3.458, paragraphs (b), (c), (e), (f) and (g) are revised to read as follows:

§ 3.458 Veterans benefits not apportionable.

Veterans benefits will not be apportioned:

(b) Where the wife or husband of the disabled person has been found guilty of conjugal infidelity by a court having proper jurisdiction.

(c) For purported or legal wife or husband of the veteran if it has been

determined that he or she has lived with another person and held herself or himself out openly to the public to be the spouse of such other person, except where such relationship was entered into in good faith with a reasonable basis (for example trickery on the part of the veteran) for the wife or husband believing that the marriage to the veteran was legally terminated. No apportionment to the wife or husband will thereafter be made unless there has been a reconciliation and later estrangement.

(e) Where a child enters the active military, air, or naval service, any additional amount will be paid to the veteran unless such child is included in an existing apportionment to an estranged wife or husband. No adjustment in the apportioned award will be made based on the child's entry into service.

(f) (1) For the wife, husband, child, father or mother of a disabled veteran, where forfeiture was declared prior to September 2, 1959, if the dependent is determined by the Veterans Administration to have been guilty of mutiny, treason, sabotage, or rendering assistance to an enemy of the United States or its allies.

(2) For any dependent of a disabled veteran, widow or widower where forfeiture of benefits by a person primarily entitled was declared after September 1, 1959, by reason of fraud, treasonable acts, or subversive activities. (38 U.S.C. 3503(e); 3504(c); 3505(a).)

(g) Until the estranged wife or husband of a veteran files claim for an apportioned share. If there are any children of the veteran not in his or her custody an apportionment will not be authorized unless and until a claim for an apportioned share is filed in their behalf.

4. Section 3.459 is revised to read as follows:

§ 3.459 Death compensation.

(a) Death compensation will be apportioned if the child or children of the deceased veteran are not in the custody of the widow or widower.

(b) The widow or widower may not be paid less than \$65 monthly plus the amount of an aid and attendance allowance where applicable.

5. In § 3.460, the introductory portion preceding paragraph (a) is revised to read as follows:

§ 3.460 Death pension.

Death pension will be apportioned, if the child or children of the deceased veteran are not in the custody of the widow or widower, at the rates specified in this section. Where the widow's or widower's rate is in excess of \$70 monthly because of having been the wife or husband of the veteran during his or her service or because of need for regular aid and attendance, the additional amount will be added to the widow's or widower's share.

[FR Doc. 75-13065 Filed 5-16-75; 8:45 am]

## RULES AND REGULATIONS

### Title 40—Protection of Environment CHAPTER I—ENVIRONMENTAL PROTECTION AGENCY

#### SUBCHAPTER C—AIR PROGRAMS

[FRL 365-2]

### PART 52—APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

#### Georgia: Approval of Plan Revisions

On December 23, 1974 (39 FR 44245), the Administrator announced proposed revisions in the Georgia implementation plan. These involved a number of changes in the State's air pollution control regulations and the removal from the plan of its regulations for the control of nitrogen oxide emissions from stationary sources. All the proposed revisions had met the requirements of 40 CFR Part 51 pertaining to notice and public hearing and plan revisions before being submitted for the Agency's approval on July 23, 1974. Copies of the proposed revisions were made available for public inspection and written comments on them were solicited. No comments were received, however. The purpose of the present notice is to set forth the Administrator's approval of the Georgia plan revisions as submitted by the State. These are now described briefly.

Subsection 391-3-1-.02(2)(a), General Provisions, of the State's regulations, is revised to include an explicit statement that whenever more than one section of the regulations can be applied to a source's emissions, the more stringent one will take precedence.

Subsection 391-3-1-.02(2)(g), Sulfur Dioxide, is revised to state that no source is exempted from the emission limits defined in paragraph (g) (1), and further revised to explicitly state that sources subject to this regulation must also meet the sulfur-in-fuel limitation of paragraph (g) (3), which remains unchanged, in addition to the provisions of paragraphs (g) (1) and (g) (2). A new paragraph (g) (4), however, allows the sulfur-in-fuel limit to be exceeded provided that sulfur oxide removal technology is used to reduce sulfur oxide emissions to that level which would be achieved by burning fuel specified in paragraph (g) (3) without sulfur oxide removal.

Removed from the Georgia implementation plan is subsection 391-3-1-.02(2) (i) of the regulations, which provides emission limitations for nitrogen dioxide from nitric acid plants. Analysis performed since the original classification of certain areas of the State as Priority I—air quality poor enough to produce health effects—for nitrogen dioxide has led the Administrator to reclassify them as Priority III—no damage to health or welfare—(39 FR 16344). Therefore, the Agency does not require a control strategy or supporting regulations for emission of this pollutant from stationary sources. These emission limits will remain a part of the State regulations and will continue to be enforceable by the State, but the Agency no longer has the power to enforce them.

An evaluation of these changes and of their effects can be obtained by consulting personnel of the Agency's Region IV Air Programs Office at 1421 Peachtree Street, NE., Atlanta, Georgia 30309 (404/526-3043).

(On March 27, 1975 (40 FR 13498), the Administrator approved the new Georgia permit regulations. At that time an erroneous entry was made under 40 CFR 52.570, Identification of plan. Due to the problems involved in coordinating a number of notices dealing with the Georgia plan, notice was given that § 52.570(c) (4) was being amended to include the date on which the permit regulations were submitted for the Agency's approval, May 20, 1974. However, subparagraph (4) did not exist at that time since it had not yet been added to § 52.570(c). Moreover, the date given was incorrect, the actual date of submittal being March 20, 1974. Therefore, the entry given below under § 52.570(c) (4) includes the date March 20, 1974, as well as the date corresponding to the submittal of the revisions which are the subject of the present notice, July 23, 1974.)

In the judgment of the Administrator, the approval of the present Georgia plan revisions will not hinder the attainment and maintenance of the national ambient air quality standards in that State, and they are hereby approved.

This action is effective immediately. The Administrator finds that good cause exists for making these changes immediately effective since they are already in effect under State law, and the Administrator's approval of them imposes no additional regulatory burden on affected facilities.

(Sec. 110(a), Clean Air Act (42 U.S.C. 1857c-5(a)))

Dated: May 12, 1975.

RUSSELL E. TRAIN,  
Administrator.

Part 52 of Chapter I, Title 40, Code of Federal Regulations, is amended as follows:

#### Subpart L—Georgia

In § 52.570, paragraph (c) (4) is amended by inserting in chronological order the dates March 20 and July 23 [1974].

[FR Doc. 75-12960 Filed 5-16-75; 8:45 am]

[FRL 361-8]

### PART 52—APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

#### Iowa: Approval of Compliance Schedules

On May 31, 1972 (37 FR 10842), pursuant to section 110 of the Clean Air Act and 40 CFR Part 51, the Administrator approved portions of State plans for implementation of the national ambient air quality standards.

The State of Iowa submitted to the Environmental Protection Agency compliance schedules to be considered as proposed revisions to the approved plan pursuant to 40 CFR 51.6. The approvable schedules were adopted by the State and

## RULES AND REGULATIONS

submitted to the Environmental Protection Agency for review after notice and public hearings. The public hearings were held in accordance with the procedural requirements of 40 CFR 51.4 and 51.6 and the substantive requirements of 40 CFR 51.15 pertaining to compliance schedules. The compliance schedules have been reviewed and determined to be consistent with the approved control strategies of Iowa.

Accordingly, the Administrator proposed approval of these schedules on September 23, 1974, and September 24, 1974, in the FEDERAL REGISTER, 39 FR 34065 and 34302. The proposed approval and disapproval of these schedules published in the September 23, 1974, and September 24, 1974, FEDERAL REGISTER provided for a 30-day comment period. No comments concerning these schedules were received. Set forth below are specific compliance schedules which the Administrator approved pursuant to 40 CFR 51.8.

Each approved revision establishes a new date by which the individual source must comply with the applicable emission limitation in the federally-approved State Implementation Plan. This date is indicated in the table below, under the heading "Final Compliance Date." In all cases, the schedules include incremental steps toward compliance with the applicable emission limitations. While the tables below do not include these interim dates, the actual compliance schedules do.

Under Iowa law, the compliance schedule is not enforceable after the date on which the associated variance expires and variances cannot extend for more than one year. Therefore, to the extent that the Iowa schedules extend past the variance expiration date, they are not legally enforceable at this time. For this reason, the Environmental Protection Agency's approval of each compliance schedule is unconditional only as to that part of the schedule covered by the initial variance. Approval of the remainder of the schedule will be conditioned upon the State's renewal of the variance in identical form and substance to that included in the schedule submitted to the Environmental Protection Agency and approved herein. If the variance is renewed in this manner, the condition precedent will be satisfied and the approval of the next segment of the schedule will not require further action by the State or this Agency. If the variance is not renewed, or is modified from the version that is federally-approved herein, the condition will not be fulfilled, the approval of the remainder of the schedule would not be effective, and the State's immediately-effective regulation will again become federally enforceable. The schedules were immediately effective on the date of adoption. An "Effective Date" is not indicated on the table. The "Variance Expiration Date" is included instead.

Provisional approval of final compliance dates and extensions of variances is justifiable only because of the one-year variance limitation in the law of Iowa.

Since there will be no substantive changes in the schedules set forth below and public hearings were held on the complete schedules, there is no reason to require compliance with 40 CFR 51.6 procedures at the time Iowa renews each variance.

In the indication of approval of individual compliance schedules, the individual schedules are included by reference only. In addition, since the large number of compliance schedules preclude setting forth detailed reasons for approval of each individual schedule in the FEDERAL REGISTER, an evaluation report has been prepared for each individual compliance schedule. These evaluation reports are available for public inspection at the Environmental Protection Agency Regional Office, 1735 Baltimore, Kansas City, Missouri. The compliance schedules and the State Implementation Plans are available for public inspection at the Environmental Protection Agency Regional Office; the Environmental Protection Agency, Division of Stationary Source Enforcement, 401 M Street, SW., Washington, D.C.; and the Iowa Department of Environmental Quality, 3020 Delaware, Des Moines, Iowa.

This rulemaking will become effective immediately upon publication. The Agency finds that good cause exists for not deferring the effective date of this rulemaking because the compliance schedules are already in effect under State law and federal approval imposes no new burdens.

(Section 110 of the Clean Air Act of 1970, as amended, 42 U.S.C. 1857c-5)

Dated: May 12, 1975.

RUSSELL E. TRAIN,  
Administrator.

Part 52 of Chapter I, Title 40 of the Code of Federal Regulations is amended as follows:

Subpart Q—Iowa

1. In § 52.825, the table in paragraph (c) is amended as follows:

[ERL 362-1]

PART 52—APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

Kansas: Approval of Compliance Schedules

On May 31, 1972 (37 FR 10842), pursuant to Section 110 of the Clean Air Act and 40 CFR Part 51, the Administrator approved portions of the State plans for implementation of the national ambient air quality standards, and in the September 22, 1972, FEDERAL REGISTER (37 FR 19809), the Administrator promulgated § 52.876 Compliance Schedules as a portion of the Kansas Implementation Plan.

The State of Kansas submitted to the Environmental Protection Agency compliance schedules as variances and enforcement orders to be considered as proposed revisions to the approved plan pursuant to 40 CFR 51.6. The approvable schedules were adopted by the State and submitted to the Environmental Protection Agency after notice and public hearings in accordance with the procedural requirements of 40 CFR 51.4, 51.6, and 51.7(d) (2), and the substantive requirements of 40 CFR 51.15 pertaining to compliance schedules. These compliance schedules have been determined to be consistent with the approved control strategy of Kansas. The schedules to be disapproved fail to meet the requirements of 40 CFR 51.15(b) (1), in that the compliance schedules extend beyond the attainment date in the State Implementation Plan. The schedule for Western Iron & Foundry Company, Wichita, is disapproved as not being expeditious.

Accordingly, the Administrator proposed approval and disapproval of these

schedules on February 26, 1975, in the FEDERAL REGISTER, 40 FR 8225. The proposed approval of these schedules published in the February 26, 1975, FEDERAL REGISTER provided for a 30-day comment period. No comments concerning these schedules were received. The Environmental Protection Agency has reviewed and considered the records of the public hearings held by Kansas. Set forth below are specific compliance schedules which the Administrator approves or disapproves pursuant to 40 CFR 51.8.

Each approved revision establishes a new date by which the individual source must comply with the applicable emission limitation in the federally approved State Implementation Plan. This date is indicated in the table below, under the heading "Final Compliance Date." In all cases, the schedules include incremental steps toward compliance with the applicable emission limitations. While the tables below do not include these interim dates, the actual compliance schedules do. The "Effective Date" column in the table refers to the date the compliance schedule becomes effective for purposes of federal enforcement.

In the indication of approval of individual compliance schedules, the individual schedules are included by reference only. In addition, since the large number of compliance schedules preclude setting forth detailed reasons for approval of individual schedules in the FEDERAL REGISTER, an evaluation report has been prepared for each individual compliance schedule. Copies of these evaluation reports are available for public inspection at the Environmental Protection Agency Regional Office, 1735 Baltimore, Kansas

## RULES AND REGULATIONS

City, Missouri. The compliance schedules and State Implementation Plans are available for public inspection at the Environmental Protection Agency Regional Office; the Environmental Protection Agency, Division of Stationary Source Enforcement, 401 M Street, Washington, D.C.; and the Kansas State Department of Health and Environment, Building 740, Forbes Air Force Base, Topeka, Kansas.

This rulemaking will be effective May 19, 1975. The Agency finds that good cause exists for not deferring the effective date of this rulemaking because the compliance schedules are already in effect under State law and federal approval imposes no new burdens.

(Sec. 110 Clean Air Act, 1970; as amended, 42 U.S.C. 1857c-5.)

Dated: May 12, 1975.

RUSSELL E. TRAIN,  
Administrator.

Part 52 of Chapter I, Title 40 of the Code of Federal Regulations is amended as follows:

## Subpart R—Kansas

1. In § 52.876, the tables in paragraph (c) (1) and (c) (2) are amended by adding the following:

§ 52.876 Compliance schedules.

(c) . . .

# PART 85—CONTROL OF AIR POLLUTION FROM NEW MOTOR VEHICLES AND NEW MOTOR VEHICLE ENGINES

## Technical Amendments

The need for a number of technical amendments has been identified. These amendments are set forth in this publication and are described in the table below.

The Agency finds that good cause exists for omitting as unnecessary a notice

of proposed rulemaking, public rulemaking procedure, and postponement of effective date in the issuance of these amendments, in that (1) none of the changes in any way invalidate the test procedures currently used by the manufacturers as prescribed by regulation for the 1975 and 1976 model year and (2) the changes primarily provide for more uniform and accurate certification testing programs with no additional burden placed on the regulated industry.

### Explanation of technical amendment changes

Section	Change	Reason
1. 85.075-7(d)(2), 85.175-7(d)(2), 85.275-7(d)(2), and 85.376-7(d)(2).	Modify the data reporting provision to specify the desired degree of accuracy in reporting emission data results.	The provision required unnecessary precision for emission data results which were an order of magnitude below the applicable emission standard. Specifications were inadvertently omitted in July 10, 1974, publication.
2. 85.075-12(b)(1) and 85.275-12(b)(1).	Specify the volume and temperature of test fuel to be added to the test vehicle when performing an exhaust emission test.	
3. 85.075-15(a)(2), 85.175-15(a)(2), 85.275-15(a)(2), and 85.376-15(a)(2).	Add language allowing for approval of alternate road load determination procedure than those currently specified in the regulations.	Other methods of measuring road load power have been developed which provide for accurate and repeatable results. The present regulations do not allow for the use of these methods.

Part 85 of Chapter I, Title 40 of the Code of Federal Regulations as applicable beginning with the 1975 model year is amended as follows, effective on May 19, 1975.

(Secs. 202, 306, and 301(a), Clean Air Act; as amended (42 U.S.C. 1857f-1, 1857f-5, 1857g(a)).

Dated: May 12, 1975.

RUSSELL E. TRAIN,  
Administrator.

1. In § 85.075-7, paragraph (d)(2) is revised to read as follows:

§ 85.075-7 Mileage accumulation and emission standards.

(d) . . . . .  
(2) The results of all emission tests shall be rounded, using the "Rounding Off Method" specified in ASTM E 26-67, to the number of places to the right of the decimal point indicated by expressing the applicable standard in § 85.075-1 to three significant figures.

2. In § 85.075-15, paragraph (e)(2) is revised to read as follows:

§ 85.075-15 Dynamometer procedure.

(e) . . . . .  
(2) The road load power listed in the table above shall be used, or the vehicle manufacturer may determine the road load power by an alternate procedure requested by the manufacturer and approved in advance by the Administrator, or the vehicle manufacturer may determine the road load power by the following procedure and request its use:

(i) Measuring the absolute manifold pressure of a representative vehicle, of the same equivalent inertia weight class, when operated on a level road under balanced wind conditions at a true speed of 50 m.p.h., and

(ii) Noting the dynamometer indicated road load horsepower setting required to reproduce that manifold pressure when the same vehicle is operated on the dynamometer at a true speed of 50 m.p.h. The tests on the road and on the dynamometer shall be performed with the same vehicle ambient absolute pressure (usually barometric), i.e., within ±5 mm. Hg.

(iii) The road load power shall be determined according to the procedure outlined in Appendix II and adjusted according to the following if applicable.

3. In § 85.175-7, paragraph (d)(2) is revised to read as follows:

§ 85.175-7 Mileage accumulation and emission standards.

(d) . . . . .  
(2) The results of all emission tests shall be rounded, using the "Rounding Off Method" specified in ASTM E 26-67,

to the number of places to the right of the decimal point indicated by expressing the applicable standard in § 85.175-1 to three significant figures.

4. In § 85.175-13, paragraph (e)(2) is revised to read as follows:

§ 85.175-13 Dynamometer procedure.

(e) . . . . .  
(2) The road load power listed in the table above shall be used, or the vehicle manufacturer may determine the road load power by an alternate procedure requested by the manufacturer and approved in advance by the Administrator, or the vehicle manufacturer may determine the road load power by the following procedure and request its use:

(i) Measuring the absolute manifold pressure of a representative vehicle, of the same equivalent inertia weight class, when operated on a level road under balanced wind conditions at a true speed of 50 m.p.h., and

(ii) Noting the dynamometer indicated road load horsepower setting required to reproduce that manifold pressure when the same vehicle is operated on the dynamometer shall be performed with the same vehicle ambient absolute pressure (usually barometric), i.e., within ±5 mm. Hg.

(iii) The road load power shall be determined according to the procedure outlined in Appendix II and adjusted according to the following if applicable.

5. In § 85.275-7, paragraph (d)(2) is revised to read as follows:

§ 85.275-7 Mileage accumulation and emission standards.

(d) . . . . .  
(2) The results of all emission tests shall be rounded, using the "Rounding Off Method" specified in ASTM E 26-67, to the number of places to the right of the decimal point indicated by expressing the applicable standard in § 85.275-1 to three significant figures.

6. In § 85.275-15, paragraph (e)(2) is revised to read as follows:

§ 85.275-15 Dynamometer procedure.

(e) . . . . .  
(2) The road load power listed in the table above shall be used, or the vehicle manufacturer may determine the road load power by an alternate procedure requested by the manufacturer and approved in advance by the Administrator, or the vehicle manufacturer may determine the road load power by the following procedure and request its use:

(i) Measuring the absolute manifold pressure of a representative vehicle, of the same equivalent inertia weight class, when operated on a level road under balanced wind conditions at a true speed of 50 m.p.h., and

(ii) Noting the dynamometer indicated road load horsepower setting required to reproduce that manifold pressure when

the same vehicle is operated on the dynamometer at a true speed of 50 m.p.h. The tests on the road and on the dynamometer shall be performed with the same vehicle ambient absolute pressure (usually barometric), i.e., within ±5 mm. Hg.

(iii) The road load power shall be determined according to the procedure outlined in Appendix II and adjusted according to the following if applicable.

7. In § 85.076-12, paragraph (b)(1) is revised to read as follows:

§ 85.076-12 Vehicle preconditioning.

(b) . . . . .  
(1) The fuel tank(s) shall be drained and filled with the specified test fuel (§ 85.075-10(a)) to the prescribed tank(s) fuel volume, defined in § 85.002 (a)(20). The fuel added to the vehicle tank(s) shall have an initial temperature of no more than 86° F. The evaporative emission control system or device shall not be abnormally purged or loaded as a result of draining or fueling the tank(s).

8. In § 85.376-7, paragraph (d)(2) is revised to read as follows:

§ 85.376-7 Mileage accumulation and emission standards.

(d) . . . . .  
(2) The results of all emission tests shall be rounded, using the "Rounding Off Method" specified in ASTM E 26-67, to the number of places to the right of the decimal point indicated by expressing the applicable standard in § 85.376-1 to three significant figures.

9. In § 85.376-13, paragraph (e)(2) is revised to read as follows:

§ 85.376-13 Dynamometer procedure.

(e) . . . . .  
(2) The road load power listed in the table above shall be used, or the vehicle manufacturer may determine the road load power by an alternate procedure requested by the manufacturer and approved in advance by the Administrator, or the vehicle manufacturer may determine the road load power by the following procedure and request its use:

(i) Measuring the absolute manifold pressure of a representative vehicle, of the same equivalent inertia weight class, when operated on a level road under balanced wind conditions at a true speed of 50 m.p.h., and

(ii) Noting the dynamometer indicated road load horsepower setting required to reproduce that manifold pressure when the same vehicle is operated on the dynamometer at a true speed of 50 m.p.h. The tests on the road and on the dynamometer shall be performed with the same vehicle ambient absolute pressure (usually barometric), i.e., within ±5 mm. Hg.

(iii) The road load power shall be determined according to the procedure outlined in Appendix II and adjusted according to the following if applicable.

## SUBCHAPTER N—EFFLUENT GUIDELINES AND STANDARDS

[FRL 375-3]

## PART 416—PLASTICS AND SYNTHETICS MANUFACTURING POINT SOURCE CATEGORY

### Miscellaneous Amendments

The FEDERAL REGISTER for April 5, 1974 (39 FR 12501 *et seq.*) contained final effluent limitations guidelines for existing sources and standards of performance and pretreatment standards for new sources in the Plastics and Synthetics Point Source Category pursuant to sections 301, 304 (b) and (c), 306(b) and 307(c) of the Federal Water Pollution Control Act as amended 33 U.S.C. 1251, 1311, 1314 (b) and (c), 1316(b), and 1317(c); 86 Stat. 816 *et seq.*; P.L. 92-500 (the Act). The publication was corrected for several errors in the FEDERAL REGISTER for July 8, 1974 (39 FR 24893 *et seq.*).

The promulgated effluent limitations guidelines and standards are hereby being changed to: (1) correct a minor error in the new source performance standard for the product High Density Polyethylene polyform process in the polyethylene subcategory; (2) revise the regulation to provide for reconsideration of the acrylics subcategory limitations and new source performance standards and suspension of their applicability during the reconsideration period and (3) withdraw COD as a limitation parameter for 1977.

The error in the polyethylene subcategory for high density polyethylene polyform process new source performance standard for BOD5 is very minor. The 1977 limitations and the new source performance standards are based on the same effluent concentration (15 mg/l), hydraulic flow (260 gal/1000 lb) and variability and should be the same value numerically. Correcting the error changes the standard from 0.054 to 0.052.

In the acrylics subcategory, questions raised concerning the hydraulic flow chosen for 1977 have prompted the Agency to reexamine the data supporting that flow. The result of such a reexamination could conceivably result in revision and/or further subcategorization of the acrylics industry. The flows for 1983 and for new sources will also be reexamined. The need to reexamine the hydraulic flows for 1977, 1983 and new sources makes suspension of the whole of the Acrylics regulation appropriate. During the period of suspension, the Agency will gather additional data and will solicit the cooperation of the industry to this end.

The COD limitations were included in the regulation because COD is a measure of the chemical by-product waste of

the manufacturing process and falls under the definition of pollutant contained in the Act (§ 502(6)). All of the 1977 COD limitations were noncontrolling as to technology; that is, the COD limitations were such that adequate removal of the BOD5 would usually result in adequate removal of COD. The limitation numbers were derived from data showing the removal of COD which accompanies reduction of BOD5 to the levels set in the effluent limitations for each subcategory. A plant which is achieving the BOD5 removal required by the regulations would not need to use any additional technology to meet the proposed COD levels for BPCTCA. The presence of a COD limitation nonetheless fulfilled an important function by requiring adequate handling and treatment of discarded (bad) batches of reactants and products, so as to avoid shock or peak COD loadings which would be inadequately treated but would not be discovered by a BOD5 analysis. In addition, the COD test is a much quicker and more convenient test for the presence of oxygen demanding pollutants than is the BOD5 test. Since the BPCTCA (1977) COD limits are liberal and would be easily attainable if the BOD5 limits are met, they are being dropped as a limitation parameter for BPCTCA (1977). In order to promote the collection of data on the oxygen demanding parameters of BOD5, COD and TOC (total organic carbon), the Agency is planning to require that a majority of the plants in each subcategory monitor their raw waste loads and treated effluents for BOD5, COD and TOC. This data will be collected for a reasonable period at which time the Agency will consider revising the limitations and standards. The requirement for a COD limit for NSPS will remain unchanged since the standards were based on demonstrated attainable COD concentrations using NSPS technology.

This amendment does not involve any changes which would affect any environmental or nonenvironmental impact. The changes set forth below correct the error and make the revisions.

In FR Doc. 74-7512 appearing on pages 12502 through 12522 in the issue of April 5, 1974, make the following changes:

1. In § 416.55(c), the BOD5 effluent limitations, "Average of daily values of 30 consecutive days shall not exceed"—English units and Metric units shall be corrected to read "0.052".
2. Subpart M, Acrylics Subcategory, shall be suspended until further notice.
3. In § 415.12 (a), (b), (c), the COD effluent limitation shall be withdrawn.
4. In § 416.22, the COD effluent limitation shall be withdrawn.
5. In § 416.32 (a), (b), the COD effluent limitation shall be withdrawn.
6. In § 416.42, the COD effluent limitation shall be withdrawn.
7. In § 416.52 (a), (b), (c), the COD effluent limitation shall be withdrawn.
8. In § 416.62, the COD effluent limitation shall be withdrawn.
9. In § 416.72, the COD effluent limitation shall be withdrawn.

10. In § 416.82, the COD effluent limitation shall be withdrawn.
11. In § 416.92 (a), (b), (c), (d), the COD effluent limitation shall be withdrawn.
12. In § 416.102 (a), (b), (c), the COD effluent limitation shall be withdrawn.
13. In § 416.112 (a), (b), (c), the COD effluent limitation shall be withdrawn.
14. In § 416.122 (a), (b), (c), the COD effluent limitation shall be withdrawn.

Dated: May 12, 1975.

RUSSELL E. TRAIN,  
Administrator.

#### Title 47—Telecommunication

[FCC 75-527; Docket No. 19999; RM-2142]

#### CHAPTER I—FEDERAL COMMUNICATIONS COMMISSION

#### PART 73—RADIO BROADCAST SERVICES

##### FM Broadcast Stations, Table of Assignments

In the matter of amendment of § 73.202(b), table of assignments, FM broadcast stations. (Hollidaysburg, Altoona, Philipsburg, and Bellwood, Pennsylvania).

1. We here dispose of the additional issue posed by John R. Powley, licensee of FM Station WHGM, Channel 280A, Bellwood, Pennsylvania, in timely comments in this proceeding which concerned mutually exclusive proposals to assign Channel 285A to either Altoona or Hollidaysburg, Pennsylvania. Powley supported the assignment of that channel to Hollidaysburg and counterproposed that Channel 280A be assigned to Altoona, Pennsylvania, to more accurately reflect the actual use of the channel. As indicated in the *First Report and Order*, adopted March 26, 1975 (FCC 75-367; 40 Fed. Reg. 15882), Channel 280A presently assigned to Philipsburg, Pennsylvania, is licensed at Bellwood and Station WHGM is allowed a dual city identification—"Bellwood-Altoona."

2. Powley became the licensee at Bellwood under the predecessor of § 73.203 (b) that allowed an application for use of a Class A channel at an unlisted community within 25 miles (now 10) of the listed city of assignment. In March 1969, Station WHGM was granted a dual city identification as "Bellwood-Altoona" under § 73.287 (now § 73.1261) with the understanding that WHGM's primary obligation to Bellwood would remain unchanged.

3. In the *First Report and Order*, we decided to assign Channel 285A to Altoona as allowing the greater flexibility since under § 73.203(b), the channel could then be licensed to Hollidaysburg, but the reverse is not permissible (these communities are about five miles apart). We also decided to deny Powley's counterproposal but to amend the FM Table of Assignments to reflect the actual use of Channel 280A at Bellwood on obtaining appropriate concurrence from the Canadian Department of Communica-

tions as required for an FM channel assignment within 250 miles of the Canada-United States border pursuant to the Working Agreement under the Canada-United States FM Agreement of 1947. Such consent has now been given.

4. Accordingly, pursuant to authority in sections 4(i), 303(g) and (r), and 307 (b) of the Communications Act of 1934, as amended, it is ordered, That effective June 20, 1975, the FM Table of Assignments (§ 73.202(b) of the rules) is amended to read as follows for the listed communities:

City	Channel No.
Bellwood, Pennsylvania	280A
Philipsburg, Pennsylvania	

5. It is further ordered, That this proceeding is terminated.

(Secs. 4, 5, 303, 307, 48 Stat., as amended, 1066, 1068, 1082, 1083; 47 U.S.C. 154, 155, 303, 307)

Adopted: May 6, 1975.

Released: May 12, 1975.

FEDERAL COMMUNICATIONS COMMISSION,

VINCENT J. MULLINS,  
Secretary.

[FR Doc. 75-13079 Filed 5-16-75; 8:45 am]

[FCC 75-520; Docket No. 20204]

#### PART 87—AVIATION SERVICES

##### Airdrome Control Stations

In the matter of amendment of Part 87 of the Commission's rules to delete the requirement for Airdrome Control Stations to maintain a continuous listening watch on 122.5 MHz during hours of operation.

1. On October 15, 1974, we released a notice of proposed rule making in this Docket, proposing to amend Part 87 of the rules by deleting the requirement for Airdrome Control Stations to maintain a continuous listening watch on 122.5 MHz during hours of operation. It was published in the *FEDERAL REGISTER* on October 21, 1974 (39 FR 37399).

2. The requirement for all Airdrome Control Stations to monitor 122.5 MHz originated many years ago when VHF radios were manufactured with a very limited number of transmit channels and a tunable receiver. By making 122.5 MHz a universal frequency (or by designating an alternate frequency in the band 121.975-122.775 MHz on which aircraft could call), the aircraft operator could then tune his receiver to a regularly assigned frequency of the facility with which he wished to speak. This gave a much greater degree of flexibility to these aircraft radios with rather limited capability. This equipment has been largely replaced by radios with more channels, thus the dependence on a single transmit channel rarely exists.

3. On July 11, 1974, the Federal Aviation Administration (FAA) advised the FCC that it was no longer FAA policy to require mandatory monitoring of the frequency 122.5 MHz by FAA air traffic control towers. They indicated they did not

believe such a change in listening requirements for FCC licensed Airdrome Control Stations would adversely affect life and property in the air.

4. One comment was received which was from the Aircraft Owners and Pilots Association. They concurred in the proposed rule making.

5. In view of the foregoing, it is ordered, Pursuant to the provisions of sections 4(i) and 303 (b) and (r) of the Communications Act of 1934, as amended, that effective June 20, 1975, Part 87 of the Commission's rules is amended as set forth below. It is further ordered, That this proceeding is terminated.

(Secs. 4, 303, 48 Stat., as amended, 1066, 1082; 47 U.S.C. 154, 303.)

Adopted: May 10, 1975.

Released: May 12, 1975.

FEDERAL COMMUNICATIONS COMMISSION,

VINCENT J. MULLINS,  
Secretary.

Part 87 of Chapter I of Title 47 of the Code of Federal Regulations is amended as follows:

Section 87.403(b) is revised to read as follows:

§ 87.403 Scope of Service.

(b) The licensee of an airdrome control station shall maintain a continuous listening watch during hours of operation on the following frequencies:

121.5 MHz  
3023.5 kHz (Alaska only)

Provided, however, The license of an airdrome control station may be exempt from these watch requirements when authorized by the Commission after a satisfactory showing has been made that an exemption will not adversely affect life and property in the air.

[FR Doc. 75-13077 Filed 5-16-75; 8:45 am]

[FCC 75-532; Docket 19662; RM-1762; RM-1692]

#### PART 89—PUBLIC SAFETY RADIO SERVICES

##### Report and Order

In the matter of amendment of Part 89 of the Commission's rules to permit expanded use of tone and impulse signaling in the Public Safety Radio Services.

1. On December 29, 1972, the Commission released a memorandum opinion and order and notice of proposed rulemaking (38 FR 808) in the above entitled matter.

2. The notice sought comments on the Commission's proposal to expand the permissible scope of secondary, point-to-point, tone signaling operations on mobile service frequencies in the Police, Fire, and Local Government Radio Services; to allow this secondary tone signaling capability in the Highway Maintenance and in the Forestry Conservation Radio Services; and to shorten the maximum duration of any one transmission from six to two seconds. Comments in response

to this proceeding were received from parties listed in Appendix A and have been carefully considered.

3. The rule changes proposed reflect recent trends in equipment development and increased interest in using tone and impulse signaling for various point-to-point alarm and confirmation functions. As noted in the Notice, the Commission believes the state-of-the-art has advanced sufficiently in the past several years to accommodate this proposed expansion of secondary tone signaling operations without causing significant interference problems to the primary use of land mobile frequencies; namely, voice communications. The basic proposal here would expand the scope of the rules to allow transmission of tones which indicate abnormal conditions and confirm the status of equipment and would permit secondary signaling operations in the Highway Maintenance, and Forestry Conservation Radio Services. This proposal was unanimously supported in the comments. The comments of the California Communications Division were typical of the reaction:

The rule changes requested will increase the capability of the Public Safety Services to meet their commitments to the public by increasing efficiency and providing vital information and/or alarms. The extension of the technique to the Forestry Conservation and Highway Maintenance Radio Services will allow the State to install intruder and equipment failure alarms in the facilities of state agencies operating in these radio services, but presently denied such alarms. As new techniques and equipment are developed, they can be added without the need for special authorizations or rule waivers.

4. The Commission believes, on the basis of the comments, that the expansion of secondary, point-to-point tone signaling in public safety operations is feasible and that such use would increase the efficiency and effectiveness of the various types of operations conducted in these services. Therefore, we are amending our rules to provide for secondary, point-to-point tone signaling capabilities in the Highway Maintenance and Forestry Conservation Radio Services and to expand the types of signaling permitted in the Public Safety Radio Services to include indication of abnormal conditions and confirmation of status.

5. However, we believe it is important to adopt measures which would limit the possibility of interference to mobile communications while allowing reasonable opportunities for licensees to conduct secondary tone signaling operations. For this purpose we proposed in the Notice to limit the message length to two seconds. We also decided to maintain the maximum permissible power at 50 watts.

6. Many of the comments opposed the Commission's decision to keep the 50 watt power limitation arguing that the restriction substantially restricts the flexibility of their communications systems by requiring additional equipment for alarm signaling operations. As APCO stated:

Operational and economic considerations will dictate in a large number of instances

that existing remote base stations and mobile repeaters be used to transmit the tone and impulse signals contemplated herein. Many such existing transmitters operate with power in excess of 50 watts so the rules as presently proposed would require many licensees to either forego the use of digital signaling techniques or substantially modify their transmitters to permit operation at reduced power during the transmission of digitally encoded data.

7. As pointed out in the Notice, the rules (§ 89.111(a)) require that the power used be no more than the minimum required for satisfactory technical operation. Since none of the comments stated that the 50 watts permitted under the present rules is insufficient to meet normal public safety needs, the Commission concludes that this figure is high enough to permit satisfactory signaling operations. Furthermore, power limitations are necessary to minimize interference. While we want to permit public safety licensees to use their radio facilities to the maximum degree possible, regular base/mobile voice communications must be afforded protection. Therefore, for these reasons we will keep the 50 watt power limitation on signaling operations at the remote alarm site.

8. Another related subject, brought up by the comments, is the use of mobile relays for relaying the alarm signals to a central control site. It is the Commission's opinion that this type of operation would be in the public interest. Mobile relay systems are common, particularly on frequencies above 450 MHz, and, as the comments pointed out, a licensee's system would not be fully useful for the secondary signaling purposes under consideration unless the mobile relay station could also be employed. Accordingly, licensees will be permitted to relay alarm transmissions through mobile relay/repeater stations in order to get extended range. However, if any harmful interference is caused to mobile service operations of any other licensee, the operation must, of course, be discontinued.

9. The other issue discussed in the comments was the Commission's proposal to limit the message length to two seconds, thereby precluding voice signaling operations. Many of the commenting parties argued that voice alarm devices have worked well in the past in police operations and should be continued. In addition, it was noted that by requiring the licensee to use complex, more expensive digital techniques, the Commission would preclude the use of radio facilities for alarm purposes by the smaller or rural police safety entities. The main opposition was submitted by Varda, which makes voice alarm equipment. Varda argued that the Commission's main reason for deleting voice alarm techniques (shorter transmissions), is not valid in the field of police radio alarms. They contend that voice alarms are usually transmitted directly to the cars, patrolmen and motorcycle officers in the immediate vicinity; while digital messages must be sent to decoders at the police station, where they must be decoded, the source of the alarm

identified, and then the message must be rebroadcast by voice to cars, patrolmen, etc., in the area of the intrusion. This process, it is argued, is cumbersome, expensive, and does not save transmitter air time.

10. We agree that voice alarm devices can be useful in police operations. Also we note that, according to several law enforcement studies, police alarms have a very low duty cycle and thus occupy very little transmitter air time. Accordingly, the Commission believes the public interest will be served if voice alarm techniques are permitted. However, the Commission still feels the transmission time for alarm transmissions should be less than the 30 seconds permitted under the present rules. Therefore, we are adopting the following standards for transmissions originating at the remote site. For voice alarm operations each alarm or signal will be limited to 3 transmissions, not to exceed six seconds each. For non-voice operations each alarm or signal will be limited to 3 transmissions, not to exceed two seconds each. The alarms may be staggered in order to improve the possibility of reception or they may be continuous. Automatic interrogation of remote sites will be permitted. However, in order to keep this a secondary operation, we feel restrictions should be placed on automatic interrogations from the base station. Therefore, we will limit the period during which the base station may interrogate the remote sites automatically and the remote sites may respond to ten seconds out of any 60-second period. For systems using manual techniques to verify status, etc., each transmission will be limited to two seconds.

11. In order for the Commission to know whether a licensee is using a mobile service frequency secondarily in a fixed operation, all new applicants proposing this type of operation will be required to so state in their application. The license issued will reflect this mode of operation by classifying the remote station (alarm site) as operational fixed, with a 50 watt power limit and a non-voice emission designator, when appropriate. Licensees currently operating alarm systems and requesting renewal of their license will also be required to supply the same information with their renewal applications.

12. In view of the foregoing, it appears that the public interest can be served by adopting the rule amendments set forth below. Accordingly, it is ordered That, pursuant to authority contained in section 303 of the Communications Act of 1934, as amended, Part 89 of the Commission's rules and regulations is amended effective June 20, 1975. It is further ordered, That this proceeding is hereby terminated.

(Secs. 4, 303, 48 Stat., as amended, 1066, 1082; 47 U.S.C. 154, 303.)

Adopted: May 8, 1975.

Released: May 14, 1975.

FEDERAL COMMUNICATIONS  
COMMISSION,

[SEAL] VINCENT J. MULLINS,  
Secretary.

Part 89 of the Commission's rules is amended as follows:

1. A new § 89.126 is added to read as follows:

§ 89.126 Secondary alarm and signaling operations.

In the Local Government, Police, Fire, Highway Maintenance and Forestry Conservation Radio Services, fixed operations may be authorized for tone or impulse signalling on mobile service frequencies above 25 MHz subject to the condition that harmful interference is not caused to the primary mobile service operation of any other licensee subject to the following limitations. In the Police Radio Service voice (A3 or F3) operation may also be authorized for alarm purposes.

(a) Secondary fixed operations under this section may be used only for the following purposes:

(1) Indication of equipment malfunction.

(2) Actuation of a device to indicate the presence of an intruder, fire, or other hazardous condition on the property under the protection of the licensee.

(3) Indication of an abnormal condition in facilities under the jurisdiction of the licensee that if not promptly reported would result in danger to human life.

(4) Transmissions as may be necessary to (i) verify status of equipment (ii) adjust operating conditions (iii) correct any abnormal condition or (iv) to activate devices that alert the public to a condition affecting the safety of life or property.

(5) Confirmation of status, or that an operation or correction has been accomplished or that the alerting device has been activated.

(b) For systems authorized after June 20, 1975 to be used for the purposes outlined in paragraph (a) of this section the maximum duration of any one voice alarm may not exceed six seconds and shall not be transmitted more than three times.

(c) For systems authorized after June 20, 1975 to be used for the purposes outlined in paragraph (a) of this section the maximum duration of any one non-voice signal may not exceed two seconds and shall not be transmitted more than three times.

(d) Systems employing automatic interrogation shall be limited to non-voice techniques and shall not be activated for this purpose more than ten seconds out of any 60 second period. This 10 second time frame includes both transmit and response times.

(e) The bandwidth shall not exceed that authorized to the licensee for this primary operation on the frequency concerned.

(f) Frequency loading resulting from the use of secondary signalling will not be considered in whole or in part as a justification for authorizing additional frequencies in the licensee's mobile system.

(g) A mobile service frequency may not be used exclusively for secondary signalling.

(h) The plate power input to the final radio frequency stage shall not exceed 50 watts. (At the remote site)

(i) A1, A2, A9, F1, F2, or F9 emission may be authorized. In the Police Radio Service A3 or F3 may also be authorized.

(j) Automatic means shall be provided to deactivate the transmitter in the event the carrier remains on for a period in excess of 3 minutes.

(k) Operational fixed stations authorized pursuant to the provision of this paragraph are exempt from the requirements of §§ 89.55(e)(2), 89.113(e) and 89.153.

(l) Base, mobile relay, or mobile stations licensed in this service on frequencies above 25 MHz may transmit secondary tone or impulse signals to receivers subject to the conditions, and for the purposes set forth in § 89.101(m).

§ 89.257 [Amended]

2. Section 89.257(c) is deleted and designated [Reserved].

§ 89.307 [Amended]

3. Section 89.307(e) is deleted and designated [Reserved].

§ 89.357 [Amended]

4. Section 89.357(d) is deleted and designated [Reserved].

#### APPENDIX A

The following parties submitted timely comments and/or reply comments in response to the Notice of Proposed Rule Making in Docket 19662:

## proposed rules

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rulemaking prior to the adoption of the final rules.

### DEPARTMENT OF AGRICULTURE

#### Agricultural Marketing Service

#### [7 CFR Part 944]

#### FRUITS; IMPORT REGULATIONS

#### Avocados

Consideration is being given to the proposal hereinafter set forth which would prescribe requirements for the importations of avocados into the United States pursuant to Part 944—Fruits; Import Regulations (7 CFR Part 944), during the period June 9, 1975, through April 30, 1976. The proposed import regulation would prescribe the same grade requirement for imported avocados as that applicable, pursuant to Order No. 915 (7 CFR Part 915), to avocados grown in South Florida. With respect to maturity the proposed regulation would apply the same minimum size or weight requirements to imported avocados of the Pollock, Catalina, and Trapp varieties as are applicable to Florida avocados of the same varieties. All other imported avocados would be required to meet minimum size or weight requirements comparable to those effective for similar types grown in Florida as variations in characteristics make application of identical requirements impractical. This import regulation would be effective pursuant to section 8e of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601-674).

All persons who desire to submit written data, views, or arguments in connection with the proposal should file the same in quadruplicate with the Hearing Clerk, Room 112A, U.S. Department of Agriculture, Washington, D.C. 20250, not later than May 26, 1975. All written submissions made pursuant to this notice will be made available for public inspection at the office of the Hearing Clerk during regular business hours (7 CFR 1.27(b)). As proposed, the domestic regulation under the marketing order for Florida avocados would become effective June 9, 1975. To prevent the import of immature avocados, the import regulation would be made effective on the same date. Hence, the time available does not permit preliminary notice beyond that herein provided.

It is proposed that 7 CFR § 944.15 be revised as follows:

§ 944.15 Avocado Regulation 23.

(a) On and after the effective time of this section, the importation into the

United States of any avocados is prohibited unless such avocados are inspected and meet the following requirements:

(1) All avocados imported during the period June 9, 1975, through April 30, 1976, shall grade not less than U.S. No. 3.

(2) Avocados of the Pollock variety shall not be imported (i) prior to July 7, 1975; (ii) from July 7, 1975, through July 20, 1975, unless the individual fruit in each lot of such avocados weighs at least 18 ounces or measures at least 3 1/16 inches in diameter; and (iii) from July 21, 1975, through August 4, 1975, unless the individual fruit in each lot of such avocados weighs at least 16 ounces or measures at least 3 1/16 inches in diameter.

(3) Avocados of the Catalina variety shall not be imported (i) prior to September 15, 1975; (ii) from September 15, 1975, through September 21, 1975, unless the individual fruit in each lot of such avocados weighs at least 24 ounces; and (iii) from September 22, 1975, through October 6, 1975, unless the individual fruit in each lot of such avocados weighs at least 22 ounces.

(4) Avocados of the Trapp variety shall not be imported (i) prior to August 18, 1975; (ii) from August 18, 1975, through August 31, 1975, unless the individual fruit in each lot of such avocados weighs at least 14 ounces or measures at least 3 1/16 inches in diameter; and (iii) from September 1, 1975, through September 15, 1975, unless the individual fruit in each lot of such avocados weighs at least 12 ounces or measures at least 3 1/16 inches in diameter.

(5) Avocados of any variety other than Pollock, Catalina, and Trapp varieties, of the West Indian varieties not listed elsewhere in this regulation, shall not be imported (i) prior to July 7, 1975; (ii) from July 7, 1975, through August 3, 1975, unless the individual fruit in each lot of such avocados weighs at least 18 ounces; (iii) from August 4, 1975, through September 7, 1975, unless the individual fruit in each lot of such avocados weighs at least 16 ounces; (iv) from September 8, 1975, through October 5, 1975, unless the individual fruit in each lot of such avocados weighs at least 14 ounces: *Provided*, That any lot of such avocados may be imported without regard to the date or minimum weight requirements of this paragraph if such avocados, when mature, normally change color to any shade of red or purple and any portion of the skin of the individual fruit has changed

to the color normal for that fruit when mature.

(6) Avocados of any variety of the Guatemalan type, including hybrid type seedlings, unidentified Guatemalan and hybrid varieties, and Guatemalan and hybrid varieties not listed elsewhere in the regulation shall not be imported (i) prior to September 22, 1975; (ii) from September 22, 1975, through October 19, 1975, unless the individual fruit in each lot of such avocados weighs at least 15 ounces; and (iii) from October 20, 1975, through December 21, 1975, unless the individual fruit in each lot of such avocados weighs at least 13 ounces.

(7) Notwithstanding the provisions of subparagraphs (2) through (6) of this paragraph regarding the minimum weight or diameter for individual fruit, not to exceed 10 percent, by count, of the individual fruit contained in each lot, may weigh less than the minimum specified and be less than the specified diameter: *Provided*, That such avocados weigh not over 2 ounces less than the applicable specified weight for the particular variety specified in such subparagraphs. Such tolerances shall be on a lot basis, but not to exceed double such tolerances shall be permitted for an individual container in a lot.

(b) The Federal or Federal-State Inspection Service, Fruit and Vegetable Division, Agricultural Marketing Service, United States Department of Agriculture, is hereby designated as the governmental inspection service for the purpose of certifying the grade, size, quality, and maturity of avocados that are imported into the United States. Inspection by the Federal or Federal-State Inspection Service with appropriate evidence thereof in the form of an official inspection certificate, issued by the respective service, applicable to the particular shipment of avocados, is required on all imports of avocados. Such inspection and certification services will be available upon application in accordance with the rules and regulations governing inspection and certification of fresh fruits, vegetables, and other products (7 CFR Part 51) but, since inspectors are not located in the immediate vicinity of some of the small ports of entry, such as those in southern California, importers of avocados should make arrangements for inspection, through the applicable one of the following offices, at least the specified number of days prior to the time when the avocados will be imported:

## PROPOSED RULES

Ports	Office	Advance notice (in days)
All Texas points.	L. M. Denbo, 506 South Nebraska Ave., San Juan, Tex. 78594, Phone (512) 787-4001.	1
	or Charles E. Parragon, 724 East Overland, El Paso, Tex. 79901, Phone (915) 543-7723.	1
All New York points.	Carmine J. Cavallo, Room 25A, Hunts Point Market, Bronx, N.Y. 10474, Phone (212) 991-7696 and 7699.	1
	or Charles D. Renick, 176 Niagara Frontier Food Terminal—Room 8, Buffalo, N.Y. 14206, Phone (716) 824-1565.	1
All Arizona points.	B. O. Morgan, 225 Terrace Ave., Nogales, Ariz. 85621, Phone (602) 287-2902.	1
All Florida points.	Lloyd W. Boney, 1350 NW 12th Ave.—Room 530, Miami, Fla. 33136, Phone (305) 234-6116.	1
	or J. T. Scroggs, 775 Warner Lane, Orlando, Fla. 32814, Phone (305) 864-9511.	1
	or Johnnie L. Corbett, Unit 46—2306 North Edgewood Ave., Jacksonville, Fla. 32204, Phone (904) 454-5883.	1
All California points.	Daniel P. Thompson, 784 South Central Ave.—Room 205, Los Angeles, Calif. 90021, Phone (213) 623-6756.	3
All Louisiana points.	Jesse M. Anderson, 5627 Federal Office Bldg., 701 Loyola Ave., New Orleans, La. 70113, Phone (504) 589-6741 and 6742.	1
All other points.	D. S. Matheson, F. & V. Division—AMS—USDA, Washington, D.C. 20250, Phone (202) 447-5870.	3

(c) Inspection certificates shall cover only the quantity of avocados that is being imported at a particular port of entry by a particular importer.

(d) The inspection performed, and certificates issued, by the Federal or Federal-State Inspection Service shall be in accordance with the rules and regulations of the Department governing the inspection and certification of fresh fruits, vegetables, and other products (7 CFR Part 51). The cost of any inspection and certification shall be borne by the applicant therefor.

(e) Each inspection certificate issued with respect to any avocados to be imported into the United States shall set forth, among other things:

- (1) The date and place of inspection;
- (2) The name of the shipper or applicant;
- (3) The commodity inspected;
- (4) The quantity of the commodity covered by the certificate;
- (5) The principal identifying marks on the container;
- (6) The railroad car initials and number, the truck and the trailer license number, the name of the vessel, or other identification of the shipment; and
- (7) The following statement, if the facts warrant: Meets U.S. import requirements under section 8e of the Agricultural Marketing Agreement Act of 1937, as amended.

(f) Notwithstanding any other provisions of this regulation, any importation of avocados which, in the aggregate, does not exceed 55 pounds may be imported without regard to the restrictions specified herein.

(g) It is hereby found that the application of the maturity restrictions being imposed, pursuant to Order No. 915 (7 CFR Part 915), upon avocados grown in South Florida to imported avocados, other than of the Pollock, Catalina, and Trapp varieties, is not practicable because of variations in characteristics between the domestic and imported avocados; and the maturity restrictions applicable to imported avocados other than of the Pollock, Catalina, and Trapp varieties are comparable to those imposed upon the domestic commodity. The quality restrictions for all imported avocados, and the maturity restrictions for imported avocados of the Pollock, Catalina, and Trapp varieties, are the same as those being imposed upon the domestic commodity.

(h) No provisions of this section shall supersede the restrictions or prohibitions on avocados under the Plant Quarantine Act of 1912.

(i) Nothing contained in this section shall be deemed to preclude any importer from reconditioning, prior to importation, any shipment of avocados for the purpose of making it eligible for importation.

(j) The terms relating to grade, as used herein, shall have the same meaning as when used in the United States Standards for Florida Avocados (7 CFR 51.3050-51.3069). "Diameter" shall mean the greatest dimension measured at right angles to a line from the stem to the blossom end of the fruit. "Importation" means release from custody of the United States Bureau of Customs.

Dated: May 13, 1975.

CHARLES R. BRADER,  
Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service.

[FR Doc.75-13007 Filed 5-16-75; 8:45 am]

## DEPARTMENT OF LABOR

Occupational Safety and Health Administration

[29 CFR Part 1910]

[Docket No. OSH-87]

## STANDARD FOR EXPOSURE TO INORGANIC ARSENIC

Proposed Standard; Extension of Time To File Post-Hearing Comments

On January 21, 1975, notice was published in the FEDERAL REGISTER (40 FR 3392), of a proposed standard for inorganic arsenic pursuant to the authority in section 8(b) of the Williams-Steiger Occupational Safety and Health Act of 1970 (84 Stat. 1593, 29 U.S.C. 655), Secretary of Labor's Order No. 12-71 (36 FR 8754), and 29 CFR Part 1911.

In accordance with that notice, an informal public hearing was held, under

section 6(b) of the Act and 29 CFR Part 1911, on April 8, 9, 10, 11, 14, 15 and 16, 1975. At the conclusion of the hearing, the presiding Administrative Law Judge set May 15, 1975, as the final date for filing written post-hearing comments containing additional evidence, and June 13, 1975, as the final date for the submission of post-hearing statements of position and analysis.

Subsequent to the conclusion of the hearing, one of the hearing participants requested that the time period for the filing of post-hearing comments be extended to permit the submission of new, relevant evidence.

Therefore, in order to provide for receipt of that, and other relevant evidence, and to allow a reasonable period for statements of position and analysis, notice is hereby given that the period for filing post-hearing evidence on the proposal for inorganic arsenic will be extended until June 13, 1975, and the period for filing statements of position and analysis will be extended until July 8, 1975.

Notice is further given that all submissions made on or after May 27, 1975, should be sent to the Technical Data Center, New Department of Labor Building, Room 3620, 200 Constitution Avenue, NW., Washington, D.C. 20210.

The record of this proceeding, including post-hearing submissions will be available for inspection and copying at the present address up until May 23, 1975. Thereafter it will be available at the above address.

(Secs. 6, 8(g), Pub. L. 91-59, 84 Stat. 1593, 1600 (29 U.S.C. 655, 657), Secretary of Labor's Order No. 12-71 (36 FR 8754))

Signed at Washington, D.C. this 14th day of May 1975.

JOHN STENDER,  
Assistant Secretary of Labor.

[FR Doc.75-13143 Filed 5-16-75; 8:45 am]

## DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Food and Drug Administration

[21 CFR Part 26]

## NUTRITIVE SWEETENERS

Proposal To Amend Standards of Identity for Glucose Sirup and Dried Glucose Sirup

The Commissioner of Food and Drugs is proposing to amend the standards of identity for glucose sirup (21 CFR 26.3) and dried glucose sirup (21 CFR 26.4) to provide for a distinctive optional name for each such food when it is made from sorghum grain. The purpose of this proposal is to minimize confusion between the names of sirups made from sorghum grain starch and the names of sirups derived from the juice of sorghum cane. Interested persons have until July 18, 1975 to submit comments on the proposal.

Glucose sirups are nutritive sweeteners from the starch component of various plants such as corn, wheat, tapioca, and sorghum grain. Section 26.3(c) provides that when glucose sirup is derived from a

specific type of starch, the name of the food is "glucose sirup" or, optionally, "sirup," the blank to be filled in with the name of the starch. As the standard is presently written, if the glucose sirup is made from the starch of sorghum grain, an optional name of the food is "sorghum sirup."

The Commissioner issued an order, published in the FEDERAL REGISTER of June 14, 1974 (39 FR 20879), establishing an identity standard for sorghum sirup (21 CFR 30.4) made by the concentration and heat treatment of the juice of sorghum cane. The effective date of the order, July 1, 1975, is confirmed elsewhere in this issue of the FEDERAL REGISTER. The food has been produced and marketed under the name "sorghum" or "sorghum sirup" in this country for many years. The Commissioner is of the opinion that, to avoid confusion between two different foods, the name "sorghum" or "sorghum sirup" should apply only to that sirup made from the juice of sorghum cane and that the name "sorghum grain sirup" should be the alternative name used in the standard for glucose sirup (26.3) when the nutritive sweetener is made from the starch of sorghum grain.

For purposes of consistency, the standard for dried glucose sirup (26.4) should also be amended so as to limit the optional names of the food made from sorghum grain starch to "dried sorghum grain sirup" or "sorghum grain sirup solids."

Therefore, pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (secs. 401, 701, 52 Stat. 1046, 1055-1056, as amended by 70 Stat. 919 and 72 Stat. 948 (21 U.S.C. 341, 371)) and under authority delegated to him (21 CFR 2.120), the Commissioner proposes that 21 CFR Part 26 be amended as follows:

1. By revising § 26.3(c) to read as follows:

§ 26.3 Glucose sirup; identity.

(c) The name of the food is "glucose sirup." When the food is derived from a specific type of starch, the name may alternatively be "sirup," the blank to be filled in with the name of the starch. For example, "corn sirup," "wheat sirup," "tapioca sirup." When the starch is derived from sorghum grain, the alternative name of the food is "sorghum grain sirup." Alternatively, the word "sirup" may be spelled "syrup."

2. By revising § 26.4(b) to read as follows:

§ 26.4 Dried glucose sirup; identity.

(b) The name of the food is "dried glucose sirup" or "glucose sirup solids." When the food is derived from a specific type of starch, the name may alternatively be "dried sirup" or "sirup solids," the blank to be filled in with the name of the starch; for example, "dried corn sirup," "corn sirup solids," "dried wheat sirup," "wheat sirup solids," "dried tapioca sirup,"

## PROPOSED RULES

21737

"tapioca sirup solids." When the starch is derived from sorghum grain, the alternative name of the food is "dried sorghum grain sirup" or "sorghum grain sirup solids." Alternatively, the word "sirup" may be spelled "syrup."

Interested persons may, on or before July 18, 1975, file with the Hearing Clerk, Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20852, written comments (preferably in triplicate) regarding this proposal. Received comments may be seen in the above office during working hours, Monday through Friday.

Dated: May 12, 1975.

SAM D. FINE,  
Associate Commissioner  
for Compliance.

[FR Doc.75-13023 Filed 5-16-75; 8:45 am]

## Social and Rehabilitation Service

[45 CFR Parts 205, 206, 233]

FINANCIAL ASSISTANCE PROGRAMS  
Quality Control

Notice is hereby given that the regulations set forth in tentative form below are proposed by the Administrator, Social and Rehabilitation Service, with the approval of the Secretary of Health, Education, and Welfare. The proposed regulations reflect decisions announced by the Secretary in his press release of March 26, 1975, to refrain from taking any disallowances of Federal financial participation pursuant to the Department's quality control regulations at 45 CFR 205.40 and 205.41 (published October 18, 1975, 39 FR 37195) for the interim periods of July 1, 1974 through June 30, 1975, and to publish revised regulations reflecting certain changes in that program.

The proposed revision of 45 CFR 206.10 would require a State plan to specify a budget period and a payment month. The budget period is a specific time period established by the State agency during which the circumstances of the assistance unit are considered for eligibility and for the amount of the assistance payment for a particular month. The month for which the payment is received is the payment month.

Because the Department recognizes that States need time for administrative action, the regulation would permit States to allow a reasonable administrative period between the close of the budget period and the beginning of the payment month during which to perform those administrative tasks.

For example, a State might establish March as the payment month corresponding to the January budget period, thus leaving the month of February for all required administrative actions. The payment month must begin no later than 34 days after the end of the corresponding budget period. The payment month and the budget period may coincide for initial payments even if they do not coincide for subsequent assistance payments.

The proposed revision of 45 CFR 205.40 reflects the view that the Social Security Act places upon the Department the responsibility for assuring that States take all necessary actions to eliminate erroneous payments from their public assistance programs under title IV-A (and titles I, X, XVI, and XVII (AABD) for Guam, Puerto Rico, and the Virgin Islands). Authority for this view lies in the mandates of sections 402(a)(5) and 1102 (and 2(a)(5), 1002(a)(5), 1402(a)(5), and 1602(a)(5) for Guam, Puerto Rico, and the Virgin Islands of the Social Security Act. Section 1102 provides that the Secretary shall publish such rules, which are not inconsistent with the Social Security Act, "as may be necessary to the efficient administration of the functions with which [the Secretary] is charged under [the] Act." Section 402(a)(5) (and the provisions of the titles applying to the territories cited above) provides authority for the Secretary to establish such methods of administration as he finds to be necessary for the proper and efficient administration of the States' plans. The Secretary believes that the elimination of erroneous State payments will further the proper and efficient administration of the States' plans by serving the dual purposes of maintaining the integrity of the public fisc (thereby maintaining public confidence in the program) and assuring that States are able to devote their limited resources to providing the maximum amount of assistance to eligible persons.

Specifically the revised regulation would require that State plans under title IV-A (and titles I, X, XIV, and XV, (AABD) for Guam, Puerto Rico, and the Virgin Islands) provide for a continuing and comprehensive system of quality control to include: the application of prescribed sampling methods; field investigations; providing of resources to analyze quality control findings; taking of appropriate corrective action on any improperly authorized assistance and any system weakness; reporting of case error rates and other required data to the Department; and affording access by Federal staff to required information. State agencies would also be required to submit to the Department a description of their sampling plan, periodic reports and periodic corrective action plans for reducing their rates of erroneous payments.

It would also require that State agencies continue to submit corrective action plans to reduce further their case error rates even after achieving the acceptable tolerance levels established in 45 CFR 205.41. This reflects the Secretary's determination that States take all appropriate corrective action to reduce their rates of erroneous payments to the greatest extent possible.

The proposed revision of 45 CFR 205.41 reflects the Department's view that the Social Security Act requires the Department to exclude from Federal financial participation States' erroneous payments to ineligible recipients and overpayments

to eligible recipients above reasonable limits established by the Secretary.

The basis for the interpretation is found in the mandates of section 403, 406, and 1102 of the Social Security Act. Section 403 requires that the Secretary of Health, Education, and Welfare certify for payments to each State an amount equal to certain proportions of " . . . total amounts expended . . . as aid to families with dependent children under the State plan . . . ." Section 406 provides specific definition of the scope of aid to families with dependent children (namely, certain forms of payments to or on behalf of a dependent child (as defined therein) and certain relatives of such child as specified therein. Further, State plans define the parameters of that aid. Thus, section 403 specifically authorizes Federal financial participation only in specified payments as defined in the Act and only in the amount specified in each State's plan. As such, these provisions do not specifically authorize Federal financial participation in States' payments to persons not eligible for such aid or in payments in excess of the amount provided for in the State plans.

However, the Department believes that section 1102 enables the Secretary to permit Federal financial participation in a certain level of erroneous State payments below which he determines most States are presently incapable of reducing their error rates.

The proposal reflects the Secretary's awareness that, under administrative structures presently existing in most States, a requirement at this time that States eliminate all erroneous payments, with a resultant disallowance of Federal financial participation in any erroneous payments, is unrealistic.

For this reason, the regulation would provide for Federal financial participation in erroneous State payments up to case error rates of three percent for ineligibility and five percent for overpayments in periods subsequent to June 30, 1975. If the case error rate exceeds these levels, the amount to be excluded from Federal financial participation will be that portion of the State's expenditures for ineligibility and overpayments in excess of the allowable tolerance levels. For purposes of Federal financial participation both the case error rate and the dollar error rate will be determined by the Social and Rehabilitation Service (SRS). In making that determination SRS will utilize State quality control data supplied pursuant to 45 CFR 205.40 and Federal quality control subsample data applying the lower limit at the 95 percent confidence level of a statistical regression formula in computing both case and dollar error rates. The dollar conversion formula and the regression formula methodology are described in an Information Memorandum issued by the Service, (SRS-IM-75-5, dated May 6, 1975). A copy of the Information Memorandum may be obtained from the Executive Secretariat, Social and Rehabilitation Service, 330 C Street, SW., Washington, D.C. 20201.

It should be noted that the error rate determined by use of the regression formula is the best statistical estimate of the rates of error and will be used as the State's official error rate; however, for the purpose of disallowance of Federal financial participation, the lower bound of the 95 percent confidence level will be used.

The revision of 45 CFR 233.10 would make that regulation consistent with the proposed revision of 45 CFR 205.41. To the extent that provisions of the Handbook of Public Assistance Administration (specifically Part IV—5512 and 5514) conflict with any provisions of the proposed regulations set forth below, these provisions of the Handbook will be superseded on publication of these regulations in final form.

Prior to the adoption of the proposed regulations, consideration will be given to any comments, suggestions or objections thereto which are received in writing by the Administrator, Social and Rehabilitation Service, Department of Health, Education, and Welfare, P.O. Box 2372, Washington, D.C. 20013, on or before June 18, 1975. Comments will be available for public inspection in Room 5326 of the Department's offices at 330 C Street SW., Washington, D.C., on Monday through Friday of each week from 8:30 a.m. to 5:00 p.m. (area code 202-245-0950).

(Sec. 1102, 49 Stat. 647 (42 U.S.C. 1302))

(Catalog of Federal Domestic Assistance Program No. 13.781, Public Assistance—Maintenance Assistance (State Aid))

Dated: May 1, 1975.

JAMES S. DWIGHT JR.,  
Administrator.

Approved: May 13, 1975.

CASPAR W. WEINBERGER,  
Secretary.

Chapter II, Title 45 of the Code of Federal Regulations is revised as follows:

1. Section 205.40 is revised to read as set forth below:

§ 205.40 Quality control system.

(a) *Definitions.* For purposes of this section and § 205.41, notwithstanding any other regulations in this chapter:

(1) "Assistance unit" means all individuals whose needs, income, and resources are considered in determining the amount of an assistance payment for which Federal financial participation is claimed under this chapter.

(2) "Budget period" means a specific time period established by the State agency, during which the circumstances of the assistance unit are considered for eligibility and the amount of the assistance payment for a specific payment month.

(3) "Case error" means an overpayment, underpayment or payment for ineligibility, as defined in this section. Case error exists even though the assistance received was required to be paid because the State agency failed to make a finding (regarding eligibility or the amount of payment) under § 206.10(a) (5) of this

chapter. There is no case error where payment is required to be continued unadjusted because a hearing has been requested.

(4) "Ineligibility" refers to a financial assistance payment received by or for an assistance unit, for a payment month, when no amount of such payment, based on circumstances relating to categorical eligibility as of the last day of the budget period, and the amount of income and resources during the budget period, should have been paid to such assistance unit under the approved State plan.

(5) "Overpayment" means a financial assistance payment received by or for an assistance unit, for a payment month, which is in excess of the amount that should have been paid, based on circumstances during the budget period, to such assistance unit under the approved State plan.

(6) "Payment month" means the specific period of time for which a particular financial assistance payment (or two successive payments, where the State pays on a semi-monthly basis) is received. Such period may be either a calendar month or a fiscal month. The payment month must begin no later than 34 days after the end of the corresponding budget period. The budget period and the payment month may coincide for initial payments even if they do not coincide for subsequent payments.

(7) "Underpayment" means a financial assistance payment received by or for an assistance unit for a payment month which is less than the amount that should have been paid, based on circumstances during the budget period, to such assistance unit under the approved State plan.

Nothing in this paragraph shall affect the agency's responsibility to promptly terminate or adjust the assistance payment where eligibility for such payment changes subsequent to the budget period and prior to the payment month, pursuant to § 206.10 of this chapter.

(b) *State plan requirements.*—A State plan under title IV-A or I, X, XIV or XVI of the Social Security Act must provide for a continuing system of quality control for assuring that assistance is furnished in accordance with State plan provisions. Under this requirement:

(1) The State agency's system of quality control shall:

(i) Apply the sampling methods and schedules in accordance with instructions prescribed by the Social and Rehabilitation Service;

(ii) Conduct field investigations, including a personal interview in all cases which fall within the sample;

(iii) Provide for the necessary resources, organizational structure and systems for the analysis of the findings of the system;

(iv) Take appropriate corrective action on improperly authorized assistance and system weaknesses; and

(v) Assure access by DHEW staff to State and local records relating to public assistance, to recipients, and to third parties.

(2) The State agency shall submit to the Social and Rehabilitation Service, in such form and at such times as it prescribes:

(i) A description of the State's sampling plan;

(ii) Data required by Form SRS-QC 341.1, within 60 days of the close of the 6-month sampling period to which such data apply;

(iii) A corrective action plan for reducing the case error rates of ineligibility, overpayments, and underpayments, within 90 days of the close of the 6-month sampling period to which they apply, even after achieving the case error rates specified in paragraph (a) of § 205.41 of this chapter; and

(iv) Data required by Forms SRS-QC 431.2, 341.3 and 341.4, at the same time the corrective action plan is submitted.

2. Section 205.41 is revised to read as set forth below:

§ 205.41 Federal financial participation in relation to erroneous State payments.

(a) Effective with the July-December 1975 Quality Control sampling period and for periods thereafter, the case error rates shall be deemed to be within tolerance if they do not exceed:

(1) 3% for ineligibility;

(2) 5% for overpayments; and

(3) 5% for underpayments.

(b) There shall be excluded from Federal financial participation in payments as Aid to Families with Dependent Children that portion of a State's expenditures for ineligibility, represented by the case error rate in excess of 3%, commencing with the July-December, 1975 Quality Control sampling period and for subsequent 6-month sampling periods.

(c) There shall be excluded from Federal financial participation in payments as Aid to Families with Dependent Children that portion of a State's expenditures for overpayments, represented by the case error rate in excess of 5%, commencing with the July-December, 1975 Quality Control sampling period and for subsequent 6-month sampling periods.

(d) The case error rates for ineligibility and overpayments in excess of 3% and 5%, respectively, shall be converted to dollar error rates in determining the amount to be excluded from Federal financial participation. The dollar error rates shall be applied to the Federal share of expenditures for assistance payments made during the sampling period, excluding payments for emergency assistance, AFDC foster care and presumptive eligibility, and vendor payments.

(e) The amount to be excluded from Federal financial participation shall be based on error rates determined by the Social and Rehabilitation Service on the basis of State quality control data and Federal quality control sub-sample data. In computing case error rates and dollar error rates for purposes of determining any such exclusions, the Service will use the lower limit at the 95 percent confidence level of a statistical regression formula applied to case and dollar error rates obtained from both the State and Federal

data. For purposes of analyzing findings of the system and for taking corrective action as required by § 206.40 of this chapter, the Service will use the figures derived from the application of this regression formula method as case and dollar error rates as opposed to using such lower limit. The dollar conversion formula and the regression formula methodology limit are described in the Information Memorandum issued by the Social and Rehabilitation Service, (SRS-IM-75-5, dated May 6, 1975.)

(f) For Guam, Puerto Rico, and the Virgin Islands, this section is also applicable to public assistance under title I, X, XIV, or XVI of the Social Security Act, except that the State expenditures for ineligibility and overpayment, in excess of the 3% and 5% tolerance levels, shall be excluded from Federal financial participation only to the extent that such excess is greater than the portion of State expenditures that is eligible for Federal financial participation but is not participated in because of the statutory limitations on Federal funds payable to these jurisdictions.

3. Section 206.10 is amended by revising paragraph (a) (9) (ii), and adding new subparagraphs (a) (13) and (b) (3) and (4), as set forth below:

§ 206.10 Application, determination of eligibility and furnishing of assistance.

(a) *State plan requirements.* . . .

(9) Where an individual has been determined to be eligible, eligibility will be reconsidered or redetermined:

(i) When required on the basis of information the agency has obtained previously about anticipated changes in the individual's situation;

(ii) Promptly, after a report is obtained which indicates changes in the individual's circumstances that may affect the amount of assistance to which he is entitled or may make him ineligible; and

(iii) Periodically, within agency-established time standards, but not less frequently than every 6 months in AFDC, and every 12 months in the other categories, including medical assistance, on eligibility factors subject to change.

(13) With respect to financial assistance programs, specify the "budget period" and "payment month", as defined in paragraph (b) of this section, which the State agency uses in initiating, adjusting, continuing or terminating assistance payments.

(b) *Definitions.* For purposes of this section:

(1) "Applicant" is a person who has, directly, or through his authorized representative, or where incompetent or incapacitated, through someone acting responsibly for him, made application for public assistance from the agency administering the program, and whose application has not been terminated.

(2) "Application" is the action by which an individual indicates in writing to the agency administering public assistance his desire to receive assistance. The relative with whom a child is living or will live ordinarily makes application for the child for AFDC. An application is distinguished from an inquiry, which is simply a request for information about eligibility requirements for public assistance.

Such inquiry may be followed by an application.

(3) "Budget period" means a specific time period established by the State agency, during which the circumstances of the assistance unit are considered for eligibility and the amount of the assistance payment for a specific payment month. Nothing in this definition shall affect the agency's responsibility to promptly terminate or adjust the assistance payment where eligibility for such payment changes subsequent to the budget period and prior to the payment month.

(4) "Payment month" means the specific period of time for which a particular financial assistance payment (or two successive payments where the State pays on semi-monthly basis) is received. Such period may be either a calendar month or a fiscal month. The payment month must begin no later than 34 days after the end of the corresponding budget period. The budget period and the payment month may coincide for initial payments even if they do not coincide for subsequent payments.

4. Section 233.10 is amended by revising paragraph (b) (3) to read as set forth below:

§ 233.10 General provisions regarding coverage and eligibility.

(a) *State plan requirements.* . . .

(b) Federal financial participation.

(3) Except as provided in § 205.41 of this chapter, where circumstances existing in the budget period make an assistance unit ineligible or eligible for a smaller amount of assistance than was paid for the payment month, Federal financial participation is not available in excess payments to such assistance unit, unless assistance is required to be continued unadjusted because a hearing has been requested.

## Notice of Proposed Rule Making

## Correction

In FR Doc. 75-11971 appearing on page 19956 in the issue for Wednesday, May 7, 1975, make the following changes:

## PROPOSED RULES

1. § 148.109(y) (5) (ii) and (iii), appearing on page 19962, were incorrectly combined as (ii) and should read as follows:

(ii) The date, title, subject, author, and addresses for each document listed as required in subparagraph 5(i) of this paragraph.

(iii) A certificate signed by each applicant and affiliate attesting that the documents listed as required in subparagraph 5(i) of this paragraph will be made available during normal business hours to authorized examiners of the Federal Trade Commission for inspection and copying upon 24 hours notice.

2. The second line of § 149.403(1), which appears on page 19967, now reading: "maintenance ships, and refueling facilities", should read "maintenance shops, and refueling facilities".

## [ 14 CFR Part 71 ]

[Airspace Docket No. 75-SO-48]

## TRANSITION AREA

## Proposed Alteration

The Federal Aviation Administration is considering an amendment to Part 71 of the Federal Aviation Regulations that would alter the Jacksonville, Fla., transition area.

Interested persons may submit such written data, views or arguments as they may desire. Communications should be submitted in triplicate to the Federal Aviation Administration, Southern Region, Air Traffic Division, P.O. Box 20636, Atlanta, Ga. 30620. All communications received on or before June 18, 1975 will be considered before action is taken on the proposed amendment. No hearing is contemplated at this time, but arrangements for informal conferences with Federal Aviation Administration officials may be made by contacting the Chief, Airspace and Procedures Branch. Any data, views or arguments presented during such conferences must also be submitted in writing in accordance with this notice in order to become part of the record for consideration. The proposal contained in this notice may be changed in light of comments received.

The official docket will be available for examination by interested persons at the Federal Aviation Administration, Southern Region, Room 645, 3400 Whipple Street, East Point, Ga.

The Jacksonville transition area described in § 71.181 (40 FR 441) would be amended as follows: "• • • long. 81° 25'15" W.; • • • would be deleted and "• • • long. 81°25'15" W.); within an 8.5-mile radius of OLF Whitehouse Field, Fla. (lat. 30°21'00" N., long. 81°52'00" W.) • • • would be substituted therefor.

The proposed alteration is required to provide controlled airspace protection for IFR operations at OLF Whitehouse Field. Instrument approach procedures to this airport, utilizing U.S. Navy radar, are proposed in conjunction with the alteration of this transition area.

This amendment is proposed under the authority of section 307(a) of the Federal Aviation Act of 1958 (49 U.S.C. 1348 (a)) and of section 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)).

Issued in East Point, Ga., on May 8, 1975.

PHILLIP M. SWATEK,  
Director, Southern Region.

## [ 14 CFR Part 71 ]

[Airspace Docket No. 75-SO-51]

## TRANSITION AREA

## Proposed Designation

The Federal Aviation Administration is considering an amendment to Part 71 of the Federal Aviation Regulations that would designate the Covington, Tenn., transition area.

Interested persons may submit such written data, views or arguments as they may desire. Communications should be submitted in triplicate to the Federal Aviation Administration, Southern Region, Air Traffic Division, P.O. Box 20636, Atlanta, Ga. 30320. All communications received on or before June 18, 1975 will be considered before action is taken on the proposed amendment. No hearing is contemplated at this time, but arrangements for informal conferences with Federal Aviation Administration officials may be made by contacting the Chief, Airspace and Procedures Branch. Any data, views or arguments presented during such conferences must also be submitted in writing in accordance with this notice in order to become part of the record for consideration. The proposal contained in this notice may be changed in light of comments received.

The official docket will be available for examination by interested persons at the Federal Aviation Administration, Southern Region, Room 645, 3400 Whipple Street, East Point, Ga.

The Covington transition area would be designated as:

That airspace extending upward from 700 feet above the surface within a 6.5-mile radius of Covington Municipal Airport (Lat. 35°35'15" N., Long. 89°35'15" W.); within 3 miles each side of the 004° bearing from Covington RBN (Lat. 35°35'22" N., Long. 89°35'14" W.), extending from the 6.5-mile radius area to 8.5 miles north of the RBN.

The proposed designation is required to provide controlled airspace protection for IFR operations at Covington Municipal Airport. A prescribed instrument approach procedure to this airport, utilizing the Covington (private) Nondirectional Beacon, is proposed in conjunction with the designation of this transition area.

This amendment is proposed under the authority of section 307(a) of the Federal Aviation Act of 1958 (49 U.S.C. 1348 (a)) and of section 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)).

Issued in East Point, Ga., on May 9, 1975.

PHILLIP M. SWATEK,  
Director, Southern Region.

## Proposed Alteration of Special Air Traffic Rules

## Correction

In FR Doc. 75-12653 appearing at page 20826 in the Tuesday, May 13, 1975, issue the second number in the third line from the bottom of the second column on page 20826 should read R-2915B.

## ENVIRONMENTAL PROTECTION AGENCY

## [ 40 CFR Part 416 ]

[FRL 375-4]

## PLASTICS AND SYNTHETICS MANUFACTURING POINT SOURCE CATEGORY

## Effluent Limitations and Guidelines

Notice is hereby given that the Environmental Protection Agency (EPA) is proposing to amend 40 CFR 416—Plastics and Synthetics Manufacturing Point Source Category. The Federal Register for April 5, 1974 (39 FR 12501 et seq.) contained final effluent limitations guidelines for existing sources and standards of performance and pretreatment standards for new sources in the Plastics and Synthetics Point Source Category pursuant to sections 301, 304 (b) and (c), 306(b) and 307(c) of the Federal Water Pollution Control Act as amended 33 U.S.C. 1251, 1311, 1314 (b) and (c), 1316 (b), and 1317(c); 86 Stat. 916 et seq.; P.L. 92-500 (the Act). The publication was corrected for several errors in the Federal Register dated July 8, 1974 (39 FR 24893 et seq.).

After careful review, a revision to the regulation is being proposed. The revision involves a change of the 1983 limitation and new source standards for the COD parameter in the Polypropylene Subcategory.

It has been found that the parameter COD was not treated in a consistent fashion in the polypropylene subcategory. The COD limitation for 1977 was based upon a COD effluent concentration of 75 mg/l (COD/BOD ratio of 5 multiplied by 1977 BOD limitation of 15), but the new source standard and 1983 limitation were based on an effluent COD concentration of 100 mg/l. This latter figure was obviously too high. Review of the data shows actually achieved COD concentrations in the exemplary plant on the order of 75 mg/l. The Agency is therefore amending the 1983 and new source regulation to reflect an effluent concentration of 75 mg/l rather than 100 mg/l—a decrease in the new source standard and the 1983 limitation for COD for Polypropylene of 25%.

The recommended treatment technology, which was discussed in the final "Development Document", will achieve these limitations and, therefore, the cost of treatment as previously reported will not change. In addition, this proposed amendment does not involve any changes which would affect any environmental or nonenvironmental impact.

A brief summary of the findings and data collected during the evaluation is available for inspection and copying at the EPA Freedom of Information Center, Room 204, West Tower, Waterside Mall, 401 M Street, SW., Washington, D.C.

Interested persons may participate in the rulemaking by submitting written comments in triplicate to the EPA Office of Public Affairs, Environmental Protection Agency, Washington, D.C. 20460, Attention: Ms. Ruth Brown, A-107. Comments on all aspects of the proposed regulation are solicited. In the event comments are in the nature of criticisms as to the adequacy of data which is available, or which may be relied upon by the Agency, comments should identify and, if possible, provide any additional data which may be available and should indicate why such data is essential to the development of the regulations. In the event comments address the approach taken by the Agency, EPA solicits suggestions as to what alternative approach should be taken and why and how this alternative better satisfies the detailed requirements of sections 301, 304(b), and 306 of the Act. All comments received on or before May 19, 1975, will be considered. Steps previously taken by the Environmental Protection Agency to facilitate public response within this time period are outlined in the advance notice concerning public review procedures published on August 6, 1973 (38 FR 21202). It is hereby proposed that 40 CFR Part 416 be amended as set forth below.

Dated: May 12, 1975.

RUSSELL E. TRAM,  
Administrator.

It is proposed that 40 CFR Part 416 be amended as follows:

1. In § 416.43, the COD effluent limitations, "Maximum for any 5 day"—English units and Metric units shall be revised to read "2.4" and the "Average of daily values for 30 consecutive days shall not exceed"—English units and Metric units shall be revised to read "1.6."

2. In § 416.45, the COD effluent limitations, "Maximum for any 1 day"—English units and Metric units shall be revised to read "2.2" and the "Average of daily values for 30 consecutive days shall not exceed"—English units and Metric units shall be revised to read "1.1."

[FR Doc. 75-12957 Filed 5-16-75; 8:45 am]

## PROPOSED RULES

## FEDERAL COMMUNICATIONS COMMISSION

## [ 47 CFR Part 73 ]

[Docket No. 20478; RM-2440]

## FM BROADCAST STATIONS

## Table of Assignments; Penn. and W. Va.

In the matter of amendment of § 73.202(b), Table of Assignments, FM Broadcast Stations. (Waynesburg, Pennsylvania, and Fairmont, West Virginia).

1. Petitioner, proposal and comments. (a) Petition for rule making filed August 30, 1974, by Kenneth R. Strawberry proposing assignment of Channel 276A to Waynesburg, Pennsylvania, as its first FM assignment.

(b) This proposal requires the deletion of unoccupied and unapplied for Channel 276A at Fairmont, West Virginia. No other changes in the existing Table of Assignments are required.

(c) The transmitter for a station operating on Channel 276A at Waynesburg must be located 2 miles southeast of the community in order that minimum mileage separation requirements be met.

2. Demographic Data. (a) Location: Waynesburg, the seat of Greene County is located approximately 43 miles south of Pittsburgh, Pennsylvania, and 30 miles southeast of Wheeling, West Virginia. Fairmont, the seat of Marion County, is approximately 25 miles south of Waynesburg.

(b) Population—1970 U.S. Census: Waynesburg—5,152; Greene County—36,090; Fairmont—26,093; Marion County—61,356.

(c) Present local broadcast service: Waynesburg receives local service from daytime-only station WABN(AM). Fairmont is provided unlimited-time AM service from Stations WMMN and WTCS. That community is now assigned unoccupied and unapplied for Channel 276A and Channel 250 for which a construction permit has been granted (BPH-8882).

(d) Economic considerations: Petitioner has adduced sufficient economic evidence to indicate a need for a first FM assignment in the community.

3. Preclusions. As this proposal requests a first FM assignment to a community not near a major population center, no preclusion study is required.

4. Additional considerations. Because this proposal requires the deletion of a second FM assignment from a community of significant size, we request that petitioner submit, in his comments, a Roanoke Rapids-Goldsboro, N.C., 9 F.C.C. 672 (1967) showing, as modified by Anamosa-Iowa City, Ia., 40 F.C.C. 2d 250 (1974), to determine the availability of aural service at Waynesburg and the loss of service at Fairmont.

5. In light of the above, the Commission proposes to amend the FM Table of Assignments, Section 73.202(b) as follows:

## § 73.202 Table of assignments.

City	Channel No.	
	Present	Proposed
Waynesburg, Pa.		276A
Fairmont, W. Va.	250, 276A	250

6. The Commission's authority to institute rulemaking proceedings; showings required; cut-off procedures; and filing requirements are contained in the attached Appendix and are incorporated herein.

7. Interested parties may file comments on or before July 7, 1975, and reply comments on or before July 28, 1975.

Adopted: May 9, 1975.

Released: May 14, 1975.

## FEDERAL COMMUNICATIONS COMMISSION.

[SEAL] WALLACE E. JOHNSON,  
Chief, Broadcast Bureau.

## APPENDIX

1. Pursuant to authority found in sections 4(i), 5(d)(1), 303 (g) and (r), and 807(b) of the Communications Act of 1934, as amended, and § 0.281(b)(6) of the Commission's rules, it is proposed to amend the FM Table of Assignments, § 73.202(b) of the Commission's rules and regulations, as set forth in the notice of proposed rulemaking to which this Appendix is attached.

2. Showings required. Comments are invited on the proposal(s) discussed in the notice of proposed rule making to which this Appendix is attached. Proponent(s) will be expected to answer whatever questions are presented in initial comments. The proponent of a proposed assignment is also expected to file comments even if it only re-submits or incorporates by reference its former pleadings. It should also restate its present intention to apply for the channel if it is assigned, and, if authorized, to build the station promptly. Failure to file may lead to denial of the request.

3. Cut-off procedures. The following procedures will govern the consideration of filings in this proceeding.

(a) Counterproposals advanced in this proceeding itself will be considered, if advanced in initial comments, so that parties may comment on them in reply comments. They will not be considered if advanced in reply comments. (See § 1.420(d) of Commission rules.)

(b) With respect to petitions for rule making which conflict with the proposal(s) in this notice, they will be considered as comments in the proceeding, and Public Notice to this effect will be given as long as they are filed before the date for filing initial comments herein. If filed later than that, they will not be considered in connection with the decision in this docket.

4. Comments and reply comments; service. Pursuant to applicable procedures set out in §§ 1.418 and 1.420 of the Commission's rules and regulations, interested parties may file comments and reply comments on or before

## PROPOSED RULES

the dates set forth in the notice of proposed rulemaking to which this Appendix is attached. All submissions by parties to this proceeding or persons acting on behalf of such parties must be made in written comments, reply comments, or other appropriate pleadings. Comments shall be served on the petitioner by the person filing the comments. Reply comments shall be served on the person(s) who filed comments to which the reply is directed. Such comments and reply comments shall be accompanied by a certificate of service. (See § 1.420 (a), (b) and (c) of the Commission's rules.)

5. *Number of copies.* In accordance with the provisions of § 1.419 of the Commission's rules and regulations, an original and fourteen copies of all comments, reply comments, pleadings, briefs, or other documents shall be furnished the Commission.

6. *Public inspection of filings.* All filings made in this proceeding will be available for examination by interested parties during regular business hours in the Commission's Public Reference Room at its headquarters, 1919 M Street, NW., Washington, D.C.

[FR Doc. 75-13082 Filed 5-16-75; 8:45 am]

## [47 CFR Part 73]

[Docket No. 20474; RM-2442]

## FM BROADCAST STATIONS

## Table of Assignments; Cal.

In the matter of amendment of § 73.202(b), Table of Assignments, FM Broadcast Stations. (Paso Robles, California.)

1. *Petitioner, proposal and comments.* (a) Petition for rule making filed September 3, 1974, by F. Ray Bryant and Nancy L. Bryant, licensees of Paso Robles Stations KPRL(AM) and KPRA (Channel 232A), proposing to substitute Channel 223 for that community's only FM assignment, Channel 232A, and requesting that their KPRA license be modified accordingly.

(b) No other changes in the existing Table of Assignments are required.

(c) Petitioners allege that the substitution must be made in order to "meet the pertinent coverage conditions, enable a Paso Robles station to survive competitively, and assure appropriate service to the public." The second reason is not material to the rule making process.

2. *Demographic Data.* (a) *Location.* Paso Robles, in San Luis Obispo County, is located midway between San Francisco and Los Angeles, California: 175 miles from each.

(b) *Population—1970 Census:* Paso Robles—7,168; San Luis Obispo County—105,690.

(c) *Present Local Broadcast Service:* Local service is provided by petitioners' two stations: unlimited time Class IV AM Station KPRL and KPRA (Channel 232A).

(d) Petitioners allege sufficient data to show that the community and surrounding areas are growing ones, to which a Class B channel can be assigned.

3. *Preclusions:* Preclusion will occur on five channels. The preclusion on Channels 220, 221A, and 222 is *de minimus*, affecting either very small land areas that contain no communities with

populations in excess of 1,000 persons or communities which already have either an FM assignment or receive FM service from a nearby community. Petitioners' preclusion study shows that Coalinga, California (pop. 6,161), in Fresno County (pop. 413,053), and Avenal, California (pop. 3,035), in Kings County (pop. 64,610), would be precluded from future assignment of Channel 223, and that Coalinga would also be precluded from future assignment of Channel 224A. The study, confirmed by Commission staff engineers, demonstrates that if petitioners' request were to be adopted, Channel 232A may be used at either of these communities and within most of the preclusion area on Channel 224A. The Bryants' engineering study also presents a list of three Class B channels, viz., 258, 275, and 295, that would be available for assignment at or near Paso Robles, should future broadcast service demand require a second Class B channel assignment.

4. *Additional Considerations:* (a) A *Roanoke Rapids-Goldsboro, N.C.* study, 9 F.C.C. 2d 672 (1967), was submitted which shows the proposed station's 1 mV/m contour extending 33 miles and providing first FM service to 471 persons in a 230 square-mile area and second FM service to 2,076 persons in a 1,030 square-mile area.

(b) As it is the petitioners' own station's license which would have to be modified, should their proposal be adopted, an *Order to Show Cause* is not required.

5. In light of the above, the Commission proposes to amend the FM Table of Assignments, § 73.202(b) as follows:

## § 73.202 Table of assignments.

City	Channel No.	
	Present	Proposed
Paso Robles, Calif. ....	232A	223

6. The Commission's authority to institute rule making proceedings; showings required; cut-off procedures; and filing requirements are contained in the attached Appendix and are incorporated herein.

7. Interested parties may file comments on or before July 7, 1975, and reply comments on or before July 28, 1975.

Adopted: May 6, 1975.

Released: May 12, 1975.

FEDERAL COMMUNICATIONS COMMISSION,

[SEAL] WALLACE E. JOHNSON,  
Chief, Broadcast Bureau.

## APPENDIX

1. Pursuant to authority found in sections 4(i), 5(d)(1), 303 (g) and (r), and 307(b) of the Communications Act of 1934, as amended, and § 0.281(b) (6) of the Commission's rules, it is proposed to amend the FM Table of Assignments, § 73.202(b) of the

Commission's rules and regulations, as set forth in the *Notice of Proposed Rule Making* to which this Appendix is attached.

2. *Showings required.* Comments are invited on the proposal(s) discussed in the notice of proposed rule making to which this Appendix is attached. Proponent(s) will be expected to answer whatever questions are presented in initial comments. The proponent of a proposed assignment is also expected to file comments even if it only re-submits or incorporates by reference its former pleadings. It should also restate its present intention to apply for the channel if it is assigned, and, if authorized, to build the station promptly. Failure to file may lead to denial of the request.

3. *Cut-off procedures.* The following procedures will govern the consideration of filings in this proceeding.

(a) Counterproposals advanced in this proceeding itself will be considered, if advanced in initial comments, so that parties may comment on them in reply comments. They will not be considered if advanced in reply comments. (See § 1.420(d) of Commission rules.)

(b) With respect to petitions for rule making which conflict with the proposal(s) in this notice, they will be considered as comments in the proceeding, and public notice to this effect will be given as long as they are filed before the date for filing initial comments herein. If filed later than that, they will not be considered in connection with the decision in this docket.

4. *Comments and reply comments:* service. Pursuant to applicable procedures set out in §§ 1.415 and 1.420 of the Commission's rules and regulations, interested parties may file comments and reply comments on or before the dates set forth in the notice of proposed rulemaking to which this Appendix is attached. All submissions by parties to this proceeding or persons acting on behalf of such parties must be made in written comments, reply comments, or other appropriate pleadings. Comments shall be served on the petitioner by the person filing the comments. Reply comments shall be served on the person(s) who filed comments to which the reply is directed. Such comments and reply comments shall be accompanied by a certificate of service. (See § 1.420 (a), (b), and (c) of the Commission's rules.)

5. *Number of copies.* In accordance with the provisions of § 1.419 of the Commission's rules and regulations, an original and fourteen copies of all comments, reply comments, pleadings, briefs, or other documents shall be furnished the Commission.

6. *Public inspection of filings.* All filings made in this proceeding will be available for examination by interested parties during regular business hours in the Commission's Public Reference Room at its headquarters, 1919 M Street, NW., Washington, D.C.

[FR Doc. 75-13083 Filed 5-16-75; 8:45 am]

## [47 CFR Part 73]

[Docket No. 20473; RM-2436; RM-2438]

## FM BROADCAST STATIONS

## Table of Assignments, Fla.

In the matter of Amendment of § 73.202(b), Table of Assignments, FM Broadcast Stations. (High Springs and Macclesney, Florida.)

1. *Petitioner, proposal and comments.* (a) Joint consideration of two mutually exclusive petitions for rule making. The requested assignments may be made without affecting existing assignments.

(1) Ray W. Forrester requests assignment of Channel 221A to High Springs, Florida, as its first FM assignment (RM-2436, filed August 14, 1974).

(2) Woodrow W. Rhoden requests that Channel 221A be assigned to Macclesney, Florida, as that community's first FM assignment (RM-2438, filed August 21, 1974).

(b) Rhoden filed comments on October 16, 1974, which indicated that Channel 285A could be assigned to High Springs. If such an assignment were made, each community could be assigned a first FM channel. The Commission's engineering analysis indicates that a Channel 285A at High Springs assignment would conform to the Commission's minimum mileage separation requirements. A preclusion study, however, should be submitted by Rhoden, the proponent of the assignment, because of High Springs' proximity to Jacksonville, Florida. Forrester has indicated that he would apply for a construction permit should Channel 285A be assigned to High Springs.

2. *Demographic Data.* (a) *Location:* (1) High Springs, in Alachua County, is located approximately 20 miles northwest of Gainesville, Florida. The community is within the Gainesville Standard Metropolitan Statistical Area but not the Gainesville Urbanized Area.

(2) Macclesney, the seat of Baker County, is located approximately 25 miles from downtown Jacksonville. It is within neither the Jacksonville Standard Metropolitan Statistical Area nor the Jacksonville Urbanized Area.

(b) *Population—1970 U.S. Census:* High Springs—2,787; Alachua County—104,764; Macclesney—2,733; Baker County—9,242.

(c) *Present Local Broadcast Service:* (1) High Springs is presently without local aural service. (2) Neither Macclesney nor Baker County receives any local service.

(d) *Economic considerations:* Each petitioner has alleged data which indicate sufficient economic activity in the communities to justify assignment of a first FM channel.

3. *Preclusion considerations.* Assignment of Channel 221A to Macclesney would cause preclusion on noncommercial educational Channels 219 and 220 (assuming Class C operation on each) and on commercial Channels 221A and 222.

(a) The preclusion occurring on Channel 219 affects an area east and south-east of Wacacross, Georgia. This affected area is not near the Grade B contour of a television station operating on Channel 6, however, so that other educational channels could be assigned to this area, should future need arise.

## PROPOSED RULES

## APPENDIX

(1) Pursuant to authority found in sections 4(i), 5(d)(1), 303 (g) and (r), and 307(b) of the Communications Act of 1934, as amended, and § 0.281(b) (6) of the Commission's rules, it is proposed to amend the FM Table of Assignments, § 73.202(b) of the Commission's rules and regulations, as set forth in the notice of proposed rule making to which this Appendix is attached.

2. *Showings required.* Comments are invited on the proposal(s) discussed in the notice of proposed rule making to which this Appendix is attached. Proponent(s) will be expected to answer whatever questions are presented in initial comments. The proponent of a proposed assignment is also expected to file comments even if it only re-submits or incorporates by reference its former pleadings. It should also restate its present intention to apply for the channel if it is assigned, and, if authorized, to build the station promptly. Failure to file may lead to denial of the request.

3. *Cut-off procedures.* The following procedures will govern the consideration of filings in this proceeding.

(a) Counterproposals advanced in this proceeding itself will be considered, if advanced in initial comments, so that parties may comment on them in reply comments. They will not be considered if advanced in reply comments. (See § 1.420(d) of Commission rules.)

(b) With respect to petitions for rule making which conflict with the proposal(s) in this Notice, they will be considered as comments in the proceeding, and Public Notice to this effect will be given as long as they are filed before the date for filing initial comments herein. If filed later than that, they will not be considered in connection with the decision in this docket.

4. *Comments and reply comments:* service. Pursuant to applicable procedures set out in §§ 1.415 and 1.420 of the Commission's rules and regulations, interested parties may file comments and reply comments on or before the dates set forth in the notice of proposed rulemaking to which this Appendix is attached. All submissions by parties to this proceeding or persons acting on behalf of such parties must be made in written comments, reply comments, or other appropriate pleadings. Comments shall be served on the petitioner by the person filing the comments. Reply comments shall be served on the person(s) who filed comments to which the reply is directed. Such comments and reply comments shall be accompanied by a certificate of service. (See § 1.420 (a), (b) and (c) of the Commission's rules.)

5. *Number of copies.* In accordance with the provisions of Section 1.419 of the Commission's rules and regulations, an original and fourteen copies of all comments, reply comments, pleadings, briefs, or other documents shall be furnished the Commission.

6. *Public inspection of filings.* All filings made in this proceeding will be available for examination by interested parties during regular business hours in the Commission's Public Reference Room at its headquarters, 1919 M Street, NW., Washington, D.C.

[FR Doc. 75-13084 Filed 5-16-75; 8:45 am]

Adopted: May 6, 1975.

Released: May 12, 1975.

FEDERAL COMMUNICATIONS COMMISSION,

[SEAL] WALLACE E. JOHNSON,  
Chief, Broadcast Bureau.

## notices

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

### DEPARTMENT OF STATE

Agency for International Development

[Number 99.1.71]

GLENWOOD P. ROANE

Redelegation of Authority Regarding the Contracting Function

Pursuant to the authority delegated to me by Redelegation of Authority No. 99.1 dated May 1, 1973 (38 FR 12836) from the Assistant Administrator for Program and Management Services, I hereby redelegate to Mr. Glenwood P. Roane authority to sign or approve:

(1) U.S. Government contracts financed in whole or in part by AID;  
(2) Country contracts for technical assistance activities financed in whole or in part by an AID grant;

(3) Grants (other than grants to foreign government or agencies of foreign governments) for technical assistance activities;

(4) Project implementation orders/technical services (PIO/T) for activities for which the Assistant Administrator for Program and Management Services has program responsibility;

(5) With respect to those contracts and grants referred to above, to make findings and determinations with respect to advance payments, including those financed by Federal Reserve letters of credit and to approve the contract provisions relating to such advance payments. This authority is limited to advance payments on nonprofit contracts with nonprofit educational or research institutions, including international organizations.

The authority herein redelegated to the officer named above may not be further redelegated by such officer, but may be exercised by a duly authorized person who is performing the function of such officer in an "Acting" capacity.

The authorities redelegated herein are to be exercised in accordance with regulations, procedures, and policies now or hereafter established or modified and promulgated within the Agency for International Development.

Actions within the scope of this redelegation heretofore taken by the official designated herein are hereby ratified and confirmed.

This redelegation of authority shall be effective immediately.

Dated: May 8, 1975.

HUGH L. DWELLEY,  
Acting Director,  
Office of Contract Management.

### DEPARTMENT OF THE TREASURY

Fiscal Service

[Dept. Circ. 570, 1974 Rev., Supp. No. 13]

MERCANTILE AND GENERAL REINSURANCE COMPANY OF AMERICA

Surety Companies Acceptable on Federal Bonds; Change of Name

The Prudential Insurance Company of Great Britain Located in New York, a New York corporation, has formally changed its name to The Mercantile and General Reinsurance Company of America, effective March 31, 1975. Documents evidencing the change of name are on file in the Treasury.

A new Certificate of Authority as an acceptable surety on Federal bonds, dated March 31, 1975, has been issued by the Secretary of the Treasury to The Mercantile and General Reinsurance Company of America, New York, under sections 6 to 13 of Title 6 of the United States Code, to replace the certificate issued July 1, 1974 (39 FR 26368, July 18, 1974) to the company under its former name. The Prudential Insurance Company of Great Britain Located in New York. The underwriting limitation of \$974,000 previously established for the company remains unchanged.

The change in name of The Prudential Insurance Company of Great Britain Located in New York does not affect its status or liability with respect to any obligation in favor of the United States or in which the United States has an interest, which it may have undertaken pursuant to the Certificate of Authority issued by the Secretary of the Treasury.

Certificates of Authority expire on June 30 each year, unless sooner revoked and new certificates are issued on July 1, so long as the companies remain qualified (31 CFR Part 223). A list of qualified companies is published annually as of July 1, in Department Circular 570, with details as to underwriting limitations, areas in which licensed to transact surety business and other information. Copies of the Circular, when issued, may be obtained from Audit Staff, Bureau of Government Financial Operations, Department of the Treasury, Washington, D.C. 20226.

Dated: May 12, 1975.

JOHN K. CARLOCK,  
Fiscal Assistant Secretary.

[FR Doc. 75-13041 Filed 5-16-75; 8:45 am]

[Dept. Circ. 570, 1974 Rev., Supp. No. 12]

RURAL MUTUAL INSURANCE CO.

Surety Companies Acceptable on Federal Bonds; Termination of Authority

Notice is hereby given that the Certificate of Authority issued by the Treasury to the Rural Mutual Insurance Company, Madison, Wisconsin, under sections 6 to 13 of Title 6 of the United States Code, to qualify as an acceptable surety on Federal bonds is hereby terminated, effective May 15, 1975.

The company was last listed as an acceptable surety on Federal bonds at 39 FR 26368, July 18, 1974.

Bond-approving officers of the Government should, in instances where such action is necessary, secure new bonds in lieu of bonds executed by Rural Mutual Insurance Company.

Dated: May 12, 1975.

JOHN K. CARLOCK,  
Fiscal Assistant Secretary.

[FR Doc. 75-13040 Filed 5-16-75; 8:45 am]

### DEPARTMENT OF DEFENSE

Department of the Air Force

USAF SCIENTIFIC ADVISORY BOARD

Meeting

May 8, 1975.

The USAF Scientific Advisory Board ad hoc Committee on the Location, Identification and Destruction of Surface Targets by Tactical Air Forces under All-Weather Conditions will hold a meeting on June 2 and 3, 1975, from 9 a.m. to 5 p.m. each day at the Pentagon, Room 5C1042.

The meeting will be closed to the public in accordance with Title 5, U.S.C. 552 (b) (1), (4) and (5). The ad hoc Committee will meet to hear classified briefings from the Army on enemy and U.S. Army doctrine/concepts of operation in a projected European armored thrust scenario.

For further information, contact the Scientific Advisory Board Secretariat at 202-697-8845.

JACK R. BENSON,  
Colonel, USAF,  
Director of Administration.

### DEPARTMENT OF THE INTERIOR

Bureau of Land Management

OUTER CONTINENTAL SHELF OFF LOUISIANA AND TEXAS

Oil and Gas Lease Sale #38 and #38A; Amendments and Corrections

The following amendments and corrections are hereby made to the FEDERAL REGISTER notice which appeared on Friday, April 25, 1975, beginning on page 18192 of Vol. 40, No. 81.

1. In paragraph 13, page 18195, strike the acreage figure for Tract 38-93, appearing as "5757" and substitute for it the figure "5760".

2. In paragraph 13, page 18197, Tract 38-529, has been withdrawn from Sale #38. This tract will be offered in Sale #38A to be held July 29, 1975. This tract will be subject to all prior applicable stipulations plus Stipulation No. 4. Stipulation No. 4 is as follows:

All reservoirs underlying this lease which extend into a royalty bid lease, as indicated by drilling and other information, shall be operated and produced only under a unit agreement covering this royalty bid lease and approved by the Supervisor. Such a unit agreement shall provide for a fair and equitable allocation of production costs. The Supervisor shall prescribe the method of allocating production and costs in the event operators are unable to agree on such a method.

CURT BERKLUND,  
Director,

Bureau of Land Management.

Approved May 15, 1975.

JACK O. HORTON,  
Assistant Secretary  
of the Interior.

[FR Doc. 75-13136 Filed 5-16-75; 8:45 am]

### DEPARTMENT OF AGRICULTURE

Farmers Home Administration

[FmHA Instruction 449.2]

BUSINESS AND INDUSTRIAL LOANS

Insured Loan Interest Rates

Notice is hereby given by the Farmers Home Administration that the current

rate of interest for insured business and industrial loans, established pursuant to 7 CFR § 1842.23(d) is as follows:

a. Insured loans to private entrepreneurs will be at the rate of ten and three-quarters percent (10¾%). This rate will remain in effect until a change is published in the FEDERAL REGISTER.

b. The rate for guaranteed loans is as agreed upon between the borrower and lender.

Effective date. This notice shall be effective Monday, May 19, 1975.

F. W. NAYLOR, Jr.,  
Acting Administrator,  
Farmers Home Administration.

MAY 14, 1975.

### Forest Service

SISKIYOU, SIUSLAW AND UMPQUA NATIONAL FORESTS, OREG.

Availability of Final Addendum

In the matter of vegetation management using selective herbicides on the Siskiyou, Siuslaw and Umpqua National Forests, Oregon, for the period July 1, 1975 through June 30, 1976.

Pursuant to section 102(2) (C) of the National Environmental Policy Act of 1969, the Forest Service, Department of Agriculture, has prepared a final addendum to the final environmental statement for vegetation management using selective herbicides on the Siskiyou, Siuslaw, and Umpqua National Forests, Oregon, for the period July 1, 1975 through June 30, 1976.

USDA-FS-R6-DES (Adm) 75-07.

The final addendum concerns a proposed use of herbicides 2,4-D, 2,4,5-T, 2,4,5-TP, Amitrole-T, atrazine, picloram and dicamba to reduce the competition from native vegetation where it hampers forest management activities in Oregon. The proposed uses of the herbicides are for reforestation site preparation, release of conifers, right-of-way maintenance, maintenance of physical facilities, range improvement work, and thinning and weeding of conifer plantations.

### DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Food and Drug Administration

ADVISORY COMMITTEES

Notice of Meetings

Pursuant to the Federal Advisory Committee Act of October 6, 1972 (Public Law 92-463, 86 Stat. 770-776; 5 U.S.C. App. I), the Food and Drug Administration announces the following public advisory committee meetings and other required information in accordance with provisions set forth in section 10(a) (1) and (2) of the act:

## NOTICES

**Purpose.** Reviews and evaluates available data concerning the safety and effectiveness of presently marketed and new prescription drug products proposed for marketing for use in the practice of surgery.

**Agenda.** Agenda items to be announced.

Committee name	Date, time, place	Type of meeting and contact person
3. Panel on Review of Allergic Extracts.	June 13 and 14, 9 a.m., Room 121, Building 29, National Institutes of Health, 8500 Rockville Pike, Bethesda, MD.	Open June 13, 9 to 10 a.m., closed June 13 after 10 a.m., closed June 14, Clay Blak, (HFD-6), 8500 Rockville Pike, Bethesda, MD. 20014, 301-495-4545.

**Purpose.** Reviews and evaluates available data concerning the safety effectiveness, and adequacy of labeling of currently marketed biological products or materials, either singly or in combination, that are administered to man for the diagnosis, prevention, or treatment of allergies and allergic diseases.

**Agenda.** Open session: Presentation of previous minutes, communications received, and comments and presentations by interested persons. Closed session: Continuing review of allergenic extracts under investigation.

Committee name	Date, time, place	Type of meeting and contact person
4. Panel on Review of Bacterial Vaccines and Toxoids.	June 19 and 20, 9 a.m., Room 121, Building 29, National Institutes of Health, 8500 Rockville Pike, Bethesda, MD.	Open June 19, 9 to 10 a.m., closed June 19 after 10 a.m., closed June 20, Jack Gertzel, (HFD-5), 8500 Rockville Pike, Bethesda, MD. 20014, 301-495-4545.

**Purpose.** Advises the Commissioner of Food and Drugs on the safety and effectiveness of bacterial vaccines and toxoids with standards of potency.

**Agenda.** Open session: Presentation of previous minutes, communications received, and comments and presentations by interested persons. Closed session: Continuing review of bacterial vaccines and toxoids under investigation.

Committee name	Date, time, place	Type of meeting and contact person
5. Panel on Review of Miscellaneous Internal Drug Products.	June 22 and 23, 9 a.m., Conference Room B, Parklawn Bldg., 5600 Fishers Lane, Rockville, Md.	Closed June 22, open June 23, 9 to 10 a.m., closed June 23 after 10 a.m., Armond M. Welch, (HFD-510), 5600 Fishers Lane, Rockville, Md. 20852, 301-443-4960.

**Purpose.** Reviews and evaluates available data concerning the safety and effectiveness of active ingredients, and combinations thereof, of currently marketed nonprescription drug products containing miscellaneous internal drug products.

**Agenda.** Open session: Comments and presentations by interested persons. Closed session: Continuing review of over-the-counter miscellaneous internal drug products under investigation.

Committee name	Date, time, place	Type of meeting and contact person
6. FDA/NIDA Drug Abuse Research Advisory Committee.	June 23, 8:30 a.m., Conference Room 372, Rockwall Bldg. 11, 400 Rockville Pike, Rockville, MD.	Closed 8:30 a.m. to 12:30 p.m., open after 12:30 p.m., John A. Reighano, Ph.D., (HFD-130), 5600 Fishers Lane, Rockville, MD. 20852, 301-443-4960.

**Purpose.** Advises FDA on action to be taken on Notices of Claimed Investigational New Drugs for substances with abuse potential; advises NIDA on supplies of substances for clinical studies and quantities of substances for animal and in vitro studies.

**Agenda.** Open session: Discussion of the Freedom of Information Act—E. C. Tocus, Ph.D.; patients consent for outside confirmation of suitability as research subject; and methodology for quantitating degree of physical dependence to opiates. Closed session: Presentation of previous minutes, review of IND applications, and review of progress reports.

Committee name	Date, time, place	Type of meeting and contact person
7. Gastrointestinal Drugs Advisory Committee.	June 23 and 24, 9:30 a.m., Conference Room F, Parklawn Bldg., 5600 Fishers Lane, Rockville, MD.	Open June 23, 9:30 to 10:30 a.m., closed June 23 after 10:30 a.m., open June 24, 10 a.m., Joan C. Standart, (HFD-140), 5600 Fishers Lane, Rockville, MD. 20852, 301-443-4730.

**Purpose.** Reviews and evaluates all available data concerning the safety and effectiveness of presently marketed and new prescription drug products proposed for marketing for the treatment of gastrointestinal diseases.

**Agenda.** Open session: Discussion of NDA 11-640 (Modumate, Abbott), and comments and presentations by interested persons. Closed session: Discussion of NDA 17-690 and NDA 17-694.
